The total fall from 1st January to 30th December 1899	71·95
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·24

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's fo[illegible]

The directions and the movement of the wind are taken from the trace of [illegible]kley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

CONTENTS.

THE MONSOON OF 1899.

THE following report is published for general information.

F. A. SLACK,

The 8th January 1900. *Offg. Secy. to the Govt. of Bengal.*

METEOROLOGICAL SUMMARY FOR THE MONSOON PERIOD OF 1899.

THE following remarks are intended to form the usual brief introduction to the rainfall tables which give full information regarding the rainfall measured during the south-west monsoon months in all parts of the province. Only the more important features of the general atmospheric conditions are discussed, and these only when they show a tendency favourable or unfavourable to rainfall.

Cold-weather storms had begun earlier than usual, [illegible] the result that weather in January was more unsettled than in Februar[illegible] reverse being of most frequent occurrence. The unsettled weather which was a noticeable feature in December of the previous year continued during the first two weeks

of January, one depression following another at short intervals of one or two days with more or less general rainfall. This period of disturbance was followed by fine and exceptionally cold weather, which continued with but one small interruption till the end of the month.

Rainfall was heavier than usual in January, but there was a considerable falling off during February in all parts of the province, except East Bengal, which received nearly double the normal amount.

Following the settled and comparatively warm weather in February, well marked hot-weather conditions prevailed during March. The pressure distribution was at times very uniform with light winds, and there were only two occasions when southerly winds became strong in the north of the Bay and in Bengal. The strong winds were due to a steep pressure gradient resulting from a rapid fall of pressure over the province. Rainfall was much lighter than usual in the western and central districts. But in Assam there was heavy rain, a fact which may be partly accounted for by the rainfall commencing in the north-east and extending south-westwards. Sibsagar received 5·88, Silchar 5·48, Dhubri 2·16, and on an average North Bengal 1·36 inches.

Weather was more unsettled than usual during the greater part of April, the daily changes of the various meteorological elements showing the irregularity which accompanies the establishment of pre-monsoon conditions. These pre-monsoon conditions had probably commenced in Assam as early as some time in March, and they became well defined in April both in Assam and East Bengal. Further, they extended westward more over the province than in ordinary years.

The chief result of this exceptional development was noticeable in there being more cloudy rainy weather than usual in all parts of the province, except North Bengal, with continued low temperature. A further sign of the early advance of monsoon weather in the east of the Bay was the formation of a small cyclonic storm over the Andaman sea towards the end of April, a most exceptional occurrence so early in the year.

Usually in April rainfall is caused by the passage westward over the province of shallow depressions, which, causing quick changes in the wind circulation, are accompanied by thunderstorms. It is not difficult in such cases to follow the changes of pressure and winds and the resulting rainfall distribution, but during the past year the changes of pressure, though at times large, were so irregular that the connection, so far as could be gathered from observations taken over so limited an area as Bengal, were difficult to reconcile with the usual easterly motion of a widespread shallow depression. The rainfall also was difficult to account for, as it began in the north-east and extended south-westward.

It appears probable that a pressure change occurred which has been noticed at times in former years. When a depression is approaching the province from the west and is beginning to be felt in the western districts, a rapid rise of pressure at times begins in the north-east in Assam and North Bengal, and spreading westward and south-westward checks the eastward movement of the depression. Some such change as this was observed at the beginning of the period of rainy weather in the second week of April. Pressure was falling over the province on the 5th and 6th, and a shallow depression was shown over Chota Nagpur. On the 6th pressure was rising at Sibsagar, on the 7th there was a rapid rise over the province, and the depression had become diffused over the south-western districts and the west of the Bay. Simultaneously with the rise of pressure rain began to fall in Assam, the rainfall area extending south-westward, till on the 10th it included the whole province.

It will be seen from the above that at the beginning of May weather conditions were very exceptional, and that from the point of view of the south-west monsoon they were considerably in advance of their usual time of development.

These exceptional features continued well marked during May, as for at least half of that month weather, such as occurs in the south-west monsoon season, prevailed with at times heavy rain. After the cyclonic storm in the south-east of the Bay, which caused strong winds in that area at the end of April and for a day or two in May, and later in the eastern parts of the

province, two shallow depressions of the south-west monsoon type formed in the north-west angle of the Bay. The first of these began about the 13th and moved westward across Orissa, causing heavy rain during its passage and practically general rainfall in all parts of the Province. The second shallow depression began on the 19th near Gopalpur. Moving north-eastward, it was well defined near Saugor Island on the 20th, and on the following day over East and North Bengal, with a centre between Bogra and Sirajganj. Though causing little increase in wind force, the disturbance was everywhere accompanied by heavy rainfall. On the 20th Saugor Island reported 6 inches, and in the course of 24 hours partly in the 20th, and partly in the 21st, the same amount fell at Calcutta. Many stations in Bengal Proper received heavy falls on the 21st, and even in Bihar and Chota Nagpur, notwithstanding the easterly movement of the depression, rain fell in considerable quantity.

The area of heavy rainfall in May included the north of Orissa, the greater part of South-West Bengal, the whole of East Bengal, and a large portion of the northern half of North Bengal. East Bengal and Orissa received considerably more than the normal fall for the month.

The comparatively dry weather which prevailed over the west of the province in the early part of June was more of the nature of a break in the rains, and it came to an end in consequence of the formation of a shallow land depression about the 10th, such as not unfrequently forms in July and August in ordinary monsoon seasons. Though the depression filled up soon after its first appearance, it caused the showery weather which had been continuous in the eastern districts to extend westward over the province, and from about the 13th ordinary monsoon weather became established in the central districts, Bihar, and Chota Nagpur.

No cyclonic disturbance occurred over the Bay throughout June, but towards the end of that month a shallow depression formed in the north-east over Assam and North Bengal. The depression was too shallow to cause a regular cyclonic circulation of winds, which, however, being light, were readily affected by small changes of pressure. Such changes as followed were of an oscillatory character, upwards in the east, downwards in the west, and *vice versâ* and being followed by frequent shifts of winds, heavy general rain fell in all parts of the province except the south-west.

The rainfall was due to local disturbances, irregular in distribution, and in places much above the normal amounts. The heaviest falls during June, relative to the normal, were in Chota Nagpur and Bihar, and Orissa was the only division which received less than the normal amount.

Weather during July possessed the same remarkable features as in June, especially in the non-occurrence of cyclonic storms over the Bay and the continuous low pressure over the province, Assam, and Burma. As no depression of any depth passed inland from the sea, the variations of pressure were never more than moderate in amount; but as the defect was continuous and westerly winds prevailed over the western districts, the moist southerly winds from the Bay, which were quite up to average strength, failed to obtain the usual outlet north-westward up to the Gangetic plain. The result was general heavy rainfall over the greater part of the province, especially in Bihar, with a more irregular distribution than in ordinary years.

The part of the province where deficient falls occurred was naturally in the south-west, where the drier south-westerly land winds prevailed. The deficiency was, however, in nearly all cases small, as may be seen from Orissa receiving on an average for the whole division 99 per cent. of the normal, and Chota Nagpur 110 per cent., the excess in the latter being due to the heavier falls in the north of the Division.

A very noticeable peculiarity in the rainfall distribution in that month was that in submontane districts, whether in the east or north of the province, and probably over the lower ranges of the hills, falls were i[illegible] all cases in slight defect, whereas at higher levels, as in the Darjeeling [illegible], there was a fairly large excess. A marked contrast was shown betwe[illegible] Baxa and Darjeeling, at the former of which there was defect of 16 inches, and at the latter excess of 11 inches.

The slight deficiency extended along the foot of the Himalayas as far as Darbhanga, but from there excess steadily increased, and was greatest in Champaran and Bettiah.

Though no cyclonic storm occurred over the Bay in July, land depressions were not wanting, as in the previous month. Two such disturbances developed in the early part of the month, and moving westward caused heavy rain during their passage; and after the middle of the month a slight depression formed over the north-west of the province, with a fairly regular cyclonic circulation of light winds. The monsoon winds from the Bay were not so strong as in the early part of the month, but the cyclonic circulation and a slight oscillatory movement of the area of lowest pressure were sufficient to maintain continuous rainfall in all except the south-western districts for some days. A rapid fall of pressure towards the end of the month was followed by another slight depression about the 25th, and further heavy rain fell in Bihar, after which high pressure was restored and became an important feature of the weather conditions, not only for the remaining days of July, but well into August. In consequence of this higher pressure in the north, such depressions as formed in August began over the Bay, and instead of moving northwards across Lower Bengal, they first moved westward into Central India, and recurving there, they entered the province in the north-west. The result of the course taken by these disturbances, two in number—one about the middle and the other towards the end of the month—was less rain in the south-western districts and continued heavy falls in the northern districts.

The depression which formed over the north of the Bay about the beginning of the second week of August caused squally weather over a wide sea area between the 10th and 12th. It crossed Orissa and recurved in Central India, approaching the western boundary of Bihar about the 15th. Between the 15th and 18th the depression moved slowly eastwards, causing heavy rainfall, which was not, however, so regular in its distribution as usual. The heavier falls were to the north of the area of lowest pressure. South Bihar and the north of Chota Nagpur received much less rain than North Bihar, and even in North Bengal the contrast was well marked till the disturbance broke up, when, as usually happens, thunderstorms became more general, with numerous heavy falls.

Except during the two periods of disturbance rainfall was not heavy or general, but no well marked break occurred during August. Rainfall was lighter and more local in the early part of the month, and again for a few days about the end of the third week. The total fall for the month was in large excess in Bihar and North and East Bengal and in large defect in Chota Nagpur and Orissa.

Two depressions formed over the Bay in September, and like all the others during the present season they ultimately filled up in the north of the province.

The first crossed the coast of the Circars in a westerly direction. Recurving, it moved northwards till it reached the North-West Provinces, after which its motion was eastward. Though by the time it affected weather conditions in Bihar the depression had become very shallow, still it caused, during its eastward advance across Bihar and North Bengal, heavy general rainfall for several days. Practically the only rainfall which was received during September in the extreme west of Bihar was due to this disturbance. Between the 15th and 18th there occurred the greater part of the total fall for the month in Shahabad, Saran, and Champaran, amounting on an average to 5 inches.

The second disturbance began about the 18th, probably in the south of the Bay, and moving northwards developed into a cyclonic storm of moderate severity before the centre crossed the Bengal coast near Saugor Island. Inland the depression remained well defined till the centre was near Malda at 8 A.M. on the morning of the 24th, after which it rapidly filled up and had entirely disappeared the following day.

The most noteworthy features of the disturbance were connected with the rainfall—

(1) in its being unusually heavy in parts of the track of the central area, more especially in the phenomenal fall in the Darjeeling Hills, on

approaching which the disturbance broke up and in a few hours ceased to exist;

(2) in the area of heavy rain being much further north than the area of low pressure, as shown by the cyclonic circulation of winds and the pressure distribution.

The rainfall which began on Saturday, the 23rd, in Lower Bengal was maintained during the 24th and part of the 25th in the Himalayas in consequence of the disturbance reaching the hilly region as a well defined depression of moderate depth, and thereafter breaking up in an exceptionally short time, an occurrence which is invariably attended by heavy rainfall, generally over a much wider area than that immediately under the influence of the cyclonic wind circulation.

As in August, the south western districts received less than the usual amount and North and East Bengal and Bihar more, though not to the same extent as in the previous month. Excess in Bihar was only 2 per cent.

Weather during the greater part of October was of the kind usual at the end of the monsoon season, with pressure above the normal and northerly winds fairly frequent and continuous, especially in the eastern districts. Temperature differed but little from the normal, and the sky was generally cloudless or lightly clouded, with an almost complete absence of rainfall, the only exception being fairly numerous light showers in North Bengal. In the western districts exceptionally dry weather prevailed, so that over a wide area, including Chota Nagpur and the greater part of Bihar, the rainfall for October was largely below the normal. On an average for these two divisions only 34 per cent. of the usual fall was received.

There were two occasions of disturbed weather, which continued for about three days each time. The first was in the middle of the month, the second towards the end, and they were both due to depressions, which beginning in the south of the Bay moved northwards or north-eastwards and passed over Southern and Eastern Bengal. Cloudy rainy weather obtained during these periods of disturbance over a great part of the Province and heavy rainfall over considerable tracts of country, chiefly in Orissa, East Bengal, and Arakan.

In both storms the most marked features were the light winds in the north of the Bay and the very heavy rainfall, which was irregularly distributed with regard to the central area of the depressions—features which were noticeable in the case of the previous disturbance, which caused the heavy rainfall in the Darjeeling Hills towards the end of September.

In consequence of the continued tendency for the cyclonic disturbances to move towards the north or north-east, the distribution of rainfall was more irregular than usual in October. Over a great part of Chota Nagpur less than 1 inch fell, and the average for the Division was 1 inch as compared with the normal fall of 2·94 inches. In the west of Bihar falls were generally less than half an inch, and only a few stations in any part of the Division received more than 1 inch. These were mostly in the Hajipur and Tajpur districts, where heavy falls of more than 2 inches were general on the 28th. The average fall for the whole of Bihar for October was slightly under 1 inch and about one-third of the normal fall.

Towards the south east of the Province falls increased considerably in amount, especially in East Bengal, in the southern part of which they varied from 10 to more than 25 inches. In the north-east also heavy rain fell, the heaviest being 19 inches at Buxa and 14 inches at Bhagalpur.

The chief features of the past monsoon season are—

(1) Weather has been unusually settled over the north of the Bay throughout the season. When depressions occurred, winds never increased to the strength usual on such occasions.

(2) Typical monsoon weather began much earlier than usual, and prevailed over the Province during a considerable part of May.

(3) During the early part of the usual monsoon season, that is, in June and July, pressure remained low in the north and east of the Province, and partly owing to shallow land depressions and

irregular pressure oscillations with light variable winds, heavy rain was general except in Orissa.

(4) During the latter half depressions forming in the Bay moved almost without exception northward or north-eastward before filling up, and caused heavy rainfall over considerable parts of the Province, chiefly in the north and east. On one occasion heavy rain fell in Orissa in October.

(5) Excessive rainfall occurred throughout the season in East and North Bengal and part of Bihar:—

Kishanganj	18	
Araria	19	

Malda.—No rain. Weather seasonable. Harvesting and threshing of winter rice nearly completed. *Kalai* is being gathered in some places. Mustard and other *rabi* crops doing well. Common rice sells at 16 seers per rupee. Cattle-disease reported from Shibganj. Fodder and water sufficient.

Sonthal Parganas.—No rain. Rice harvest over. *Rabi* crops doing well. Average price of rice 15 seers and of maize 20½ seers per rupee. Cattle-disease in Rajmahal. Fodder and water sufficient.

Cuttack.—Rainfall nil. Weather seasonable. Harvesting of *guru sarad* going on. *Arhar* and sugarcane being cut. *Dalua* and tobacco doing well. Condition of cattle generally good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Cuttack	14	7	per rupee.
Jajpur	17	0	
Kendrapara	18	6	
Banki	17	9	

Balasore.—No rain. *Sarad* harvesting and sugarcane pressing continue. *Rabi* crops ripening. Cotton growing well. Rice sells at 17½, 15, and 18 seers per rupee in the interior, Balasore, and Bhadrak respectively. Cattle-disease reported from Balasore and Basudebpur Circles. Fodder and water sufficient.

Angul.—No rain. For want of rain the *rabi* crops have suffered greatly. Harvesting of *rabi* and pressing of sugarcane in progress. Common rice sells at 15 seers per rupee in Angul and 9 seers in Khondmals.

Puri.—Rainfall nil. Weather seasonable. *Sarad, arhar,* and *kulthi* are being harvested. Sugarcane being pressed. *Dalua* being re-planted. Winter *mandia, mung,* and other miscellaneous crops thriving. Rain wanted for *rabi* crops. Test-works opened at Tua. Fodder and wate[illegible]ent. Common rice sells as follows:—

	Srs.	ch.	
Sadar	17	1	per rupee.
Khurda	17	1	
Interior of district	17	4	

Hazaribagh.—Rainfall nil. Weather seasonable. Sugarcane pressing in progress Common rice sells at Sadar 12 seers and at Giridih 14 seers per rupee.

Ranchi.—Rainfall nil. Weather seasonable. Harvesting of *sirgufa* nearly finished. Rice sells at Ranchi 10 seers and in the interior 13 seers per rupee. Cattle-disease continues. Fodder and water available.

Palamau.—Rainfall nil. Weather seasonable. Sugarcane pressing continues. Early-sown *rabi* still doing well. Cattle-disease continues in places. Fodder and water sufficient. Prices at Sadar are—Rice 11 seers 13 chitaks, gram 10 seers 5 chitaks, wheat and *makai* 13½ seers, and barley 16 seers 14 chitaks per rupee.

Manbhum.—Rainfall nil. Weather seasonable. Winter rice an average crop. *Rabi* crops promise well. Cattle-disease reported from thanas Purulia and Para. Fodder and water sufficient. Average price of common rice at Sadar 14 seers, and at Gobindpur 13 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall nil. *Rabi* needs rain. Rice sells at 15 seers 10 chitaks per rupee.

General Summary.—There was no rain during the week. The winter rice is nearly all harvested and is now being threshed· The pressing of sugarcane is going on. The prospects of the *rabi*, poppy and other cold-weather crops are good except in parts of the Chota Nagpur Division and in Angul. Rain is wanted for the *rabi* crops. The price of common rice is practically stationary, the variations reported being very slight and confined to a few districts only. Cattle are generally in good condition, and there is no want of fodder anywhere. Cases of cattle-disease continue to be reported from some districts. Test-works have been opened at Tua in Puri.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

F. A. SLACK,
Offg. Secy. to the Govt. of Bengal.

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of December 1899.

	Inches.	Date.	Hour.
The mean pressure of the month	30·018		
The average pressure of December from 24 years' registers ...	30·027		
The highest pressure in the month	30·179	11th	10
The lowest pressure in the month	29·874	31st	16
The range of pressure	0·305		
	Hours.		
The total number of hours of bright sunshine during the month	221·9		
The maximum possible number of hours of sunshine ...	332·8		
	⊖		
The mean temperature of the month	65·2		
The average temperature of December from 24 years' registers	68·0		
The highest temperature in the month	84·1	7th	
The lowest temperature in the month	50·0	16th	
The range of temperature during the month	34·1		
The mean daily range of temperature	23·1		
The greatest range of temperature in one day	27·9	16th	
	Per cent.		
The mean humidity of the month	75		
The average humidity of December from 24 years' registers ...	71		
	Inches.		
The mean vapour tension of the month	0·453		
The average vapour tension of December from 9 years' registers	0·476		
The mean cloud proportion of the month	0·97		
The average cloud proportion of December from 22 years' registers	1·51		
	Ins.		
The total rainfall of the month	Nil		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	Nil		
The average fall of December from 48 years' registers ...	0·23		
The greatest fall in 24 hours	Nil		
	Days.		
The number of rainy days in the month	Nil		
The average number of rainy days in December from 24 years' registers	1		
	⊖		
The mean maximum equilibrium temperature of solar radiation during the month	130·3		
The mean difference of sun and air temperatures	51·8		
The greatest sun temperature	138·1	4th	
The greatest excess of sun over air temperature	55·1	2nd & 4th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	47·3		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	8·4		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	11·7	19th	
	Miles.		
The mean movement of the wind per day	43·5		
The greatest movement of the wind in one day	97·0	12th	
The greatest movement of the wind in one hour	14·0	18th	1 to 2 P.M.

The number of hours with winds from each of the 8 points—
N. 175, N.E. 14, E. 19, S.E. 2, S. 9, S.W. 43, W. 43, N.W. 78, Calm 361.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 2·3 lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory.

G. W. KUCH[illegible]R,
For *Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.*

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Calcutta, the 8th January 1900.

	Inches.
The total fall of rain from 31st December 1899 to 6th January 1900	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·04
The total fall from 1st January 1899 to 6th January 1900	71·95
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·28

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

(a) The increase is in outward passenger traffic from stations throughout the line, chiefly due to Hindu devotees proceeding to stations near the Ganges, to bathe on the occasion of the moon eclipse of 17th December 1899.

(b) The increase is in coal traffic and in upward despatch of food-grains from almost all the principal stations on the line, and in hides and skins traffic from Cawnpore City to Howrah.

* Added number of passengers 8,263 and Rs. 18,862 }

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE RAJSHAHI DIVISION FOR THE YEAR 1898-99.

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 15th January 1900.

RESOLUTION—No. 226.

READ—

The Annual General Administration Report of the Rajshahi Division for the year 1898-99.

THE Division was in the charge of Mr. P. Nolan, except for a period of three months, during which Mr. C. J. O'Donnell officiated for him.

The tours of the Commissioner were full, including the inspection of all the district head-quarters, except Bogra, and special attention was devoted by him to the Duars. Those of the District Officers were of the normal length, and appear to have been well arranged. The Subdivisional Officers of Sirajganj might have been out much more, and the reason assigned by the Commissioner is not accepted, since it would appear that one of the officers was in charge all through the cold weather.

The Collectors of Rangpur and Bogra failed to inspect their treasuries more than once, the former being debarred by ill-health. The failure of six Subdivisional Officers to inspect the sub treasuries twice in the year is not explained, and the Commissioner is desired, in the absence of a satisfactory explanation, to draw the attention of the officers to the necessity of carrying out the standing orders.

2. *Weather and Crops: Prices: Material condition of the people: Public health.*—The rainfall exceeded the average in all districts, save Jalpaiguri, where the deficiency was but slight, though the Deputy Commissioner reports that its unsuitable distribution affected the well-being of the crops. Elsewhere the winter rice was very good, a bumper crop being reaped in Dinajpur. Rajshahi, and Bogra. As in the rest of Bengal, the year was exceptionally healthy, cholera, in particular, decreasing notably. There was a slight falling off in the number of vaccination cases and a marked increase in those of deaths from small-pox. Wages were unchanged, and the abundant harvests gave cheap food. In short, the Commissioner has summed up as follows:—

This year the crops were good, the price of food low, and the death-rate diminished: I infer that the condition of the people was much above the average.

The Commissioner comments as follows on the careless manner in which the returns of wages have in some cases been prepared:—

It is said, for instance, that a superior mason received during the last week in March from five annas three pies to twelve annas a day, a common mason from three annas nine pies to ten annas, *the margin of difference being great enough to destroy the value of the statement.*

The Lieutenant-Governor desires that more attention should generally be paid to this point in the preparation of the prices of labour and commodities.

3. *Manufactures, Mines, and Commerce.*—The yield of silk is reported to have been 155,452 lbs. as compared with 135,831 lbs. in the previous year. The outturn of the jute hand-presses diminished very considerably. The number of tea-gardens decreased, but the area in Jalpaiguri under both mature and immature plants was much larger, as was the gross yield. The yield of the Government cinchona plantations is returned as 236,098 lbs. as compared with 318,715 lbs. in the preceding year, the decrease being due to the smaller requirements for the drug. The output of the Daling coal mine again increased very considerably.

The principal trade of the Division is with Calcutta, and the figures relating to the general trade do not include that which is conveyed by river steamers. This omission vitiates any comparison of the total volume of trade with that of previous years, and at the same time conceals the extent to which the river traffic is passing from the control of the country boats to the steam-ship companies.

The exports to Calcutta consist almost entirely of agricultural products, and differed in the year in question from the preceding one, mainly in the enormous increase in food grains and the great falling off in jute, both raw and in the form of gunny-bags. Of the imports from Calcutta, there was a great increase in the quantity of European piece-goods and European cotton twist and of gunny-bags. The import of kerosine oil increased in all districts, except Rangpur and Pabna. In the case of the latter, which includes the trade of Sirajganj, the falling off amounted to more than a lakh of maunds, for which the Commissioner has not been able to find an explanation. The total volume of trade (exclusive of the steam-ship traffic) shows a decrease of four lakhs of maunds in both imports and exports. The route by the Nadia rivers is now little used, but there was a great increase in the exports through the canals.

4. *Civil Justice.*—The number of civil suits disposed of in the year rose from 62,855 to 68,048. The increase, which was confined to money and rent suits, was most marked in Rangpur, and Pabna alone showed a falling off, while the figures in Darjeeling were stationary. The Commissioner attributes the results to the comparative prosperity of agriculture in the year. The proportion of witnesses kept over two days was slightly less than before, but in the Courts of the Subordinate Judges 19 per cent. were so detained.

5. *Crime: Criminal Administration: Police.*—The total number of cognisable crimes fell from 18,277 to 17,334, and that of non-cognisable offences rose from

8,673 to 9,577. The experience of the Division was, therefore, the same as that of the rest of the Province. Moreover, the cognisable offences, when analysed, disclose an increase in offences against the public tranquillity, the person, and special laws (as well as under the head of nuisances), and a most marked decrease in those against property. The inference to be drawn is that the spirit of lawlessness engendered by the recent scarcity has had a more lasting influence than would have been expected. This is more markedly apparent from the figures relating to the returns of cognisable offences for the last eight years, which are as follows :—

Year.			Total.	Offences against public tranquillity.	Serious offences against the person.	Minor offences against the person.
1891	...	...	13,499	379	662	346
1892	...	...	14,277	351	637	337
1893	...	...	14,096	337	568	345
1894	...	...	14,558	375	608	392
1895	...	...	15,273	389	617	290
1896	...	...	15,477	327	634	271
1897	...	...	18,277	599	1,047	482
1898	...	...	17,344	639	1,127	479

The causes of the great increase in the last two years of offences against the person and against the public tranquillity have not been explained, and the Lieutenant-Governor, whilst meantime inviting the attention of the District Officers to the fact, looks forward with interest to the statistics of the current year.

The Stipendiary Magistrates disposed of 7,639 cases compared with 7,574 in the previous year, and the percentage of persons convicted was 52·3. The Courts of the Honorary Magistrates disposed of 1,212 cases, or 155 less than last year. The detention of witnesses in these Courts, to which attention was drawn last year, has diminished, though the evil is still excessive in Rangpur, Darjeeling and Jalpaiguri. The results of appeals from both classes of Courts were more favourable to the convicts than in the previous year. The remands in "A" cases showed some relative improvement. The number of bad livelihood cases increased, and the proportion of convictions was slightly greater. The percentage of convictions in Sessions cases was also higher. The Lieutenant-Governor is pleased to observe some improvement in the attendance of the Honorary Magistrates in the last year, but the fact that the members of the Benches of Rangpur, Nator and Bogra were so repeatedly absent without leave calls for explanation.

On the whole, the disposal of criminal work appears to have been more effective than in the previous year; but, as the Commissioner has remarked, the average amount of work per officer is very small compared with other parts of Bengal.

The Commissioner has expressed no opinion on the conduct of the police, nor has he reported those of the District Officers, but it appears that the charges of extortion made against them increased to 28. Of these, however, only three resulted in convictions. One inspector of police was dismissed for complicity in the embezzlement of Government money.

The chaukidars appear to have been on the whole liberally rewarded and as freely punished, though the divergences in the practice of the various districts are as marked as usual, and the Lieutenant-Governor must again insist on a more careful control by the Commissioner of the vagaries in this matter of the District Officers. Nothing has been said by the Commissioner in continuation of the interesting remarks contained in last year's report on the progress made in the organisation of dafadari circles and the most suitable punishments for erring chaukidars; and the subject of chaukidari assessment, to which attention was drawn in last year's Resolution, has escaped notice.

6. *Land Revenue and Cesses.*—The current demand of land revenue was Rs. 52,57,361, the increase of Rs. 43,572 over that of the previous year being due to the resettlement of the Jaipur Government estate and in the Darjeeling Terai, and to new cultivation in Jalpaiguri. The collections, which amounted

to Rs. 51,99,700, were inferior to those of last year, and the outstanding balance (excluding Rs. 5,319 remitted) increased from Rs. 1,71,369 to Rs. 2,26,264, or 4·3 per cent. On the whole, however, the results were fair, especially in respect of arrear collections, which were complete in both permanently and temporarily-settled estates, and very creditable in the Jalpaiguri and Darjeeling directly-managed estates. In Bogra and Pabna, where the united demand from this class of estates is about one-fifth of that of Jalpaiguri, the arrears not collected were more than double those of that district. Current collections in permanently-settled estates were good in all districts, but those in farmed estates were poor in Rangpur and Pabna, because the farmers experienced no unpleasantness in pursuing the practice of making Government wait for the rent. It is hoped that the recent enquiries of the Board into this question will lead to reform. Current collections in directly-managed estates were poor in Pabna and only moderate in Bogra. In Jalpaiguri they were very bad, amounting to only 56·3 per cent. of the current demand. The Commissioner has refused to entirely accept the local explanations, and has ascribed the failure in part to defective management at the tahsils of Mainaguri and Falakata, and in consequence changes have been made which, it is hoped, will accelerate collections and improve the staff. The number of sales of estates for arrears of land revenue was 24 only. The Commissioner considers that the number of defaults in permanently-settled estates is excessive in Pabna, where, as will appear from the foregoing remarks, the results of the land revenue administration were generally least satisfactory. The Lieutenant-Governor would like to know the reasons which led the Collector of this district to shew the great leniency he did to the defaulters.

In order to obviate the difficulties in the preparation of schemes for the improvement of Government estates which arise from the transfers and consequent temporary local ignorance of District Officers, the Commissioner has ordered, with the approval of Government, the preparation of programmes extending over a series of years.

The road cess demand, current and arrears, aggregated Rs. 10,73,837, and collection Rs. 9,99,991, or 98·9, of the current demand. The arrear collections were very good everywhere save in Pabna.

The working of the Public Demands Recovery Act calls for little comment. Excluding the district of Jalpaiguri, the mere issue of notice appears to have been comparatively fruitless. The least progress in the disposal of the cases was made in Pabna, which the Lieutenant-Governor can only assume to be due to inefficient supervision on the part of the Collector.

The working of the Bengal Tenancy Act as regards those sections which are under the control of the revenue authorities is striking, because in some cases it appears to be not working at all. The appraisement of produce, the notice of intention to resume abandoned holdings, the commutation of produce rents, the registration of improvements, or the aid of the Collector in the acquisition of a village site, are provisions of the Act, which seem to be wholly dormant. It would be interesting to know whether the evils, to remedy which these provisions were made, are not now existent, or are obviated by other methods than a recourse to the Collector.

7. *Wards and Attached estates.*—The charge of one additional estate was assumed in the year. The current demands of rent were Rs. 2,09,855 and collections Rs. 2,02,271, or 96 per cent. The balance still exceeds the current demand, and little improvement has followed from the emphatic orders of Government conveyed in last year's Resolution. The condition of all the estates in Rangpur is unsatisfactory, and the Commissioner has reported that poor management is one of the contributory causes. The Lieutenant-Governor trusts that the Board have taken measures which will ensure an improvement during the present year.

8. *Excise: Stamps: Income-tax.*—The income from excise failed to reach that obtained two years ago, though it was slightly above that of 1897-98. The incidence in the five districts in the plains varied from one anna two pies to one anna five pies per head, which is much lower than in most other Divisions. There was a falling off in the income from country spirits and opium, the latter being due to a smaller consumption. Excessive rain caused a smaller area to be

planted with ganja, but the outturn per acre was much better, and the total outturn was nearly the same as last year.

The increase in civil cases led to an increase in the income from stamps for court-fees, copies, and court paper, but there was a decrease under each of the other heads. In the case of non-judicial stamps it amounted to Rs. 27,000.

The returns for the last three years are as follows:—

YEAR.	Court-fees.	Copies.	Receipts.	Non-judicial.	General.	Court-paper.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1896-97 ...	10,02,000	57,000	44,600	4,16,000	19,000	22,000
1897-98 ...	+72,000	−4,000	−16,000	−29,000	−1,000	+ 0
1898-99 ...	+11,000	+3,000	−1,000	−27,000	−3,000	+2,000

Thus, though the total remains pretty constant, the items have undergone considerable modification. It is probable that the renewed prosperity has been the cause of the great falling off under the head of "Non-judicial stamps;" but that under the heads of "Receipts" and "General" deserves some explanation. The demand and collection of income-tax differed little from those of the preceding year, the largest balances being in Dinajpur, Bogra, and Rangpur.

9. *Communications and Public Works.*—Extensions in connection with the Cooch Behar State Railway and the Bengal Duars Railway were in progress during the year, and surveys for new lines in Rajshahi were being made. Rupees 94,177 were spent by District Boards in original road works and Rs. 1,91,743 on repairs, but no important scheme was undertaken by them.

Much progress was made by the Public Works Department in repairing the damages caused to public buildings by the earthquake of 1897.

10. *Education.*—The percentage of boys of a school-going age who attended school was 18·6, and the number was absolutely higher than in the two previous years, though relatively lower than that of 1896-97. The Commissioner is of the opinion as regards primary education that something approaching the normal standard has now been attained, and that future fluctuations will depend more on material conditions than the spread of the desire for education. There was a slight increase in the number of girls at school. The average cost per head of all pupils was Rs. 5·3, and the total cost was Rs. 6,38,373. The contributions by Government and the District Boards and Municipalities were much lower than in the preceding year. A comparison of the numbers of the various classes of schools and their pupils with those of 1897-98 seems to exhibit, as elsewhere in Bengal, the tendency of vernacular education to lose ground, for the number of middle vernacular schools decreased from 132 to 127, and that of the pupils from 6,322 to 5,808. This decrease is emphasised by the prosperity of every other class of schools, and is worthy of the attention of those who are interested in education. The students of the Pabna Technical School were very fairly successful in the examination for sub-overseers; and the Rangpur Technical School is tolerably prosperous.

11. *Dispensaries.*—The number of institutions was the same as in the previous year, viz., 70, and the travelling hospital assistant was retained in Darjeeling. Two new dispensaries were opened in that district, but the Kalam dispensary in Rajshahi and the Sultanpur dispensary in Bogra have disappeared from the returns. Yet the number of patients increased, though the year was remarkably healthy, and the increasing popularity of the dispensaries among the humbler members of the community enhances their claims on the liberality of the rich.

12. *Local self-government institutions.*—The administration of the municipalities of Darjeeling and Kurseong is reported to have been efficient, but that

of Bogra and Rangpur has been condemned by the District Officers. There was nothing in the history of the year to make it noteworthy. The District Boards meet with the usual praise as consultative bodies. Jalpaiguri was somewhat unfortunate in obtaining a useless probationary District Engineer.

13. *Conduct of zamindars.*—The zamindars of whom favourable mention is made in the Commissioner's report include His Highness the Maharaja of Cooch Behar, Maharaja Manindra Chandra Nandy of Cossimbazar, the Maharaja of Dinajpur, Rai Banamali Bahadur of Taras, and Radha Gobinda Rai Saheb. Only from Pabna are quarrels between zamindars reported.

The thanks of the Lieutenant-Governor are due to Mr. Nolan for his experienced administration of the Division during the year, and for the excellent report submitted by him, extracts from which are published for general information.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secy. to the Govt. of Bengal.

Extracts from the Annual General Administration Report of the Rajshahi Division for 1898-99.

* * * * * *

III.—WEATHER AND CROPS.

(a) Weather.

10. The following statement shows the rainfall of the year in the different districts, as compared with the average of the last five years:—

District.	Rainfall in inches.	
	Average of last five years from 1893-94 to 1897-98.	1898-99.
1	2	3
Rajshahi	52·94	71·48
Dinajpur	65·02	67·27
Jalpaiguri	134·84	130·44
Darjeeling	119·17	138·07
Rangpur	77·47	87·71
Bogra	62·13	81·34
Pabna	58·43	62·81
Total ...	81·43	92·32

The rainfall of the year was excessive in comparison with the average of the last five years in all the districts except Jalpaiguri. The Deputy Commissioner of that district observed as follows:—

"The rainfall in August was insufficient, and there were several breaks in it in that month, which retarded the transplantation of the *Haimanti* paddy to a considerable extent. In September it was excessive. The result of this unequal distribution of the rainfall was that the outturn of the crops did not generally come up to the normal."

In regard to the quantity of rain I do not find any real deficiency in Jalpaiguri, where it was one-third more than in any other district in the plains. One hundred and thirty inches indicate an ample supply of moisture, and the deviation of five inches from the average is, under the circumstances of no consequence.

The distribution of rain during the monsoon season was as follows:—

Month.	Rainfall in the Rajshahi Division.	
	Normal.	Actual in 1898-99.
1	2	3
	Ins.	Ins.
May	8·89	7·43
June	16·97	17·32
July	18 32	16·37
August	15·29	14·21
September	13·43	21·46
October	4·28	5·90

It will be seen from the above table that the actual rainfall in May, July and August was below the normal, while in June, September and in October it was above the normal. The excess in September was very marked, being 21·46 inches, against 13·43 inches. The general result was that during the monsoon

period the actual rainfall in the Division was above the normal rainfall by 5·41 inches.

(b) Crops.

11. The following statement shows the outturn of the principal crops, as reported by the District Officers:—

District.	Rice.		Wheat.	Jute.	Tobacco.	Tea.	Remarks.
	Bhadoi.	Hemanti.					
1	2	3	4	5	6	7	8
	P. C.	P. C.	P. C.	P. C.	P. C.	P. C.	
Rajshahi ...	105	120	110	78	75	...	
Dinajpur ...	112	125	...	100	100	...	
Jalpaiguri ...	69	92	75	60	85	75	
Darjeeling ...	88	105	75	50	73	93	
Rangpur ..	94	100	87	81·8	76	...	
Bogra ...	112	118	...	73	87	...	
Pabna ...	100	112	100	80	100	...	

It will be seen that the harvests were generally favourable. In Jalpaiguri I think the estimates below the truth.

* * * * * * *

V.—MATERIAL CONDITION OF THE PEOPLE.

16. The material condition of the people depends on the outturn of the crops, on the price of food, and on the healthiness of the season. Wages are so uniform that the variations which occur under that head are of little importance in this connection. This year the crops were good, the price of food low, and the death-rate diminished: I infer that the condition of the people was much above the average. This is the general view: in Rangpur I found that the raiyats held that the earthquake brought with it a blessing—strengthening the rice and banishing sickness. I am surprised to find that the comparative prosperity of the people was not accompanied by an increase in the stamp or excise revenue. Similarly, it was noticed that the famine did not produce any great falling off under these heads.

* * * * * * *

VII.—PRICES OF FOOD AND LABOUR.

(a) Price of food.

19. There has been a general fall in the price of all articles of food. The price of rice fell from about 12½ seers to 19 seers. The price of wheat and gram fell from 9¾ and 10 seers to 16¾ and 17 seers, respectively. This is, of course, the effect of the good harvests recently reaped. It so happens that even salt has fallen in price, except in Darjeeling. In this instance it is necessary to remember that the value of the rupee, by which we measure that of all other commodities, has been artificially raised in recent years; taken in gold, I doubt if salt has really fallen in price.

(b) Price of labour.

The rate of wages has not fallen with that of food. In five of the seven districts there has been no change worthy of notice. The Rajshahi figures show some marked fluctuations, generally in the direction of increase, but they are so vague, as to be of little use. It is said, for instance, that a superior mason received during the last week in March from 5 annas 3 pies to 12 annas a day, a common mason from 3 annas 9 pies to 10 annas; the margin of difference being great enough to destroy the value of the statement. It is an inference from the figures that some inferior masons got nearly double as much as some superior masons. In Rangpur there has been some fall in the wages of superior masons, *gharamis*, blacksmiths, and boys, probably owing to the tendency to level down rates, which in that District were exceptionally high.

[illegible]

20. The [illegible] in this Division are [illegible], the [illegible] being given in raw produce, such as rice, [illegible] and [illegible]. This is the general rule, and I [illegible] of [illegible] of instalments in which the [illegible] they consist of natural products of the Division, [illegible], as indigo and silk. The production of indigo is practically limited to Rajshahi, only a few maunds being manufactured in the district of Rangpur. The two small factories that exist in Dinajpur did not work during the year. The outturn of indigo in Rajshahi was 1,062 maunds, against 784 maunds and 29 seers in the preceding year. The yield of silk was 155,452 lbs., against 135,831 lbs. in the previous year. The outturn of jute hand-presses in Jalpaiguri and Sirajganj was 29,063 and 178,173 bales, respectively. Sugar is made in Jalpaiguri and Dinajpur and molasses are prepared in all the districts, being largely exported from Rajshahi. Endi-cloth, a coarse silk, is manufactured in small quantities for home consumption in Dinajpur, Jalpaiguri, Rangpur, and Bogra. Gunny-cloth and gunny-bags are made to a considerable extent in Dinajpur and exported to Calcutta and other districts. *Satranjies* or cotton carpets are manufactured at Nisbetganj in Rangpur, but the industry is falling into decay. Brass and bell-metal utensils are manufactured at Budpara and Kalam within the Nator subdivision and in the Nilphamari subdivision, at Pachagar in Jalpaiguri, and in the district of Pabna. *Sitalpati* mats are made in Pabna. Beer and porter are brewed in Darjeeling.

21. The number of tea-gardens in the districts of Jalpaiguri and Darjeeling, the area under cultivation in acres, the gross yield in pounds, and the average yield per acre from mature plants are shown in the following table:—

...rict.	Number of gardens.			Area under cultivation in acres. Mature plants.			Area under cultivation in acres. Immature plants.			Gross yield in pounds.			Average yield per ... from mature pla...

Total	431	471	[illegible]	84,707	90,[illegible] (a)	[illegible]	12,810	21,[illegible] (a)	23,707	34,1[illegible]	[illegible]	39,338,760	408·1	398·5 (a)

(a) Revised figures.

In Jalpaiguri only three applications for lands under tea-lease rules were received, against 19 in the preceding year. The outturn of tea shows an increase. The average yield per acre of mature plants was 484·2 lbs., as compared with 510·6 lbs. in the previous year. The cause of this falling off has been attributed partly to the conversion of a large area of land under immature plants yielding leaf, but not accounted for, into the area under mature plants, and partly to the fall of the estimated outturn in consequence of unfavourable weather during the year.

22. The following statement shows the condition of cinchona cultivation in Darjeeling during the year of report and the two previous years:—

District.		Number of plants.			Gross yield in pounds.		
		1896-97.	1897-98.	1898-99.	1896-97.	1897-98.	1898-99.

	Total ...	[illegible]	[illegible]	2,174,[illegible]	[illegible]	[illegible]	251,[illegible]

(b) Mines.

23. The Daling Colliery in Darjeeling is the only mine in the Division. The outturn was 2,191·4 tons in 1898, against 1,356 tons in the preceding year, the total value being Rs. 24,233 against Rs. 14,883.

IX.—TRADE AND COMMERCE.

24. The trade of this Division is almost entirely with the metropolis, to which we send our agricultural produce, receiving in return manufactured goods, salt and kerosine oil. The following table shows the exports:—

Food-grains.

25. The increase in the rice traffic is remarkable, not only with reference to the previous year, which was one of scarcity but also when the comparison is made with 1896-97 when three lakhs of maunds were exported, against over five lakhs in 1898-99. Dinajpur and Bogra are the only districts which export rice to any great extent. The other food-grains are of little comparative importance, but proportionately the increase in regard to them is almost as great.

26. The jute trade is in this Division more important than all other forms of business taken collectively. In 1897-98 the exports were—raw jute, 86,27,568 maunds; gunny-bags 6,392,409 number. In 1898-99 they amounted to—raw jute, 63,61,915 maunds; gunny-bags 2,998,660 number. The falling-off is much greater than I would have expected. The high price of rice at the season of sowing, and the abundant stock of jute induced many raiyats to prefer the former.

Other products. The export of mustard seed declined from three lakhs of maunds to one, cotton from 20,484 maunds to 4,891; silk from 4,290 to 3,805; the export of refined sugar almost ceased, that of unrefined sugar fell from 7,263 to 517 maunds. On the whole, the return of exports does not support the view that the year was a very good one for agriculture. It was favourable in regard to food-grains only, and in this Division other crops are of great importance.

Imports. 27. The following table shows the imports from Calcutta :—

Total .	99,81,884	1,14,73,386	906	7,567	8,999	12,778	16,002	17,190	11,75,316	12,21,281	3,79,673	2,93,641	756,100	1,080,857

There has been a marked increase in the value of cotton goods, twist and salt imported, presumably because the people were better able to afford such purchases. I do not know why the import of kerosine oil fell off. The increase under the head of gunny-bags is due to the greater export of rice packed in such bags.

28. The following statement shows the imports into and exports from the Division by rail, Nadia rivers and Canal with different ports of India :—

XIII.—CRIME.

36. The following statement shows the crime, cognizable and non-cognizable, reported in each district during the year 1898, as compared with the preceding year:—

District.	Cognizable crime.		Increase.	Decrease.	Non-cognizable crime.		Increase.	Decrease.	Total crime.		Increase.	Decrease.	Remarks.
	1897.	1898.			1897.	1898.			1897.	1898.			
1	2	3	4	5	6	7	8	9	10	11	12	13	14

Jalpaiguri	1,629	1,532	......	97	670	684	14	......	2,299	2,216	......	83	
Darjeeling	1,295	1,544	250	......	1,250	1,154	......	96	2,545	2,698	153	......	
Rangpur	3,363	3,653	290	......	2,039	2,227	188	......	5,402	5,880	478	......	
Bogra	2,250	1,963	......	287	888	801	......	87	3,158	2,764	......	394	
Pabna	2,603	2,602	......	1	1,374	1,896	522	......	3,977	4,498	521	......	
Total ...	18,277	17,334	540	1,483	8,673	9,557	1,067	183	26,950	26,891	1,162	1,221	
			Net 943				Net 884				Net 59		

There was a nominal decrease of 59 in the total amount of crime in the Division during the year under report as compared with the preceding year. Crime cognizable by the police decreased by 943, non-cognizable crime increased by 884—a change in the direction to be expected in a year of comparative prosperity, when men have less temptation to steal, and greater means for prosecuting their neighbours on account of real or fancied injuries. The increase in cognizable cases in Darjeeling and Rangpur is due to greater energy in prosecuting nuisances; these districts, therefore, constitute only apparent exceptions o the rule. Darjeeling, escaped the influence of the scarcity which so greatly ffected the crime returns of former years.

The increase in non-cognizable and decrease in cognizable crime were greatest in Dinajpur, where it amounted in each case to 33 per cent. This district is the only one of the Division which is intimately connected with Bihar, and is influenced by the conditions prevelent in that part of the Province.

The following statement shows the number of offences reported under each class during the years 1897 and 1898 in the Division:—

Cases.	Cognizable.		Non-cognizable.	
	1897.	1898.	1897.	1898.
1	2	3	4	5
I.—Offences against public tranquillity ...	599	639	872	839
II.—Serious offences against the person ...	1,047	1,127	4	...
III.— Ditto ditto property ...	5,165	4,572	177	193
IV.—Minor offences against the person ...	482	479	3,348	3,673
V.— Ditto ditto property ...	8,401	7,475	837	715
Total of cases I to V ...	15,694	14,292	5,238	5,420
VI.—Other offences	2,499	2,907	1,609	1,846
Special laws	84	135	1,826	2,291
Total ...	2,583	3,042	3,435	4,137
Grand Total ...	18,277	17,334	8,673	9,557

Every entry in this table indicates the effect produced on crime by a favourable harvest. There has been a diminution in offences against property, and it is most marked in the case of the minor offences cognizable by the police, that is to say, of theft, while offences of other kinds have increased.

The net decrease in the number of cognizable cases in the Division amounted to 943, against an increase of 2,800 in the previous year. The decrease was most marked in Dinajpur, where it amounted to 825. Of these, 114 were nuisance cases, the falling-off being due to a change of system in regard to prosecuting those who permitted cattle to stray. There has been in this district a very marked improvement in regard to crimes against property, both serious and minor.

Non-cognizable crime increased under classes III, IV, VI, and in offences under Special laws, and decreased in the remaining classes, constituting a net increase of 884, against a decrease of 1,242 in the preceding year.

37. The following statement shows the proportion of crime to population in the several districts of the Rajshahi Division during 1898:—

District.	Total cognizable cases.	Population to each cognizable case.	Total non-cognizable cases.	Population to each non-cognizable case.	Total of both cognizable and non-cognizable cases.	Population to each case.	Remarks.
1	2	3	4	5	6	7	8
Rajshahi ...	3,530	407	1.496	960	5,026	286	
Dinajpur ...	2,510	490	1,299	1,141	3,809	389	
Jalpaiguri ...	1,532	444	684	995	2,216	307	
Darjeeling ...	1,544	144	1,164	193	2,698	82	
Rangpur ...	3,653	565	2,227	927	5,880	352	
Bogra ...	1,963	390	801	957	2,764	277	
Pabna ...	2,602	523	1,896	717	4,498	302	

This table gives results which in some respects are exactly the opposite of those which we might expect from the general reputation of the districts. Darjeeling appears to be by far the most criminal; Dinajpur is equally distinguished by its exceptional freedom from offences. The fact would appear to be that the number of registered cases is regulated not by that of criminals, but by that of Courts. Darjeeling contains far more Magistrates in proportion to population than any other district, while Dinajpur has less. In the south of the latter district, where the nearest tribunal is 30 or 40 miles away, it would be ridiculous to prosecute for petty nuisances,—for cutting grass on another man's land, and other such matters, which in Darjeeling do not escape police notice.

I observe that Rangpur and Pabna are comparatively free from cognizable crime, and that among the districts in the plains, Bogra is the worst.

38. To the review of the year 1898, it may be convenient to add the following statement showing the number of serious crimes in the several districts of this Division during the first quarter of 1899, as compared with the corresponding quarter of the previous year:—

Crime.	Rajshahi.		Dinajpur.		Jalpaiguri.		Darjeeling.		Rangpur.		Bogra.		Pabna.		Total.		Remarks.
	1898.	1899.	1898.	1899.	1898.	1899.	1898.	1899.	1898.	1899.	1898.	1899.	1898.	1899.	1898.	1899.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18
Murder	1	1	1	[illegible]	...	...	...	1	4	...	1	...	2	1	9	5	
Dacoity	...	...	10	[illegible]	...	1	1	1	6	3	3	1	4	6	26	11	
Robbery	2	...	1	[illegible]	1	1	...	2	2	1	6	2	4	3	16	8	
Burglary { With theft ...	170	148	115	[illegible]	46	57	14	19	212	174	114	80	186	108	898	672	
Burglary { Without theft	37	45	12	[illegible]	1	1	1	1	4	11	24	21	19	13	96	113	
Burglary { Attempt ...	40	17	10	[illegible]	...	3	3	2	11	16	16	5	10	13	90	63	
Theft	208	153	208	[illegible]	96	78	76	64	196	183	151	100	119	36	1,039	854	
Riot	11	11	8	5	1	6	1	...	9	15	2	5	9	11	36	50	
Obstruction on Railways, &c.	...	1	...	[illegible]	...	...	...	...	...	1	...	2	...	...	...	4	
Total ...	464	371	360	[illegible]	139	146	96	80	444	408	315	224	308	289	2,126	1,780	

It will be seen that in 1898 there were 2,126 such offences; in 1899, 1,780, being an improvement of 346, or 16·2 per cent.

The decrease was most marked in Bogra, where it amounted to 29 per cent., Pabna follows with 22 per cent., Rajshahi with 20 per cent., Darjeeling with 17 per cent. Progress was less marked in Dinajpur and Rangpur, while in Jalpaiguri only was there an actual increase of crime; it amounted to 5 per cent.

Dacoities have decreased from 23 to 11, mainly owing to the cessation of the crime in Dinajpur, where there were 10 cases in 1898 (I refer only to the first quarter of each year), while none occurred in 1899. The adjoining district of Rangpur also showed an improvement in this respect.

Robbery decreased from 16 cases to 8, the improvement being most marked in Bogra.

Burglary with theft fell from 823 to 672. The greatest decline was in the adjoining districts of Bogra and Pabna; Darjeeling and Jalpaiguri only show an increase.

Theft decreased from 1,032 to 854. In this, the most ordinary of crimes, the improvement extended to every district of the Division, but was most marked in Bogra and least in Dinajpur.

There were 50 riots, against 36 in the previous year. This fact is probably connected with the same cause as the decrease in the majority of crimes, those against property, namely, the improved condition of the people. It is when there is a little money to spare that complaints, true or false, are lodged of agrarian violence, and it is when there is little to eat that thieves break in. The increase in rioting extended to Jalpaiguri, Dinajpur, Rangpur, Bogra, and Pabna; in Rajshahi the number remained the same, but it had been large in 1897; and only in Darjeeling, where the crops were about the same as in the previous year, was there any improvement.

The improvement in Dinajpur is particularly gratifying, as following a still greater improvement effected in 1898, the results in the first quarter of that year being better by 32 per cent. than those of 1897. Of Bogra only can it be said that the ground gained had been previously lost.

* * * * * * *

XVI.—REGISTRATION OF DEEDS.

48. The following statement shows the number of deeds registered during the year 1898-99, as compared with the previous year:—

District.	Number of documents registered.		Increase.	Decrease.
	1897-98.	1898-99.		
1	2	3	4	5
Rajshahi	9,449	8,437	...	1,012
Dinajpur	24,578	24,489	...	89
Jalpaiguri	7,342	7,919	577	...
Darjeeling	569	616	47	...
Rangpur	31,969	35,444	3,475	...
Bogra	23,170	20,987	...	2,183
Pabna	19,679	17,308	...	2,371
Total ...	1,16,756	1,15,200	4,099	5,655
			Net decrease ...	1,556

It will be observed that there was a slight decrease of 1,556 in the total number of deeds registered in the Division, accounted for by the fact that the

raiyats enjoyed a good harvest and had no pressing necessity for raising money. This change had not so great an effect in the hill and the Terai tracts, where the preceding scarcity was little felt, and there was the normal development in the districts of Darjeeling and Jalpaiguri. In Rangpur a large number of leases executed in 1894, 1895 and 1896 fell in and were renewed.

The Sub-Registrars are reported to have generally worked well.

No new office was opened in this Division during the year under report, but the joint sub-registry office of Gaibanda at Sadullapur was abolished from the 1st March 1899. It was an experimental office, and was found not to pay expenses.

XVII.—CONDITION OF THE DIVISION AS REGARDS THE LAND AND THE LAND REVENUE ADMINISTRATION.

49. The current demand of land revenue was Rs. 52,57,361, and there was at the beginning of the year an arrear balance of Rs. 1,71,309; the collections amounted to Rs. 51,99,700 and the remissions to Rs. 5,319. The outstanding balance at the end of the year was Rs. 2,26,264 (current Rs. 2,23,346 + arrear Rs. 2,918), against Rs. 1,71,309 on the preceding 31st March. The total road-cess collections were Rs. 9,99,991, against a current demand of Rs. 10,10,299, leaving an outstanding balance of Rs. 73,846, against Rs. 63,282 in the preceding year.

There was an increase of Rs. 43,572 in the current demand of land revenue, almost entirely obtained from the temporarily-settled estates and estates held under direct management. To this increase Jalpaiguri contributed Rs. 17,304 gained by the settlements under the Arable Waste Land and the Tea Lease Rules, and by progressive rates of rents under those rules. Rupees 10,462 were derived from the re-settlement of the Terai jotes in Darjeeling, and Rs. 14,298 from the re-settlement of the Jaipur Government estates in Bogra. The current demand of cesses was Rs. 10,10,299, against Rs. 10,00,901 in the preceding year, giving an increase of Rs. 9,398, due mostly to partial revaluation of certain estates.

The total demand on account of zamindari dâk cess was Rs. 52,488 and the collections amounted to Rs. 51,274, leaving a balance of Rs. 1,189 at the close of the year, against Rs. 1,453 in the previous year.

Collections.

50. The following table shows the percentage of current collection on current demand, and the percentage of arrear collection on arrear demand, under each class in each district:—

District.	Class I.—Permanently-settled estates.		Class II. (a) Settled for periods with proprietors.		Class II. (b) Private estates leased to farmers for periods.		Class II. (c) Government estates leased to farmers for periods.		Class III. (a) Those managed for proprietors.		Class III. (b) Those owned by Government as proprietors.		Remarks.
	Current.	Arrear.	Current.	Arrear.	Current.	Arrear.	Current.	Arrear.	Current.	Arrear.	Current.	Arrear.	
2	3	4	5	6	7	8	9	10	11	12	13	14	15
Rajshahi	99·56	100	100	...	94·53	100	95·54	...	97·46	95·99	89·46	99·65	
Dinajpur	98·53	100	...	...	...	...	...	...	50·0	...	53·18	...	
Jalpaiguri	99·96	...	99·4[illegible]	100	...	...	...	...	...	...	66·21	97·36	
Darjeeling	52·60	...	...	...	...	...	96·32	100	...	...	99·02	94·54	
Rangpur	99·85	100	97·37	...	68·37	100	75·66	100	...	...	100	...	
Bogra	90·76	100	...	...	...	...	...	...	...	...	77·57	86·95	
Pabna	90·91	100	80·9[illegible]	100	94·87	100	65·73	100	67·49	86·17	76·30	72·94	

The percentage of current collections in permanently-settled estates was above the prescribed standard in all the districts except Dinajpur and Darjeeling, and the exceptions are no more than nominal; as in Dinajpur the money was received by Government within the prescribed period, though at a different treasury, and the amount uncollected in Darjeeling was never due; it was on account of revenue remitted for political reasons, but which is yearly entered as a demand in the accounts. Arrear collections were cent. per cent. in all the districts except Jalpaiguri and Darjeeling, where there were no arrears to collect.

In Rangpur the current collections in private and Government estates temporarily settled with farmers did not reach the prescribed standard. The short collections are stated to be due chiefly to the fact that the farmers voluntarily neglected to pay their revenue in time, and steps are being taken for its realization. This explanation appears to me insufficient, as it does not show why Government estates were farmed for a term of years, to persons of this character, they having no title to the settlements.

In Pabna the deficiency under this head is accounted for in the same imperfect manner.

The arrear collections were cent. per cent. in all the districts where estates were temporarily settled. This is a very satisfactory result, and indicates that the degree of unpunctuality shown by the returns does not ultimately cause any financial loss. In regard to this branch of revenue we are not in the position of the land-owner who, having a rental of a thousand a year, collects only eight hundred, but of the more fortunate proprietor who always gets his full thousand, though some part of it will be by way of arrears for the previous year.

The current collections on Government estates managed directly in Dinajpur, Jalpaiguri, Bogra and Pabna fell short of the standard. The decline was considerable in Jalpaiguri, and it is said to be due to the fact that the establishment was engaged in collecting arrears, that the date of the final kist is inconvenient, and to the low prices of grain. I am unable to accept this explaination. It is however satisfactory to observe that nearly all the arrears were realized in Jalpaiguri. That the current demand was not realized also I attribute to defective management at two of the four tahsils—Mynaguri and Falakata.

There were no arrears to collect in the districts of Dinajpur and Rangpur under the two heads. The percentages of the remaining districts vary from 97·36 in Jalpaiguri to 82·64 in Pabna.

Operation of the sale law.

51. Out of 979 estates liable to sale, 146 were put up to auction and 24 actually sold. The large number of defaults in Pabna have not been explained; the exemptions in that district were more numerous than in all the rest of the Division.

Settlements.

52. Seven original settlements, 27 resettlements, and 3 summary settlements making in all 37, were concluded during the year. The net increase of revenue obtained was Rs. 20,151. This amount includes Rs. 18,790, which was due to the resettlement of the 30-years' grants and jotes in the Terai.

The final reports for the settlement operations of the Darjeeling Terai and of the Jaipur Government estates in Bogra have been submitted.

Estates held under direct management.

53. The subjoined table will show the state of collections from these estates during the year:—

District.	Number of estates. Belonging to Government.	Number of estates. [illegible]	Number of estates. Total.	Total demand, arrear and current.	Total collection, arrear and current.	Total remission, arrear and current.	Total balance.	Percentage of collections on demand. Arrear.	Percentage of collections on demand. Current.	Percentage of collections on demand. Total.	Remarks.
1	2	3	4	5	6	7	8	9	10	11	12
				Rs.	Rs.	Rs.	Rs.

Agency and mode of management.

54. There was no material change during the year either in the agency or in the mode of management.

55. The following table shows the cost of management in the several districts:—

Cost of management.

District.	Revenue demand of estates for which the expenditure in column 3 was incurred.	Cost of management, including contingencies.	Percentage of column 3 on column 2.
1	2	3	4
	Rs.	Rs.	
Rajshahi	6,668	329	4·93
Dinajpur	27	...	...
Jalpaiguri	3,76,288	20,251	5·38
Darjeeling	1,32,853	13,195	9·9
Rangpur	26	...	...
Bogra	55,625	6,703	12·05
Pabna	16,019	2,380	14·32
Total ... 1898-99 ...	5,88,106	42,858	7·2
Total ... 1897-98 ...	5,60,720	43,977	7·8

Condition of raiyats, desertions, &c.

56. The condition of the raiyats in the khas mahals of the several districts was generally good.

In Jalpaiguri there were 15 desertions of holdings by raiyats of Government estates during the year, owing to either deaths of jotedars or depredations of wild animals.

Miscellaneous and sanitary improvements.

57. The following statement shows the expenditure from the grant for the management of miscellaneous and sanitary works of improvement during the year:—

Division.	District.	Amount expended from— 7½ per cent. Management proper.	Miscellaneous improvements.	Agricultural improvements.	Total.	Two per cent. for sanitary improvements.	Total of columns 6 and 7.	Grant by Board for miscellaneous agricultural and sanitary improvements.	Remarks.
1	2	3	4	5	6	7	8	9	10
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
Rajshahi	Rajshahi ...	329	1,109	...	1,109	35	1,144	1,305	
	Dinajpur ...	...	...	...	...	...	...	...	
	Jalpaiguri ...	20,251	2,966	1,954	4,920	8,488	13,708	21,000	
	Darjeeling ...	13,195	5,744	1,857	7,601	1,509	6,510	9,527	
	Rangpur ...	...	...	...	...	...	...	...	
	Bogra ...	6,703	1,306	454	1,760	510	2,270	2,270	
	Pabna ...	2,380	150	162	312	795	1,107	1,222	
	Total ...	42,858	11,275	3,127	14,402	11,337	25,739	36,333	

It will be seen that in the district of Bogra only was the full amount of the grant spent. In Rajshahi there was a balance of Rs. 159, in Darjeeling Rs. 1,017, and in Pabna Rs. 115. For the district of Jalpaiguri Rs. 21,000 were provided, but only Rs. 12,708 were spent, leaving a large balance of Rs. 8,292. I cannot find any satisfactory explanation for the failure of District Officers to spend the allotments.

The expenditure of Rs. 35 in Rajshahi under head "Sanitation" was incurred for clearing tanks and jungles in khas mahals Sirampur and Butanpur, and Nator cutcherry compound. The expenditure in Jalpaiguri was incurred in jungle-clearing, construction of a latrine, subscriptions and contributions to dispensaries, sinking wells, construction of a bridge, and repairs of culverts and drains. In Darjeeling Rs. 1,509 were spent on water-works and a latrine at Sukiapakuri and the construction of a well at Siliguri. In Bogra Rs. 510 were disbursed on the re-excavation of a tank at Dhalpara. In Pabna Rs. 795 were spent for sinking wooden wells.

Details of expenditure shown in columns 4 and 5 of the foregoing statement.

Division.	Districts.	Amount expended—					
		In digging tanks and sinking wells.	In drainage and irrigation.	In planting trees.	On roads.	On sundry works.	Total.
1	2	3	4	5	6	7	8
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Rajshahi.	Rajshahi ...	1,109	...	...	...	35	1,144
	Dinajpur ...	...	...	...	...	...	
	Jalpaiguri ...	3,597	1,694	...	1,031	6,386	12,708
	Darjeeling ...	250	...	...	1,811	6,449	8,510
	Rangpur ...	...	...	...	...	...	...
	Bogra ...	533	...	...	783	954	2,270
	Pabna ...	795	...	...	...	312	1,107
	Total ...	6,284	1,694	...	3,625	14,136	25,739

In Jalpaiguri, out of Rs. 3,597 shown in column 3, Rs. 3,509 were expended for purchasing materials for 29 Raniganj pipe wells, and sinking as many of them as could be done within the year, and Rs. 88 for fitting up a Pasteur filter to Alipur cutcherry well. Out of Rs. 6,386 disbursed on sundry works, Rs. 40 were spent in purchasing seeds for experimental purposes, Rs. 1,740 on the construction of Alipur, Dhupguri and Kyranti dispensaries, Rs. 1,816 for jungle clearing, and Rs. 990 in maintaining the rest-houses, tahsil office, and tahsildars' quarters. In Darjeeling the principal items of expenditure on sundry works were:—

	Rs.
(1) Construction and maintenance of dispensaries in the Terai ...	3,858
(2) Purchase, feed and keep of bulls for improving the cattle-breeding	1,219
(3) Sukniapakri water-works	1,147
(4) Purchase of seeds for experimental purposes	38

58. The subjoined statement shows the expenditure in connection with "Education" and "Roads and Communications" in the Government estates of this Division:—

Education and roads and communications.

Division.	District.	Amount of one per cent. grant for education.	Amount spent and number of schools and pupils.			Amount of one and a half per cent. grant for roads and communications.	Amount expended—		Remarks.
			Rupees.	Number of schools.	Number of pupils.		On repairs.	On new works.	
1	2	3	4			5	6		7
		Rs.				Rs.	Rs.	Rs.	
Rajshahi	Rajshahi ...	104	23	2	21	...	1,224	538	
	Dinajpur ...	...	...	...	...	...	...	...	
	Jalpaiguri ...	4,938	5,193	126	2,746	...	15,704	19,108	
	Darjeeling ..	12,861	11,611	73	1,644	2,391	12,397	11,968	
	Rangpur ...	...	...	...	...	...	...	...	
	Bogra ...	406	406	12	304	...	1,716	175	
	Pabna ...	356	356	22	766	180	51	...	
	Total ...	18,665	17,589	235	5,481	2,571	31,092	31,787	

From the foregoing statement it will be seen that in some districts the total amount spent on education and roads exceeds the percentage grants. This is due to the fact that the expenditure is met not only from the management grant, but also from other funds, such as district and other local funds.

Cultivation of new staples.

59. In Jalpaiguri an experiment is being made with the assistance of the Central Duars Tea Company to grow *Rhea*; the seeds are still in the nursery. In Bogra good results have been obtained from Naini Tal potato seeds, the outturn being eight times the quantity sown, and the quality was much superior to the country variety. The tenants appear to take great interest in growing the crop.

Agricultural improvements, implements, machinery, &c.

60. No new implements or machinery were introduced in any estates in the several districts of this Division. Rupees 1,214 were disbursed in Jalpaiguri for works of improvements. In Darjeeling the following expenditure was incurred:—

	Rs.
(1) Purchase of two bulls from the Political Officer of Sikkim for use of Kalimpong khas mahals	80
(2) Purchase of 10 Siri bulls for improving the cattle-breeding in the hills	685
(3) Feed and keep of 16 Siri bulls	454
(4) Purchase of American maize seeds	38

Besides Rs. 24 spent for the purchase of wheat and potato seeds in Bogra, Rs. 430 were sent to the Director of Land Records for the purchase of bulls. Rupees 200 were also spent for an agricultural show at Rukindpur fair. In Pabna Rs. 162 were spent for the purchase of two bulls.

Working of the Public Demands Recovery Act.

61. The total number of certificates for disposal, including arrears, was 12,724, as against 15,421 in the previous year. The number of certificates filed has decreased by 1,945. The cases disposed of exceeded the institutions, so that there was a decrease in the pending cases as compared with the preceding year, viz., 2,968, against 3,246. The number disposed of exceeded 69 per cent. in each district of the Division. Out of Rs. 2,39,814 realized during the year, Rs. 95,014 or 39·7 per cent., were realized on mere

issue of notice. Rupees 1,36,469 were realized on issue of sale notification and the balance, Rs. 8,381, on sale or arrest.

The following statement shows the work in each district and percentages of cases disposed of to total cases for disposal:—

DISTRICT.	Number of certificates pending at the beginning of the year.	Number of certificates issued during the year.	Total.	Number of certificates disposed of during the year.	Number of certificates pending for disposal.	Percentages of certificates disposed of to total cases for disposal (column 5 on column 4).
1	2	3	4	5	6	7
Rajshahi ...	471	1,027	1,498	1,251	247	83·5

Pabna ...	1,504	2,273	3,777	2,629	1,148	69·6
Total ...	3,213	9,511	12,724	9,756	2,968	76·7

* Revised figures.

Land acquisition.

62. The total number of cases for disposal was 68, of which 20 were disposed of and 48 cases remained pending at the close of the year, against 23 in the preceding year.

Partition.

63. There were 32 cases pending at the commencement of the year, 13 institutions and 11 disposals, leaving 34 cases pending at the close of the year.

Registration of land mutations.

64. The number of cases instituted during the year was 2,317, against 2,034, and the number pending from the previous year 572, making a total of 2,889 cases for disposal. Two thousand three hundred and ninety-one cases were disposed of and 498 were pending at the close of the year. The instructions contained in the Board's Circular order No. 3, of September 1891, dispensing with the necessity of recording evidence of possession in uncontested cases, have been duly observed by registering officers.

Working of the Bengal Tenancy Act.

65. In Jalpaiguri the Act came into force from the 1st January 1899 under Government Notification No. 963 T.R., and 964 T. R., of the 5th November 1898. It is reported to have worked smoothly. The Subdivisional Officer of Alipur, who formerly tried rent cases as Deputy Collector, and now tries them as Munsif, has very exceptional opportunities of forming a correct opinion on the subject. He observes :—

"Rent suits can now be more summarily disposed of without going into the lengthy process of recording the statements of the parties, framing issues, and fixing another date for recording of evidence, as was required under Act X of 1859, sections 59 and 65. The introduction of this Act will lead to a further increase in the number of institutions of civil suits. It has made the position of chukanidars and dar chukanidars existing before the time of the last settlement more secure, as they were liable to eviction for default in payment of a single year's rent, and the jotedars took every opportunity they could to avail themselves of the provisions of the old Act in ejecting their raiyats."

The fact is that Act X of 1859 is now an antiquated enactment. It was made when very slender experience had been accumulated on the subject, with a view rather to the requirements of the North-West Provinces than to those of the outlying districts of Bengal, where its existence has been

prolonged. It is now out of date everywhere, and should be superseded by more modern enactments. The view that, being somewhat old, it must be peculiarly suited to backward places, has always appeared to me to be a popular fallacy: it is highly technical in its procedure, and most difficult of construction.

66. The following statement shows details as to those operations of the Act which are under the control of the Revenue authorities:—

Division.	Districts.	Transfers of tenures. (a) Voluntary, section 12 (3).	(b) By decree sale, sections 13 (2) and 14.	(c) By succession, section 15.	Commutation of rent payable in kind, section 40.	Appraising of produce when rent is paid in kind, sections 69 and 70.	Registration of improvements, section 80.	Certificate of Collector as to acquisition of land for building or other purposes, section 84.	Notices of resumption of land by landlords, section 87 (2).	Written permission to landlords to measure land under section 90.	Applications by Collector for appointment of common Manager under section 93.	Applications made for survey and record of rights under Chapter X.	Applications made for the survey and record of proprietor's private lands under Chapter XI.	Local enquiries held by the order of a court, section 158.

Relations between landlords and tenants.

67. The relations between landlords and tenants were generally peaceful.

LOANS.

Advances under Act XIX of 1883 (the Land Revenue Improvement Act).

68. Out of the sum of Rs. 4,800 allotted to the Collectors under the Land Improvement Loans Act, nothing was disbursed during the year under report in any district of the Division. Nobody came forward to take advances, owing probably to the good harvests of the year.

Advances under Act XII of 1884 (Agriculturists' Loans Act).

A total of Rs. 188 was advanced under the Agriculturists' Loans Act, 1884, as against Rs. 10,825 in the previous year. Of this sum, Rs. 150 were disbursed in Darjeeling and Rs. 38 in Pabna. In other districts no advances were made during the year. In Rajshahi eight applications under the Act were received. Of these, 5 for Rs. 180 were rejected on account of insufficiency of the security offered, and 3 for Rs. 160 were granted, but the applications were subsequently struck off the file, as the applicants did not appear to take payment.

Training of young civilians in survey and settlement work.

69. In Rajshahi Mr. H. L. Salkeld was placed in charge of the Settlement Department during a portion of the year. He was deputed temporarily to the settlement camp in Darbhanga to receive his training in survey and settlement work. In regard to Mr. Botham, the Collector states that he joined his appointment in the district towards the close of the year, and was chiefly employed in treasury work, and had no opportunity to learn the work. Mr. J. J. Platel, Subdivisional Officer of Sirajganj, was in charge of settlements, under the regulations, of petty Government and resumed estates in the subdivision.

Deputy and Sub-Deputy Collectors.

70. There is nothing special to record under this head.

* * * * * * *

XIX.—EXCISE.

72. The subjoined statement shows the excise revenue in the several districts of this Division during the year 1898-99:—

istricts.	Country spirit.		Tari.		Pachwai.		Rum, &c.		Charas, &c.		Ganja and bhang.		Opium.		Druggists' licenses.		Miscellaneous.		Total.	
	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.

ra ...	25,585	24,601	338	302	386	491	810	937	...	...	22,152	24,008	16,192	16,061	10	11	61	55	65,534	66,586
na ...	33,059	32,787	204	326	308	487	1,708	1,732	...	...	48,066	50,716	16,691	16,768	19	21	26	105	1,01,671	1,02,942
Total ...	5,22,944	5,16,410	3,801	3,951	37,600	42,363	31,469	35,311	...	...	2,51,987	2,50,391	1,96,919	1,88,293	261	248	517	1,819	10,45,489	10,47,786

It will be seen that the total amount of excise receipts, exclusive of the cost price of opium realised, increased from Rs. 10,45,489 in the preceding year to Rs. 10,47,786. I am surprised that the increase was thus merely nominal, as the improvement in the harvest was so great.

During the year 149,258 gallons of country-spirit were consumed, against 142,078 gallons in the preceding year, but the revenue under this head diminished. The consumption of ganja and opium was 416 and 148 maunds, against 380 and 154 maunds, respectively, in the preceding year.

The rate of excise revenue per head of the population was as follows in the several districts:—

	A.	P.		A.	P.
Rajshahi	1	5	Rangpur	1	5
Dinajpur	1	4	Bogra	1	4
Jalpaiguri	4	11	Pabna	1	2
Darjeeling	15	11			

It will be seen that in the plains the consumption is uniform and small, but that there is a very great increase when we come to the Terai and Himalayan districts of Darjeeling and Jalpaiguri.

73. Ganja is cultivated in a tract of country about 64 square miles in area, lying within thanas Naugaon and Mahadebpur in the Naugaon subdivision of the Rajshahi district. In consequence of the destruction of the plants in the nurseries by heavy rains, the area under the crop decreased from 2,108 bighas to 1,531; the number of cultivators growing the drug from 1,892 to 1,834; and the produce from 5,793 maunds to 5,417. The average outturn of the crop was 3 maunds 20 seers per bigha, against 2 maunds 30 seers in the previous year.

The total quantity of ganja exported from Naugaon was 5,867 maunds, against 5,966 in the preceding year. The decrease of 99 maunds was due to smaller export to Assam. The distribution of the export was as follows:—

	Maunds.
Bengal	4,072
Orissa	255
Assam	545
Cooch Behar	67
North-Western Provinces	328
Total ...	5,867

The export to the North-Western Provinces is gradually increasing, as the demand for Rajshahi ganja is increasing in those Provinces, where it is now exported under bond, free of duty.

There was no change in the rates of duty on ganja during the year.

XX.—STAMPS.

74. The following table compares the stamp revenue of the year 1808-09 with that of the preceding year:—

District.	Court-fees.		Copies.		Non-judicial adhesive.		Receipts.		Non-judicial impressed.		General.		Court papers.		Total.	
	1897-98.	1898-99.	1807-98.	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.	1808-99.	1897-98.	1808-99.	1897-98.	1898-99.	1897-98.	1898-99.

There has been an increase in the revenue derived by the sale of the "Court-fees stamps" "Stamps for copies" and "Court paper," whereas a falling off is observable under the heads "Receipts," "Non-judicial impressed" and "General"—the result being a decrease of Rs. 14,789 in the total receipt from the sale of stamps of all descriptions. This decrease is said to have been due to good harvests in the Division, which reduced the number of non-judicial impressed stamps sold for the execution of bonds.

The number of cases in which deficient stamp duty and penalty were levied by Civil Courts under section 34 of the Indian Stamp Act, I of 1879, was 193 against 178 in the previous year, showing an increase of 15. The amount of duty and penalty realised was Rs 1,212 against Rs. 1,405 in the preceding year, showing a decrease of Rs. 193. The number of cases in which duty and penalty were realised by Collectors was 268 against 252, and the amount of duty and penalty realised was Rs. 4,880 against Rs. 1,769 in the previous year. This unusual increase in the amount of fines and penalty realised was chiefly due to the realization of Rs. 2,917, being the deficient duty for probate of will executed by the late Fanindra Deb Raikat of Jalpaiguri.

The number of prosecutions instituted for the infringement of the provisions of the Indian Stamp Act was 34 against 33, the number of persons brought to trial was 39 against 59, the number of convictions was 35 against 58, and the amount of fines imposed was Rs. 323 against Rs. 530 in the preceding year. Nothing was disbursed as rewards during the year under report. The decrease in the number of persons brought to trial and convicted as well as in the amount of fines imposed has been attributed to the better acquaintance of the people with provisions of the Stamp law.

XXI—INCOME-TAX.

75. The general result of income tax operations is summarised in the following abstract:—

Year.	Number of persons assessed.	Demand.	Collections.	Percentage of collections to demand.	Distress warrants.	Penalties.	Expenditure.	Percentage of expenditure to collections.	Objections.
1	2	3	4	5	6	7	8	9	10
		Rs.	Rs.			Rs.	Rs.		
1898-99	13,851	3,38,835	3,33,700	98·5	713	5,215	17,091	5·1	825
1897-98	13,675	3,32,201	3,28,708	98·9	819	4,176	17,082	5·2	823
Increase or decrease	+176	+6,634	+4,992	...	—106	+1,039	+9	...	+2

It will be observed that there was a slight increase both in the number of assesses and the amount assessed, and that collections were a shade less favourable than in the previous year. The collection exceeded the prescribed limit of 95 per cent. in all the Districts of the division; in Darjeeling, Pabna and Rajshahi, they exceeded 99 per cent.; Bogra and Dinajpur show the least favourable results. The proportion of persons assessed to population for the Division was 1 to 585, and the average incidence of the tax in the Division was one rupee to 24 persons. The incidence was highest in Darjeeling, viz., one rupee to 4 persons and lowest in Rangpur, viz., one rupee to 40 persons. Out of 13,851 persons finally assessed, distress warrants were issued against 713, as compared with 819 in the preceding year. The number of cases in which taxes were realised by the sale of property was 114 against 133 in the preceding year.

* * * * * * * *

XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

(a) Railways and railway feeders.

79. Survey parties of the Ranaghat-Katihar Railway survey were at work on the banks of the river Ganges or Padma, and on a line from Godagari to Sultanpur near Naugaon in Rajshahi. A sum of Rs. 73 was spent in surveying the projected tramway line from Raiganj to Lahiri in the Dinajpur district. The work is in progress. The construction of the Cooch Behar State Railway extension from Torsa to the town of Cooch Behar and that from Cooch Behar to Jainti was undertaken during the year. The length of this line is 35·30 miles The first section from Torsa to Cooch Behar was opened for traffic on the 15th December 1898, and the construction of the other section is well in hand. The portion within the Cooch Behar State was opened for traffic from the 15th April 1899, while the extension to Jainti in the British territory is not yet opened. The earthwork of the Bengal-Duars Railway extension, viz., from Malbazar to Madarihat, 44 miles, Dam-Dim to Bagracote 6·76 miles, and Barnesghat to Lalmonirhat, 65·8 miles, was commenced during the year. The line from Sultanpur to Bogra was opened for all kinds of traffic on 1st April 1899.

Railway feeders.

The railway feeders in Rajshahi were kept in a fair state of repairs during the year. Little could be done, owing to want of funds, towards the construction of new railway feeders in Rangpur. Rupees 762, however, were expended on a new road from Chilahati to Chatnai; but unless special grants for the purpose can be given by Government, it will be almost impossible to do anything in this direction for several years to come, as practically all the funds of the District Board will have to be expended on the repairs to the main roads of the district rendered necessary by the earthquake.

Other public works.

The imperial and provincial buildings remained in charge of the Public Works Department during the year. At the sadar station of Jalpaiguri two new buildings were constructed, viz., (i) Telegraph Office building, (ii) Munsif's Court building, besides few additions to the treasury building and the Deputy Commissioner's office building. The construction of the circuit-house has been commenced but not completed. The new tahsil office building at Alipur in the Alipur subdivision in Jalpaiguri was completed during the year. A record-room was also constructed for the Subdivisional Office records at Alipur. The construction of record-racks for the Pabna Collectorate was completed at a cost of Rs. 4,940. With the exception of the Post Office building and the Barakuthi at Sirajganj, all the public buildings wrecked or damaged by the earthquake have been repaired. The Barakuthi is under reconstruction, but the Post Office building has been given up by the Department as no longer required, as the office has since been converted into a sub-office.

(b) Steamer service.

80. The steamers that ply between Goalundo and Malda, touching at Damukdia, Rampur Boalia, and Godagari, as well as some other intermediate stations were occasionally delayed by running aground during the dry season. The District Board pay no subsidy to the Company. The District Board of Pabna have discontinued the subsidy of Rs. 5,000 which was paid annually to the Indian General Steam Navigation Company for the steam-ferry service between Pabna and Kushtia.

(c) Tanks, wells, roads, &c., constructed, &c., by private individuals and by the District Board.

81. The total number of tanks and wells, roads and bridges, and other works of public utility, constructed and repaired during the year 1898 by private individuals at their own cost, are shown in the following table:—

DISTRICT.	Number of tanks and wells.	Cost.	Number of roads and bridges.	Cost.	Hospitals, schools, and other works of public utility.	Cost.	REMARKS.
1	2	3	4	5	6	7	8
		Rs.		Rs.		Rs.

XXIV.—COMMUNICATIONS.

82. The amount spent on original works and repairs by the several District Boards is shown in the following table:—

District.	Original works. Total amount proposed to be spent.	Original works. Total actual expenditure.	Repairs. Total amount proposed to be spent.	Repairs. Total actual expenditure.	Total proposed amount (columns 2 and 4).	Total actual expenditure (columns 3 and 5).	Percentage of column 7 on column 6.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
Rajshahi ...	22,243	16,532	57,566	47,923	79,809	64,455	87·6
Dinajpur ...	18,667	17,259	34,748	34,263	53,415	51,522	96·4
Jalpaiguri ...	40,582	20,955	56,371	41,794	96,953	62,749	64·7
Darjeeling ...	25,440	11,968	14,426	12,804	39,866	24,772	62·1
Rangpur ...	29,641	9,469	60,954	16,106	90,595	25,575	28·2
Bogra ..	15,728	9,414	20,047	19,614	35,775	29,028	81·14
Pabna ...	13,836	8,580	23,724	19,230	37,560	27,810	74·04
Total for 1898-99	1,66,137	94,177	2,67,836	1,91,734	4,33,973	2,85,911	65·8
Total for 1897-98	1,41,542	70,682	2,31,003	1,84,434	3,72,545	2,55,116	68·5

The expenditure on original works was incurred mainly in improving existing roads and in constructing bridges along them.

Village roads.

83. The amounts spent in the construction and repairs of village roads in each district are shown below:—

District		Rs.	District		Rs.
Rajshahi	...	7,199	Rangpur	...	10,979
Dinajpur	...	1,824	Bogra	...	1,149
Jalpaiguri	...	96	Pabna	...	1,880
Darjeeling	...	124			

Arboriculture.

84. In Rajshahi Rs. 404 were spent in planting trees on roadsides. The number of established trees is 4,655. In Dinajpur 2,985 trees were maintained and 1,299 trees newly planted during the year. In Jalpaiguri the number of trees planted and that maintained during the year were 153 and 6,605, respectively, at a total cost of Rs. 216. Rupees 1,655 were spent by the Public Works Department on planting and maintaining trees on roads in Darjeeling. The expenditure on aboriculture in Rangpur was Rs. 490, the number of new trees planted being 705 and the number maintained being 11,322, of which 538 died owing to floods. In Bogra the number of existing roadside trees was 14,366; besides, 763 new trees were planted during the year. The total cost of planting and maintaining roadside trees was Rs. 959. Nothing was spent under this head in Pabna during the year. The village chaukidars were placed in charge of trees within their beats, but the scheme did not work well.

* * * * * * *

XXVI.—EDUCATION.

86. The following table indicates the number of pupils under education in the schools of different classes at the end of the year:—

Class of Schools.	Number of schools at the end of March.		Number of pupils at the end of March.		Cost per head of pupil.	
	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.
1	2	3	4	5	6	7
High English	26	28	4,772	5,670	25·8	22·2
Middle do.	97	100	6,634	6,617	11·7	12·
Do. vernacular ...	132	127	6,322	5,808	8·4	8·4
Primary schools	3,622	3,715	97,611	101,417	2·6	2·4
Special do.	9	23	469	888	59·3	35·4
Total ...	3,886	3,993	115,808	120,400	5·4	5·3

87. The figures indicate an improvement in the number of schools and pupils, with a corresponding economy in the cost of education to the individual scholar. In high English education the increase appears to be normal, the demand for such instruction becoming greater every year, as the official business of the country is transacted to a greater extent in that language. Primary education fluctuates with the seasons, this year the conditions were favourable, the harvest being good, and the floods moderate. The time has passed away when we were able to report year by year some permanent progress in the spread of education among the illiterate masses.

88. The following table gives the districts ranked according to educational progress as evidenced by the number of pupils attending school.

District.	Number of boys of school-going age.	Number under instruction		Percentage of pupils under education to the number of school-going age.		Increase.	Decrease.	Remarks.
		1897-98.	1898-99	1897-98	1898-99.			
1	2	3	4	5	6	7	8	9
I.—Bogra	58,946	13,046	13,546	21·4	22·1	·7	...	
II.—Pabna	101,587	21,074	23,327	19·8	21·1	1·3	...	
III.—Jalpaiguri ...	54,698	10,754	11,606	18·4	19·8	1·1	...	
IV.—Dinajpur ...	116,167	20,912	21,298	17·4	17·8	·4	...	
V.—Rajshahi ...	107,694	20,713	19,641	18·08	17·2	·88	·88	
VI.—Rangpur ...	169,274	26,789	28,868	15·6	17·2	1·6	...	
VII.—Darjeeling ..	18,456	3,520	3,414	18·3	16·2	2·1	2·1	
Total ...	6[illegible]6,808	115,[illegible]08	120,400	17·9	18·6	·7	...	

89. As in the previous year, Bogra heads the list, and the number under instruction also shows an increase. In the B. A. examination of 1898, five students passed from the Rajshahi College. In the F. A. examination, one stood in the competition list, obtaining a first grade scholarship. In the B. L. examination none passed.

During the year the Rani Monmohini Debi's Endowment was diverted from the Law to the General Department of the College, founding scholarships, free studentships and medals.

Raja Promoda Nath Roy Bahadur, of Dighapatia, has founded a scholarship of Rs. 10, to be awarded to a graduate of the College reading for the M. A. degree examination.

90. The Rangpur Technical School continues to do fairly useful work. The Pabna Technical School sent up 15 candidates for the Sub-Overseership examination, of whom 10 passed. This result I consider most satisfactory.

XXVII.—HOSPITALS AND DISPENSARIES.

91. The following table shows the working of the dispensaries in the several districts of this Division:—

District.	Number of dispensaries.	Income from— Municipalities.	District Board grant.	Government.	Private subscriptions, endowments, &c.	Total.	Expenditure.	Total number treated. In-patients.	Out-patients.	Total.	Daily average number of in-patients.	Daily average number of out-patients.	Cost of diet per in-patient.	Ratio per cent. of the number of outdoor patients to population.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.						Rs. A. P.

Figures for 1897	15	3,868	1,195	232	10,257	15,487	14,885	636	69,424	70,060	26·87	357·69	0 2 11	3·36
Bogra	8	2,148	4,078	407	1,889	8,485	8,498	249	33,820	34,069	10·94	253·27	0 1 10½	4·40
Figures for 1897	9	1,995	3,341	390	2,463	8,059	8,068	356	31,704	32,130	13·27	254·74	0 2 0¼	4·15
Pabna	6	2,388	940	244	6,251	9,857	8,853	512	30,371	30,883	23·06	283·49	0 2 0	3·2
Figures for 1897	6	3,770	990	318	3,633	8,001	8,698	762	27,740	28,502	27·86	214·91	0 2 1	3·04
Divisional Total for 1898.	71	30,489	23,771	10,514	47,530	1,01,303	95,303	4,146	3,17,112	3,25,273	157·85	2,110·97	0 2 0	4·
Ditto for 1897 ...	73	25,556	17,401	9,060	64,676	1,17,012	1,14,719	5,440	3,06,771	3,12,557	206·	2,245·6	0 2 4	3·9

It is worthy of note that though the health of the people was much better this year than last, the number of patients treated was greater. This speaks well for the efficiency of the institutions and their popularity.

Besides the dispensaries accounted for in the table, there are several institutions maintained by private individuals—one at Tahirpur in Rajshahi, by Raja Sasisekareswar Roy Bahadur; one at Saidpur, by the Eastern Bengal State Railway; and one at Govindganj, by the Tagore estate. Both these dispensaries are in Rangpur. The Panga dispensary in the Kurigram subdivision is maintained by the Maharaja of Cooch Behar. The dispensary at Sara, which belongs to the Eastern Bengal State Railway, affords medicines to the railway employés as well as to the public.

XXVIII.—LIBRARIES.

92. The public library at Rampur Boalia is a flourishing institution. Some of the leading zamindars of the district, the District Board, and the Rampur Boalia Municipality regularly contribute to its funds. Its income amounted to Rs. 1,977 during the year. The number of books in the library in English, Bengali and Sanskrit is about 5,000, and the number of subscribers, consisting of males, females, and juveniles, is 136. There are two public libraries in Rangpur, maintained by public subscriptions. The one at Saidpur is in a good condition, but no new building for that at the sadar station has yet been constructed after the earthquake of the 12th June 1897. Nawab Syed Abdus Subhan Choudhuri, of Bogra, has contributed Rs. 2,000 towards the reconstruction of the Library building at Bogra. There are five public libraries in the district of Pabna, viz., one at Pabna, one at Sirajganj, one at Parjona, one at Jamirta, and one at Sthal. The number of books in the Pabna library is 1,471. The income of the institution amounted to Rs. 418 during the year. The library at Sirajganj is maintained by public subscriptions. Its income this year was Rs. 336. The libraries at Parjona, Jamirta and Sthal are supported by the local zamindars. There is no public library in Dinajpur, Jalpaiguri or Darjeeling.

XXXIII.—ZAMINDARI DÂK

98. The demand on account of the zamindari dâk cess was Rs. 51,017 for the current year and Rs. 1,471 arrears, making a total demand of Rs. 52,488. The collections, including excess payments made in previous years, were Rs. 51,274, leaving an outstanding balance of Rs. 1,189. The percentage of collections on demand is 97·68, against 86·17. The following statement shows the expenditure and balance of the Zamindari Dâk Fund in the several districts of the Rajshahi Division during the year 1898-99:—

District.	Collections.	Balance in hand from the previous year.	Total.	Expenditure.	Balance in hand.	Remarks.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	
Rajshahi ...	11,751	860	12,611	10,707	1,904

Total of 1897-98	47,523	35,005	82,528	51,440	31,088	

It will be seen that in all the districts the balances were adequate. The rates per Rs. 100 of revenue at which the cess was levied were as follows:—

	Rs.	A.	P.
Rajshahi	1	0	0
Dinajpur	0	10	0
Jalpaiguri	2	0	0
Rangpur	1	4	0
Bogra	1	4	0
Pabna	2	4	0

Fairs.

99. The most important fair in the Division is that held at Nekmurd, in the district of Dinajpur, during the month of April. The following statistics regarding it were collected by police agency. The Collector reports that they may be accepted as approximately correct:—

I.—LIVE-STOCK.

Description of animals sold.	Number sold.		Total prices realized.		Average price per head.		Remarks.
	1897.	1898.	1897.	1898.	1897.	1898.

Miscellaneous, including fancy articles, blankets, durries, &c. ...	300	40,000	30,000	
Earthenware	50	1,500	1,200	

As stated last year, three fairs are held annually in Jalpaiguri. The fair at Jalpesh, the largest in the district, commenced on the 10th March 1899, and lasted till the 27th idem. It was not so well attended as in the preceding year, owing chiefly to the heat of the season when the fair commenced. The income derived from different sources amounted to Rs. 1,012, and the expenditure incurred in its management was Rs. 163. The fair at Alipur lasted from 1st to 15th February 1899. The estimated value of articles sold was Rs. 4,500, against Rs. 5,000 in the preceding year. A grant of Rs. 200 was made by Government. The public subscribed Rs. 99-8. The whole amount was spent in erecting sheds, making sanitary arrangements, awarding prizes for specimens of agricultural and local produce, and on providing entertainments. The Falakata fair commenced a few days later than the 10th February, and continued till the middle of March. It was most unsuccessful. The annual Government grant of Rs. 300 was received for the purpose. The annual Agricultural Show at Kalimpong in the district of Darjeeling was held on the 30th November and 1st December 1898. It is reported that the *mêla* showed a distinct advance on the previous ones in the character of the exhibits, especially grains, fruits and vegetables. The total number of visitors was 5,000, being the same as in the preceding year. Rupees 500 were contributed by the Darjeeling Improvement Fund, Rs. 500 by the Agricultural Department, and Rs. 500 by the Veterinary Department of Government to meet expenses, and Rs. 908 were raised by local subscriptions. A considerable number of Bhutia ponies were purchased by planters and others. Government purchased about 100 mules for transport purposes.

The only fair of any importance in the district of Rangpur is the one held in Darwani in the months of February and March and lasts for about a month. It is mainly a cattle fair. The annual gathering of people varies from 50,000 to 60,000.

FERRIES.

100. The Division is one in which the management of ferries is a matter of great importance. There are 351 under public management, bringing in a revenue of Rs. 1,06,900. I have interested myself in securing the introduction of better boats, on the platform plan, into which a cart can be wheeled without unloading. In this matter I observe that considerable progress has been made. The Rajshahi District Officer notes that two such platforms of teak timber were supplied, and that a large grant for improvement has been assigned during the current year. In his jurisdiction the want of such

arrangements was formerly very conspicuous. The Magistrate of Dinajpur writes :—

"The District Board has supplied wooden platform-boats to five important ferries at Samjhia, Kanthanagore, Phulbari, Dangi and Nischintapur. During the year under report one more ferry at Mohonbati has been supplied with wooden platform, and other ferry farmers have been directed to keep boats with bamboo platforms.

"Five ferries at Radhicapur, Tambuli, Atwari, Jetmalpur and Sabnasaid will be supplied with wooden platforms during the current year, in accordance with estimates which had already been framed."

The policy of occasionally supplying plant, instead of leaving that work always to the ferry farmers, has been advocated by me, and approved by Government. I notice that it has at last commended itself to the Jalpaiguri Board, the other District Boards having previously adopted it. The object for the present is to show what good ferry boats should be, thus raising the expectation of the public, and of the officers of Government, so as to keep the farmers up to a proper standard. In time I hope that the plant at all public ferries will be supplied by the Boards; it is only the fees that should be farmed out. The object of the farming system is to prevent the fraud incidental to collections which cannot be checked, and so far as it is not necessary it should be discouraged. I observe that the farmers frequently default, and if they cannot pay dues sure to be severely exacted they are not likely to incur much outlay on boats.

POUNDS.

101. The number of pounds rose from 676 to 709, and the revenue also increased from Rs. 79,731 to Rs. 91,934. They are generally leased out every year to the highest bidder at auction sales. The increase in the receipts is generally attributed to realization on account of sale-proceeds of unclaimed cattle. In Dinajpur eight pound farmers were prosecuted and seven were convicted for neglect in supplying fodder and water to the impounded cattle, and for not keeping pound-sheds and fencing in proper repairs.

* * * * * * *

XXXVI.—CONDUCT OF ZAMINDARS.

106. The larger land-owners of the Division are well known for their liberality. The District Officers have named the following as distinguished in this respect:—

His Highness the Maharaja of Cooch Behar, who owns a valuable estate in the district of Jalpaiguri.

Maharaja Manindra Chandra Nundy, of Cossimbazar.

Ray Banamali Bahadur, of Taras.

The Maharaja of Dinajpur and Radha Govinda Rai Saheb of that district are praised for their special popularity among their tenants. In Pabna only is there any mention of serious disputes between one zamindar and another. The Collector of Dinajpur refers to the prevalence of the practice of levying illegal cesses, but much of the evil which formerly attended that custom has disappeared now that the raiyats realise that the cesses are really illegal. Irregular demands are now complied with mainly because the tenants prefer a payment which they can stop at any moment to the chances of a law suit for raising rent in proportion to the rise in prices. It is, of course, known that the Bengal zamindars do not undertake the function of English land-owners in regard to maintaining or improving farms.

FINAL REPORT ON THE SUGARCANE CROP OF BENGAL IN 1899.

The following report is published for general information.

F. A. Slack,

The 13th January 1900. *Offg. Secy. to the Govt. of Bengal.*

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Final Report on the sugarcane crop of Bengal in 1899.

1. *Explanatory.*—The following final report on the sugarcane crop of Bengal is issued under the recent orders of Government, directing that a preliminary and a final forecast of sugarcane should in future be submitted in place of the note on the crop which has hitherto been incorporated in the final note on the *rabi* harvest.

Reliable estimates of the sugar produced from other sources than cane in the province are not yet available, and hence no statistics showing this are furnished in the present report.

2. *Character of the season.*—The character of the season up to the end of July was described in the preliminary forecast of the sugarcane crop of Bengal issued by this Department on the 2nd August 1899. In August, the rainfall was excessive in most parts of these provinces, excepting in South-West Bengal and Orissa, where it was slightly in defect, and in Chota Nagpur, where it was only half the normal fall. In September, the rainfall was general in Bengal and Bihar, but deficient in Chota Nagpur and Orissa. In October, it was excessive in East Bengal and Orissa, but fell below the normal in the rest of the province. Only a few scattered showers were received in the month of November. There was practically no rain in December. The season was generally rather favourable to the sugarcane crop at the beginning, but the excessive rain in August, September, and October, in some parts, appears to have adversely affected the prospects of the crop, while, in a few places, it appears to have suffered from a want of seasonable rainfall as well as from insect pest.

3. *Area sown.*—The District Officers of Rajshahi, Dacca, Backergunge, Muzaffarpur, Monghyr, Bhagalpur, and Purnea have revised their estimates of normal area since the date of the final report, in consequence of which the provincial total now stands at 893,900 acres against 896,700 acres shown in the preliminary forecast. The figures representing the area under sugarcane, both this and last

year, have also been revised by some District Officers. According to the district estimates, the total area cultivated in sugarcane this year is 860,200 acres against 861,100 acres cultivated last year. The slight decrease of 900 acres appears to be altogether casual and to call for no explanation.

4. *Outturn.*—From the Statement I appended to this note, it will be seen that only three districts report a crop which is above the normal, viz., 24-Parganas (107), Sonthal Parganas (105), and Gaya (102); nine districts, viz., Murshidabad, Rajshahi, Dinajpur, Darjeeling, Faridpur, Backergunge, Saran, Cuttack, and Balasore estimate an average crop. All the remaining 33 districts report a crop which is below the normal. Only six districts report a better crop than was expected in August last, while in 17 others the estimates remain unchanged. All the remaining 22 districts report a worse crop than previously anticipated. The estimate made in the first forecast issued by this Department was a normal crop. The conditions have since changed for the worse, and the final estimate of the actual outturn of the sugarcane crop may be taken as 84 per cent. of a normal crop.

5. *Gross outturn.*—Accepting an 84 per cent. crop for the province, as stated above, the estimate of the probable gross outturn of *gur* or raw sugar may be taken as 15,896,500 cwts. against 17,428,700 cwts. produced last year.

D. L. ROY,

Asstt. Director of the Department of Land Records and Agriculture, Bengal.

COUNTERSIGNED.

S. L. MADDOX,

Offg. Director of the Department of Land Records and Agriculture, Bengal.

CALCUTTA,

The 7th January 1900.

APPENDIX I.

Final Report on the Sugarcane Crop of 1899.

Division.	District.	Total area of district, in acres.	Total area estimated to be under cultivation, in acres.	Approximate normal area under sugarcane crop, in acres.	Approximate area under sugarcane, last year (1898), in acres.	Estimated area under sugarcane this year (1899), in acres.	Taking 100 to represent the normal outturn, how much represented the outturn last year (1898)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1899)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11
Burdwan ...	Burdwan ...	1,726,020	1,283,800	27,400	27,400	27,400	93	75	Heavy rainfall this year and the flood of the Damodar much damaged the crop.	
	Birbhum ...	1,121,920	900,000	9,900	6,900	7,000	40	61	The excessive rainfall in the latter part of September and October last has damaged the sugarcane crop considerably.	
	Bankura ...	1,677,440	642,800	15,000	17,000	17,600	87	88	....	
	Midnapore ...	3,319,040	2,125,900	20,400	18,300	18,700	73	97	....	
	Hooghly ...	1,067,360	702,300	14,500	13,000	13,900	84	86	....	
Presidency ...	24-Parganas ...	3,574,551	1,102,000	4,500	4,000	4,000	107	107	Owing to the favourable rainfall, the outturn is estimated to be above the normal. The decrease in the area sown as compared with the normal is ascribed to the insufficient rainfall when cultivation commenced.	
	Nadia ...	1,788,160	1,510,700	14,000	14,000	16,700	80	78	....	
	Murshidabad	1,373,440	966,500	17,000	16,800	17,000	76	100	The increase in the area and outturn is due to the seasonable rainfall and to sufficient water being available for early irrigation.	
	Jessore ...	1,872,000	11,421	15,000	11,500	14,800	67	82	....	

Division.	District.	Total area of district, in acres.	Total area estimated to be under cultivation, in acres.	Approximate normal area under sugarcane crop, in acres.	Approximate area under sugarcane last year (1898), in acres.	Estimated area under sugarcane this year (1899), in acres.	Taking 100 to represent the normal outturn, how much represented the outturn last year (1898)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1899)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11
Presidency—*concld.*	Khulna ...	3,103,942	870,000	3,100	3,300	3,100	88	81	The crop was slightly damaged by the rains of April and May; hence the low outturn.	
Rajshahi ...	Rajshahi ...	1,663,040	1,222,100	18,000	18,000	14,500	83	100	The normal area has been revised since the submission of the preliminary forecast.	The figure in column 6 have been revised in this office.
	Dinajpur ...	2,586,080	1,322,900	24,000	24,500	30,000	100	100	The growth of the sugarcane crop was much favoured by the heavy rainfall of the year, but the cane is deficient in sweetness.	
	Jalpaiguri ...	1,594,600	1,075,000	3,190	3,200	3,300	80	90	....	
	Darjeeling ...	744,960	142,900	400	400	300	100	100	This year's area has been revised.	
	Rangpur ...	2,231,040	1,602,700	24,100	23,500	22,500	98	97	The low outturn, as compared with the estimate made at the preliminary forecast, is due to the fact that the stalks of the sugarcane were under water for some time in the Gaibanda subdivision.	
	Bogra ...	869,760	680,000	12,600	12,600	18,000	110	0	The excessive rainfall has damaged the crop to some extent; hence the low outturn.	
	Pabna ...	1,176,960	652,500	66,000	60,000	52,500	70	6	....	

Dacca ...	Dacca ...	1,750,480	1,213,500	23,000	20,800	21,[illegible]	[illegible]	70	The sugarcane crop was partially damaged by a disease [illegible] and flood water; hence the low outturn.
	Mymensingh	4,052,480	2,405,700	35,000	33,000	33,000	55	75	Owing to excessive fall of rain, the sugarcane could not thrive well this year: hence the low outturn.
	Faridpur ...	1,450,840	1,007,500	42,000	42,000	42,000	88	100	......
	Backergunge	2,335,300	1,408,000	20,000	20,000	20,000	95	100	The area and outturn of sugarcane this year is expected to be normal.
Chittagong ...	Tippera ..	1,594,850	1,171,300	14,000	11,400	12,800	93	90	......
	Noakhali ..	1,052,500	818,800	900	800	600	82	70	The low outturn is due to the early heavy rainfall. The ore prepared from sugarcane is very small.
	Chittagong ...	1,394,915	506,900	5,900	5,700	5,700	50	95	No sugar of any kind is manufactured in this district.
Patna ..	Patna ..	1,332,560	903,700	3,400	3,200	3,200	100	92	Sugar is obtained from sugarcane only. The crop suffered this year from floods: hence the short outturn.
	Gaya .	3,015,654	2,207,700	29,000	30,000	31,500	100	102	The weather has all along been favourable for the sugarcane crop.
	Shahabad .	2,795,520	1,841,900	36,000	36,000	34,000	67	48	The poor outturn is due to absence of rain in September and October 1899.
	Saran ..	1,8[illegible]	1,352,500	40,000	40,000	42,000	106	100	At the beginning the crop prospered very well, but subsequent excessive rains caused by floods damaged the crops of low lands.
	Champaran ...	2,[illegible]	1,[illegible]	13,000	13,[illegible]	17,000	30	75	This year's area has been revised on subsequent enquiry. Owing to seasonable rainfall the area brought under cultivation this year has been greater than the area sown last year. [illegible] of the last year also accounts for the spread of cultivation. The short outturn is due to excessive rainfall in July and August last.
	Muzaffarpur ...	1,042,324	1,335,300	8,500	8,500	8,800	100	95	The area has been revised. The low outturn this year is due to drought in the Sitamarhi subdivision and unusual rains in the Sadar.
	Darbhanga ..	2,134,400	1,520,700	73,900	72,900	73,200	104	81	The short outturn is due to excessive rain.

Division.	District.	Total area of district, in acres.	Total area estimated to be under cultivation, in acres.	Approximate normal area under sugarcane crop, in acres.	Approximate area under sugarcane last year (1898), in acres.	Estimated area under sugarcane this year (1898), in acres.	Taking 100 to represent the normal outturn, how much represented the outturn last year (1898)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1899)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11
Bhagalpur ...	Monghyr ...	2,509,440	1,552,800	6,800	6,300	6,710	75	75	The figures have been revised. Owing to excessive rains the crop has been partially damaged.	
	Bhagalpur	2,704,64[illegible]	2,0[illegible]7,000	54,700	54,700	51,700	100	[illegible]	Excessive rain has to some extent injured the crop this year in [illegible] and Banka. Elsewhere the crop is a normal one.	
	Purnea ...	3,195,520	1,511,500	9,500	10,500	9,500	96	81	The normal and this year's areas have been revised. The short outturn is due to excessive rainfall.	The figure in column 6 has been revised in this office.
	Malda ...	1,216,000	811,500	5,000	4,500	4,200	75	87	The increase in the outturn is due to timely rainfall of the year.	
	Sonthal Parganas.	3,500,160	1,158,000	16,700	16,700	110,700	98	105	... .	
Orissa ...	Cuttack ...	2,203,149	1,161,200	5,010	4,600	4,500	100	100	The state of the crop up to date is favourable, and a normal outturn is estimated.	
	Balasore ...	1,515,475	990,800	4,400	2,300	2,300	88	100	The decrease in the area, as compared with the normal, is due to the want of seasonable rainfall.	
	Angul and Khondmals.	1,075,840	254,000	2,000	2,000	2,300	100	50	The increase in the area this year is due to the inclusion of estimates for the Khondmals. The low outturn is due to insufficient and untimely rain.	
	Puri ...	1,582,720	600,000	3,500	4,000	3,000	75	70	The low outturn is due to insufficient and unequal distribution of rain both at the time of sowing and growth.	

Chota Nagpur.	Hazaribagh ...	4,493,440	2,475,500	32,100	32,100	32,100	100	86	....
	Ranchi ..	4,569,600	2,888,340	200	200	200	90	60	Early cessation of rain accounts for the low outturn.
	Palamau ...	3,159,206	768,000	100,000	93,200	94,700	85	75	....
	Manbhum ...	2,654,680	1,519,500	20,000	19,100	12,400	90	60	....
	Singhbhum ...	2,526,019	1,182,100	1,000	1,000	1,000	100	75	The short outturn is due to the insufficient rainfall.
	Total ...	97,483,022	57,168,860	893,900	861,100	860,200	92	84	

APPENDIX II.

Abstract Statement of Estimated Acreage and Outturn of the Sugarcane Crop, 1899.

Province.	Acreage— Of current year's crop.	Of previous year's crop.	Average of five preceding years.	Percentage by which column 2 exceeds (+) or falls short of (−) area in— Column 3.	Column 4.	Outturn in cwt. Estimated yield of current year, i.e., of area in column 2.	Yield of previous year, i.e., of area in column 3.	Average of five preceding years.	Percentage by which column 7 exceeds (+) or falls short of (−) outturn in— Column 8.	Column 9.	Remarks by the Department of Land Records and Agriculture, Bengal.

Bengal	860,200	861,100	......	−·10	...	15,896,500	17,428,700	...	−8·68	......	The average yield of raw sugar—gur—is estimated at 22 cwt. per acre in Bengal.

THE EMBANKMENT AND DRAINAGE REPORTS FOR THE YEAR 1898-99.

No. 631.

Government of Bengal.

IRRIGATION DEPARTMENT.

IRRIGATION.

Dated Calcutta, the 15th January 1900.

RESOLUTION.

READ—

The Embankment and Drainage Reports for the year 1898-99.

The expenditure incurred during the year on embankments and drainage and other miscellaneous irrigation works in Bengal, which are not dealt with in the Canal Revenue Report, is shown in the following statement:—

	1898-99.
	Rs.
I.—Embankments—	
Class A, in Orissa	49,883
Class B, Schedule D, and other Government embankments	1,84,883
Class C, maintained under contract ...	99,040
Class D, maintained by annual apportionment of charges	10,418
II.—Works carried out by Civil Officers in Government or temporarily-settled estates	1,92,517
III.—Works undertaken under the provisions of the Drainage Act	16,190*
IV.—Drainage works carried out at the cost of Government	7,718
V.—Drainage works carried out under the Embankment Act	17,168
Total ...	5,77,812

* Inclusive of Rs. 7,901 on account of Drainage Deputy Collector's salary.

2. *I.—Embankments maintained by the Irrigation Department.*—The Public embankments in Bengal are of two kinds—

1st.—Embankments the property of Government, which are maintained at the public expense.

2nd.—Embankments maintained by Government officers at the cost of the persons interested.

Of the first kind there are—

A.—The embankments in Orissa, which are maintained under Act XXXII of 1855.

B.—The embankments enumerated in Schedule D of Act VI (B.C.) of 1873, among which are included those of the Burdwan Raj estate taken over by Government in 1804, and some additional lengths which have at various times been added to the schedule under the provisions of section 43 of Act II (B.C.) of 1882, as also two small embankments in the Pabna and Bogra districts.

Of the second kind there are—

C.—The embankments of which the cost of maintenance is recovered from the persons interested by the payment of a fixed annual charge under a contract extending over a term of years not exceeding thirty, as provided for in sections 63-68 of Act II (B.C.) of 1882.

D.—The embankments of which the cost of maintenance is recovered from the persons interested by an annual apportionment of the actual charges.

Embankments A in Orissa are also, for departmental purposes, further sub-classed as follows:—

Sub-class I.—Capital or Canal embankments constructed and maintained as part of the Orissa Canal system and intended to be above high flood-level.

" II.—Ordinary or Agricultural embankments on large rivers above high flood-level to be maintained permanently at their present height.

" III.—Embankments of local importance, such as marginal embankments outside canal embankments, which will probably be eventually abandoned.

" IV.—Embankments of doubtful utility and harmful effect, which it is undesirable to retain.

" V.—Embankments which have been abandoned and are not repaired.

The capital embankments, sub-class I, are not treated of in this report.

3. *Lengths of embankments and areas protected.*—The lengths of embankments in each class and the areas protected by them are shown below:—

CIRCLE.	Class.	Length.		Area protected.
1	2	3		4
		Miles.	Ft.	Acres.
Sone	A	Nil		Nil
	B	Nil		Nil
	C	228	3,302	3,655,680
	D	57	3,910	306,400

	D	72	1,044	363,122
	GRAND TOTAL ...	2,222	797	7,841,499

In class A, Orissa embankments, there is an aggregate reduction of 2,400 feet, due to the abandonment of the No. 24 Haripur and No. 25 Kupari embankments. A proposal is now under consideration to abandon schedule D embankment

No. 98, Kargpur bund (a length of three miles), and part of the Orissa Trunk Road adjoining it. The reclassification of these embankments is still in progress. In the class B embankments there was no change, but the figures have been slightly altered, due to certain errors having been corrected. In classes C and D there were no changes, though the total area protected by the latter class of embankments shows a slight increase, due to the correction of some errors.

4. *Floods.*—There were no high floods in any of the rivers in the Orissa Circle during the year. In the Sone Circle, a high flood occurred in the Gandak river on the 8th September. This was the only heavy flood in this river during the season, and it rose and fell very rapidly. A flood of unprecedented height occurred in the Bur Gandak, and this, together with the simultaneous flood in the Baginati river, which it joins, did considerable damage to the Titaria road extension of the Turki embankments, and wrecked the greater part of the Turki weir. The river protective works along the Turki embankment and at Sikandarpore were also practically washed away. A flood, which was the highest on record in the Cossye river, came down on the 19th June 1898. The flood overtopped No. 98 Schedule D embankment in many places, breached the road from Mohunpore to Kargpur and carried away a considerable length of the new railway embankment. A large tract of country was flooded and great damage was done to the canal distributaries. The Mohunpore lock was breached, and the flood water, finding its way down the canal, did a large amount of damage to the banks. The right bank above the Lachmapur lock was badly breached and the upper wing walls only just escaped being seriously damaged by the scour. The north abutment of the anicut at Midnapore had a narrow escape of being undermined. The gauge at Mohunpore head sluice read 93·30 when the flood was at its height, and the reading at the workshop was 95·50 at the same time. The previous highest recorded readings were 91·70 and 92·30, respectively.

A high flood in the rivers Darkessur and Selye began shortly before the Cossye flood. At Shaikhpur the Darkessur river rose to 43·27 on the 17th June, against the highest recorded flood of 44·77 on the 23rd August 1893.

The gauge readings of the Selye river during the year, together with the previous maximum readings of that river, are noted in the subjoined table:—

Locality of Gauge.	Previous maximum readings.		Highest reading of 1898.	
	Date.	Reading.	Date.	Reading.
1	2	3	4	5
Harinaraiupur ...	23rd June 1893	52·60	19th June 1899	53·35
Dewanchack ...	24th " "	43·66	19th " "	43·16
Ghatal	25th " "	32·75	19th " "	31·25
	1876	33 00		

The floods in the Hooghly were of an ordinary nature, and no damage was done to the Hooghly embankments.

There were altogether six high floods in the Damodar. The floods of the 19th June and 15th September were only four inches lower on the Edilpur gauge, and one foot six inches lower at Jujuty, than the flood of July 1897, the highest flood on record. They lasted for about 72 hours and 48 hours, respectively.

The effect of these two floods on the right bank of the Damodar was serious. An area of about 100 square miles from Sanghatgola to the Begua breach, a length of 25 miles, was flooded. Several mud houses fell down, but very little damage was done to the standing crops. No damage was done to the Schedule D embankments on both sides of the river, but the protective works were all more or less injured. The spurs, which were made at a cost of Rs. 486 at Natu, to protect the portion of the embankment which was left in 1891

in front of the village were much damaged, and a portion of the embankment was carried away by the high floods.

In the Northern Circle there was a heavy flood in the Panar river in September 1898 which damaged three out of the four spur bunds constructed for the protection of the civil station of Araria from the encroachment of the river.

5. *Original Works.*—Good progress was made with the construction of the Bhagwangola retired line, which is now rapidly approaching completion. The earthwork is complete, with the exception of making up that portion of the embankment which has settled, and finishing the rear bund of the Gogra crossing. The cost of the work executed during the year was Rs. 52,408. Some additional refuge mounds on the Sankarsahi island in the Daib river were constructed during the year at a cost of Rs. 1,580. Four spur bunds for the protection of the Araria civil station were constructed during the year. The amount expended on them was Rs. 3,017.

6. (*a*) *Ordinary repairs.*—In the Orissa Circle the cost of ordinary repairs to Government embankments was less than usual, owing to there having been no high floods in the rivers during the past two years. The expenditure for the year amounted to Rs. 17,870, as compared with Rs. 24,074 during the previous year. In the Sone Circle the expenditure incurred on C class embankments in the Gandak Division was Rs. 37,841, as compared with Rs. 35,554 in the previous year. The increase was mainly due to the large expenditure on the Tirhut embankment caused by the provision of extensive protective works, which became necessary owing to the river having come over from the Saran to the Tirhut side. The expenditure on the Saran embankment was Rs. 19,313 as against Rs. 18,075 in the previous year; the increase is due to extra expenditure on retired lines. There was a marked reduction in the cost of ordinary repairs to this embankment which was brought down from Rs. 13,443 during last year to Rs. 10,622 in the year under review. The sum expended on the Champaran embankment during the year was Rs. 6,622, which shows a decrease of Rs. 3,239 from last year, and this reduction is attributable to the very much reduced expenditure on the Sagrampore retired line.

The expenditure incurred on repairs to the D class embankments was Rs. 8,642 against Rs. 6,096 in the previous year. On the Turki and Daudpur embankments Rs. 5,944 were expended, which shows an increase of Rs. 1,164 over last year, and this is due to the extensive repairs found necessary to make good the damage caused to the Turki embankment by flood. The sum of Rs. 2,469 was expended on the Bazitpur embankment and Rs. 196 on the Monghyr embankment. The Sukri bund is reported to be in good order, but is not of much use as, owing to the shifting of the river bed, all scour in the vicinity of the bund has ceased. The expenditure on this work was only Rs. 33, compared with Rs. 92 in the previous year.

In the Northern Circle a sum of Rs. 757 was expended on the Government embankments in the Malda, Bogra and Pabna districts against Rs. 693 in the previous year. The expenditure on D class embankments was Rs. 964, showing an increase of Rs. 367 over last year's figures.

In the South-Western Circle the expenditure incurred during the year on Schedule D and other Government embankments, exclusive of expenditure incurred on retired lines and breaches, was Rs. 1,25,523 against Rs. 1,16,893 in the previous year. The cost of the repairs to the embankments in the Burdwan district amounted to Rs. 18,716, which shows a decrease of Rs. 3,924 in comparison with last year's expenditure. The decrease was mainly due to reduced expenditure on repairs to the spur works at Bengatcha and Lakra.

The expenditure in the Birbhum district was higher by Rs. 520 than that of the previous year. This was due to heavy repairs being found necessary to the Ajai embankments and bungalows. The mileage rate was Rs. 282 against Rs 122 in 1897-98.

The expenditure in the Midnapore district was higher by Rs. 3,834, while that in the Hooghly, Murshidabad and Rajshahi districts was slightly less than in the previous year. The higher expenditure in the Nadia district was due to the construction of boundary pillars on the Katchikata embankment. Special repairs to some miles of the embankments in the 24-Parganas district, which were in a very bad condition, together with some brick facing work which was done, was the cause of the heavy expenditure during the year which

showed an increase of Rs. 10,675 over that of last year. There was a slightly increased expenditure on the Orissa embankments in the Balasore district, chiefly due to the raising of the Bhograi Embankment.

The aggregate expenditure on repairs, exclusive of establishment and tools and plant to the C class (Takavi) embankments in the Midnapore district, was Rs. 61,199, compared with Rs. 34,710 in 1897-98. The heavy increase in expenditure was due to the repairs which became necessary owing to the damage done by floods in June. Rupees 496 was expended on Joki Takavi embankment from the 1st April 1896 to 31st March 1898, and adjusted in the current year's accounts, but Rs. 429 was shown in last year's report as expenditure of that year, and the difference has been added to in the total sum of expenditure shown for the current year, as the full amount has been written back in the accounts of the Executive Engineer, Balasore Division, for August 1898, and charged against "Agricultural" under "43—Minor Works and Navigation," agreeably to the instructions of the Examiner of Public Works Accounts, Bengal. The embankment is being maintained under contract system since 1st April 1896.

The expenditure on the D class Takavi embankments in 24-Parganas and Hooghly districts amounted to the sum of Rs. 807, compared with Rs. 502 in the previous year, and a sum of Rs. 199 was spent on petty repairs to takavi sluices. The increase is due to repairs made necessary by the excessive floods.

The total expenditure on repairs to the embankments protecting the Burdwan Raj Estate in the districts of Hooghly, Burdwan, Birbhum and Midnapore, was Rs. 1,00,647 against Rs. 1,01,406 in the previous year.

7. *Breaches and retired lines.*—Owing to the absence of heavy floods in the rivers in the Orissa Circle, there were no breaches of any importance in the embankments.

In the Cossye Division of the South Western Circle, a total number of 361 breaches occurred in the Schedule D embankments, of which 93 occurred in embankment No. 18 Pannah Circuit), 81 in embankment No. 97 (connecting embankment), 46 in No. 5 (Selye left embankment), 31 in No. 22 (Chitua Circuit), and 30 in each of the Schedule D embankments Nos. 19 and 98.

The total length of the breaches amounted to something over ten miles, the area inundated was 271 square miles, and the area of *aman* and *boro* crops damaged is reported to be 93 square miles. The cost of repairing breaches in the Government embankments in the South-Western Circle amounted to Rs. 51,268.

The Takavi embankments (class C) in the Midnapore district suffered severely from the floods, and the cost of special repairs on this account came to Rs. 24,153. The amount expended on ordinary repairs was Rs. 37,046.

There were no breaches in the embankments in the Northern Circle.

In the Sone Circle the Turki embankment was breached in the ninth mile during the high flood of the 11th September in the Bagmati river. The Titaria road, an extension of the Turki embankment, was overtopped at the same time and considerably damaged. The cost of maintenance of the Turki embankment, including the expenditure on breach filling, was Rs. 4,796.

8. *Retired lines.*—The expenditure in the Orissa Circle on retired lines was only Rs. 1,877, which is the lowest for the last five years, the average expenditure for which is Rs. 10,584. In the South-Western Circle a total expenditure of Rs. 16,084 was incurred on retired lines of which the major portion was for the Hooghly district.

The expenditure is less than half that of last year. No expenditure was incurred on retired lines of Schedule D embankments in the Midnapore district.

There was a total expenditure of Rs. 9,569 on retired lines in the Sone Circle, of which Rs. 8,966 was expended on the Saran embankment, and Rs. 603 on the Sagrampur retired line of the Champaran embankment.

No retired lines were constructed in the Northern Circle, nor was there any expenditure under this head.

9. *River Protective Works.*—About half the whole cost of maintaining the Orissa embankments was incurred on revetments and river protective works.

The more important of the works of this class were as under:—

Repairs to Katjoree revetment at Cuttack.

Constructing spurs at the head of the Khoakhye river, right bank.

Repairs to groynes at Bogla at seventh mile of the Machgong canal.
Groynes and spurs at Kendupatna on the left bank of the Noona river.
Revetting the slope of the Brahmini river at Nilkantpur.
Protective works at the right bank of the Brahmini river at Chowsotapara above Jenapur.

The total cost of works under this head was Rs. 20,593 which is a considerable reduction on last year's figures.

In the South-Western Circle no important river protective works were carried out.

The expenditure on river protective works in the Sone Circle is shown below:—

		Rs.
C class embankments—		
Saran embankments	... ...	3,267
Tirhut embankment	... ...	4,387
D class embankments—		
Turki and Daudpore embankments	... ...	1,172
Bazitpur embankment	... ...	1,687
	Total ...	10,513

The expenditure on the Saran embankments river training works was slightly less, and that on the Tirhut embankment, more than in the previous year.

There was no expenditure under this head incurred in the Northern Circle.

10. *Financial.*—The actual cost of repairs to the Orissa embankments (class A), exclusive of charges for establishment and tools and plant, was Rs. 49,883 against Rs. 77,953 in 1897-98, showing a decrease of Rs. 28,070, the rate per mile being Rs. 90 against Rs. 141. The amount expended on class B embankments was Rs. 1,84,883 against Rs. 1,71,601, or at the average mileage rate of Rs. 165 against Rs. 153 in the previous year. As regards class C embankments maintained by Government under the contract system, the actual cost of repairs was Rs. 99,040 against Rs. 70,264, showing an increase of Rs. 28,776, the average rate per mile being Rs. 206 against Rs. 146 in the previous year.

The sums payable under contract for the C class embankments, compared with the maintenance charges, including book charges for Establishment and Tools and Plant are shown in the following statement, together with the amount recovered during the year and the balance remaining to be recovered:—

Year.		Midnapore District.		Saran District.		Champaran District.		Muzaffarpur District.		Total.		Recoveries.	Balance to be recovered.	Surplus.	Deficit.

NOTE.—The figures in columns 2 to 11 are supplied by the Superintending Engineers of Public Works Department Circles, and those in columns 12 and 13 by the Board of Revenue. The net demand of 1898-99, as shown by the Board, is Rs. 1,50,549. It has been arrived at by adding the demand of the year 1898-99, Rs. 1,03,003, with the arrear due from previous years, Rs. 54,513 *minus* the advance payment at credit, Rs. 6,967. The balance to be recovered, Rs. 45,324 (column 13), is the difference between the net demand, Rs. 1,50,549, *minus* the recoveries during the year, Rs. 1,05,925 (column 12). The difference between the maintenance charge and the contract amount (columns 10 and 11) is shown in columns 14 and 15. The total recoveries, Rs. 17,28,786 (column 12), is the difference between the total contract amount, Rs. 17,74,110 (column 11), and the balance to be recovered, Rs. 45,324 (column 13). As the Board deal with the advance payment and credit, the amount of annual demand given by them differs from the contract amount supplied by Superintending Engineers.

It will be seen from the above figures that Government is, on the whole, a loser by Rs. 36,895 on the working of the year. The total outstanding balance to be recovered amounts to a sum of Rs. 45,324 which points to the collections not being carried out as energetically as they might be. It is true that the unrecovered balance remains a fairly constant quantity from year to year, but

from a detailed examination of the collections in the different districts separately, it would seem that this balance is susceptible of considerable reduction. The annual demand for the district of Muzaffarpur amounts to Rs. 8,361, and the arrears from previous years to Rs. 5,239 which, after deducting a sum of Rs. 1,725 on account of advance payment at credit, shows a net demand of Rs. 11,875. The current collections only amounted to Rs. 2,602 and the collections on account of arrears to Rs. 2,459 which, after adding a sum of Rs. 1,317 on account of advances, shows a total collection of Rs. 6,438. In this instance, the recovery on account of previous years arrears is not very satisfactory; the result of the collections in the district of Darbhanga is also rather disappointing. It is hoped that the figures for the next year will show a marked improvement in the collections.

In the Midnapore district the amount fixed as payable under the contract system for the maintenance of the takavi embankments is ordinarily quite sufficient. There was excess expenditure over the contract amount in six years only since the introduction of the system in 1881-82 owing to heavy cost of repairing damages caused to the embankments by high floods. During the year the maintenance charge was more than the contract amount by Rs. 27,359. In the Saran, Champaran and Muzaffarpur districts, the maintenance charges of the takavi embankments are generally in excess of the amounts fixed under contract. They were less only in four years in Saran, three years in Champaran, and one year in Muzaffarpur, since the introduction of the contract system there.

The actual outlay incurred during the year on embankments of class D (Appendix C) was Rs 12,457, and the amount outstanding from the previous year was Rs. 6,39[illegible]; while the recoveries and adjustments made by the Civil Department were Rs. 6,829, the balance unadjusted at the end of the year being Rs. 12,020. These figures do not agree with those supplied by the Board of Revenue (Appendix B), in which the collections of the year were shown as Rs. 20,159 , exclusive of collections of Rs. 16,041 in the Birbhum, Midnapore, and Patna districts which have not been given by the Superintending Engineers in their accounts), or Rs. 13,330 in excess of those shown in Appendix C. No explanation of this discrepancy has been given by the Board of Revenue. The figures given in the Board's return (Appendix B) include only the amounts which have been accepted and apportioned by the Civil Department, and hence no comparison can be made between the "Advances" and "Outstanding balances" as reported by the Board and as given by the Superintending Engineers. The figures supplied by the Board (Appendix B) are shown in a more concise form in the following statement. The recoverable amount or demand falling due during the year was Rs. 54,941; the amount collected, inclusive of remission, was Rs. 37,805; the recoveries falling short of the amount of the demand were, therefore, Rs. 17,136 :—

	Due during the year.		Falling due in subsequent days.		Total.

Total ...	54,512	32,854	14,473	35,206	30,701	24,771	99,686	92,831

The principal works of improvements carried out in the Government estates were the construction and repairs of embankments or bunds, roads, tanks, wells, ahurs, cutcherries or tahsil offices, dispensaries and experimental cultivation.

In the Chittagong, Midnapore and Jalpaiguri districts, Rs. 22,114, Rs. 11,827 and Rs. 8,131 were expended on embankments, roads, tanks, wells, tahsil offices, dispensaries and experimental cultivation.

In the 24-Parganas district a sum of Rs. 28,834 was expended on the Orphanganj market alone.

The expenditure in the remaining districts in no instance exceeded Rs. 10,000 and in most cases was considerably below this sum.

12. *Works undertaken under the provisions of the Drainage Act, VI (B.C.) of 1880.*—The drainage works, four in number, viz., Dankuni, Howrah, Rajapore, and Burrajolla, lie in the southern part of the Hooghly district in the South-Western Circle. All of them have been completed and their maintenance charges capitalised, the average annual amounts fixed for the purpose being Rs. 4,390 and Rs. 2,000 for the Dankuni and Howrah drainage projects, and Rs. 5,000 for the combined Rajapore and Burrajolla schemes.

The Dankuni Drainage Scheme cost a sum of Rs. 4,11,500 for original works and the addition of interest and capitalised maintenance charges brought the total up to Rs. 5,71,986. The whole of this has been recovered, together with an additional sum of Rs. 1,26,265 on account of interest accruing after apportionment.

The cost of the original works for the Howrah Drainage Scheme came to Rs. 3,45,743 and interest and other charges brought this up to Rs. 5,24,924. Of this sum Rs. 3,11,432 has been recovered, which may be considered very satisfactory, considering that the apportionment was made in 1894.

The total cost of the Rajapore Drainage Scheme, including the capitalised amount for future maintenance charges with interest, amounted to Rs. 14,57,295: this sum has to be paid in ten years. Out of this amount, Rs. 2,98,695 has been recovered since June 1897, which is satisfactory. The total cost divided by the annual increased value, Rs. 2,56,090 gives a little over five-and-a-half as the number of years' purchase, so that the collections may on the whole be considered eminently satisfactory.

The drainage works were all efficiently maintained during the year. The cost of maintenance compared with the previous year is given below:—

	1897-98.	1898-99.
	Rs.	Rs.
Dankuni	2,991	1,640
Howrah	1,056	1,899
Rajapore	3,441	3,807
Burrajolla	1,138	943

It will be seen from the above that the maintenance charges, exclusive of the portion of the Drainage Deputy Collector's salary charged against the Howrah and Rajapore drainage schemes, amounting to Rs. 2,400 and Rs. 5,501, respectively, during the year, were less than the amounts fixed for their maintenance.

During the year no advances were made under the Drainage Act in any of the districts of the Burdwan Division.

Efficiency of the drainage works.—All drainage works were maintained in an efficient condition. There was an income of Rs. 3,533 principally derived from land rent, fisheries, tolls on boats, &c.

13. *Drainage works carried out at the cost of Government and not under the provisions of the Drainage Act.*—The outer bund of the Surpai sluice channel, which was cut in the month of June at a cost of Rs. 531, was reconstructed in November at Rs. 557.

The Baliaghai main drain was cleared of silt at a cost of Rs. 2,465 against Rs. 7,412 in the previous year. Silt was also cleared from the Uttarbar, Katigae Branch I, Thacoorchuck, Naraindari, Dariadighi, Sadar, Barunda, Mirzapur, Panipea, Kalabaria, Sewlipur, and Magra khals, at an aggregate cost of Rs. 2,913. On repairs to the Bullee Bil drainage works Rs. 1,252 were expended during the year against Rs. 1,552 in the previous year. No dredging was done in the Sadar khal during the year.

14. *Drainage works carried out under the provisions of the Embankment Act, II (B.C.) of 1882.*—Three drainage sluices at Satpukur, Kulpi, and Bindal, in the 24-Parganas district, were completed and opened for drainage in 1897-98. The total expenditure incurred on each of them, inclusive of establishment and tools and plant charges, is Rs. 1,20,972 on Satpukur, Rs. 76,968 on Kulpi, and Rs. 30,327 on Bindal. The accounts of all of them have been closed during the year and the expenditure adjusted with the Civil Department. The drainage of the southern portion of the 24-Parganas district has been considerably improved by these sluices.

An irrigation sluice also in the 24-Parganas district was commenced and completed during the year, at a cost of Rs. 5,731. Another sluice at Kaoratola was commenced. The expenditure incurred on it during the year was Rs. 2,743 against an estimate for Rs. 6,612. In the Hooghly district an irrigation sluice at Nayachuck on the Damodar left embankment was reconstructed at a cost of Rs. 1,718.

The Churial khal drainage sluice in the 24-Parganas district was maintained during the year at a cost of Rs. 992 against Rs. 881 in the previous year. For efficiently maintaining the sixteen sluices in the Schedule D embankments also in the 24-Parganas district Rs. 199 only were expended during the year.

The Kumrool and Bacharhat sluices and their channels in the Hooghly district were maintained during the year at a cost of Rs. 307 and Rs. 75, respectively.

For repairing the Dainan sluice in the Midnapore District Rs. 1,297 were expended during the year and for revetting the bank of the Burrabullong river near the Nalkul Lock in the Balasore Division a revised estimate for Rs. 26,066 was sanctioned by the Superintending Engineer in October 1898, against which Rs. 16,338 were expended during the year and charged to the maintenance of the Orissa Coast Canal. The total expenditure incurred up to end of the year was Rs. 19,599. Applications for the construction of eleven sluices in the Cossye Division and twelve sluices in the Balasore Division were received during the year by the Executive Engineers. They are under enquiry and consideration. The Burdwan Raj Estate has not taken up any steps for improving the Kalabaria khal in the Balasore Division, which is gradually deteriorating since its management was taken up by the Raj Estate in February 1897.

No decision has been arrived at regarding the additional works required to improve the drainage of the Doobda Jheel in Range III of the Orissa Coast Canal, as the year under review was not a favourable one for ascertaining the capabilities of the existing channels to carry off the drainage owing to the absence of floods. The proposal for improving the Protapkhali khal for drainage by the Commissioner of Burdwan has been approved by Government in April 1899. The cost and maintenance charges are recoverable from the persons interested under section 54 of the Embankment Act, II (B.C.) of 1882.

Twenty-nine cases were instituted during the year for erecting bunds within the prohibited areas of the Subarnarekha, Burrabullong and Hooghly rivers and Ramnagar khal outside the sea-dyke in the South-Western Circle. Of these, convictions were obtained in 26 cases, the offenders were acquitted in two cases for want of evidence, and one case was withdrawn.

ORDER.—Ordered that a copy of this Resolution and of its Appendices (A to C) be published in the Supplement to the *Calcutta Gazette* and submitted to the Government of India, Public Works Department, for information.

Ordered also that copies of this Resolution and of its Appendices (A to C) be forwarded to the Secretaries to the Government of Bengal in the Revenue and Financial Departments; Secretary to the Board of Revenue, Lower Provinces; Commissioners of the Presidency, Burdwan, Patna, Bhagalpur, Rajshahi, Dacca, Chittagong, Chota Nagpur and Orissa Divisions; Director-General of Statistics, Superintending Engineers of the Orissa, South-Western, Sone and Northern Circles; and Examiner of Public Works Accounts, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

R. B. BUCKLEY,

Secretary to the Govt. of Bengal.

List of public Embankments in Bengal in charge of Government Officers, showing their lengths and the actual cost of repairs (without charges for Establishment) during the year 1898-99.

(a) Includes Rs. 21,230, being cost of river revetment and training works, not immediately connected with the embankments. Excluding this amount, the rate per mile of the Orissa embankments is Rs. 51 only.
(b) Consists of expenditure of Rs. 5,840 and Rs. 4 incurred on the Turki and Daudpur embankments.

APPENDIX B.

[Compiled by the Board of Revenue.]

Return No. XXVIII, showing the demands, collections and balances on account of Advances under the Embankment Act II (B.C.) of 1882 for the year 1898-99.

Divisions and Districts.	Outstanding Advances.			Unrecovered interest of previous year.	Classification of the demand of the year.						Collections.						Remissions.	Balances.										Received in advance during the year on account of future instalments.	Remarks.
																		Principal.			Interest.								
	Total amount advanced in preceding years outstanding on 1st April 1898.	Total amount advanced during the year.	Total of columns 2 and 3.		Amount due during the year out of the sum shown in column 2. RESOLUTION ON THE REPORT ON PUBLIC INSTRUCTION OF BENGAL FOR THE YEAR 1898-99.

GENERAL DEPARTMENT—EDUCATION.

Calcutta, the 16th January, 1900.

RESOLUTION—No. 254.

READ—

The Report on Public Instruction of Bengal for the year 1898-99.

The report has been submitted with punctuality by Mr. Pedler, who succeeded Dr. Martin as Director of Public Instruction on the 3rd January, 1899. Mr. Pedler has found it necessary to discuss certain matters in somewhat greater detail than in previous years.

2. *Number under instruction.*—The following table compares the number of schools and colleges in Bengal, and the number of pupils in them, for the past two years:—

Class of Institution.	1897-98.		1898-99.	
	Schools.	Pupils.	Schools.	Pupils.
1	2	3	4	5
Public Institutions.				
University ... Art Colleges ...	38	6,440	39	7,204
Secondary ... High English Schools ..	400	86,069	428	95,529
Secondary ... Middle ditto ...	948	72,465	971	72,267
Secondary ... Do. Vernacular Schools	1,129	65,370	1,094	60,202
Primary ... Upper Primary Schools ...	4,113	165,192	4,240	174,161
Primary ... Lower ditto ...	43,482	1,036,635	44,082	1,061,536
Special (including Madrassa and institution for professional training) ...	129	9,574	394	13,587
Female	2,861	63,147	2,775	61,817
Total ...	53,100	1,504,892	54,023	1,546,213
Private Institutions.				
(1) Advanced teaching—				
(a) Arabic or Persian ...	1,201	13,946	1,398	18,672
(b) Sanskrit ...	1,641	16,593	1,412	13,100
(2) Elementary, teaching a vernacular only or mainly—				
(a) With 10 pupils and upwards ...	605	9,377	715	10,693
(b) With less than 10 pupils ...	3,452	21,693	3,291	21,079
(3) Elementary, teaching the Koran only	4,348	56,840	4,113	56,461
(4) Other schools not conforming to the departmental standards ...	166	2,474	149	2,537
Total ...	11,413	119,923	11,078	122,542
GRAND TOTAL ...	64,513	1,624,815	65,101	1,668,785

The calamities of 1896 and 1897 had checked the increase in pupils which had continued from 1892, and the prosperity which has been enjoyed throughout the Province since the winter of 1897 has not yet succeeded in regaining the lost ground. If the normal growth of population is taken into account, it appears that the proportion of boys at school is steadily falling. The number of girls at school is lower even absolutely. Interesting, too, are the facts disclosed by

the distribution of the pupils in the various classes of schools; and the fidelity of the Muhammadans to their own methods of education is emphasised by the increase in the pupils of the Arabic, Persian, and Koran schools.

But by far the most important disclosure is the decay of the middle vernacular schools. The middle English schools have made no progress, but the vernacular schools have fallen back. The reason alleged is that the avenues to public service or professional education are being one by one closed to the vernacular schools. The last change of this sort was the rule, which requires an entrance certificate from candidates for the mukhtearship examination. These changes may be inevitable, but they must be witnessed with regret, and the time has come for a careful reconsideration of the curriculum of the higher vernacular schools and its adjustment to new wants, which are plainly rising in the non-professional classes in the country.

3. *Ratio of pupils to population.*—The percentage of boys at school in the whole of the Province (excluding certain Tributary States) is nominally 28·6, though, as this is based on the population shown by the census of 1891, it is really slightly lower. The proportion varies very greatly from district to district, Midnapore with 61 per cent. heading the list, and Saran falling in at the rear with 13. Hazaribagh has fallen into the black list of districts with less than 15 per cent. at school. Only one Bihar district, and only one of Chota Nagpur, has a place in the first half of the list; and the popularity of education is obviously hampered by poverty.

4. *Schools classified according to their management.*—The following table classifies the colleges and schools according to their management:—

Class of Schools.	1898.		1899.	
	Schools.	Pupils.	Schools.	Pupils.
1	2	3	4	5
Public Instruction.				
Under public management.				
Managed by Government	171	24,787	170	25,547
Do. by District or Municipal Boards	195	13,493	200	13,800
Under private management.				
Aided by Government or by District or Municipal Boards	37,270	1,117,662	38,641	1,164,193
Unaided	15,464	318,950	15,012	342,703
Total ...	53,100	1,504,892	54,023	1,546,243
Private institutions of indigenous instruction	11,413	119,923	11,078	122,542
Grand Total ...	64,513	1,624,815	65,101	1,668,785

The changes exhibited by this table are slight. It is noted elsewhere that the extension of aid from public funds was almost entirely confined to primary schools. The number of special schools managed by Government necessarily tends to increase as more provision is made for technical training. The decrease in the number of schools is not an unmixed evil, as the efficiency of a large school is usually superior to that of a small one.

5. *Financial results.*—The total expenditure during the year under report amounted to Rs. 1,11,12,906, and exceeded that of the previous year by

Rs. 1,70,411, or by 1·5 per cent. The sources and distribution of this large sum are as follows:—

Head of charge.	1897-98.				1898-99.			
	Net expenditure after deducting receipts.			Total expenditure.	Net expenditure after deducting receipts.			Total expenditure.
	From Provincial revenues.	From district funds.	From municipal funds.		From Provincial revenues.	From district funds.	From municipal funds.	
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
University	...	...	...	1,40,868	...	......	......	1,74,268

Primary	1,57,148	4,62,884	52,891	28,29,704	1,82,173	5,08,815	32,0[illegible]0	29,65,888
Female	1,60,634	84,680	10,937	8,53,815	1,75,435	83,896	[illegible]	8,71,946
Special	2,95,069	16,684	1,792	4,95,834	2,97,176	20,494	2,821	5,21,798
Scholarships	1,73,626	28,589	1,013	2,35,009	1,73,073	20,828	833	2,37,065
Buildings	1,88,251	3,910	3,254	5,48,880	1,58,096	3,898	2,003	5,00,506
Furniture	19,723	2,275	371	60,589	12,385	2,521	506	62,845
Miscellaneous	90,353	65,571	6,200	4,06,268	63,198	65,389	6,858	8,31,780
Superintendence	4,44,876	2,79,708	2,333	7,30,148	4,49,016	2,67,807	3,003	7,23,689
Total ..	24,83,908	11,13,085	99,122	1,09,42,495	23,74,226	11,37,434	94,877	1,11,12,906
	36,96,115				36,06,537			

Taken as a whole, the expenditure from all the public funds together decreased by Rs. 89,588, or 2·1 per cent., while the expenditure from private sources rose from Rs. 72,46,380 to Rs. 75,06,379, or by 3·5 per cent. The latter is due chiefly to increased fee-receipts, consequent on the rise in the number of pupils in various institutions. The receipts from fees have risen in the last ten years from 38 lakhs to nearly 52, but the percentage of fees on the total cost of education is still only 47, as compared with 44 in 1888-89. The increase in miscellaneous charges from four to eight lakhs of rupees, all of which was met from private sources, has been due to the inclusion of hostel charges for European schools under this head instead of under school expenditure direct, as was done in preceding years. This raised the total hostel charges from Rs. 2,42,977 to Rs. 6,83,108.

6. *Inspection tours.*—Dr. Martin was on tour for 15 days out of Calcutta, and Mr. Pedler for 37. The consideration of questions o[illegible]igh importance kept the Director of Public Instruction at head-quarters, but no one recognizes more warmly than himself the importance of these tours for the information of himself and the guidance of his immense staff of inspectors and teachers, and the Lieutenant-Governor does not doubt that the Director will devise means of subordinating his office business to this very essential duty.

The time spent on inspection by the inspecting staff of the Province is shown and compared for the past two years in the following statement:—

Class of Officers.	1897-98.		1898-99.	
	Number of officers.	Average number of days on tour.	Number of officers.	Average number of days on tour.
1	2	3	4	5
Inspectors	7	146	7	158
Inspector of European Schools	1	69	1	90
Inspectress of Girls' Schools	1	40	1	35
Assistant Inspectors ...	10	153	10	172
Deputy Inspe[illegible]s ...	(a) 50	177	(a) 50	180
Sub-Inspectors ...	209	218	209	212

(a) Excluding the Deputy Inspector of Calcutta, who always works within five miles of head-quarters, and including the Additional and Special Deputy Inspectors.

The above shows a satisfactory increase in the amount of work done by the higher inspecting agencies generally, as well as by the Deputy Inspectors of Schools. The tour days of the Inspectress of girls' schools and of the Sub-Inspectors, however, fall short of those of the previous year. The Inspectress, it appears, visited only 156 schools during the year, of which none was a high school, although she has a few of this class under her exclusive charge. This is regrettable.

The Inspectors, as a class, appear to have done their work well, though in the matter of visiting high English schools and distributing their tours evenly among the different districts there is room for much improvement. In the latter respect, it is incumbent on the Director of Public Instruction to see that some scheme of distribution is laid down in advance. In the Resolution on the last report, His Honour expressed a desire that such Assistant Inspectors as had very little office work to do should remain out of head-quarters for about 180 days. This limit had been reached by the Assistant Inspectors of Schools in the Chittagong and Patna Divisions. The tour days of the two Assistant Inspectors for Muhammadan Education, who have large areas under their charge and have to look after the interests of a special class of pupils, should not be permitted to fall below this limit, and the outturn shown by these officers (150 and 151 days) is inadequate. The performances of the various classes of inspecting officers have been reviewed in detail by the Director of Public Instruction; and the Lieutenant-Governor merely wishes to remark on the insufficiency of mere numbers as a test of good work, a point to which the report shows that the Director of Public Instruction is fully alive. Again, it is obvious that a detailed programme prepared in advance would defeat its own objects; but the failure to visit half the high schools, or to even enter a whole district, is a serious defect inconsistent with reasonable provision. The question of the efficiency of the class of inspecting pandits is one of great importance, which has been under consideration for a long time; and the conclusions of the Director have just been received. The minor point of distributing in the most effective way the energies of the additional Deputy Inspectors is one which the Director will himself settle. The Lieutenant-Governor has read with pleasure the appreciative remarks on the services rendered by Rai Radhika Prosanna Mukherjee, Bahadur, which have not ceased with the termination of his official connection with the Department, and which, he hopes, will continue for many years to be at the disposal of Government.

7. *District Boards.*—The relations between the District Boards and the Education Department continue to be as entirely harmonious as before. The practice referred to in paragraph 62 of the Director's Report of the alteration by a Local Board of the bills countersigned by the Deputy Inspector is clearly objectionable and must not recur. The educational functions exercised by Local Boards are in most districts nominal and not, therefore, particularly successful. Whether, in the small areas with which they have to deal, it is possible to make these functions more real is open to much question.

8. *Educational Conferences.*—No conference of Inspectors of Schools could be held during the year under report. The short time at the disposal of Mr. Pedler was fully occupied in connection with the revision of the text-books for vernacular schools, for which a Special Committee was appointed. The report of this Committee, which is the result of careful discussion and enquiry into the condition of vernacular education in this as well as in other provinces, was published, and criticisms thereon were invited from the public. The subject excited a gratifying degree of interest, and elicited many valuable opinions, which are now receiving the consideration of Government; and there is ground for hoping that this thorough ventilation of the subject will produce results of benefit.

Two conferences, one of the Head Masters and the other of the Deputy Inspectors, were held in the Patna Division for the preparation of courses of studies for high and upper primary schools, respectively.

9. *University education.*—The number of Arts Colleges open during the year under review was 39, that is, one more than in 1897-98. The aided colleges declined from six to five, there being no college classes at work in St. Paul's School, Darjeeling; but the unaided colleges increased in number by two. The total number of college students advanced from 6,440 to 7,204, an increase of 764 students. It is curious that the number of students attending the aided colleges is diminishing, whilst in the other classes it increases. The most notable feature of the returns of the Government colleges is the continued decline of the Hooghly College. In five years the numbers have fallen by a half. The Lieutenant-Governor was not prepared for so serious a change, and would be glad of a special report from the Director on the matter. It is a matter of congratulation that mufassal colleges as a whole are making headway.

10. *Cost of College education.*—The total expenditure on colleges decreased from Rs. 7,71,372 to Rs. 7,32,690. This decrease took place mainly in Government and aided colleges, in the former by Rs. 47,321 and in the latter by Rs. 13,614, while the unaided colleges show an increase of Rs. 22,454, consequent on their increased number. The expenditure from Provincial Revenues in the Government colleges declined from Rs. 2,49,710 to Rs. 1,84,056, owing partly to increased fee receipts but chiefly to the appointment of native professors and lecturers on lower salaries than those of the officers formerly occupying such posts. In the Government Colleges the average cost of a year's education is Rs. 183, in aided colleges Rs. 122, and in unaided colleges Rs. 50. For the whole province it is Rs. 101, of which the Government share is Rs. 29, compared with Rs. 40 in the previous year. Thus the total cost and the proportionate cost borne by Government have notably decreased.

11. *Success at University examination.*—The number of candidates for the first examination in Arts was practically the same in both years (2,796 as against 2,724 in 1897-98), but that of successful candidates fell off from 1,256 to 1,063, the percentage of success having gone down again from 46 to 38, its level in 1896-97. The percentage in Government colleges was 48 (as against 55); in the aided colleges 46 (as against 49); and in the unaided colleges 33 (as against 43). The Madrassa was the least successful of the Government Colleges.

The total number of candidates for the B.A. degree rose from 1,588 to 1,636, and the number of successful candidates from 391 to 416. The percentages of successful candidates in both the courses together were 33·3 in Government colleges, as against 35·2 in 1897-98; 27·4 in aided colleges (as against 22·3), and 20·8 in unaided colleges (as against 19·9). Of the 958 candidates in the A course 236, or 24·6 per cent., passed as against 26·3 in the previous year, while of the 678 candidates in the B course 180, or 26·5 per cent., passed as against 21·7 per cent. in 1898. As usual the highest place in Bengal was occupied by the Presidency College which passed 47·5 per cent. of its candidates, 51·9 in the A course and 44 per cent. in the B course. The results obtained in the Hooghly and Krishnagar Colleges were quite incommensurate with the expenditure, and deserve the careful consideration of the Director.

The number of candidates for the M.A. examination fell off from 172 to 162, and of those who obtained the degree from 83 to 63. Of the successful candidates, 43 belonged to Government colleges, 37 coming from the Presidency College alone; 10 from two aided colleges and 2 from two unaided colleges. Twenty-two of the candidates took the degree in English, 3 in Sanskrit, 2 in History, 11 in Philosophy, 11 in Mathematics, 2 in Chemistry, 11 in Physics, and 1 in Botany. Judged by the test of these examinations, the Presidency College continued to perform well its function of a Model Arts College for the Province. But the Lieutenant-Governor is gratified to observe that some of the mufassal colleges obtain a great and increasing measure of success, and promise to some day challenge the supremacy of the Metropolitan College. He is specially pleased with the progress in the colleges at Dacca and Barisal.

12. *Secondary education.*—The main statistics relating to secondary schools for native boys for the last five years are shown in the following table:—

YEAR.	Number of schools.	Number of pupils.	EXPENDITURE.		
			Public funds.	Private funds.	Total.
1	2	3	4	5	6
			Rs.	Rs.	Rs.
1894-95 ...	2,397	206,989	6,09,740	21,85,658	27,95,398
1895-96 ...	2,422	207,542	6,07,983	22,61,106	28,69,089
1896-97 ...	2,451	215,131	6,01,526	22,95,876	28,97,402
1897-98 ...	2,453	220,159	5,99,672	23,46,117	29,45,789
1898-99 ...	2,471	224,538	5,68,462	23,60,828	29,29,290

The increase in the number of pupils had been comparatively slow, amounting to 8·5 per cent. in the last four years; and that in expenditure to less than 5 per cent., whilst there has been a continuous decrease in the amount spent from public funds.

These schools are distributed into high English, middle English, and middle vernacular, though English is taught to an increasing number of pupils in the lastnamed schools also.

13. *High schools.*—These schools rose from 391 with 84,185 pupils to 419 with 93,680 pupils, the number of schools under public management remaining the same as in the preceding year, while the aided schools advanced by 6 and the unaided schools by 22. The numerical strength of schools and pupils shows a satisfactory increase all round. At the University Entrance examination, 4,798 candidates attended as against 4,754 in the preceding year, of whom 2,922 passed as against 2,658, the percentage of success having improved from 55·9 to 60·9. As the increase was 5 per cent. in each class of schools, it is to be ascribed with probability to a lowering of the standard. The Director has pointed out the theoretical fallacy of estimating the relative efficiency of the various schools by the percentage of passes to examinees, and recommends that the percentage should be calculated on the proportion of successful pupils to the total number in the entrance class. The difference between the two methods, as worked out in paragraph 113 of the report, is less marked in practice than was *primâ facie* to be expected, but the Director's method is no doubt the sounder one, and will, as he suggests, be gradually substituted. With the remarks of the Director on the subject of weak schools of less than 100 pupils, the Lieutenant-Governor at once agrees.

14. *Drawing.*—The increased success in drawing at the Entrance Examination is satisfactory, 373 having passed in this subject from the Government high schools last year as against 199 in the preceding year. The improvement has been due to the enforcement of the rule that in the award of junior scholarships the marks secured in drawing should be taken into consideration. Drawing masters have been employed by all high schools under public management, except Rangamati, and by a large number under private management, both aided and unaided. The Lieutenant-Governor desires that, as recommended by the Director, the appointment of a qualified drawing master should be made one of the conditions of a grant-in-aid as new grants are sanctioned or old ones revised.

15. *Middle schools.*—The middle English schools increased from 933 to 958, or by 25, and the number of pupils in them from 70,604 to 70,656, or by 52 only. The schools managed by Government were 6 in number in both years, but the number of pupils in them decreased by 108, or 14 per cent. Those managed by District or Municipal Boards increased by two but had fewer pupils. The number of aided schools was the same in both the years, but the pupils attending them were fewer by 1,044, or by 2 per cent. The unaided

schools, just like the unaided colleges, gained both in number and strength, the former rising from 256 to 279 and the latter from 18,124 to 19,343.

The number of middle vernacular schools declined from 1,129 to 1,094 and their pupils from 65,370 to 60,202, or by 8 per cent. The schools maintained by Government were 39, as before, but lost 267 pupils. The number of Board schools has risen from 144 to 147, and the attendance has increased from 8,653 to 8,700. The aided schools were fewer by 24, with 41,091 pupils as against 44,547, and the unaided schools were fewer by 14, with their attendance reduced from 9,234 to 7,742. The decline in all classes, therefore, has been heavy.

The following table shows in a condensed form the results of the middle scholarship examination from the two classes of schools (middle English and middle vernacular) for the last two years:—

1897-98.

		Number of candidates.	Passed at the Middle English examination.	Passed at the Middle Vernacular examination.	Total.
Middle English schools	...	3,433	858	901	1,759
,, Vernacular schools	...	3,4[illegible]8	96	1,494	1,590
Total	...	6,861	954	2,395	3,349

1898-99.

		Number of candidates.	Passed at the Middle English examination.	Passed at the Middle Vernacular examination.	Total.
Middle English schools	...	3,685	1,414	1,215	2,629
,, Vernacular schools	...	3,487	179	2,268(a)	2,447
Total	...	7,172	1,593	3,483	5,076

(a) Including those candidates who appeared at the middle English examination from middle Vernacular schools, but passed with the middle vernacular certificate.

The very favourable results of the examination in 1898-99 compared with those of the previous year have been discussed at length, and the conclusion is that the question papers were less difficult than before. Changes so marked are undesirable, and the Lieutenant-Governor does not doubt that the Director will take measures to ensure closer adherence to some recognized standard.

16. *Discipline and moral training*.—Cases of serious breaches of discipline were not numerous, and His Honour is glad to observe that in most cases the offenders were adequately punished. Misconduct on the part of teachers and inspecting pandits has not unfortunately been so rare. Several gurus of primary schools used unfair means to pass pupils at the examinations. They were fined, deprived of their rewards, or punished in criminal courts, according to the gravity of the offence in each case. In connection with this matter, the Director quotes the following extract from the report of Mr. J. Willson, Inspector of Schools, Patna Division:—

"The general tenour of the district reports shows that discipline, as looked on from the native point of view, is on the whole satisfactory; but, from the little experience I have had of Bihar, it appears to me that there is still much to be done before we can say that discipline is really good in our schools. Very many of our teachers do not understand what good discipline consists of, and it is therefore hard to expect that they can maintain it. Then again, for the maintenance of true discipline, the hearty co-operation of parents and guardians of the students is specially needed; for, if the precepts inculcated while at school are not observed at home, there is little hope that real improvement will be made. A very ordinary breach of discipline is the touting of boys, and even of masters and managers of schools to induce students to go from one school to another. In the case of teachers and managers of schools, this is a very serious matter, as the example they set is most injurious to boys. Cases have occurred, when the services of a teacher have been dispensed with, that he went about trying to induce students of his old school to withdraw, evidently with the intention of injuring the school; this example was naturally followed by some of the students."

The moral conduct of the pupils is dependent mainly on home influences, which are beyond the control of Government, but to some extent also on the example of their teachers and on the standard of discipline which the latter not only propose but also enforce. Therefore the Lieutenant-Governor observes with regret the prevalence of the very injurious system of touting for pupils. *Virtus post nummos*, and it is not surprising that the already low ideal of

discipline is sacrificed to the dread of unpopularity and consequent loss of pupils. Obvious remedies consist in a reduction in the number of the competing schools wherever possible, and the prompt punishment of flagrant offenders against the transfer rules. Signs are not wanting that some unprincipled teachers, on the other hand, use the transfer rules as a means for oppression, and the Lieutenant-Governor assumes that the Director will, where necessary, take such measures as may be required to check these practices.

17. *Boarding-houses.*—The number of boarding houses for Indian pupils of educational institutions rose from 195 with 5,475 inmates in 1897-98 to 222 with 6,158 inmates in 1898-99. The steady increase in the number of these institutions, which are invaluable for the purpose of enforcing discipline, is extremely satisfactory. The total expenditure was Rs. 2,41,456 in 1898-99 as compared with Rs. 2,42,845 in the preceding year, of which Rs. 15,074 was contributed by Government. The low price of food-stuffs in the year under report no doubt accounts for the somewhat reduced expenditure.

18. *Physical exercise.*—Physical exercise continued to receive a fair share of attention. In some of the zilla schools drill has been made compulsory, and the Lieutenant-Governor hopes that this will be extended to the rest, as it is such an excellent training in discipline. As a rule, boys are reported to have taken kindly to this form of exercise. It is desired that the next report may contain a list of Government and aided institutions in which systematic drill is not practised.

19. *Primary education.*—The number of primary schools and their pupils during the past five years is shown in the following statement:—

		Upper primary.		Lower primary.	
		Schools.	Pupils.	Schools.	Pupils.
1894-95	...	3,901	150,878	46,897	1,055,253
1895-96	...	3,944	153,070	47,054	1,087,356
1896-97	...	4,029	162,102	45,612	1,081,432
1897-98	...	4,107	165,057	43,482	1,036,635
1898-99	...	4,232	173,885	44,080	1,061,477

The above exhibits a steady gain in the number of upper primary schools and a still more satisfactory increase in the number of pupils attending them. The lower primary schools are fewer in number, and have fewer pupils than in 1895-96 and 1896-97; but they appear to stand on a surer basis, the average number of pupils of each school being 24 in 1898-99, the highest number yet reached.

20. *Cost of primary schools to Government.*—The expenditure incurred by Government and by District Boards on account of primary schools for native boys and girls for the last two years is compared in the following table:—

	From Provincial Revenues.		From District Funds.		Total.	
	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
To stipendiary schools	1,27,769	1,18,950	1,71,137	1,54,101	2,98,906	2,73,031
" non-stipendiary schools	30,919	22,053	3,21,989	3,27,647	3,48,908	3,49,730
" payments to primary schools under the District Boards or Department or such as are not included in the above ...	681	1,317	3,361	3,010	4,042	4,327
" rewards to teachers of primary schools for passing pupils at scholarship examinations	5,828	9,310	32,596	51,432	38,424	60,781
" charges for abolished schools	4,541	3,502	9,538	12,098	14,079	15,600
" buildings and furniture	5,067	6,736	978	2,055	6,045	8,791
" subordinate inspecting agency	14,196	13,640	88,628	87,867	1,02,824	1,01,527
" lower primary scholarships created from the primary grant	2,202	2,453	24,047	24,443	26,249	26,896
" miscellaneous	8,377	14,626	20,987	52,153	29,364	66,779
Total payment	1,59,080	1,92,716	6,73,861	7,14,826	8,32,941	9,07,542
Add 60 per cent. of the actual charges on account of Sub-Inspectors	51,071	20,766	1,52,545	1,42,505	1,73,616	1,63,211
GRAND TOTAL	2,10,151	2,13,482	8,26,906	8,57,331	10,36,457	10,70,753
Total allotment,* excluding the allotment for Sub-Inspectors	1,97,470	1,98,526	7,46,616	7,58,253	9,44,086	9,53,779
Actual savings	7,899	5,610	73,355	40,4[illegible]	61,245	46,257

* The allotment for salaries and travelling allowances for Sub-Inspectors in Board areas was Rs. 1,95,315, of which Rs. 1,77,603 was spent, and Rs. 17,712 was saved.

This statement is, however, misleading in two distinct ways. Firstly, the want of punctuality in issuing cheques on the part of the District Boards often causes sums really expended in one year to be shown in the accounts of the next year. Of course if this irregularity were persistent, the nominal gain at the end would be counterbalanced by the loss at the beginning: but it is sufficiently erratic to seriously affect the comparative value of the table. It is desired that the Director will insist on his orders in this matter being obeyed by his subordinates. Secondly, certain sums are spent on primary education by municipalities and by "Circle Funds" derived from Provincial Revenues, the former expending Rs. 60,000 in the year.

The cost from Provincial and District Funds on primary education for the last five years is shown in the following table:—

YEAR.	From Provincial Revenues.	From District Funds	Total.
1	2	3	4
	Rs.	Rs.	Rs.
1894-95	2,16,254	5,30,257	7,46,511
1895-96	2,22,684	5,73,991	7,96,675
1896-97	2,27,485	5,51,119	7,78,604
1897-98	2,18,775	4,97,364	7,16,139
1898-99	2,22,125	5,37,201	7,59,326
Total ...	11,07,323	26,89,932	37,97,255

21. *Comparison of cost of Upper and Lower Primary Schools.*—The apportionment of the grants from Provincial Revenues and District Funds between upper and lower primary schools and the relative cost of both classes are shown, division by division, in the following table, which has been condensed from that in paragraph 137 of the Report:—

DIVISION.	Allotment.	Expenditure.		Number of Schools.		Number of pupils.		Cost per school in rupees.		Cost per pupil in annas.	
		Upper.	Lower.	Upper.	Lower.	Upper.	Lower.	Upper.	Lower.	Upper.	Lower.
1	2	3	4	5	6	7	8	9	10	11	12
	Rs.	Rs.	Rs.								
Burdwan	1,73,403	33,242	82,599	900	7,367	35,386	194,190	36·0	11·2	15·0	6·8
Presidency	1,36,613	22,721	67,025	495	3,719	22,586	120,177	45·9	18·0	16·0	8·0
Calcutta	11,000	1,027	5,806	13	137	981	6,655	125·1	34·3	26·0	13·0

Dacca	1,23,410	32,772	55,080	910	3,535	33,003	89,604	36·0	15·5	15·8	9·8
Chittagong	1,03,889	22,189	40,757	441	2,332	18,625	63,576	50·5	17·4	19·0	10·2
Patna	1,89,908	22,203	93,073	224	4,340	11,764	121,435	99·1	21·0	30·1	12·2
Bhagalpur	1,17,326	20,290	47,600	274	2,489	12,047	60,890	74·3	19·1	26·3	12·5
Orissa	92,058	18,297	36,607	253	3,716	9,883	63,301	72·0	9·7	29·0	9·2
Chota Nagpur	85,419	10,853	55,617	127	1,908	5,786	50,694	85·5	29·2	30·0	17·6
Total for 1898-99 ...	11,74,591	2,07,258	5,37,575	4,068	32,282	166,805	844,032	50·9	16·6	19·8	10·1
Total for 1897-98 ...	11,45,489	1,83,087	4,06,809	3,691	30,030	145,832	769,459	49·7	15·5	20·1	9·7

The Director observes that the rise in the average cost per school, upper and lower, has been caused by the inclusion of municipal grants this year in the foregoing statement. In the upper primary schools this rise has, however, been followed by a reduction in the average cost per pupil owing to the increase of pupils, while in the lower primary schools, in which the increase has not been proportionately so large, the contrary has been the case. The Director remarks:—

"The figures in the last four columns show the widest difference, not only between one division and another, but in some cases also between the same districts of a Division. The causes of these vari[illegible]s are many local circumstances, such as backwardness and inaccessibility, the system of administration prevailing in the different districts, and many other conditions, all of which are at work in bringing them about. The highest averages of

figures of the cost for an upper primary school are shown by all backward places, such as the districts of the Patna, Bhagalpur, Orissa and Chota Nagpur Divisions, by the Chittagong Hill Tracts and Darjeeling, and also by the Town of Calcutta, in which the monthly house-rent alone adds materially to the cost of maintaining a school. Again, the Burdwan, Rajshahi and Bhagalpur Divisions show large differences between the different districts of which they consist. Thus the average cost of all upper primary schools in Hooghly and Howrah is over Rs. 50, in Burdwan Rs. 40, and in Birbhum only Rs. 21; in the same way an upper primary school cost on an average Rs. 82 in Bogra against Rs. 32 in Rangpur, Rs. 122 in Monghyr, Rs. 43 in Malda, Rs. 117 in Bhagalpur, and Rs. 57 in the Sonthal Parganas. The entire absence of the stipendary system in Birbhum and the rather advanced character of Malda and the Sonthal Parganas, which resemble the Bengal districts more than the Bihar portion of the Bhagalpur Division, will to some extent explain these divergences."

The Director has discussed the merits of the three systems of (i) stipends irrespective of results, (ii) payment by results pure and simple, and (iii) the mixed system of a small stipend and rewards proportionate to results: he concludes that the first system is most efficient, most expensive, and least expansive; and the second, it is abundantly clear from the reports, requires the most careful supervision, for which the present staff is inadequate, and without which singularly, impudent and successful frauds prevail. The remarks of the Inspector of the Patna Division on this point are of great importance. Other matters to which the attention of the Lieutenant-Governor has been attracted are the account of the laxity which prevails in conducting the examinations and marking the papers in the Dacca Division; the carelessness in the inclusion of schools in the upper primary division; and the various malpractices associated with the minor examinations of the lower primary schools. These are disagreeable facts, which must, however, be faced. These papers contain stronger evidence than the Lieutenant-Governor has yet seen of the need of improved inspection, to which the Government of India has lately drawn attention. He awaits the Director's report on this matter with great interest. Meanwhile, he entirely approves the Director's conclusion that in the conduct of the primary school examinations the Eastern Districts must, without further objection, be brought under the system applied in the rest of the province.

22. *Relative position of the districts.*—In paragraph 138 of the Report the Director has given the usual table showing the number of pupils in each district and division in the different stages of primary education and comparing its relative position with reference to the progress made in this respect. The merit marks have been calculated on the same principle as before, and the figures quoted in the margin show the position of the different tracts.

Division.	1897-98.	1898-99.
1	2	3
Burdwan	132·5	137·2
Chittagong	98·0	96·4
Orissa	75·4	83·3
Presidency	81·0	81·0
Dacca	74·4	76·7
Rajshahi	50·1	51 7
Chota Nagpur	41·6	44·1
Bhagalpur	35·7	35·3
Patna	32·4	32·1

23. *Primary Scholarship Examination.*—The results of the Upper Primary Scholarship Examination for boys, including private candidates, are shown below for the last five years:—

Year.	Competing schools.	Successful schools.	Candidates examined.	Successful candidates.	Percentage of successful schools.	Percentage of successful candidates.
1	2	3	4	5	6	7
1894-95	2,484	1,613	5,868	2,751	65·0	46 8
1895-96	2,637	1,942	6,162	3,466	73·0	56·2
1896-97	2,682	2,037	6,518	3,824	75·9	58·6
1897-98	2,647	2,115	6,118	4,051	[illegible]	66·2
1898-99	2,969	2,280	7,357	4,386	76·8	59·6

The year's increase in the number of successful schools and pupils is satisfactory. With regard to the percentage of success, the Director observes that the normal ratio is about 60, the low figure for 1894-95 and the high figure for 1897-98 being due to undue variations in the standard of the examination.

In the Lower Primary Scholarship Examination the number of competing schools slightly decreased from 13,725 to 13,482, and that of successful schools from 10,460 to 10,454. The examinees also diminished from 46,175 to 45,339, and the successful candidates from 28,761 to 28,438. The percentage of success made a slight advance from 61·6 to 62·7. It was as high as 82 per cent. in the Patna Division, which is admittedly backward, and as low as 35·5 in Dacca, which is admittedly advanced. In Burdwan the percentage has gone up from 55 to 75; in Calcutta from 45 to 75; while in Dacca it has gone down from 68 to 35, and in Chittagong from 77 to 45. These fluctuations are serious, and the Lieutenant-Governor will be glad if the Director will come to an early decision as to which of the two remedies he suggests shall be adopted.

24. *School Post Office.*—There were 781 school post offices during 1898-99 as against 745 in the preceding year. The system is reported to be working well on the whole.

25. *Training Schools.*—The number of training schools for teachers of both sexes was 29, the same as in the preceding year, although the three guru-training classes then returned have ceased to exist. Schools for mistresses increased from nine to ten, but the pupils attending them fell off from 458 to 456. The expenditure on all training schools from Provincial Revenues was Rs. 95,199 as against Rs. 97,648 in 1897-98; but the total expenditure rose from Rs. 1,32,848 to Rs. 1,36,822. The average cost of each pupil per annum in the Government training schools was Rs. 158·6 as against Rs. 154·7 in the preceding year. It is as high as Rs. 225 in the Calcutta school, which, as compared with the sister school at Hooghly, in which the cost was only Rs. 134·6, appears to be excessively expensive, whilst it is less successful in the examinations. The principle under which a training school is maintained at the head-quarters of each division is that the demand for local teachers may be supplied from local sources. This end seems to be partially defeated in the Calcutta school, inasmuch as 36 out of its 59 pupils are reported to have come from the Burdwan Division, for which there is adequate provision at Hooghly.

The Lieutenant-Governor regrets that the English training classes opened some years ago for the training of English teachers for Secondary Schools have proved a failure. The Hooghly class was closed for want of pupils, and the classes at Calcutta, Dacca, Cuttack, and Patna are also in a moribund state. At the last examination not a single candidate was successful in any of the grades of the examination. In the light of this failure, and having regard to the desirability of preliminary training for school-masters, the Lieutenant-Governor wishes that the Director will not wait for the expiry of the period of grace previously laid down, but will at once devise a new scheme.

The total number of candidates for the vernacular mastership examination was 395 as against 420 in the preceding year, of whom 313, or 79·2 per cent., were successful as against 275, or 65·4 per cent. Seventy-three of these candidates (as against 81) won first grade certificates, of whom 19 came from Hooghly and 14 from Dacca.

The Lieutenant-Governor is constrained to express some disappointment at the slow progress made in the employment of trained teachers. In England the idea is exploded that a man can go straight from the examination hall to the teacher's desk; and the existence of an art of teaching, capable itself of being taught, is fully recognised. But in India the discipline which attends a course of study in a training college is a most valuable concomitant; and the Lieutenant-Governor trusts that the instructions, already issued to the Inspectors, of the necessity of encouraging trained teachers, will be loyally observed.

26. *Law classes.*—The number of law schools increased from 16 in 1897-98 to 17 in 1898-99, owing to the opening of a class in connection with the Braja Mohan Institution, Barisal, and that of pupils from 1,194 to 1,305,

or by 111. The average annual cost of educating each pupil in the law departments of the Government colleges was nearly Rs 57-2-6 as against Rs. 52-4-5 in the previous year. The number of pupils reading for the degree of Bachelor-in-Law increased by 65, and those attending the Pleadership classes by 46. The total number of candidates who appeared at the last B.L. Examination was 450 as against 468 in the previous year, and the number of successful candidates also decreased from 239 to 206. Legal education is now almost monopolised by a few private colleges, the numbers attending public and private institutions being 217 and 1,088, respectively. It is noteworthy that no candidate was adjudged worthy of a place in the first division of the B.L. Examination, and that three Government colleges and one Municipal college did not furnish a single successful pupil. These poor results call for some explanation; and it is a matter of regret that better legal teaching is not provided.

27. *Medical institutions.*—The total number of medical institutions increased by two, but that of medical students fell off from 1,815 to 1,709. The total strength of the Medical College at the beginning of the session was 576 as against 583, 588, 511 and 484 at the same period of the four preceding years, but at the end of the session the number was 477 as against 477, 468, 375 and 311 at the close of the same four years. Of the students that competed at the various examinations, 48·7 per cent. were successful as against 44 per cent. in the preceding year. The Lieutenant-Governor is sorry to see that no candidate appeared at the examination for Honours in Medicine or in that of Doctor in Medicine.

The number of students in the Campbell Medical School at Sealdah on the 31st March 1899 was 202, of whom 17 were female students. Thirty-five male and five female students appeared at the second or final diploma examination; 27, or 77·14 per cent., of the former and 3, or 60·0 per cent., of the latter were successful as against 82·35 and 90·0 per cent. in the previous year, respectively. All the female students, excepting one, who is married, were boarders in the Lady Elliot Hostel. The number on the rolls of the Dacca Medical School on the 31st March last was 144, of whom 8 were females. Of the 18 students who appeared at the final examination, 14 were successful. The number of pupils in the Temple Medical School at Patna was 115 at the close of the session, of whom 2 were females. There was a large number of Bengalis and of students from the Central Provinces. Three students appeared and passed at the final examination. In the Cuttack Medical School the number of pupils at the close of the session was 104, of whom 6 were females. All the 13 candidates that appeared at the final examination passed.

28. *Sibpur Engineering College.*—The college consists of three departments, viz. (1) the Engineering Department, affiliated to the Calcutta University, (2) the Apprentice or Foreman Mechanic Department, and 3) the Artisan class In the Engineering Department there were 99 students, less by 19 in the previous year, of whom 90 were Hindus, 5 Europeans or Eurasians, and 4 Muhammadans. The total strength of the Apprentice Department was 195, showing an increase of 11 pupils. This number consists of 158 Hindus, 33 Europeans or Eurasians, and 4 Muhammadans. The Artisan class does not prosper, there being only one pupil in the class on the 31st March 1899. An Agricultural class was opened in connection with the college in June 1898, which had 13 pupils on the 31st March last. The total strength of the college on that date was 309 as against 313 in 1897-98. At the L.E. Examination two candidates appeared, both of whom failed. At the B.E. Examination 18 candidates appeared, of whom 4 passed. The percentage of passes in the combined examination was 20—a result which cannot be considered satisfactory. Five overseers' certificates were granted and 17 sub-overseers' certificates, viz., 11 to students of the college and six to students of technical schools. The results of the annual examination of the Apprentice Department were satisfactory, the percentage being more than 90, except in the second-year class, in which it was 69·4. As in the former year, no student of the college selected a mining scholarship. An ex-student, however, was passing through a special course in electrical engineering. Three students who had gone through an electrical course passed during the year and at once obtained good appointments.

The Lieutenant-Governor learns with satisfaction that the students behaved very well during the plague scare. They enjoy a great privilege in the conditions of their college life, greater perhaps than is open to any other body of students in Bengal; and they set an excellent standard of manliness and *esprit de corps* for similar institutions in the Province. The Principal was deputed during the year to inspect and report upon all the Technical Schools of the Province. His report has been a most valuable one. Defects in the method of instruction and in the appliances of the schools are now being remedied, and their affiliation to the central college will now, the Lieutenant Governor hopes, be a real and useful connection.

29. *Survey schools.*—The number of students in the three Government Survey Schools at Dacca, Patna and Cuttack on the 31st March 1899 was 144, 137 and 88, respectively, as compared with 190, 182 and 84, respectively, in the previous year. The decrease in the number of students in the Dacca school is attributed—

(1) to the enforcement of the new rule that only English-knowing pupils are qualified for the second-year survey class;

(2) to the failure of a large number of passed students to obtain employment.

Practical training received much attention at these schools. The number of pupils who appeared at the final examinations was 148, of whom 120 passed successfully.

30. *School of Art.*—The number of students on the rolls in the Government School of Art on the 31st March 1899 was 265 as against 226 in the previous year. The numbers on the Fine Art side fell from 20 to 16. A proposal to give instruction in practical surveying for the benefit of the architectural and mechanical drawing students has since the close of the year been sanctioned by Government.

31. *Female education.*—The main statistics of female education, *i.e.*, the attendance and the expenditure in the school for native girls, are shown in the following table:—

Class of Schools.	Number of schools.	Number of pupils on the roll on the 31st March 1899.	Average number on the rolls monthly.	Average daily attendance.	Expenditure from— Public funds. Provincial revenues.	Public funds. District fund.	Public funds. Municipal fund.	Private funds. Fees.	Private funds. Other sources.	Total.
1	2	3	4	5	6	7	8	9	10	11
					Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Managed by Government	4	402	361	244	21,974	...	...	3,402	564	26,080

Aided by Government or by District or Municipal Boards	2,276	49,796	40,405	34,165	64,739	33,886	8,878	29,633	1,68,804	3,05,940
Unaided	451	7,374	6,761	5,341	...	...	...	741	6,804	7,545
Total ...	2,732	57,617	53,563	39,778	86,713	33,886	9,091	33,880	1,76,172	3,39,748
						1,29,690		2,10,052		
Total for 1897-98 ...	2,817	58,807	55,138	41,925	85,227	34,660	10,987	29,964	1,81,462	3,42,260
						1,30,874		2,11,326		
Total for 1896-97 ...	3,216	65,313	69,416	46,105		1,43,597		2,11,811		3,55,408
Total for 1895-96 ...	3,356	65,974	61,444	46,450		1,45,940		2,31,463		3,76,402
Total for 1894-95 ...	3,216	64,867	58,603	45,098		1,46,682		2,58,796		4,05,478

There was a falling off both in the number of schools for girls and of the pupils attending them during the year under review. Besides the girls shown in the above table, there were also 38,083 girls in boys' schools as against 36,806 in the previous year. The net result of the year is a loss of 85 schools and a gain of 87 pupils, including the girls in the boys' schools. The number of schools and the pupils attending them in the Town of Calcutta and in the Dacca, Patna, and Bhagalpur Divisions decreased, while that of schools and of pupils in the other divisions increased, excepting Orissa and

Orissa Tributary Mahals, in which the number of schools remained stationary with a slight accession to the number of pupils attending them. The total expenditure decreased from Rs. 3,42,260 in 1897-98 to Rs. 3,39,742 in 1898-99, or by Rs. 2,518, and a decrease is shown both under public and private funds. The Director reports:—

"Comparing the figures for the year under review with those for the last four years, it is found that the expenditure on female education has been steadily decreasing, while the number of schools and the pupils attending them have also decreased. But it is difficult to assign any single or precise cause for these facts."

The only two girls' schools maintained by Government are the Bethune Collegiate School in Calcutta and the Eden Female School in Dacca. The Bethune School sent up three girls at the last Entrance Examination, all of whom passed—one in the first and two in the second division. The Eden Female School had no candidate for any higher examination, but two girls passed the upper primary and two the lower primary examinations. The total number of girls who passed the modified middle English, middle vernacular, upper primary and lower primary examinations for boys in the year under review was 3, 22,108 and 827 as against 4,13,82 and 899 in the previous year, respectively The higher examinations, middle and upper primary, show better results in 1898-99 than in 1897-98, but a considerable falling off took place at the lower primary examinations, so that on the whole there were 38 less passes than the preceding year. Altogether the report emphasises the failure of the present system of female education in Bengal. No progress is being made; and it is said the finger cannot be laid on the weak points of the present organisation. The time has therefore come for a reconsideration *ab initio* of the methods which have proved so unsuccessful.

32. *Education of Europeans.*—The following table shows the number of Government, aided and unaided, schools for European education in Bengal, and the number of pupils attending them for the last two years:—

Class.	31st March 1898.				31st March 1899.			
	Number of schools.	Number of scholars.			Number of schools.	Number of scholars.		
		Boys.	Girls.	Total.		Boys.	Girls.	Total.
1	2	3	4	5	6	7	8	9
Secondary Schools. Government	2	143	55	198	2	155	72	227
Secondary Schools. Aided	41	2,753	2,749	5,502	40	2,525	2,513	5,038
Secondary Schools. Unaided	11	1,275	299	1,574	12	1,307	386	1,693
Total ...	54	4,171	3,103	7,274	54	3,987	2,971	6,958
Primary Schools. Aided	17	353	501	854	18	427	505	932
Primary Schools. Unaided	3	31	61	92	3	30	15	45
Total ...	20	384	562	946	21	457	520	977
Government schools	2	143	55	198	2	155	72	227
Aided Schools	58	3,106	3,250	6,356	58	2,952	3,018	5,970
Unaided schools	14	1,306	360	1,666	15	1,327	401	1,728
Grand Total of all Schools ...	74	4,555	3,665	8,220	75	4,444	3,491	7,935

The total number of Government and of Government aided schools remains unchanged, while the unaided schools have increased in number by one. The Government schools at Kurseong show an increase of 29 pupils, the aided schools a decrease of 386, and the unaided an increase of 72, the total decrease being 285 as against an increase of 90 in the preceding year.

This general decrease is to some extent accounted for by the unusually large number of children who were sent to the hill schools during the year under review probably on account of the fear of the plague. Many of these children, although withdrawn from the Calcutta schools, did not join the hill schools until after the 31st March 1899, and are therefore not included in the above return. The total cost of European education was Rs. 14,85,737 as against Rs. 13,84,365 in 1897-98, of which Government contributed Rs. 2,22,767 as against Rs. 2,07,364. The number of candidates from European schools for the University Entrance Examination was 26 as against 30 in the previous year, and the number of successful candidates was 19 as against 24. All these candidates were sent up by two unaided schools which admit a large number of non-European scholars. The Lieutenant-Governor has read with interest the comparison made by Mr. Bamford of the efficiency of class teaching in India with that in England; and he trusts that the efforts now being made to provide trained teachers will be successful. With regard to the examinations he observes that no candidates appeared for the High School Honours, and that the Entrance Examination of the Calcutta University has been practically abandoned. He would like to have the opinion of the Director as to the bearing of these two facts on the quality of the education furnished at the European Schools.

Proposals for supplying more targets and good carbines than those now issued to the members of the Cadet Volunteer Corps in Calcutta, for providing a separate Range for practice and for class-firing, and for changing the date of the drill competition for the Lieutenant-Governor's prize have been made in paragraph 232 of the report. Mr. Pedler is requested to submit these proposals separately for the orders of Government.

33. *Muhammadan education.*—The total number of Muhammadan pupils increased from 445,179 in 1898 to 452,298 in 1899, or by 7,119. The increase was shared both by public and private institutions, the former gaining 2,654 Muhammadan pupils and the latter 4,465. The percentage of Muhammadan pupils to the total number of pupils declined from 27·4 to 27·1. It is the public institutions that suffered in this respect; the percentage of Muhammadans in private institutions, presumably less efficient, advanced from 61·7 to 63·4. With the exception of the arts colleges, middle vernacular schools, technical schools and madrassas, all classes of public institutions gained pupils of the Muhammadan persuasion. High English schools, middle English schools, upper primary schools, professional colleges and training schools showed an increase both in the number and in the percentage of Muhammadan pupils, while lower primary schools showed an increase in the number of pupils only as compared with the previous year. The percentage of Muhammadan pupils in technical schools decreased from 14·8 to 5·3, and this falling off the Lieutenant-Governor observes with peculiar regret as boding ill for the future prosperity of the community. There was an increase of Muhammadan pupils in all the divisions, with the exception of Chittagong and Bhagalpur, which lost on the whole 709 and 560 Muhammadan pupils, respectively.

Muhammadan candidates acquitted themselves better than in the previous year at all the examinations, with the exception of the Lower Primary Scholarship Examination. The total number of successful candidates at the M.A., B.A., F.A., and Entrance Examinations was 296 as compared with 267 in the previous year. But it is a matter for serious reflection that in the whole of the Province only 203 pupils qualified themselves for employment in the district offices by passing the Entrance Examination.

34. *Education of aborigines.*—The total number of aboriginal pupils increased from 33,708 to 34,266, or by 558, though this failed to make good the loss of 4,140 pupils recorded in the preceding year. The slight increase of the year was shared by schools of all classes, except middle vernacular and special and private schools, in which the number of pupils declined. The five missions in Chota Nagpur maintained 220 schools with 6,792 pupils in 1898-99 as against 192 schools with 6,323 pupils in 1897-98. The total number of passes of all description fell by 113, owing entirely to the greater severity of the Lower Primary Examination. Four pupils passed the Entrance Examination. The number of successful candidates at the Middle Scholarship and

Upper Primary Scholarship Examinations rose by 4 and 16, respectively. The success of the aboriginal pupils at the higher examinations is satisfactory. The Lieutenant-Governor notes with satisfaction that the East Indian Railway Company at Giridih, the Equitable Coal Company in Manbhum and various coal companies in Burdwan maintained schools for the children of the miners employed by them.

35. *Private institutions.*—There are a large number of private institutions scattered throughout the Province which do not conform to any particular departmental standards of instruction and submit to no public test, but adhere to indigenous modes of teaching. They include the elementary schools for reading and writing, Sanskrit *tols*, and *maktabs* for teaching the *Koran* or Arabic and Persian. The number of these schools and that of the pupils attending them during the last two years are shown below :—

	1897-98.	1898-99.
Schools	11,413	11,078
Pupils	119,923	122,542

The above figures show a decline of 335 schools, but an increase of 2,619 pupils. The decline in the number of schools is nominal merely and due to the transfer to the class of special schools of those Sanskrit *tols* which by preparing their pupils for the title examinations have become entitled to rewards and stipends from public funds. Some of the schools included under this head are the embryos of the lower primary schools.

36. *Sanskrit.*—The number of Sanskrit *tols* decreased by 229 and their pupils by 3,493, but against this is to be set off 276 schools with about 4,600 pupils of this class transferred under Government orders to the list of special schools. In the examination for titles there was a considerable falling off at the first and the final (or title) examination, and a large increase at the second one in the number of successful students. Altogether about Rs. 19,000 were spent during the year from Provincial Funds on the encouragement of Sanskrit learning.

37. The Text-book Committees sat during the year, and the Central Committee transacted a very considerable amount of business. The Patna Committee also scrutinised a fair number of books; but the Orissa Committee's work was almost nominal. The constitution and functions of these Committees have been the subject of consideration during the year, but final orders have not yet been passed.

38. *Conclusion.*—Dr. Martin, who has for the last three years been head of the Education Department, retired on the 3rd January 1899. The Lieutenant-Governor desires to acknowledge his eminent services to education in the Province, to which he had given 34 years of assiduous labour. The thanks of Government are due to Mr. Pedler for the excellent report submitted by him, and to the officers he has specially mentioned. There are issues of magnitude before him and the Government in the Department, which he has to guide, issues such as constantly arise at intervals in every branch of administrative business. There are at the present in Bengal no larger or more far-reaching questions than those on which Mr. Pedler's attention is now bent, the curriculum of the vernacular schools, the methods of examination in the primary schools, and the improvement of the staff and system of inspection.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secy. to the Govt. of Bengal.

RESOLUTION ON THE PROGRESS REPORT OF FOREST ADMINISTRATION IN THE LOWER PROVINCES OF BENGAL FOR THE YEAR 1898-99.

REVENUE DEPARTMENT—FORESTS.

Calcutta, the 16th January 1900.

RESOLUTION—No. 265.

READ—

The Progress Report of Forest Administration in the Lower Provinces of Bengal for the year 1898-99.

Read again—

The Progress Report of Forest Administration in the Lower Provinces of Bengal for the year 1897-98, and Government Resolution thereon.

Mr. E. G. Chester, Officiating Conservator, held charge of the Bengal Forest Circle up to 10th February 1899, when he was relieved by Mr. A. E. Wild on return from furlough. The Report was submitted by the latter on 14th November 1899, about a month and a-half later than the prescribed date.

The following statement shows the area of each class of forest in the circle :—

CLASS OF FOREST.	Area at commencement of the year.	Added.	Excluded.	Area at close of the year.	PERCENTAGE—	
					Of total forest area.	Of the area of the provinces (151,535 square miles).
1	2	3	4	5	6	7
	Sq. miles.	Sq. miles.	Sq. miles.	Sq. miles.		
Reserved	5,880	1	...	5,881	43	3·88
Protected	3,460	379	23	3,816	28	2·52
Unclassed .. .	4,034	.....	1	4,033	29	2·66
Total .	13,374	380	24	13,730	.....	9·06

2. Excepting the constitution of the Paglajhora (Unclassed) forest in Kurseong, measuring only 363 acres, as "Reserved Forest," and the addition of 160 acres deducted last year in the Singhbhum Division, no other change in the area of the reserved forests was made during the year. As to protected forests, an area estimated by the Deputy Commissioner of Angul at 378 square miles in the Sadar subdivision of that district was added; and an increase of 1 square mile was made by rectification of areas in Palamau. An area of 23 square miles was transferred from the Forest Department to the Commissioner in the Sundarbans to be leased out to cultivators. Orders to remove the whole of the Saoria tract, covering some 113 square miles, in the northern portion of the Damin-i-koh, in the Sonthal Parganas, from the control of the Forest Department and to place it under that of the Deputy Commissioner have issued, but pending the appointment of the necessary establishment have not yet been given effect to. Similarly the re-adjustments attendant on the settlement of the Kolhan have not been finally approved, and their nominal area has not yet been changed. The only change in the area of the Unclassed forests was that caused by the constitution of the Paglajhora reserved forest.

3. Rules for the protected forests in Angul, closely imitating those in force in the Khurda Government Estate, were published during the year.

4. *Settlement.*—Excepting the Paglajhora forest mentioned above, no other area was finally settled during the year. It is to be regretted that the settlement of the 11 blocks aggregating 842 square miles in the Chittagong Division, which it was stated in the Report for 1897-98 had so far advanced as to be ready for notification early in 1898 99, has not been completed. The delimitation of the boundaries of the protected forests in the Palamau and Singhbhum Divisions resulted in raising the total length of boundaries from 4,011 miles in 1897-98 to 5,184 miles during the year under report. In those forests 657 miles of new work was carried out, labour having been supplied free by the adjoining villages. Ten miles of boundaries of reserved forests were demarcated during the year (in Singhbhum), and only seven remain to be done.

The areas requiring survey in the Bengal forests amount to 3,046 square miles in the reserved, 1,733 square miles in the protected, and 4,033 square miles in the Unclassed forests; and a programme of operations to be undertaken by the Imperial Forest Survey Branch during the ten years, commencing from 1899-1900, has been approved by the Government of India.

5. *Working-Plans.*—Last year the Government of India emphasised the necessity of preparing working-plans with as little delay as possible. It is, therefore, with great regret that the Lieutenant-Governor observes that the progress made has been so small. In all 12 square miles (the Tista Valley) were added to the area for which plans exist; though it was only a delay in ascertaining the opinion of the local officers that prevented the plans of the Jalpaiguri Division (183 square miles) from receiving the approval of Government during the year. The Lieutenant-Governor has to say again what he said last year, and what the Government of India has insisted upon for years, that the compilation of working plans is an essential and imperative duty of the department. Better a rough record than none at all. Without some summary of the character of the timber in a forest, it is impossible to work it with confidence. The market does not know the potential supply, and the Government cannot control it. Of the grievous deficiency of Bengal in this cardinal matter the following figures are the proof. In the North-Western Provinces and Oudh 88 per cent. of the reserved forests is under completed working plans; in the Central Provinces 97 per cent., in Bengal 45 per cent. The excuse will be made that the Department in Bengal is under officered. The excuse is inadequate. The Conservator has repeatedly lent his officers for miscellaneous duties elsewhere. This will be inflexibly stopped till he has brought his forests in this matter to the level of neighbouring provinces. The plans the Lieutenant-Governor has seen are unnecessarily elaborate. He expects them in future to be pushed on with the greater expedition, because they need not be so closely minute. In most forests there will be from year to year variations of demand, and compilations of excessive precision are wasted, and the experience of the market will lead to adjustments, for which allowance must be made. An illustration is given in this very report in the Darjeeling and Tista Divisions. The working plans were not adhered to in the first case because the fuel merchants would not take wood from the more distant blocks. It is not clear that a scale of prices varying inversely with the distance and difficulty of access from Darjeeling would not remove this difficulty, and the Lieutenant-Governor is disappointed to find that no effort seems to have been made to meet it.

The Conservator remarks that the three lines of railway now under construction in the neighbourhood of the forests, viz.,—

(1) the extension of the Cooch Behar line towards Buxa Cantonment and the Jainti river, which runs along the main road through the midst of the forests,

(2) the Baroon-Daltonganj section from Baroon on the Sone river, and

(3) the Bengal Duars extension in an eastern direction through the Tondu reserved forest of the Jalpaiguri Division,

should be of considerable advantage to the Forest Department, at least for facilitating travelling, if not for the transport of forest produce. The Conservator will report what share his forests have taken in providing sleepers for these railways. His report is silent on the matter.

6. *Buildings and communications.*—The following statement shows the expenditure on roads and buildings in 1897-98 and 1898-99 and the budget estimates for the latter year:—

Description of work.	Buildings.			Roads and Bridges.			Total.		
	Actuals of 1897-98.	Budget estimates of 1898-99.	Actuals of 1898-99.	Actuals of 1897-98.	Budget estimates of 1898-99.	Actuals of 1898-99.	Actuals of 1897-98.	Budget estimates of 1898-99.	Actuals of 1898-99.
1	2	3	4	5	6	7	8	9	10
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
New construction ..	21,568	25,597	23,433	11,592	26,674	10,205	33,160	52,271	33,638
Repairs	11,341	10,875	11,146	10,715	10,498	8,902	22,086	21,373	20,048
Unapportioned ...	1,395	1,528	1,160	120	4,828	123	1,515	6,356	1,283
Total ..	34,304	38,000	35,739	22,457	42,000	19,239	56,761	80,000	54,069

In the Sundarbans Division the new head-quarters house at Khulna was completed, and a residence for the Divisional Officer of the Sonthal Parganas at Dumka was almost finished. In Singhbhum the divisional head-quarters house at Chaibassa was partially re-constructed.

Fifty-seven miles of new roads and paths were made during the year as against 67 in the previous year, and repairs were carried out along 842 miles of road, the corresponding figures for 1897-98 being 881. Of the new roads, 37 miles were meant to facilitate export, while 20 miles were for purposes of inspection. The Lieutenant-Governor has read with interest the remarks of the Conservator on the subject of communications, and agrees with him that the attention of the Divisional Officers may with advantage be directed more towards this important subject. He awaits with interest the fate of the experiment in the Tista Division.

7. *Breaches of Forest Law.*—Three hundred and seven cases were taken into Court during the year under report as against 379 in 1897-98. This decrease occurred mainly under "fire cases" in the Singhbhum Division, and under "Unauthorised fellings" in the Sonthal Parganas, where the cause of the falling off is ascribed to the better understanding by the people of section 67 of the Forest Act. Against this there was some increase in the Sundarbans Division, said to be due to better supervision.

Of the cases disposed of, 90 per cent. ended in conviction as against 89 in the previous year. Prosecutions were instituted in 19 cases for offences with regard to fire, of which 14, involving 38 persons, ended in conviction, and 1, involving 1 person, resulted in acquittal. The remainder were pending at the end of the year. Of the total cases of this kind 10 occurred in Singhbhum, 3 in Angul, 3 in Palamau, 2 in Jalpaiguri, and 1 in Darjeeling.

The Government of India have lately asked for the opinion of this Government as to whether the Indian Forest Act needs amendment with a view to the better protection of forests from fires and the punishment of incendiarism, and the Conservator has been requested to report on the question.

The number of cases compounded by Forest officers amounted to 2,057, involving 4,018 persons as against 1,631 cases, involving 3,441 persons in the previous year. The amount received as compensation was Rs. 12,867 as compared with Rs. 11,532 the previous year. The average compensation received for each case was Rs. 6-4-1 and for each person Rs. 3-3-3. The compensation received for each person involved varied between 8 annas 4 pies in Singhbhum and Rs. 10-13-5 in Chittagong. It is explained that in Chittagong, where only 14 cases were compounded, the high compensation was demanded, owing to the fact that the sums fixed in the previous year did not act as a sufficient deterrent; while in Singhbhum, it is stated, the cases of this nature were much more numerous, and light sums had to be fixed in many of them as the offences were committed in the protected forests. But, as in the previous year, no explanation has been offered of the wide variations in other Divisions. The total number of offences increased from 2,230 to 2,487, and of these the Darjeeling Division contributed 608 cases, while the Sundarbans and Tista Divisions contributed over 400 and 300 cases, respectively.

8. *Forest fires.*—Protective measures against fire were taken for 2,089 square miles, of which only 37 square miles, or 1·77 per cent. of the entire protected area, were burnt, as against 27·09 per cent. in 1897-98 and 3·16 in 1896-97. This very satisfactory result is ascribed mainly to the early and favourable rains. It is a curious fact that an excessive number of fires occurs every other year; and as the year under report happened to be the one in which fires were not due, it would be over-sanguine to attribute the falling off to the efficacy of protective measures. Singhbhum again records the largest area burnt, which, however, amounted only to 16 square miles, compared with 436 square miles in 1897-98. Some modifications in the system of fire-protection were introduced in this Division, which the Conservator says promise to give better results, viz., the girdling of trees on the fire lines and the reward of an extra rupee per month to each fire patrol in whose beat no fire occurs.

A great source of danger to the forests in Kolernna, Singhbum, Puri, and Angul is the fires which take place year by year in the forests belonging

to private persons and petty States, which in parts surround these forests. Out of the total number of 143 fires that broke out, 19, spreading over 2,965 acres, are attributable to this origin. A suggestion made by the Superintendent of the Tributary Mahals, Orissa, for the deputation of a depamental officer to the forests of these mahals is under the consideration of this Government, and the Conservator has also addressed the Commissioner of the Chota Nagpur Division on the subject.

The Conservator remarks that in the trial of fire cases no distinction was made in estimating the gravity of the offence by reason of its having been committed in a fire-traced area, and that fires occurring in the open forests were, in fact, more severely dealt with than those happening inside closed areas. The particular case which has elicited these remarks has been examined by this Government, which has approved of the censure conveyed by his official superior to the trying Magistrate. The Lieutenant-Governor desires that the Conservator will instruct the Divisional officers in future to bring this distinction to the notice of the trying Magistrates and press for heavier sentences in such cases.

In their review of the Report for 1897-98 the Government of India expressed the opinion that the area under protection may have been increased too quickly and that a smaller area effectually protected, would be preferable to ineffectual protection. With regard to this, the Conservator observes:—

"The suggestion to protect a smaller area effectively seems to resolve itself into one of cost. Again, the abandonment now of protective measures over any area which has hitherto been attempted might be construed as a sign of weakness, and would doubtless induce the feeling referred to, even if it does not now exist. It might further even lead to attempts to render the protection of the area thus treated ineffective in order that it might likewise be abandoned."

No attempt has yet been made to confine the operations to a smaller area and Mr. Wild adds that—

"So long as the people intentionally set fire within the protected area, the effectiveness of any protective belt seems doubtful. It is of the first importance that the people should be made to respect protective measures, and this can only be attained by patient teaching and the hearty co-operation of the district officials."

The Lieutenant-Govenor concurs with the above remarks.

9. *Grazing.*—As in the previous year, 393 square miles of reserved forests were open to all animals during the year under report; and an addition was made to the area open in the protected forests by the constitution of the Angul protected forest, the returns from which however have not been furnished. The returns of Puri also are incomplete. The average area per head of cattle grazed in the reserved forests was 5·5 acres compared with 5·6 acres in the year before, and the value increased by Rs. 4,100 to Rs. 31,417. In the protected forests, excluding Angul, and crediting 18,167 cattle to Puri, the acreage per head was practically unchanged, though the value fell off by Rs. 3,919 owing to bad collections by the Sub-divisional Officer of Khurda. The District Magistrate of Puri is desired to take steps to improve the collection in that Subdivision.

The question of the best method of instituting a rotation of grazing areas in protected forests is still under the consideration of the Conservator, and his report is awaited.

10. It would appear that for the circle 62 fires, as against 108 in the previous year, were fired intentionally, damage being done to 40,545 acres as against 241,652 in 1897-98. Prosecutions were instituted in 9 of those cases, of which 7 ended in conviction, and 2 were pending at the close of the year.

11. *Yield and outturn of forest produce.*—The following statement gives details of the forest outturn of the year :—

Class of forest and agency by which produce was removed.		Timber.	Fuel.	Total wood.	Bamboos.	Minor produce
Reserved.		C. ft.	C. ft.	C. ft.	C. ft.	Rs.
Government	...	80,964	81,597	1,62,561	7,152	105

Grand total in 1898-99	6,420,306	32,248,935	38,669,241	20,744,794	2,90,016
Ditto in 1897 98	4,904,846	30,128,991	35,033,837	19,827,312	2,74,606
Difference in 1898-99 ...	+1,515,460	+2,119,944	+3,635,404	+91 ,482	+15,410

* Includes Rs. 982 collected from Hill Tippera.

The gross outturn under all heads was, therefore, much greater than in the previous year, and the increase was shared by all the divisions except Kurseong, Tista, and Direction. The increase in the Sundarbans was very noteworthy, the timber and fuel exceeding that of the previous year by 2,661,161 cubic feet, and minor products being much more profitable. In the Chittagong Division also the careful supervision of Mr. Stebbing resulted in a great advance being made.

12. *Financial results.*—The following statement shows the financial results during each of the last six official years: —

Financial year.		Receipts	Charges.	Net revenue.
		Rs.	Rs.	Rs.
1893-94	...	... 8,01,611	4,04,043	3,97,568
1894-95	...	... 7,95,673	3,98,601	3,97,072
1895-96	...	... 9,18,709	4,66,068	4,52,641
1896-97	...	... 13,70,849	6,90,042	6,80,807
1897-98	...	... 11,89,285	6,53,437	5,35,848
1898-99	...	... 9,72,313	4,86,319	4,85,994

Eliminating the Singhbhum sleeper operations of 1896-97 and 1897-98, which swelled the gross receipts of those years by Rs. 4, 93,763 and Rs. 3,61,357, both the gross receipts and the net revenue of the year under report are the highest on record. These larger receipts are almost entirely due to the improved removals by purchasers of timber, firewood and minor products, mainly from the Sundarbans and Chittagong Divisions.

13. The following table shows the result of the last two financial years, Division by Division:—

Division.	Receipts.		Charges.		Surplus.		Deficit.	
	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Darjeeling ...	79,969	72,452	69,647	76,486	10,322	......	...	4,034
Tista	27,828	22,996	28,675	26,346	......	......	847	3,350
Kurseong... ...	39,021	40,610	33,796	33,864	5,225	6,746	...	...
Jalpaiguri ...	49,127	43,154	23,459	27,455	25,668	15,699	...	...
Buxa	16,441	20,230	23,752	19,801	......	429	7,311	...
Sonthal Parganas	22,760	18,021	17,364	15,918	5,396	2,103	...	...
Direction	13,506	14,813	39,660	45,929	......	......	26,154	31,116
Palamau	3,429	3,561	11,890	11,528	......	......	8,461	7,962
Singhbhum ...	40,745	3,83,760	46,842	2,24,810	......	1,58,950	6,097	...
Angul	3,912	7,642	15,286	12,159	......	......	11,374	4,517
Puri	25,084	31,313	26,093	26,050	...	5,263	1,009	...
Sundarbans ...	5,57,120	4,50,684	1,10,480	94,654	4,46,640	3,56,030	...	...
Chittagong ..	98,871	75,149	45,875	33,442	52,996	41,707	...	...
Total ...	9,72,313	11,89,285	4,86,319	6,53,437	5,46,247	5,86,827	60,253	50,979
Net surplus ...	......	......	......	......	4,85,994	5,35,848	...	...

The Conservator observes that—

"The statement is disappointing in so far as it shows so many Divisions working at a loss—a state of affairs which should not exist except in the Direction Division, and perhaps in Palamau, where, however, especially as little timber is at present available, far greater attention should be given to the capabilities of the Division in regard to minor products. * * That Divisions like Tista, Buxa and Angul, where there are quantities of material available, should not pay their way seems surprising, but with a large scale of Imperial officers and more energetic and experienced management, considerable improvement is hoped for."

The Lieutenant-Governor is even more disappointed than the Conservator seems to be. He cannot admit that the completion of sleeper works in one corner of the province is sufficient excuse for a fall of a third in the revenues of the whole. There must be other outlets for what the Conservator admits to be available material, if the officers of the Department will exert themselves to find a market for it. It seems incredible that the Buxa Division should not pay its way, when a railway is under construction in its immediate neighbourhood. The truth is that Forest Officers must realize more than they do that they are the agents of a great commercial undertaking, and that as such they are not merely the scientific protectors of an important property, but active exploiters, whose business it is to seek and develop markets for the produce that is ready for use. The Lieutenant-Governor fears from what he has seen that this is not sufficiently remembered in Bengal, and he looks to the Conservator to infuse greater alertness and ardour in this matter into the officers of his staff.

He is glad in this connection to see that the Conservator's attention has been particularly directed to the development of miscellaneous products; and that he proposes to establish a central depôt in Calcutta to foster this branch of forest exploitation. The proposal is at first sight hopeful: and he will watch the progress of the scheme with interest. The more remote divisions are at a great disadvantage compared with those more accessible, in disposing of those products of which the bulk is great, compared with the value: and their financial prosperity will for a long time to come depend to a great extent on the development of the outturn of minor products.

In another respect the year's results are disappointing. Much was expected from the development of the mica industry in Hazaribagh; but no satisfactory method has yet been devised of collecting the Government royalty on the outturn of the mines, and the Lieutenant-Governor trusts that the personal enquiries of the Conservator will result in a scheme which will secure a fair return to Government without unduly hampering the industry.

14. *Miscellaneous.*—Mr. Chester, Officiating Conservator, was on tour for 175 days and Mr. Wild for 53. Two forest guards were sentenced to rigorous imprisonment, one for two years and the other for three months, for forgery and giving false evidence with the object of defrauding Government, and 14 guards were dismissed. A revised scheme for the re-organization of the office establishment of the Department has lately been submitted to the Government of India. Towards the end and after the close of the year collections of forest products and of articles connected with forestry have been made for the Paris Exhibition.

15. The administration of the Forest Department in the past year has been in some respects excellent, but the Lieutenant-Governor has to repeat that in two directions there is serious deficiency which must be rectified—the preparation of working plans, and the finding of markets for the produce of the forests.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secy. to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE CHITTAGONG DIVISION FOR THE YEAR 1898-99.

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 13th January 1900.

RESOLUTION—No. 231.

READ—

The Annual General Administration Report of the Chittagong Division for the year 1898-99.

MR. G. E. MANISTY was in charge of the Division until the end of November, when he was relieved by Mr. F. R. S. Collier, who has submitted this report.

2. *Tours and Inspections.*—On the whole, the tours and inspections made by the Commissioners and District Magistrates appear to have fallen below the standard attained elsewhere. Thus the Commissioner failed to inspect the whole of the Sadar offices of Comilla and Chittagong: and the Feni and Cox's Bazar sub-treasuries were only inspected once by the District Magistrate, whilst in duration the tours of the District Magistrates of Chittagong and Tippera, and the Subdivisional Officers of Brahmanbaria, Chandpur, and Feni, fell short of the standard fixed after proper consideration by the Commissioner. It is desired that the Commissioner will see in future that the yearly programme fixed by him is completed.

3. *Weather and crops: Material condition of the people: Public health.*—The total rainfall was much higher than in the two preceding years, being in Noakhali as much as 125 inches. The rice crop exceeded the normal in Tippera, but is reported to have been only 93 and 90 per cent. of a normal crop in Noakhali and Chittagong; but the terms in which the Collector and Commissioner describe the material condition of the people of the former district suggest that the new crop notation here, as elsewhere, has not been understood. Whatever may be the exact meaning of the term "normal" crop, an "abundant" crop must be one above the normal.

The jute in Tippera and Noakhali was not good, and the betelnut and cocoanut crops in Noakhali gave 12-anna and 10-anna outturns, respectively—presumably represented by 100 and 83 in the new notation.

The Collector of Noakhali has drawn a glowing picture of the prosperity of the year, in which—to use the proverb—the dogs refused to eat cooked rice; and the Collector of Tippera has given a list of signs pointing to the same material welfare. In Chittagong, however, the people have not yet recovered from the effects of the cyclone and stormwave of 1897.

The public health would appear from the returns to have deteriorated in Tippera and Noakhali and improved considerably in Chittagong. Cholera claimed 4,800 victims in Tippera and 1,300 in Noakhali, while in Chittagong there were over 10,000 deaths, or less than 1 per cent. of the population, from the same cause. This excessive mortality is emphasised by the fact that throughout the rest of Bengal there was unprecedented immunity from the disease. The expenditure of Rs. 22,000 by the District Board of Tippera on improving their tanks and *khals* is, therefore, amply justified; and this example will, it is hoped, be followed in Noakhali and, when funds permit, in Chittagong.

4. *Manufactures: Trade and Commerce.*—The outturn of tea, which slightly increased, was 2,233,389 lbs., and in Chittagong four brigs were built during the year. Beyond these, there are no manufactures of importance.

The trade of the Division is tabulated under four heads, viz.—

(*i*) External trade generally by rail, the Nadia rivers, and canals alone, in 26 main staples.

(*ii*) Trade of the Division with Calcutta alone by rail, river, and canal alone.

(*iii*) Internal trade of each district.

(*iv*) Trade of the port of Chittagong.

As the trade of the port includes sea-borne trade with other parts of the Division, it is not possible to make out from these tables the *total* external

trade of the Division, but its fluctuations should be represented by the total volume of trade returned under heads (*i*) and (*iv*). The most notable figures in those heads are abstracted below:—

			Total Imports.		
			1897-98.	1898-99.	Fluctuations.
Head (*i*)	...	Mds.	244,479	244,796	+ 317
,, (*iv*)	...	Rs.	1,28,64,000	1,07,56,170	−21,07,838
			Total Exports.		
Head (*i*)	...	Mds.	799,466	1095,994	+ 296,528
,, (*iv*)	...	Rs.	1,12,63,036	1,07,05,958	−5,57,078

It would thus appear that in the external trade of the Division as a whole the imports decreased very considerably and the exports slightly.

The chief fluctuations in *imports* were a large increase in gunny-bags (presumably for rice) and in cotton goods; while the value of salt was less by 3½ lakhs. The value of kerosine oil imported through the port was less by 3 lakhs, but through other channels it increased in quantity by 4,000 maunds. The value of railway materials decreased by 2 lakhs of rupees, of jute by 13 lakhs, rice 2 lakhs, and apparel 1 lakh.

With regard to *exports*, the trade in rice and paddy increased very considerably; while that in jute decreased by 8 lakhs of rupees and 140,000 maunds, respectively, corresponding with the diminished crop. The tea exported decreased by Rs. 36,000 in value.

The increase in the import of cotton is ascribed to the good harvests, but the existence of large stocks is the explanation of the falling off in the trade in salt and kerosine oil.

The port of Chittagong lost ground in its volume of trade, and fewer ships cleared from the harbour. The receipts of the Port Commissioners fell off by nearly 30 per cent., though the customs receipts increased by over 20 per cent, chiefly from salt.

5. *Civil justice.*—The total number of civil suits disposed of was 79,402 as compared with 75,611 in the previous year. The increase of rent suits was most marked. The reason assigned for these results is the greater prosperity, but it seems to be scarcely applicable to the case of rent suits.

There was more delay in the detention of witnesses than in the previous year.

6. *Crime: Criminal justice: Police.*—In last year's report the number of cognisable cases for the year 1897 was returned as 10,243. It was pointed out in the Resolution that according to the Police Annual Report the number of true cognisable cases was 8,891. According to the present report the number was 7,422. In the absence of any explanation, it is, therefore, difficult to decide how far the numbers of 1898—7,261 cases—represent a real decrease. In non-cognisable crime, however, there was a marked increase.

There were no less than 52 cases of arson in Chittagong, a common crime in that district, and 30 in Noakhali; and the immunity with which this most serious crime may be committed continues to be deplorable; in only four cases did a conviction follow. Greater success was, however, obtained in dealing with coiners; and the attention directed to the cases of obstruction on the railway has caused a reduction in their number.

The Stipendiary Magistrates disposed of 8,729 cases in the year, and Honorary Magistrates 1,243. The convictions were 57·2 and 39·1 per cent., respectively, and of these 74·6 and 63·8 per cent. were upheld by the Appellate Courts. It follows, therefore, that the proportion of accused who ultimately were punished, in the courts of the Honorary Magistrates, for offences, the majority of which were presumably not serious, was one in four. Probably, however, many of the cases in these courts were compromised; for the average duration of each case (in which less than three witnesses were usually examined) being from 14 to 30 days, the parties may well have been weary of the law's delays: and the Lieutenant-Governor agrees with the Commissioner in considering that the protraction of the cases in the Stipendiary Courts of Noakhali and the Benches of Tippera and Noakhali reflects little credit on the Magistrates concerned. The Lieutenant-Governor observes with regret that the Honorary Magistrates in Tippera and Chittagong were even more frequently absent without notice on court days than in the previous year, and trusts that the Commissioner

will endeavour to reduce this fertile cause of delay in disposing of criminal work. The balance of unpaid fines at the close of the year increased, but is still low.

The Commissioner has offered no comments on the conduct of the police, but no charges of torture were made against them during the year, and the departmental punishments were not numerous.

For the whole Division the number of punishments inflicted on chaukidars decreased slightly, but the number of rewards was very much smaller than before; and the Lieutenant-Governor is particularly disappointed to see the extraordinary diminution in the number of rewards in Tippera. It is impossible that chaukidars who deserved so well in 1898 that 685 were rewarded, could turn out only 30 deserving men in 1899. He looks to the Commissioner to ascertain and prevent such violent fluctuations in the opinions or at least in the practice of successive officers.

7. *Land Revenue and Cesses.*—The total collections on account of land revenue and cesses were Rs. 32,35,704, a sum greater than that collected in the previous year, but smaller in relation to the total demand, of which it is only 85·7 per cent. The most notable failures with regard to land revenue were in Noakhali (in classes II and III), in Chittagong in khas estates, and in Tippera in temporarily-settled estates. The large arrears in class I in Noakhali are almost entirely due from the estate Bamni Chak, which has been bought in by Government. The failure in the other classes is not explained, and would appear to be inexplicable in view of the abundant harvests. The failure to collect arrears in class III should have been fully explained. The Collector of Tippera will, it is hoped, inculcate in the temporary settlement-holders the conviction that punctuality in payment is essential. Ordinary standards cannot fairly be applied to the progress made in Chittagong; but it is observed that, in spite of the great remissions, over Rs. 60,000 are still outstanding of the arrears due at the beginning of the year. Road and Public Works Cess arrears decreased considerably in Chittagong and slightly in Tippera, but increased in Noakhali. They now form nearly 16 per cent. of the current demand. Money-orders are increasingly popular as a means of paying revenue and rent in Chittagong.

The work of the certificate officer is specially heavy in Chittagong, where no less than 23,601 cases were for disposal. Of these, 7,341 were pending at the close of the year. Over 10,000 of the total were for arrears of road cess alone. The progress made was considerable; but it is regrettable that this enormous weight is added to the already heavy burden of the Chittagong Collectorate; and the Lieutenant-Governor trusts that the consideration of the question of collecting the cesses on which Government is now entering will result in some alleviation of the strain. The Deputy Collectors engaged on partition work failed to dispose of a single case in the year—a fact which at least merits explanation, though it has failed to obtain one.

8. *Excise: Stamps: Income-tax.*—The income from excise (exclusive of salt) increased by Rs. 10,538 to Rs. 2,84,028, in spite of a decrease in Chittagong. The incidence is, however, only 1 anna 1 pie per head, which is much below the rate elsewhere; and in Noakhali it is as low as 3 pies per head. Chittagong is usually credited with being not altogether innocent of the vice of smuggling opium into Burma; but no important preventive results were obtained in the year.

The revenue from stamps increased by Rs. 68,023 to Rs. 16,54,956, the growth of revenue being confined to court-fee stamps, which is a corollary of the increased litigation of the year. The sale of non-judicial stamps increased in Tippera alone; and the explanations advanced are not entirely convincing. In other Divisions the increased prosperity of the year has been followed by a decrease in the sale of these stamps, and it is not quite clear why in Tippera the contrary result should have followed. The incidence of the income-tax, which was slightly more productive than in the previous year, was *4 pies* per head, which cannot be deemed a crushing burden.

9. *Railways and Communications.*—Sanction was given to the construction of two branch lines of the Assam-Bengal Railway, and the requisite surveys have been begun. A feeder road in the district of Chittagong was completed. The district roads cost, according to the report, Rs. 133 per mile to keep in good order, and the village roads no less than Rs. 90 per mile. It is understood

that these rates included bridge repairs, but even so, the latter call for explanation. The sanctioned rate in Bihar is Rs. 10 per mile. Owing to the large expenditure occasioned by the cyclone, nothing was spent on village roads in Chittagong for work done in the year. The bills for work done in previous years, and amounting to Rs. 11,000, were paid No reason is given why these were not paid within the year to which each item related, and it is desired that greater care should be taken in future to prevent such delays recurring.

10. *Education.*—The total number of pupils at school was 144,402 as compared with 167,990 and 144,367 in the two previous years. It is evident that the ground lost in the unlucky year 1897-98 has not been recovered. High English education had more devotees as elsewhere; and equally notable is the falling off in the middle vernacular schools. Of the special institutions, the artisan school of Comilla was fairly successful in the Sibpur examinations; but from the Government madrassa at Chittagong, with an attendance of 509 students, one pupil alone succeeded in passing—and that in the second division—the Calcutta University Entrance Examination. Female education recovered much of the lost ground; and the number of pupils compares favourably with those in other Divisions. The total expenditure decreased slightly, the falling off in receipts from private sources amounting to Rs. 10,000.

11. *Medical institutions.*—The number of hospitals and dispensaries remained the same; and though there was a slight falling off in the in-door patients, there was very great increase in the out-door patients. The income from non-official sources was higher than last year, and nearly as high as in 1896—a result that must be considered satisfactory, though it is regrettable that the Faizunnissa Zanana Hospital had to be closed for three months for want of funds.

12. *Local Self-Government.*—The local Union Committees are again the subject of unfavourable comment; but the Local and District Boards appear, from the absence of criticism, to have worked well. Of the District Boards, both income and expenditure decreased by a lakh of rupees owing to the reduction in the amount granted by Government for special works. The large balance in Tippera, to which attention was drawn last year, has been reduced to Rs. 80,616, though this is still a very large sum.

The sanitary condition of the Chittagong Municipality is reported to have greatly improved in consequence of the effective supervision of the out-door work by the Chairman, and the satisfactory administration of municipal matters is ascribed in great part to him and to the Vice-Chairman. Noakhali is reported to be a clean and healthy town: but apparently the state of Comilla is not all that could be desired.

13. *Employment of Muhammadans.*—Due consideration was given to the claims of this class to such appointments as fell vacant in the year; but the Magistrate of Noakhali significantly points out that he has not a single Muhammadan apprentice who has passed the Entrance Examination (which is the requisite qualification). There are large madrassas in the Division liberally supported from public funds, but they appear to be singularly unsuccessful in equipping their pupils for Government service.

14. *Conduct of zamindars.*—The relations between landlord and tenant in Tippera and Noakhali are reported to have been satisfactory. As regards the Chittagong petty maliks, who last year were reported to have been somewhat severe in the collection of their rents from the tenantry distressed by the cyclone, it is said that they have behaved well.

15. *Political.*—The general condition of the Chittagong Hill Tracts appears on the whole to have been good. Collections of revenue were fair, and the number of pupils at school increased; while the principal crops were satisfactory. The Lieutenant-Governor, however, regrets to observe an increase in the civil and criminal work, which, he trusts, will not be permanent.

Extracts from the Commissioner's report are published for information.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secy. to the Govt. of Bengal.

Extracts from the Annual General Administration Report of the Chittagong Division for 1898-99.

* * * * * * *

III.—WEATHER AND CROPS.

18. On the whole, the weather was seasonable throughout the year, and the rainfall was plentiful, as will be seen from the table below:—

	1896-97.	1897-98.	1898-99.
Tippera	53·17	75·15	78·35
Noakhali	89 51	95·26	125·49
Chittagong	74·13	102·16	124·09

19. The average rainfall for the whole Division was 109·3 inches during the year under report against 90·85 inches in 1897-98, and 72·27 inches in 1896-97.

20. In Tippera, the rainfall was seasonable and plentiful, and being well distributed, was most beneficial to both the *aus* and *aman* crops, the outturn of which was above the average, being 104 and 103 per cent., respectively, of a normal crop. In the outturn of jute, however, there was a considerable decrease, which is due to the fact that the rainfall was below the normal, towards the beginning of the year, in consequence of which the sowing of jute was retarded.

21. In Noakhali, the rainfall was abundant and fairly well distributed. It was more heavy in the tracts lying near the sea, than in those away from it. Though the crops on the low-lands suffered somewhat from heavy rainfall in the month of August, still the outturn of *bhadoi* paddy was, on the whole, above the average, being 104 per cent. of a normal crop. Owing to excessive rainfall at the time of transplantation, the outturn of winter rice was slightly below the average, being returned at 93 per cent. of a normal crop. The outturn of the *rabi* crops was only slightly better than that of the preceding year. During the year under report, 3,500 acres of land were cultivated for the jute crop against 3,300 acres in the previous year. The outturn of jute was about 81 per cent. of a normal crop. The betel-nut plague did not re-appear during the year under report. The outturn of betel-nuts was 12 annas and of cocoanuts 10 annas in the year under review against 6 annas and 10 annas, respectively, in the preceding year. As reported previously, these two crops are an important source of income to the people of Noakhali.

22. In Chittagong, the rainfall was seasonable, and the state of the crops was very fair. The heavy rains which fell in June last washed out of the soil the salt deposited on it during the storm-wave of 1897. In this district, the outturns of *aus* and *aman* paddy were 100 and 90 per cent., respectively, of a normal crop.

23. There was no cyclone, storm-wave, inundation, or any other calamity in the Division during the year under report.

IV.—PUBLIC HEALTH.

24. The table below shows the mortuary statistics of the year under report:—

Prevailing Disease.	Tippera Population, 1,782,935.				Noakhali Population, 1,009,0?3.				Chittagong Population, 1,290,197.			
	Number of deaths reported.		Deaths per mille.		Number of deaths reported.		Deaths per mille.		Number of deaths reported.		Deaths per mille.	
	1897.	1898.	1897.	1898.	1897.	1898.	1897.	1898.	1897.	1898.	1897.	1898.
1	2	3	4	5	6	7	8	9	10	11	12	13
Cholera	4,210	4,817	...	...	2,984	1,347	...	...	10,781	10,220	...	...
Small-pox	22	20	...	...	3	7	...	...	2	97	...	...
Fever	33,742	34,461	...	...	29,742	36,517	...	...	40,058	33,461	...	...
Bowel-complaints	700	869	...	...	653	453	...	...	1,158	1,433	...	...
Others	7,734	9,568	...	...	4,121	4,285	...	...	[illegible]	2,514	...	...
Total ...	46,408	49,684	26 02	27·8	37,445	42,609	37·08	42·19	68,027	47,725	53·2	36·9

25. It will be seen from the above table that the year under report was a very unhealthy one in the districts of Tippera and Noakhali; but that the district of Chittagong was more healthy in 1898 than in 1897.

26. In Tippera the number of deaths from cholera rose to 4,817 against 4,210 in the preceding year. Cholera prevailed almost throughout the year, beginning from November 1897, and went on increasing in virulence up to the month of May 1898, when no less than 1,389 deaths were registered. The mortality was at last reduced by a copious fall of rain in that month, and in the month of June. Five extra Hospital Assistants were employed by the District Board to give medical relief in the affected villages. The number of deaths from small-pox rose from 21 to 29. In some villages in the Brahmanbaria subdivision, where there were 23 deaths from small-pox, the inhabitants, who are mostly Muhammadans, at first refused to permit vaccination. But finally, after a good deal of persuasion, they consented to be vaccinated, and the further progress of the disease was arrested. The mortality from fever increased from 33,742 in 1897 to 34,461 in 1898. The disease prevailed throughout the year in a more or less severe form. Mr. Harris observes:—"The reported increase may be chiefly due to the fact that the registration of vital statistics is now more vigorously enforced, and the reports of chaukidars, giving information of births and deaths are now more systematically tested by police officers, and officers of the Vaccination Department than before." The number of deaths from bowel-complaints increased from 700 in 1897 to 869 in 1898, and is reported to be chiefly due to deficient and bad supply of drinking-water. In the month of March 1899 there were eight cases of plague in Tippera, viz.. two in Daudkandi, four in Muradnagar, one in Kasba, and one in Comilla. All the cases ended fatally except the last, which was cured.

27. In Noakhali there was a remarkable decrease in the number of deaths from cholera, the figures being 1,347 in 1898 against 2,924 in the preceding year. There was a decrease in the number of deaths from bowel complaints also, there being 453 deaths in 1898, against 655 in 1897. The largest number of deaths from bowel-complaints, occurred from February to May, when the tanks, the only sources of water in this district, dry up The number of deaths from fever, however, rose to 36,517 in 1898 against 29,742 in 1897. Mr. Cargill observes:—"To a certain extent, the improved methods of registration and verification by inspecting officers have secured the record of a larger number of deaths, but there can be no doubt that the health of the district has been gradually growing worse since 1894, as judged from the mortuary returns." There were only seven deaths from small-pox against three in the preceding year.

28. In Chittagong there were 10,220 deaths from cholera during the year under report, against 10,781 in the preceding year. Cholera, which broke out in an epidemic form after the cyclone and storm-wave of 1897, continued its ravages until the end of June 1898, from which period it almost disappeared from the district. Twelve native doctors were employed on cholera duty in this district. The number of deaths from fever decreased from 40,058 in 1897, to 33,461 in 1898 There were 97 deaths from small-pox against two in 1897. The Magistrate has not assigned any reason for this increase.

29. The following table shows the births and deaths registered in each municipality, and the rate per mille:—

District.	Town.	Population.	Deaths registered. 1897.	Deaths registered. 1898.	Deaths registered. Rate per mille. ...	Deaths registered. Rate per mille. ...	Births registered. 1897.	Births registered. 1898.	Births registered. Rate per mille. 1897.	Births registered. Rate per mille. 1898.
1	2	3	4	5	6	7	8	9	10	11
Tippera ...	Comilla	14,680	333	304	22·6	20·7	299	323	20·3	21·9
	Brahmanberia ...	18,000	[illegible]	437	28·8	24·2	674	652	37·4	36·2
	Chandpur	5,000	*	158	*	31·6	*	110	*	23·2
Noakhali ...	Noakhali	5,479	168	174	30·6	31·7	158	128	28·8	22·2
Chittagong ...	Chittagon[illegible] ...	24,069	695	502	28·8	20·8	327	213	13·5	8·8
	Cox's Ba[illegible] ...	4,347	132	95	30·3	21·8	65	46	14·9	10·5
	Total ...	71,[illegible]81	1,847	1,670	25·8	23·3	1,523	1,471	21·2	20·5

* No figures available.

It will be seen from the above that the Chittagong and Cox's Bazar Municipalities show a decreased death-rate, and this fact agrees with the totals reported for the Chittagong district. The Noakhali Municipality shows an increase, which also agrees with the totals reported for that district. But the Comilla and Brahmanbaria Municipalities show a decreased death-rate, though the year was especially unhealthy in the Tippera district. One cannot possibly believe that the death-rate is so low as 20·8 per mille in Chittagong, or 21·8 in Cox's Bazar, when the death-rate of the whole district was 36·9 per mille. I am of opinion that deaths are not properly registered in the municipalities of this Division.

30. Registration of births seems to be still more defective, as the Chittagong Municipality shows a birth-rate of only 8·8 per mille, the Cox's Bazar Municipality 10·5 per mille, and the Comilla Municipality 21·9 per mille. The attention of the District Superintendents concerned will be drawn to this subject and they will be asked to see that births and deaths are properly registered in future.

31. During the year under report the District Board of Tippera spent Rs. 22,249 on the following sanitary works:—

		Rs
Re-excavation of eleven tanks	... ...	13,355
Ditto thirteen khals	... ...	8,894
		22,249

32. The District Board of Noakhali spent Rs. 561 and Rs. 3,685, respectively, in improving the drainage and water supply of the district. The drains along the Sahebghatta Road and the Chittagong Trunk Road were deepened and improved. Three new tanks were excavated, and four old ones were re-excavated. The reserved tanks were cleared of weeds and jungle and maintained in order. A tube-well was sunk in the compound of the District Board's office at a cost of Rs. 165. But the water obtained from the tube was slightly brackish.

33. The District Board of Chittagong spent Rs 700 for the excavation of three new tanks. As the Board had to spend a large amount in repairing the roads and bridges damaged by the last cyclone, no other sanitary works could be undertaken by it.

34. The Comilla Municipality spent Rs. 1,595 and the Brahmanbaria Municipality spent Rs. 705 on sanitary works. The Noakhali Municipality spent Rs 668-11-4 for improvement of water-supply and Rs. 417-7-10 for improvement of drainage.

35. The Chittagong Municipality spent Rs. 1,161-14-3 on sanitary works. Out of this amount, Rs. 138-11-3 were spent in clearing tanks and sinking wells, and Rs. 539-14 were spent in improving drains. The Cox's Bazar Municipality paid a contribution of Rs. 420 to the Charitable Dispensary of the place, and spent Rs. 200 on medicines, Rs. 60 on vaccination, and Rs. 92-15-3 for the construction of a culvert.

V.—MATERIAL CONDITION OF THE PEOPLE.

36. In Tippera and Noakhali, the year under report was a prosperous one, the fields having yielded an abundant crop and the prices of rice and other food-grains having fallen considerably In consequence, the people of these districts who are mostly agriculturists, were prosperous during the year under report.

37. In the Chittagong district, on the contrary, notwithstanding that the crops were on the whole fair, there was a deterioration in the material condition of the people. This result was due to the cyclone and storm-wave of October 1897, which destroyed the habitations of the raiyats over more than three-fourths of the district and thereby inflicted heavy losses on them. That there was a deterioration in material prosperity in the year under review, all the statistics for the year attest. Ordinary thefts increased by about 20 per cent.; receipts under Excise and Income-tax fell off; while registration of sales of immovable property and of mortgages increased. All these facts point in the same direction.

38. Mr. Harris, the Collector of Tippera, states:—

"The soil of the district is generally fertile and easily worked, and with the help of a fairly-distributed rainfall, the people obtain a good harvest. That the material condition of the people has considerably improved will be evident from the facts that in many villages thatched roofs are being replaced by corrugated-iron, and earthenware by brass utensils, and that gold and silver ornaments are now in common use by the women of the country."

39. As remarked last year, the people of the Noakhali district are well-fed, well-clothed, and well-housed, and their standard of living is undoubtedly good. There are very few landless labourers in this district. The process of land-formation, which is continually going on in the chars and littoral tracts, affords, year by year, fresh lands for cultivation. The pressure of population on the land, is not yet felt to any extent. Nature is bountiful, and the ample rainfall practically assures the two rice crops, year by year. Mr. Cargill states that during the year under review so plentiful was the outturn of crops, that it was a general complaint amongst the cultivating classes, that rice was so cheap that they did not care to sell it at such low rates. Mr. Cargill observes:—

"The high birth-rate, the steady increase in the already high stamp revenue, the amount of unnecessary litigation, and the surroundings of the people themselves all point to a general and well distributed agrarian prosperity."

40. In Chittagong, the portions of the district where the standard of material prosperity has been most lowered are the island of Kutubdia and the parts of the Chakaria thana, which were submerged by the storm-wave of 1897. The collection of rents in this area, whether by Government or by private zamindars, is still practically at a stand still.

VII.—PRICES OF FOOD AND LABOUR.

* * * * * * *

45. The year opened with very high prices; the price of common rice varying from 9 to 11 seers per rupee. The price of rice began to fall, when the *aus* crop was harvested and brought to market. There was no very marked fluctuation, until the prospects of the *aman* crop were assured. The fall was most noticeable when the crop appeared in the market, and towards the close of the year, the price of rice was as low as 16 to 18 seers per rupee. There was also an appreciable fall in the price of almost all other food-grains during the year under report.

46. There was no variation in the prices of labour during the year under report. The wages of skilled labour generally vary from six annas to one rupee, and of unskilled labour from four to eight annas. In Hatiya, agricultural labourers receive three meals and four annas wages per day, the islanders being too well off and lazy to work themselves. Elsewhere, an ordinary cooly receives four to five annas for a day of about seven hours' work. It is thus clear that labour is well-paid in this Division. The Division is very badly off, as regards skilled labour, which has to be imported from Calcutta or Dacca, when required.

47. Five boys of the Comilla Elliott Artizan School were reported as qualified for certificates of proficiency; three in carpentry, and two in tinsmiths' work.

VIII.—MANUFACTURES AND MINES.

48. There are no mines in this Division, and no important manufactures, except tea.

49. In Tippera the principal manufactures are brass utensils, pottery, rough agricultural tools, cane and bamboo-baskets, and *gur*, or undrained sugar. These articles are mostly consumed locally. Besides these, a kind of coarse cloth, called *mainamati* cloth, is manufactured close to Comilla. This kind of cloth is principally used for coats and shirts, and, being cheap and durable, is largely purchased by the people of this Division. In the village of Kalikacha, in the Brahmanbaria subdivision, a small cutlery manufactory has been opened, which turns out knives, scissors, choppers, and pruning knives. The Collector states that some of the tea-gardens in Assam get their supply of pruning knives from this manufactory.

50. In Noakhali, only bamboo mats and baskets, fishing nets, earthen pots, and coarse cloth are made.

51. In Chittagong, tea is manufactured. During the year under report, 2,233,380lbs. of tea were manufactured in twenty gardens, against 2,126,028 lbs. manufactured in seventeen gardens in the preceding year. Four brigs were built during the year under report, against three in the preceding year. Messrs. Bulloch Brothers and Company milled no rice for exportation during the year under review.

52. Coarse mats, used for bedding, are prepared in Chittagong from a reed known as *patipata*, and are sometimes sent to Arrakan and Rangoon for sale.

53. The pearl fisheries of Sonadia and Gomakhali were destroyed by the cyclone of the 24th October 1897: but new oyster-beds have formed, to some extent, at seven other places in the Moiskhal channel. These fisheries have been settled with a farmer for a term of three years, with effect from the 1st April 1899, on a rent at Rs. 1,770 per annum.

IX.—TRADE AND COMMERCE.

* * * * * * *

71. *Imports.*—As in previous years, husked and unhusked rice constitute the staple imports. There was an increase of 148,018 maunds and 1,408,174 maunds, respectively, in the quantity of rice and paddy imported during the year. There was also a large increase in piece-goods, gram and pulses, hides, and cocoanuts, while there was a noticeable decrease in coal and coke, raw cotton, raw jute, dried fruits and nuts, chillies, unrefined sugar, and fire-wood.

72. *Exports.*—Piece goods, kerosine oil, mustard oil, iron and betel-nuts show an increase, while raw cotton, twist, rice, paddy, hides, brass and copper, salt, cocoanuts, unrefined sugar, tobacco and timber show a large falling off. No explanation has been furnished regarding the fluctuation in imports and exports.

* * * * * * *

XII.—CIVIL JUSTICE.

92. The following statement shows the work done by the Civil Courts during the year 1898, as compared with the previous year:—

YEAR.	Suits for money.	Rents.	Title.	Number of witnesses examined.	Number of those in column 5 who were detained more than two days.	Ratio per cent. of witnesses detained over two days to total number examined.	Total number of appeals disposed of.	Percentage of appeal confirmed to appeal disposed of.
1	2	3	4	5	6	7	8	9
1898 ...	27,800	39,824	11,778	114,847	16,511	14·3	4,735	62·13
1897 ...	27,672	36,649	11,290	102,396	14,110	13·7	3,181	63·32

93. The increase in suits of all descriptions is due to the good harvests of the year, which enabled the people to enjoy the luxury of litigation.

94. During the year under review 114,847 witnesses were examined by the Civil Courts against 102,396 in the preceding year. The percentage of witnesses detained over two days was 14·3 against 13·7 in the preceding year.

95. There was a falling off in the percentage of appeals confirmed from 63·32 to 62·13.

96. Five hundred and eighty-three notices were served under section 424, Civil Procedure Code, in connection with the cadastral survey and settlement of Chittagong, against 318 in the preceding year. Only 26 suits, however, were actually instituted against 11 in the preceding year.

XIII.—CRIME.

97. The following table gives the total amount of cognizable and non-cognizable crime for the last two years, and shows its incidence:—

District	Cognizable.		Increase.	Decrease.	Non-cognizable.		Increase.	Decrease.	Total crime.		Population.	Incidence.	
	1897.	1898.			1897.	1898.			1897.	1898.		1897.	1898.
1	2	3	4	5	6	7	8	9	10	11	12	13	14
												Case. Person.	Case. Person.
Tippera	2,429	2,968	..	154	7,056	7,606	550		9,477	9,873	1,782,935	1 to 188	1 to 180
Noakhali	2,230	1,976		254	4,166	4,323	157		6,396	6,299	1,009,093	1 to 157	1 to 160
Chittagong	2,770	3,017	247		2,651	2,805	154		5,422	5,822	1,290,167	1 to 237	1 to 221
Total	7,122	7 261	247	408	13,873	14,734	860		21,295	21,994	4,082,795	1 to 191	1 to 165

98. It will be seen from the above that there was an increase in non-cognizable crime in all the districts of the Division, which may be partly attributed to good harvests which enabled the people to resort to the Courts on trivial grounds, as litigation is regarded as a luxury by the lower classes of the people. It also appears probable that owing to changes of subordinate Magistrates, there was on the whole a relaxation of stringency in admitting complaints

99. In cognizable crime, there was a decrease in the districts of Tippera and Noakhali, while there was an increase in the district of Chittagong, which is attributed by the Magistrate to the better reporting of cases by the rural police and by the public. The explanation is not convincing. The increase is more probably due to a deterioration in material prosperity occasioned by the ravages of the cyclone as explained in section V. The fact that there was an increase in thefts supports this view.

100. The most prevalent serious crime in this Division is incendiarism. It is one of the two recognized methods of taking vengeance, the other being the poisoning and slaughtering of cattle. During the year under report there were 52 cases of arson in Chittagong, 30 in Noakhali, and 4 in Tippera. Three of the cases in the district of Chittagong and one in the district of Noakhali ended in conviction. In the case in the Noakhali district, and in one of the cases in Chittagong, the culprits were sentenced to rigorous imprisonment for seven years each.

101. There was no recurrence of incendiarism in the town of Chittagong, such as prevailed in the hot-weather of 1897. This is, I believe, due to the fact that in January 1898, I wrote to the Magistrate informing him that I had arranged with Government that in case of a recurrence of incendiarism in Chittagong, a force of special police would be quartered in the town at the expense of the inhabitants. Notices to this effect were posted all over the town, and there has been no recurrence of incendiarism since.

102. Coining is somewhat prevalent in this Division. In Tippera there were twelve coining cases during the year under report, ten of which ended in conviction. In Noakhali seven coining cases were detected, five of which ended in conviction. In one of these cases, a constable, disguising his identity, contracted an intimacy with a notorious coiner. After a month or so he succeeded in having the coiner and his wife arrested in the act of manufacturing moulds for coining. The male prisoner was sentenced to seven years' imprisonment, while his wife was acquitted. In another case, two professional coiners, a eunuch and a woman, lived together in the vicinity of the Sudharam town. Sub-Inspector Osman Ali, while in charge of the Sudharam thana, kept a strict watch over their movements, and at last succeeded in arresting them with two moulds, eleven counterfeit current rupees, eight Charyari rupees, and a large amount of materials used is coining. In Chittagong there was no important coining case during the year.

103. In Tippera during the year under report there were 78 cases of rioting against 80 in 1897; in Noakhali 17 against 35; and in Chittagong 30 against 25. All these cases were of a petty nature, except 14 cases in Tippera, in two of which there was loss of life, and one in Chittagong resulting in grievous hurt to one person.

104. In Tippera there were six cases of dacoity, including two pending trial in 1897. Of the four cases reported during the year, three were committed on rivers. Only one of these cases ended in conviction; the culprits could not be recognised in two other cases, and the fourth case was pending trial at the end of the year. In Noakhali only one case was reported, in which ten persons were sent up, of whom five were convicted and sentenced to undergo rigorrous imprisonment for five years each. In Chittagong there were two cases against three in the preceding year. Both these cases ended in conviction. One of these cases was attended with murder. In this case, 25 Mughs armed with spears, guns, *daos*, and swords, attacked the house of a Muhammadan of Falongkhali at night, killed the owner of the house and his mother, and then carried off property to the value of about Rs. 2,000

105. In Tippera there were 7 cases of murder and 12 of culpable homicide, against 12 and 16 cases respectively in the preceding year. In Noakhali there were 4 cases of murder and 5 of culpable homicide, against 3 and 5 cases respectively in the preceding year.

106. In Chittagong there were 3 cases of murder and 6 of culpable homicide, against 2 and 4 cases respectively in the preceding year.

107. The practice of throwing clods and bricks at passing trains, and of putting obstacles on the railway line, is very common in this Division. In the district of Tippera there was a proposal for the appointment of additional police to patrol the line at the cost of the villagers. The proposal was not sanctioned, but it had the desired effect, and cases of this nature are decreasing.

108. In Chittagong a good deal of opium-smuggling is suspected to be carried on, but the number of cases detected is comparatively small, which is unsatisfactory. In two cases the police captured a quantity of opium amounting to 31 seers. Liberal rewards were given in these cases, both of which ended in conviction.

* * * * * * *

XVII.—CONDITION OF THE DIVISION AS REGARDS LAND REVENUE ADMINISTRATION.

142. The current demand of land revenue and cesses during the year amounted to Rs. 33,58,459, and the total demand including arrear balances of the previous year, to Rs. 37,74,664. The total collections were Rs. 32,35,704, or 85·7 per cent. of the gross demand. The following statements show the amounts of the current and arrear demands of land revenue and cesses, and the percentages of the total collections on the current demand:—

Land Revenue.

District.	Class of estates	Current demand.	Arrear demand	Total collections current and arrear	Percentage of total collections on current demand.
1	2	3	4	5	6
		Rs	Rs.	Rs.	
Tippera ...	I. Permanently-settled estates ..	9,39,753	2,448	9,40,847	100·1
	II. Temporarily-settled " .	24,788	3,322	20,787	83 8

Zamindari Dák Cess.

District.		Current demand	Arrear demand.	Total collections current and arrear.	Percentage of total collections on current demand.
1		2	3	4	5
Tippera ...	...	7,364	191	7,270	98·7
Noakhali ...	...	7,530	203	7,377	97·9
Chittagong ...	...	7,825	781	7,855	100·3
Divisional total	1898-99 ...	22,719	1,175	22,502	99·04
	1897-98	22,760	1,037	22,625	99·4

143. The percentages of the current collections of land revenue on the current demand, as compared with the standard prescribed by Government, are shown below:—

	Permanently-settled estates	Temporarily-settled estates.	Government estates.
1	2	3	4
Standard ...	99	95	90
Tippera ...	99·85	70·45	88·26
Noakhali ..	97·63	92·46	89·39
Chittagong ...	92·69	100·	59·45

144. Except in the cases of permanently-settled estates in Tippera and temporarily-settled estates in Chittagong, the percentages fell short of the prescribed standard. The falling off under classes I and III in Chittagong is reported to be mainly due to the cyclone and storm-wave of October 1897 and the consequent remission of a large amount of revenue, and that under class I, in Noakhali, is due to the delay in bringing the estate Chakla Bamni under settlement, owing to which the collection of revenue from that estate was kept in abeyance. In the temporarily-settled estates, and in Government estates, the low percentages of collection in Tippera may be attributed to the late collection of large sums of Rs. 2,786 and Rs. 3,040, respectively, which consequently could not find entry in the accounts of the year. In class II, the default of a large sum of Rs. 3,822 in this district, which was payable by the 28th March, also greatly affected the collections. In Noakhali the falling off in class II may also be attributed to the defaults of the January and March kists, for the realization of which coercive measures could not be taken within the year. In class III, although the percentage of collections fails to reach the prescribed standard, it shows a marked improvement over the results of the previous year, the percentage being 89·39 against 85·99 in the previous year.

Road and Public Works cesses.

145. In Noakhali both the current and arrear collections of Road and Public Works cesses exceeded the standard of 90 and 80 per cent, being 90·1 and 90 respectively. In Tippera the current collections fell far below 90 per cent., being 84·6 only, but they compare favourably with those of the previous year, which were 82·03 per cent. The low percentage is said to be due to the payment of Rs. 3,000 on account of the March kist, after the close of the year, by the Ganga Mandal estate, and also to the fact that certificates could not be promptly issued, the present staff not being sufficient to cope with the work. The percentage of arrear collection on arrear demand is 91·8 against 92·4 in 1897-98, which, though somewhat below that of the previous year, is above the standard of 80 per cent. In Chittagong also the current collections fell far short of the standard, being 83·2; but they show some improvement as compared with the preceding year, when they were 79·03 per cent. The short collections are said to be due to the bad outturn of crops during the last two years, and to the effect of the cyclone. The arrear collections were above 80 per cent., being 90 against 89·57 in 1897-98.

146. The dák cess collections exceeded 90 per cent. in all the districts, though in Tippera and Noakhali they fell from 98·12 and 97·35 in 1897-98 to 96·22 and 95·39, respectively, in the year under report. In Chittagong the percentage was 91·27 against 90·11 of the previous year.

Revenue and rent money-orders.

147. The following table shows the revenue and rent paid by money-orders during the year:—

Districts.	Revenue money-order.		Rent money-order.	
	Number.	Amount.	Number.	Amount.
1	2	3	4	5
		Rs.		Rs.
Tippera	3,091	71,375	1,179	14,517
Noakhali	737	6,022	1,562	20,097
Chittagong	27,044	1,01,851	10,068	45,531
Total ...	30,872	1,79,248	12,809	80,145
Total for 1897-98 ...	30,690	1,71,503	11,890	1,07,011

148. The increase in Tippera and Chittagong in the number of money-orders issued for the payment of revenue and cess, and in the amount covered

by them, as compared with the figures of the previous year, is attributed to the gradually increasing appreciation, by the owners of petty estates, of the facility and convenience afforded by the system. In Noakhali the system is apparently not growing in popularity. It is chiefly availed of by the residents of Hatia and Sundip. The landlords of the mainland of this district, and the big zamindars of the other two districts, who have agents at the Sadar, prefer direct payment. An increase in the number of rent money-orders also occurred in Chittagong, while the other two districts show a decrease. These orders are said to be refused by the landlords in the case of non-payment of interest and other extra demands, and in cases of strained relations between zamindars and tenants.

Working of the sale law.

149. In Tippera there were 129 defaults and 12 sales against 114 and 15 in the previous year. The revenue demand of the estates and shares sold was Rs. 324. and the defaults amounted to Rs. 127. The amount realized by sale was Rs. 1,038, or a little over three times the Government revenue. There were 588 defaults and 10 sales of patni tenures, against 575 defaults and 20 sales in the previous year. In Noakhali, 92 estates and shares of estates became liable to sale against 79 in 1897-98, and 10 were sold against 16. The revenue demand of these estates amounted to Rs. 148, and the defaults to Rs. 37-11-6. The purchase-money realized by sale was Rs. 5,465, or about 37 times the Government revenue. Forty-four tenures under khas mahals were sold, out of 143 advertized for sale, against 36 in the previous year. In Chittagong 1,404 estates, 301 shares of estates, and 4,733 dependent tenures in khas mahal, became liable to sale against 969, 156, and 3,950, respectively, in the previous year, and 923 were sold against 700. The total revenue demand of the estates, shares, and tenures sold, amounted to Rs. 46,633. The arrears which brought them to sale were Rs. 29,597. The amount realized by sale was Rs. 92,696. There were altogether 66 appeals in respect of sales of estates and tenures, of which one came from Tippera and the rest from Chittagong. The one appeal from Tippera was rejected, and of the 65 appeals from Chittagong, 38 were in respect of estates, 2 of shares of estates, and 25 of tenures. Out of this number, 15 sales were cancelled on the ground of irregularity in the service of notices and other causes, such as mistakes in the adjustment of accounts of money-orders, &c. Recommendations for the annulment of sales, in the case of 2 shares, were made on the ground of hardship under section 26 of Act XI of 1859. The causes of default generally appear to have been, as usual, disputes among co-sharers, wilful default in order to get rid of encumbrances and obtain better prices by Government sale, agricultural distress, and the insolvency of proprietors. The principal cause which led to the sales of so many estates and tenures in Chittagong was the poor condition of the people, resulting from the effects of the last cyclone and storm-wave. In consideration of the heavy defaults in all the districts, and the number of estates sold, it is apparent that the sale law was administered with leniency and moderation.

Working of the Public Demands Recovery Act.

150. The table below shows the certificate work for the year 1898-99:—

District.	Cases instituted.	Cases disposed of.
1	2	3
Tippera	4,394	4,226
Noakhali	2,693	2,548
Chittagong	18,374	16,267
Total ...	25,461	23,041
Total for 1897-98 ...	20,136	20,108

151. The number of certificates filed during the year increased by 5,325, and disposals by 2,933. This increase is shared by all the districts. In Tippera, the increase occurred only under head "All other certificates," owing to the extensive recoveries of survey and settlement charges that are going on in both the Sarail and Chakla Roshnabad estates, while there has been a decrease under all other heads. In Noakhali, the increase principally occurred under heads "Arrears of rent," and "All other demands," owing to the receipt of a larger number of requisitions for certificates from the Khas Mahal Department under the Commissioner's orders, and to the institution of cases for recovery of loans. In Chittagong, with the exception of Class I (Demands of all kinds), the institutions have exceeded those of the previous year in all classes, and this is chiefly due to the fact that tenants residing in the parts of the district not damaged by the late cyclone and storm-wave, withheld voluntary payments with a view to get remission of rent. The percentage of disposals was 62·31 against 66 in Tippera, 72 against 69 in Noakhali, and 68·9 against 71·9 in Chittagong. The falling off in the number of disposals in Tippera and Chittagong is due to the institution of a large number of cases towards the latter part of the year, which are still pending, as sufficient time has not elapsed for their disposal.

Land registration.

152. Nine thousand eight hundred and one applications for mutations were filed during the year. The number was 7,300 in the previous year. They represent a percentage of 5·3 on the total number of interests registered under initial registration, as against 3·9 in the previous year. The increase is shared by all the districts. In Tippera it is attributed partly to the energetic measures taken to secure registration and partly to settlement and revaluation proceedings. No explanation of the increase in Noakhali has been given. The increase in Chittagong is ascribed to the results of the cyclone and storm-wave of the previous year, which caused great losses and necessitated many estates changing hands. The following table shows the number of cases disposed of during the year and pending at its close:—

	Disposed of.	Pending.
Tippera	508	423
Noakhali	448	77
Chittagong	8,743	1,784

153. The expenditure in Tippera and Chittagong was Rs. 56-0-10 and Rs. 21,220-10-6, respectively, against Rs. 26-11 and Rs. 16,575-4-11 in the previous year. No expenditure was incurred in Noakhali.

Miscellaneous and Sanitary works of improvement.

154. The expenditure incurred on miscellaneous and sanitary improvements is given below:—

District.	Amount allotted by Board for miscellaneous and sanitary improvement.	Miscellaneous improvement.	Sanitary improvement.	Total of columns 3 and 4.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Tippera	4,368	946	3,412	4,358
Noakhali	5,840	4,710	1,130	5,840
Chittagong	27,325	12,139	11,666	23,805
Total ...	37,533	17,795	16,208	34,003
Total for 1897-98 ...	51,120	29,250	[illegible]89	50,239

155. The amount allotted by the Board for agricultural, sanitary, and miscellaneous works of improvement was Rs. 43,533, of which Rs. 34,003

was expended during the year, leaving an unexpended balance of Rs. 9,530. Rupees 9,521 of this balance relates to Chittagong, and the remaining Rs. 9 to Tippera. Of the total balance in Chittagong, Rs. 6,000 was taken back by the Board of Revenue for works of improvement in the Government estates of Puri, and in the Contai and Kukrahati Circles of the Midnapore district, and the remainder could not be spent owing to the khas tahsildar of Patia not having drawn any amount for embankments in his circle, and also to the fact that the purchase of certain agricultural implements and some iron tubes for digging wells, and some bulls for breeding, could not be made during the year.

156. The principal sanitary improvements on which the sum of Rs. 16,208 was spent, were excavation and re-excavation of tanks, digging wells for drinking water, and clearing drainage khals. The miscellaneous improvements also include excavation of tanks, construction and repairs of khas mahal offices, and other items, such as embankments, roads and bridges, &c.; Rs. 540 was spent on maintenance of two dispensaries in Noakhali, and Rs. 800 for construction of the Sub-Deputy Collector's quarters in Sundip. Rupees 3,233 was spent in Chittagong on embankments, and Rs. 3,849 on roads and bridges.

Survey and Settlement.

157. The survey of 24,371 acres of land in Tippera and of 17,230 acres in Noakhali was completed during the year at a cost of Rs. 6,680 and Rs. 195 respectively. In the former district, out of 137 settlement cases, 36 were struck off the file owing to the settlement-holders of the estates possessing rights which debarred Government from re-assessing the revenue, and two petty estates were also removed from the file owing to the conclusion of settlement. In Noakhali, out of 67 cases, 30 were disposed of during the year. The total increase of revenue obtained from settlements in this district amounted to Rs. 1,685, and that in Tippera to Rs. 50 only. The pending cases in both the districts are in different stages of progress. In Chittagong a piece of lakhiraj land, consisting of an area of 1*k.* 12*g.* 2*k.* 2*kt.* was permanently settled with the original proprietors at an annual rental of Re. 1-10. A permanent settlement of an area of 4*d.* 8*k.* 15*g.* 2*c.* of resumed lakhiraj lands was made with one Pitambar Sarma at a total jama of Rs. 23. But, as the settlement-holder has not executed the formal kabuliyat, the settlement proceedings could not be completed during the year. The area under survey and settlement, as since corrected, is 2068·06 square miles against 1,923 previously shown. The survey, record-writing, and attestation were completed the year before last. The publication of draft records was completed before the commencement of the year under report. The work done during the year consisted of final publication of the records of 78 villages of this district and 30 villages of the Noakhali district, called trans-Feni villages, the settlement of rents of 1,306 tenants, making fair copies of the record of 60 villages containing 527,913 plots for final publication, making copies of khatians of 355 villages containing 1,022,084 plots for raiyats, and 43 villages containing 185,527 plots for khas tahsildars. The total increase of revenue ascertained up to date comes to Rs. 2,15,327 against Rs. 1,84,091 previously shown. These figures are reported to be also liable to correction, as there are numerous mistakes and discrepancies in the assessment lists.

158. The survey and attestation of the estate of the Raja of Hill Tippera were completed in the previous year. During the year under report draft publication of records was made in regard to 1,148 villages and final publication in regard to 1,245 villages. The rents of 14,827 tenants were settled, giving an increase of 22 per cent. in the case of raiyats and of 61 per cent. in the case of tenure-holders. The expenditure incurred was Rs. 80,375.

* * * * * * *

XX.—STAMPS.

169. The stamp revenue, excluding postage, service postage, and telegraph stamps, increased from Rs. 15,86,933 in 1897-98 to Rs. 16,54,956 during the year under report, showing an increase of Rs. 68,023. The increase occurred chiefly in the sale of judicial or court-fee stamps, viz., Rs. 26,856 in Tippera,

Rs. 16,545 in Noakhali, and Rs. 21,444 in Chittagong, the total for the Division being Rs. 64,845. The Collectors of Tippera and Chittagong attribute the increase to an increase in the institution of suits for the realisation of rents and debts withheld by tenants and debtors on account of the distress prevailing in their districts during the previous two years. The Collector of Noakhali attributes the increase in his district to the general prosperity of the people during the year under report. Non-judicial stamps show an increase of Rs. 3,178, which is the net result of an increase of Rs. 5,042 in Tippera, and a decrease of Rs. 1,552 and Rs. 312 in Chittagong and Noakhali, respectively. The increase in Tippera is attributed to an increase in deeds of sale and mortgage executed by debtors to clear off their accumulated debts, incurred during the distress of the previous two years, and is also partly attributed to an increase in the number of security bonds executed by the employés of zamindars and talukdars. The decrease in Noakhali is mainly due to the sale of a smaller number of certificate stamps during the year under report, as some of the higher grade pleaders left the district. The decrease in Chittagong is attributed to a decrease in bonds and leases, due to the fact that the people in distress received a large amount of loans from Government under the Agricultural and Land Improvement Loans' Acts.

170. Deficient stamps duty and penalty were levied by Civil Courts, under section 34 of the Indian Stamp Act I of 1879, in 77 cases during the year under report, against 82 in the preceding year. Action was taken by Revenue officers under sections 31, 37 and 38 of the Act, in 255 cases during the year under report against 219 cases in the preceding year. The duty and penalty realised were Rs. 475 and Rs. 1,835, respectively, against Rs. 594 and Rs. 1,414, respectively, in the preceding year. During the year under report there were 15 prosecutions against 18 in the preceding year. Altogether, 18 persons were brought to trial, of whom 11 were convicted and fined Rs. 105, while 5 were acquitted, and 2 cases remained pending at the end of the year. In the previous year 22 persons were brought to trial, 17 were convicted, 2 acquitted, and 3 cases remained pending at the end of the year. The fines imposed amounted to Rs. 168 in 1897-98. The decrease in prosecutions may be attributed to the spread of a better knowledge of the stamp law among the people.

XXI.—INCOME-TAX.

171. The following statement shows the collections during the year as compared with those of the previous year:—

		1897-98.	1898-99.
		Rs.	Rs.
Tippera	... ...	43,005	43,120
Noakhali	... ...	22,012	23,168
Chittagong	... ...	28,114	27,995
Total	...	93,131	94,283

172. The total collections for the Division show an increase of Rs. 1,152, which is the net result of an increase of Rs. 115 in Tippera and Rs. 1,156 in Noakhali, and a decrease of Rs. 119 in Chittagong. The decrease in Chittagong is attributed to the dullness of trade on account of the impoverishment of the people, caused by the cyclone of October 1897 and the bad harvests of previous years.

173. The Collector states that much of the tax due to his district is drawn away by Calcutta, Rangoon, Bombay and other places, where the chief merchants and firms of Chittagong have their principal places of business. Warrants were issued in 78 cases against 16 in Tippera, 14 against 22 in Noakhali, and 66, against 62, in Chittagong. No property was sold in default of payment during the year. In the previous year the property of 5 defaulters had to be sold for realisation of the tax due from them.

174. The total number of objections filed during the year was 451 against 345 in the preceding year. There was a falling off in Tippera from 51 to 39, but there was an increase in Noakhali and Chittagong from 103 and ~~191 to 113~~ and 299, respectively. The percentage of successful objections was 35·9 in Tippera against 17·6 in the preceding year, in Noakhali 31·9 against 42·7, and in Chittagong 32·8 against 41·8.

175. The number of persons finally assessed was 4,540 against 4,700 in the preceding year, viz., 1,628 against 1,677 in Tippera, 1,264 against 1,259 in Noakhali, and 1,648 against 1,764 in Chittagong. During the year under report, 1 out of every 1,095 persons was assessed in Tippera against 1 out of every 1,063 persons in the preceding year; 1 out of 799 against 1 out of 802 persons in Noakhali; and 1 out of 783 persons against 1 out of 731 persons in Chittagong.

176. The total expenditure for the Division during the year was Rs. 8,139 against Rs. 8,263 in preceding year, the percentage of cost on collections being 8·6 against 8·8 in the preceding year. It was 7·5 against 7·08 in Tippera; 7·5 against 8·2 in Noakhali; and 11·1 against 12·03 in Chittagong. The percentage was rather high in Chittagong.

177. Direct taxes are never agreeable to the payers. But the people have become more or less accustomed to the income-tax.

* * * * * * *

XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

182. The want of waiting-rooms at the stations on the Assam-Bengal line is noticed in the Chittagong and Noakhali reports. The Magistrate of Chittagong reports that the arrangements for the despatch of goods from Calcutta to Chittagong by rail are unsatisfactory, as considerable delay occurs at present.

183. The branch line from Akhaura to Bhairab Bazar, of which mention was made in the report for last year, has been sanctioned; as also another branch line from Hagiganj to Satnol, a steamer station on the Megua. Both these lines are under survey. The Magistrate of Noakhali reports that the proposal for a branch line of railway to connect Noakhali with the Laksham station was sanctioned during the year, but no work has yet been done in connection therewith.

Feeder roads.

184. During the year under report the Bhatiari feeder road was completed in the district of Chittagong. Another feeder road to the Kunderhat Railway Station has been sanctioned, and the work will be commenced as soon as funds are available.

Other public works.

185. In Tippera the telegraph office building at Comilla and the combined dak and inspection bungalow at Chandpur were completed during the year, and the extension of the Comilla Jail enclosure was finished. An entrance gate to the Comilla Jail and the Jailors' quarters are under construction. In Noakhali a bungalow in the zilla school compound and the Deputy Magistrate's Court houses in the Sadar station were improved during the year; corrugated iron roofs were provided over the latrines of the Feni Subsidiary Jail; quarters were built for the Sub-Deputy Collector of Sundip; and the khas tahsil office building at Bamni and two new dispensary buildings, one at Char Gazi and the other at Nanda Bhuia's hat, were constructed during the year. Four inspection bungalows were also improved. No public work of any importance was constructed during the year in the district of Chittagong. The Kutubdia embankments have been recently transferred to the Collector from the Public Works Department. But the Collector reports that there is not sufficient time now to put them in good order.

Roadside wells.

186 There are no roadside wells in this Division, except a few in the district of Chittagong.

XXIV.—COMMUNICATIONS.

Roads.

187. The following table shows the outlay on roads during the year under report:—

District.	Village roads.		District roads.	
	Mile.	Costs.	Mile.	Costs.
1	2	3	4	5
		Rs.		Rs.
Tippera ...	200½	18,458	296¼	40,591
Noakhali ...	141	7,036	371	45,543
Chittagong ...	60	11,765	576	79,074

188. The total length of roads in Tippera is 725¾ miles. The existing roads were repaired and some new roads were constructed during the year. In Noakhali one new road was made and two more were taken in hand. Altogether 363 miles of *kutcha* roads and about 8 miles of metalled roads, besides village roads, were maintained by the District Board of Noakhali, and some roads were improved. Bridge were constructed on the Gupta Chara road, and some of the existing bridges were improved. The Magistrate states that all the district roads are in very good order. From what I have seen of them, I believe this to be the case. In Chittagong there are no metalled roads of any length, except portions of the Double Moorings Road, the Mahajan's Hât Road, and the Dacca Trunk Road. The damages caused to the roads and bridges of this district by the cyclone of the 24th October 1897 have been repaired. No allotment could be made in Chittagong for repairs to the village roads, as the District Board had to spend a very large amount for repairing the damages caused by the cyclone. The amount shown as expended during the year represents the sums spent in previous years, the accounts for which were submitted during the year under report.

Khals.

189. During the year two khals were re-excavated in the Sadar subdivision of the Tippera district, two in the Chandpur subdivision, and nine in the Brahmanbaria subdivision.

Steamer services.

190. All the districts of the Division are served by steamer lines. In Tippera the Sylhet-Cachar line of steamers continued to touch at several important places on the Megna, and the boat services between Comilla and Naraingani, between Akhaura and Brahmanbaria, and between Maniknagar and Brahmanbaria, were maintained. In Noakhali, the steamer service between Noakhali and Barisal was maintained as before, but the steamer service between the main land and the island of Sandip was very irregular, the steamer companies having refused to run the steamers, except during the cold weather, on account of the dangers of navigation in the channel between Sandip and Noakhali. Steamers ply regularly between Chittagong and Calcutta and between Chittagong and Rangoon, Akyab and other ports in Burma.

Tree planting.

191. In planting and maintaining trees Rs. 279 was spent in Tippera against Rs. 815 in the preceding year, and in Noakhali Rs. 1,554 against Rs. 1,515 in the preceding year. During the year under report, 392 trees were planted in Tippera and 1,900 in Noakhali, in which district trees have been planted on the sides of 128 miles of road. In Chittagong no trees were planted during the year, and nothing was spent in maintaining the existing trees owing to want of funds.

* * * * * * *

XXVI.—EDUCATION.

196. The following statement shows the state of education in this Division during the year under report:—

District.	High English.		Middle English.		Middle vernacular.		Upper primary.		Lower primary.		Special.		Elementary private institutions.	
	Schools.	Pupils.	Schools.	Pupils.	Schools.	Pupils.	Schools.	Pupils.	Schools.	Pupils	Schools.	Pupils.	Schools.	Pupils.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Tippera	7	2,229	31	2,568	48	2,429	217	8,644	1,571	38,585	4	278	467	6,927
Noakhali	4	963	12	850	40	2,025	116	4,654	793	18,369	2	75	348	6,484
Chittagong	6	1,597	17	1,493	39	1,970	126	6,151	856	26,143	6	814	572	11,255
Total ...	17	4,088	60	4,911	127	6,424	459	19,449	3,220	83,097	12	1,167	1,386	24,666
Total for 1897-98 ...	15	3,711	57	5,099	131	7,705	453	19,667	3,316	84,603	9	1,077	1,283	22,605

197. There were altogether 5,280 schools with 144,402 pupils during the year under report, against 5,269 schools with 144,367 pupils in the preceding year, showing a slight increase of 11 schools and 35 scholars. There was an increase of 2 high English schools during the year, 1 in Tippera and 1 in Chittagong. There was an increase of 6 middle English schools in Tippera, but in Noakhali there was a decrease of 2 such schools, and in Chittagong of 1 such school. Middle vernacular schools decreased by 3 in Tippera and by 1 in Chittagong. There was a decrease of 10 upper primary schools in Tippera but there was an increase of 6 and 5 such schools in Noakhali and Chittagong, respectively. Lower primary schools show a loss of 81 schools in Tippera and of 52 in Noakhali, and again of 37 schools in Chittagong. Special schools show an increase of one school in Tippera and of two in Noakhali. Elementary private institutions show an increase in all the districts of the Division, viz., 72 in Tippera, 29 in Noakhali, and 1 in Chittagong. In Tippera several *maktabs* were removed from the list of primary schools to that of elementary private institutions, as the Maulvis of these schools could not teach the primary course properly. This accounts for the reduction in the number of primary schools and the increase of elementary private institutions in that district. Most of these indigenous institutions are Koran schools. The Magistrate of Chittagong observes:—

"The progress of education in the district, which had been seriously affected by the cyclone in the preceding year, received a further check during the year under report in consequence of the reduction of the education grants of the District Board and suspension of aid to middle and primary schools."

198. The following statement shows the total number of students of different creeds attending the various public schools of the Chittagong district during the year under report, as compared with the previous year:—

	1897-98.	1898-99.
Muhammadans	20,238	20,273
Hindus	15,238	16,007
Buddhists	1,808	1,854
Brahmos	14	14
Native-Christians	7	10
Aborigines	4	10
Total ...	37,309	38,168

199. Of the school-going boys, 36·4 per cent. were at school in Tippera against 37·7 per cent. in the preceding year, 33·4 against 34·9 per cent. in Noakhali, and 37·4 against 37·0 per cent. in Chittagong. The percentages shown in the report of last year are incorrect and have been corrected.

Special Schools.

200. Of the four special schools in Tippera, one is the Artisan School at Comilla; two are Madrasahs, one at Comilla and the other at Chandpur, both of which are aided from the Mohsin Fund; and the fourth is a Sanskrit tol, the teacher of which obtained a stipend on the results of the Sanskrit standard examination. The artisan school had 45 students, 22 in the apprentice department, and 23 in the artisan classes. Six boys of the apprentice department passed the second year examination of the Sibpur Engineering College, and five boys of the artisan classes were reported qualified for certificates of proficiency—three in carpentry and two in tinsmith's work. The expenditure of the school during the year amounted to Rs. 10,010, of which Rs. 600 was paid by Government, Rs. 360 was received from subscriptions, Rs. 1,708 from fees, and Rs. 2,555 from the sale-proceeds of articles manufactured, the rest being paid by the District Board. In Noakhali there are two Sanskrit tols, viz., one at the Sadar station, and the other at Feni. In Chittagong there is a training school for vernacular teachers, four Madrassahs, and one Sanskrit tol. The number of pupils in the training school fell from 46 to 43 during the year under report.

Female education.

201. During the year under review there were 441 girls' schools with 7,317 pupils, against 428 schools with 6,762 pupils in the preceding year, showing an increase of 13 schools and 555 scholars. In Tippera 24 girls passed the lower primary examination, but there were no girls sufficiently advanced to compete at the middle or upper primary scholarship examinations. In Noakhali. two Hindu girls passed the upper primary scholarship examination, and 10 Hindu and six Muhammadan girls passed the lower primary scholarship examination. In Chittagong 20 girls passed the lower and two the upper primary scholarship examination. Female education is very backward in this Division, as in most parts of the Province, and is likely to remain so as long as girls are married and confined to the zenana at an early age.

Muhammadan education.

202. In Tippera there are two Madrasahs, one at Comilla, and the other at Chandpur, both aided from the Mohsin Fund. In Chittagong, besides the Government Madrasa, there are three unaided Madrasahs, viz., one at Chittagong, one at Sitakund, and one at Mirsarai. The Government Madrasah at Chittagong had 509 students on its roll against 456 in the preceding year, showing an increase of 53 students. It sent up six candidates for the last entrance examination, out of whom only one has passed in the second division. During the year under report there were 35,227 Muhammadan pupils in the private and public schools of Tippera, 21,126 in Noakhali, and 30,952 in Chittagong. They form about 60·4 per cent. of the school-going population in this Division.

Expenditure.

203. The total expenditure on education during the year amounted to Rs. 3,99,629 against Rs 4,08,232 in the preceding year, giving an average of Rs 3-5-3 per head of pupils against Rs 3-5-7 per head in the preceding year. Of this amount, Rs. 35,947 was contributed by Government against Rs. 38,326 in the preceding year, Rs. 68,293 against Rs. 65,411 by the District Boards, and Rs. 2,560 against 2,279 by Municipalities. The income from fees and other sources amounted to Rs. 2,92,829 during the year under report against Rs. 3,02,226 in the preceding year. The expenditure on high education was Rs. 71,099, on middle English Rs. 34,596, on middle vernacular Rs. 41,248, on upper primary Rs. 61,474, on lower primary Rs. 1,56,529, and on special education Rs. 34,683 against Rs. 69,318, Rs. 36,541, Rs. 45,626, Rs. 61,004, Rs. 1,60,662, and Rs. 35,078, respectively, in the preceding year. The figures given in last year's report were wrong, and have been corrected.

XXVII.—DISPENSARIES AND HOSPITALS.

204. The following statement shows the working of the dispensaries during the year under report:—

DISTRICTS.	Number of dispensaries, under Government supervision.	Income.			Expenditure.			In-door patients.	Out-door patients.
1	2	3			4			5	6
		Rs.	A.	P.	Rs.	A.	P.		
Tippera ...	(a)17	18,858	4	1	16,862	8	1	298	1,14,763
Noakhali ...	11	11,053	0	4	11,040	15	9	385	96,011
Chittagong ...	13	20,482	0	5½	23,817	8	10	521	1,02,614
Total ...	41	50,393	4	10¼	51,721	0	8	1,207	3,43,388
Total for 1898...	41	48,356	0	0	48,253	0	0	1,356	3,08,796

(a) The dispensary supported by the Ganga Mandal Estate is not under Government supervision.

205. No dispensaries were opened or closed during the year. The largest number of dispensaries is in the district of Tippera, where there are 18 dispensaries, 12 of which are mainly supported by the District Board, 2 by the the Municipalities, 2 by the Nawab of Dacca, 1 by Raja Ashutosh Nath Roy of Sarail, and 1 by the Ganga Mandal Estate, which last is not under Government supervision. In Noakhali the dispensary at Dalal Bazar is supported by the local zamindar, Babu Chandra Kumar Ray, Rai Bahadur. The Noakhali dispensary is maintained by the Municipality, while the other dispensaries are mainly supported by the District Board. In Chittagong all the dispensaries are mainly supported by the District Board and the Municipalities. As in the other parts of the Province, private subscriptions are usually much in arrears.

206. For want of sufficient funds, the Faizannesa Zenana Hospital at Comilla had to be closed for three months during the year under report. It was re-opened in September last for the treatment of out-door patients, and is reported to have worked fairly well. In commemoration of His Honour the Lieutenant-Governor's visit to Comilla, Raja Ashutosh Nath Roy of Sarail paid a sum of Rs. 1,900 to the credit of the Comilla Municipality for certain improvements in the Comilla Hospital. The work has been taken in hand.

207. The income and expenditure of the dispensaries amounted to Rs. 50,393 and Rs. 51,721, respectively, during the year under report, against Rs. 48,356 and Rs. 48,253, respectively, in the preceding year. The increase in expenditure was principally due to a more liberal supply of European medicines to the dispensaries.

208. The total number of indoor patients decreased from 1,356 in 1897 to 1,207 in 1898; but the total number of out-door patients increased from 308,796 in 1897 to 343,388 during the year under report.

209. The question of providing sheds for the relatives of indoor patients and of constructing contagious and pauper wards has been taken up at Comilla. The Magistrate of Noakhali reports that the medical expenditure in his district is so high that the District Board cannot increase it by opening a moribund and pauper ward. The Magistrate of Chittagong proposes to set aside a ward for paupers in the new General Hospital.

* * * * * * *

XXX.—LOCAL SELF-GOVERNMENT INSTITUTIONS.

213. There were three District Boards, presided over by the District Officers as Chairman.

214. The following statement shows the constitution of the District Boards, and the attendance of the members, during the past two years:—

Name of District Board.	Number of members.		Number of meetings.		Average attendance at each meeting.	
	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.
1	2	3	4	5	6	7
Tippera ...	19	19	14	13	11·3	11·07
Noakhali ...	13	13	11	16	8·06	7·62
Chittagong ...	19	19	12	12	12·2	16·2

215. As compared with the previous year, the attendance improved in Tippera and Noakhali, but it diminished in Chittagong. The Boards continued to work through standing sub-committees. The sub-committees of the Tippera District Board held 34 meetings during the year against 53 in the preceding year; those of the Noakhali District Board held 29 meetings against 41 in the preceding year; and those of Chittagong held 17 meetings against 22 in the preceding year.

216. The following statement shows the income and expenditure of the District Boards during the year under report:—

Income.

Name of district.	Opening balance.	Rate.	Government contribution.	Pound rents and sale-proceeds of unclaimed cattle, &c.	Ferries.	Other sources.	Total.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Tippera ...	1,27,658	1,64,102	43,785	8,309	6,365	21,031	1,84,592
Noakhali ...	42,098	9,253	27,063	5,695	9,955	16,384	1,28,361
Chittagong ...	9,745	84,617	25,635	3,187	10,845	46,875	1,71,359
Total ...	1,79,501	2,57,872	96,483	18,492	27,165	84,290	4,84,312
Total for 1897-98 ...	2,24,188	2,39,351	1,68,014	18,212	33,173	1,30,500	5,95,253

Expenditure.

Name of district.	Communication.	Education.	Sanitation.	Establishment.	Other sources.	Total.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Tippera ...	68,554	61,691	22,249	6,577	82,563	2,31,634
Noakhali ...	52,679	29,226	3,994	5,004	46,643	1,37,545
Chittagong ...	79,074	23,246	700	7,258	56,168	1,66,446
Total ...	2,00,207	1,04,162	26,943	18,839	1,85,374	5,35,625
Total for 1897-98 ...	2,91,349	1,08,197	20,399	20,563	2,89,432	6,39,940

217. In Tippera, the cost of establishment was 2·8 against 3·6 in the preceding year; in Noakhali 3·6 against 3·7; and in Chittagong 4·4 against

2·5. All the District Boards worked satisfactorily during the year. The members took an interest in their work, which was disposed of promptly, without friction or obstruction.

Local Boards

218. There is no Local Board in the district of Chittagong. In Tippera there are three Local Boards, viz., at Comilla, Brahmanbaria, and Chandpur. In Noakhali there are two Local Boards, one at the Sadar station and the other at Feni. The following statement shows the constitution of the Local Boards and the attendance of the members during the past two years:—

NAME OF DISTRICT.	Name of Local Board.	Number of members		Number of meetings.		Average attendance at each meeting	
		1898-99.	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.
1	2	3	4	5	6	7	8
Tippera ...	Cor illa ...	12	12	13	11	5·0	5·7
	Brahmanbaria ...	9	9	8	6	4·8	4·6
	Chandpur ...	7	7	11	12	4·9	4·5
Noakhali ...	Sadar ...	11	11	16	19	5·9	5·[illegible]
	Feni ...	9	9	11	7	6·0	6·1

219. The Comilla and Feni Local Boards show a falling off in the attendance of the members, but the other Local Boards show an improvement.

220. The following statement shows the income and expenditure of the different Local Boards during the year under review:—

DISTRICT.	Name of Local Board.	INCOME.			EXPENDITURE.		
		Allotment for original works.	Allotment for repairs.	Total.	Original works.	On repairs.	Total.
1	2	3	4	5	6	7	8
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Tippera ...	Sadar ...	3,000	6,000	9,000	2,994	5,824	8,818
	Bramanbaria ...	2,000	4,500	6,500	2,195	4,047	6,242
	Chandpur ...	1,500	3,000	4,500	845	3,419	4,264
Noakhali ...	Sadar ...	...	...	9,343	...	...	7,685
	Feni ...	..	..	3,243	...	...	3,243

221. The Local Boards have been entrus'ed with works in connection with the improvemeat of drainage and water-supply and repairs of village roads. Mr. Harris states that the Local Boards of his district worked fairly well. In Noakhali, the Feni Local Board worked smoothly during the year. But the Sadar Local Board had some friction with the District Engineer and with the Chairman, Mr. Agasti. But this ceased as soon as Mr. Cargill took charge.

Union Committees.

222. There are no Union Committees in the district of Chittagong. In Tippera there are five Union Committees, viz., at Laksham under the Sadar Local Board, at Sarail and Navinagar under the Brahmanbaria Local Board, and at Chandpur and Matlab under the Chandpur Local Board. There are four Union Committees in the district of Noakhali, viz, at Lakshmipur, Hatyia and Sandip under the Sadar Local Board, and one at Feni under the Feni Local Board.

* * * * * * *

225. During the year under report the Chittagong District Board could not do much for the improvement of the roads and bridges within its jurisdiction, as it had to spend a very large amount for repairing the damages to roads, bridges and inspection bungalows, caused by the cyclone and storm-wave of October 1897. The District Board had to curtail its expenditure on education owing to want of funds, and the grants of several grant-in-aid schools were discontinued from July last. But the Local Government has granted a loan of Rs. 30,000 to the District Board, which will enable it to raise its expenditure on education to the usual standard. The Tippera District Board spent a large amount on sanitary works and other improvements, and the large balance in hand of the District Board was reduced to Rs. 80,616 at the end of the year.

Municipalities.

226. There were six municipalities in the Division. The Chandpur Municipality completed its first year of existence. Chandpur is fast growing in importance owing to the expansion of the local jute trade, and bids fair to rival Narainganj in time. All the municipalities, except Cox's Bazar and Chandpur, have the elective system.

* * * * * * *

228. The following figures show the income and expenditure of each municipality during the past two years:—

District.	Name of Municipality.	Income.		Expenditure.	
		1898-99.	1897-98.	1898-99.	1897-98.
1	2	3	4	5	6
		Rs.	Rs.	Rs.	Rs.
Tippera ...	Comilla ...	23,089	25,802	22,363	19,388
	Brahmanberia ...	10,813	7,613	10,250	7,408
	Chandpur ...	5,721	...	4,185	...
Noakhali ...	Noakhali ...	14,751	12,103	11,832	8,853
Chittagong ...	Chittagong ...	56,921	79,989	54,070	78,729
	Cox's Bazar ...	7,444	6,348	6,206	4,431

Improvements made by Municipalities.

229. During the year under review, the Comilla Municipality spent Rs. 1,595 on sanitary works, viz., Rs. 784 on the improvement of drains, Rs. 30 on repairing slaughter-houses, Rs. 519 on repairing public latrines, and Rs. 262 on fencing and guarding reserved tanks. The re-excavation of the Bijaypur and Silguri outfall khals was commenced during the year. Mr. Harris observes:—

"The Comilla Municipality appears to have done nothing of importance during the year to improve the sanitation of the town. The drainage is defective, and the scheme to improve it has been hanging fire, pending the improvement of the outfall khals called Bijaypur and Silguri."

230. The Brahmanbaria Municipality spent Rs. 705 on sanitary works, and a very fine tank for drinking water was excavated in the heart of the Brahmanbaria town by a private individual at a cost of Rs. 3,000. Mr. Harris states that the drainage and conservancy arrangements of the town are defective, and that to improve them a heavy outlay is required, which the Municipality is too poor to meet. The Chandpur Municipality was created only about a year ago, and is yet too poor to be able to do much for the improvement of the town.

231. The Noakhali Municipality spent Rs. 668-11-4 for improvement of water-supply and Rs. 417-7-10 for improvement of drainage. The provisions of Part IX of the Municipal Act worked without friction. Mr. Cargill observes:—

"The town is in good order, clean and well-drained, and remarkably free from smells of any kind. Sanitation is satisfactory, and the water-supply good and well looked after."

I have recently visited the town and concur in these remarks.

232. The Chittagong Municipality spent Rs. 8,249 on the repair of roads and about Rs. 1,000 for watering them. All the roads were kept clean, and the Conservancy Department worked very satisfactorily. The drains were thoroughly cleared and deepened, where necessary, at a cost of Rs. 516. The wells and springs of the town were cleaned out very frequently, and great care taken to keep them free from pollution. The Municipality spent a sum of Rs. 342 for improvement of the water-supply. Notices were issued on the owners of filthy tanks to have them re-excavated, and several private tanks were re-excavated during the year. The provisions of Part IX of the Municipal Act were carefully worked during the year, the Chairman, Mr. Good, personally supervising all out-door works. Mr. Lea observes:—

"I consider that the Municipality has worked most satisfactorily during the year, and that great credit is due to the Chairman and Vice-Chairman."

The Assam-Bengal Railway Company appears to be unwilling to join in the water-supply scheme mentioned in the last year's report. The Municipality is too poor to carry out the scheme without assistance from the Railway Company. There appears, therefore, to be no probability of the scheme being carried out until the town becomes much larger.

XXXI.—EMPLOYMENT OF MUHAMMADANS.

233. During the year under report, Muhammadans held nine gazetted, 177 ministerial appointments, and 654 menial posts against 6, 180 and 655 posts, respectively, in the preceding year.

234. In filling up vacancies, due consideration was given to the claims of Muhammadan candidates in all the districts of this Division. It is, however, very difficult to find competent Muhammadan candidates for any but the lowest grades of appointments. In Noakhali, for instance, there is not a single Muhammadan apprentice in the Magistrate's office who has passed the University entrance examination. Mr. Cargill reports that though the proportion of appointments given to Muhammadans is below the proportion of Muhammadans in the district, it is above the proportion of eligible Muhammadan candidates to the total number of eligible candidates.

* * * * * * *

XXX.—GENERAL REMARKS.

251. The historic event of the year was the visit of His Excellency Lord Elgin, Viceroy and Governor-General of India, to Chandpur and Chittagong *en route* to Burma. The year has been otherwise rather an uneventful one: there were no natural calamities or outbreaks of any epidemic disease on an unusual scale. There were a few cases of plague in the Tippera district, but almost all of these were imported from Calcutta. Stringent measures were taken to prevent the spread of the disease, which was soon stamped out. The outturn of the principal crops, jute and rice, was very good throughout the Division, except in a portion of the Chittagong district. Prices of food-grains fell considerably, and the condition of the people was, on the whole, prosperous. In the Chittagong district the people are recovering from the disastrous effects of the cyclone of 1897, but the standard of prosperity is still low in a considerable portion of the district. Another good rice crop this year will restore the district to its normal condition of prosperity.

WEATHER AND CROP REPORT.

For the week ending the 15th January 1900

Burdwan.—No rain. Weather seasonable. Harvesting of *aman* over. Threshing going on. Harvesting of *kalai* continues. Sugarcane and *rabi* crops doing well. Fodder and water sufficient. Condition of cattle good. Common rice selling as follows:—

				Srs.	
Sadar	...	...	...	15	per rupee.
Kalna	...	...	...	14	
Katwa	...	...	...	16	
Raniganj	...	...	...	14½	

Birbhum.—No rain. Weather cloudy. Harvesting of *aman* nearly over. *Rabi* doing on. Price of common rice at Sadar 13¾ seers and at Rampur Hât 14 seers per rupee. Cattle-disease reported from Muraroi, Rajnagore, Sakulipur and Nalhati. Fodder sufficient.

Bankura.—No rain. Weather generally cloudy. Threshing of *aman* still continues. Pressing of sugarcane has commenced in places. *Rabi* doing well. Fodder and water sufficient. Sporadic cases of cow-pox reported. Rice is selling at 16 seers per rupee at Bankura and Vishnupur.

Midnapore.—No rain. Weather seasonable. Harvesting of winter rice going on. Outturn good. Prospects of *rabi* good. Cattle-disease reported from Garhbeta. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	16	per rupee
Contai	...	...	...	20	
Tamluk	...	...	...	15	

Hooghly.—No rain. Weather seasonable. Harvesting of *aman* finished. *Rabi* doing well. Price of common rice stationary.

Howrah.—No rain. Weather seasonable. Harvesting of *aman* almost over. *Rabi* progressing. Fodder and water sufficient. Common rice sells at 13¾ seers per rupee.

24-Parganas.—Rainfall nil. Weather seasonable. Prospects good. Harvesting of *aman* almost completed and that of *rabi* crops going on. Fodder and water sufficient. Common rice sells as follows:—

Rajshahi.—No rain. Weather seasonable. Prospects of standing crops good. Harvesting of winter paddy in progress. No cattle-disease. Fodder and water plentiful. Common rice sells at 19 seers per rupee.

Dinajpur.—No rain. Weather seasonable. Cultivation of *rabi* over. No cattle-disease. Fodder and water sufficient. Rice sells at 17 seers per rupee in town and 18 seers at Thakurgaon.

Jalpaiguri.—Rainfall nil. Weather seasonable. Harvesting of *haimanti* paddy continues. Tobacco and mustard doing well. Common rice sells at 16 seers per rupee. Fodder and water sufficient.

Darjeeling.—No rain. Weather seasonable. *Hills*:—Harvesting of *phaphar* going on: wheat, barley, potatoes and *tori* are progressing. *Terai*:—*Haimanti* paddy being harvested; *kalai*, mustard, tobacco and potatoes progressing. Coarse rice sells as follows:—

					Srs.	
Hills	...	...	...	...	10	per rupee
Terai	...	...	...	...	15	

Bhutta sells at Darjeeling 20 seers and at Kalimpong 24 seers per rupee.

Rangpur.—Rainfall nil. Weather seasonable. Prospects of standing crops good. Fodder and water sufficient. Common rice sells at 18¼ seers per rupee.

Bogra.—No rain. Harvesting of *aman* still going on. Cultivation for *aus*, jute and sugarcane continuing. Prospects good. Fodder and water ample. Common rice selling at 19 seers per rupee.

Pabna.—No rain. Weather seasonable. Harvesting of paddy over. Outturn satisfactory. Standing crops in good condition. Fodder and water sufficient. Average price of common rice 15 seers 12¼ chitaks per rupee.

Dacca.—Rainfall nil. Weather seasonable. Harvesting of *aman* continues. Prospects good. Fodder available. No cattle-disease. Price of common rice stationary.

Mymensingh.—Rainfall nil. Weather cold and dry. Prospects of crops good. Health of cattle generally good. Fodder and water sufficient. Common rice selling at 19 seers per rupee at Sadar and 16 to 19 seers in the subdivisions.

Faridpur.—No rain. Weather cold. State and prospects of *rabi* crops good. Harvesting of *aman* paddy over. *Boro* paddy being planted. Common rice sells at 17 seers per rupee.

Backergunge.—Rainfall nil. Weather fine. Prospects of crops good. Common rice sells at 12 seers (old) and 16 seers (new) per rupee.

Tippera.—No rain. Weather seasonable. Harvesting of *aman* completed. *Boro* being transplanted. *Rabi* doing well. Average price of common rice 16¾ seers per rupee.

Noakhali.—Rainfall nil. Harvesting of *aman* finished. Prospects of *rabi* crops good. No cattle-disease. Fodder and water sufficient. Price of common rice stationary.

Chittagong.—No rain. Sowing of *rabi* crops in progress. Water and fodder sufficient. Common rice 15 seers per rupee.

Patna.—*Rabi* doing well, as well as poppy plants. Prospects of standing crops good. Small showers of rain fell on Sunday and Monday (14th and 15th). No cattle-disease. Fodder and water for cattle sufficient. Common rice in Patna sells at 16½ seers per rupee.

Gaya.—Rainfall at Gayâ ·17. Paddy harvest approaching conclusion. *Rabi* and poppy doing well. Common rice selling at 14½ seers per rupee.

Shahabad.—Standing crops doing well. Sugarcane pressing going on. Fodder and water abundant. One hundred and thirty-seven cases of cattle-disease in Sasaram. Price of rice at Sadar 12 to 15 seers per rupee.

Saran.—Weather cool and rainy. Prospects of *rabi* and poppy good. Rain wanted. Common rice sells at 14 seers 3 chitaks, and *makai* 14 seers 8 chitaks per rupee.

Champaran.—Prospects continue favourable, though rain much needed. Weeding of *rabi* and poppy going on. Price of common rice 13½ seers and of maize 16 seers per rupee.

Muzaffarpur.—Rainfall nil. Prospects of crops favourable. Prices are—Common rice 13¾ seers, wheat 13 seers, barley 18 seers, *makai* 15¼ seers, gram 16 seers, *rahar* 16 seers, and *marua* 20 seers per rupee.

Darbhanga.—Rainfall at Sadar ·02. Weather cool. *Rabi* doing well. Fodder and water sufficient. Cattle-disease reported from Madhubani. Common rice sells as follows:—

	Srs.	
Sadar	13½	per rupee.
Samastipur	16	
Madhubani	16½	

Monghyr.—No rain at Monghyr and Jamui; Begusarai ·16. Weather chilly cold. Threshing of winter rice and pressing of sugarcane going on. Prospects of *rabi*, poppy and other standing crops fair. Rain needed for late and backward poppy plants. Common rice sells as follows:—

	Srs. ch.	
Monghyr	14-6	per rupee.
Begusarai	16	
Jamui	15	

Bhagalpur.—Weather cloudy and drizzling. A few showers would be welcome for the *rabi* crops. Harvesting of paddy almost over. Cattle disease reported from one thana in Supaul. Fodder and water sufficient. Prices rising.

Purnea.—Rainfall nil. Weather cold. Threshing of winter rice going on briskly. Standing crops promising well. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	15	per rupee.
Kishanganj	18	
Araria	20	

Malda.—Rainfall nil. Weather cool with west wind; sometimes cloudy. Harvesting and threshing of winter rice finished. Gathering of *kalai* and mustard commenced. Other *rabi* crops thriving. No cattle-disease. Common rice sells at 17 seers per rupee. Fodder and water sufficient.

Sonthal Parganas.—*Rabi* doing well. Rain threatening. Cattle-disease reported from Rajmahal. Fodder and water sufficient. Average price of rice 15 seers 1 chitak and of maize 18 seers 5 chitaks per rupee.

Cuttack.—Rainfall nil. Weather seasonable. Harvesting of *guru sarad* going on *Arhar* and sugarcane being cut. *Dalua* and tobacco doing well. Condition of cattl generally good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Cuttack	14	7	per rupee.
Jajpur	17	1	
Kendrapara	18	6	
Banki	17	6	

Balasore.—Rainfall nil. Harvesting of *sarad* and *rabi* crops and pressing of sugarcane continue. Cotton growing well. Rice sells at 17 seers per rupee in the interior of the district, and at 15 and 17 seers at Balasore and Bhadrak respectively. Cattle-disease reported from Balasore and Basudebpur Circles. Fodder and water sufficient.

Angul.—Weather cloudy. Harvesting of *rabi* and sugarcane in progress. Common rice selling at 15 seers per rupee in Angul and 9 seers in the Khondmals.

Puri.—Rainfall nil. Weather seasonable. *Sarad*, *kulthi*, and *arhar* are being harvested. *Dalua* being re-planted and *mung* being sown. Rain wanted for *rabi* crops. Winter *mandia* and other miscellaneous crops doing well. Sugarcane being pressed. Test-works opened at Tua. Fodder and water sufficient. Common rice sells as follows:—

	Srs. c.	
Sadar	17	per rupee.
Khurda	17-1	
Interior of district	17	

Hazaribagh.—Slight showers. Sugarcane pressing nearly completed. Common rice sells at Sadar 12 seers and at Giridih 13 seers per rupee.

Ranchi.—Rainfall nil. Weather cloudy. State of *rabi* crops not favourable. Rice sells at Ranchi 10 seers and in the interior 12½ seers per rupee. Cattle-disease continues. Fodder and water available.

Palamau.—Weather cloudy. Prospects of *rabi* much bettered by to-day's rain (15th). Cattle-disease continues in places. Fodder and water sufficient. Prices at Sadar are—Rice 12½ seers, gram 16¼ seers, barley 16⅞ seers, *makai* 13 seers, and wheat 12⅞ seers per rupee.

Manbhum.—No rain. Weather seasonable. *Rabi* crops promise well. Cattle-disease reported from thanas Purulia, Para, and Tundi. Fodder and water sufficient. Average price of common rice at Sadar 13 seers 6 chitaks, and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall nil. *Rabi* crops need rain. Common rice sells at 14½ seers per rupee. Mango trees are flowering.

General Summary.—Rain is reported to have fallen towards the end of the week in several districts in Bihar and Chota Nagpur. The winter rice harvest is nearly over, and the pressing of sugarcane is going on. The prospects of the *rabi* crops in Bengal and Bihar continue generally good, and in Palamau some improvement is reported owing to the rainfall of the 15th instant. Rain is needed in Puri, Ranchi, Singhbhum, and Champaran. The poppy crop in Bihar so far promises well. The price of common rice is reported to have risen in 14 districts and fallen in 5; it is stationary in the remainder. There is plenty of fodder in every district, and cattle are generally in good condition. Some cattle-disease exists in certain districts.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,

The 16th January 1900.

The total fall from 1st to 13th January 1900	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·11

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌒, dew; ≡, fog; o, overcast.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF DECEMBER 1899.

As is usual in December, weather has been fine and settled over both the Province and the Bay. Not unfrequently cyclonic disturbances develop in the extreme south of the Bay during the first-half of the month; and on rare occasions they move northwards and influence weather in Bengal. During the past month there has been no such disturbance, and the only weather which might be considered abnormal appears to have originated in the north-east.

A faint depression was shown in North Bengal about the 5th or 6th, more by the cyclonic wind directions than by pressure differences. Moving south-westward it became better developed over the central parts of the province on the 7th, and then becoming fainter again soon after disappeared, owing to a brisk rise of pressure which became general over the province. During these days the only rainfall of the month occurred, beginning in North Bengal and ending in Orissa. Light showers were fairly general in the Jalpaiguri, Darjeeling and Cooch Bihar districts between the 5th and 9th, and a few scattered showers were recorded in East Bengal between the 4th and 8th, and similar scattered rain fell in Orissa on the 10th, 11th and 13th. The only rain in South-West Bengal was ·17 inch at Saugor Island on the 10th, and none fell in Chota Nagpur and Bihar throughout the month.

One abnormal feature of the general atmospheric condition was the very low temperature which prevailed in Burma during the first week of the month At that time comparatively warm weather obtained in Bengal, but after the slight disturbance referred to above, the pressure gradient became steeper over the Bay and the province. Northerly winds were more regular, and temperature fell in Bengal, especially in the north-east. Along with these changes temperature rose in Burma, and during the second-half of the month was generally above the normal by small amounts.

The low temperature which followed the disturbance was at first fairly general over the province, but the most usual arrangement during the month was high temperature in the west and low temperature in the east, more especially the north-east. This is shown by the means for the month which differ from the normal by amounts varying from excess of 2°·5 in Chota Nagpur to defect of 2°·3 in Assam. These differences may be partly accounted for by pressure being relatively higher in Assam and North Bengal than it was in Bihar, in consequence of which winds were more north-easterly than usual in the eastern districts and not so northerly as usual in Bihar and Chota Nagpur. In fact in the west of the province winds varying from west to south-west or south were of most frequent occurrence.

The usual direction from which unsettled weather approaches the province in the cold season is the west, and at times as in the previous year some of these disturbances occur in the latter half of December. On this occasion there was only the faintest appearance of a disturbance from the west in the last days of the month. There was a brisk fall of pressure, causing defect of about ·1 inch in the centre and west of the province, and light irregular cyclonic winds, but no cloud or rainfall or any considerable change of temperature. Practically therefore throughout the month normal weather prevailed with the usual oscillations of temperature and pressure characteristic of settled conditions.

It would appear that the abnormal conditions on which the irregular distribution of rainfall of the past monsoon season depended have been followed by other conditions likely to have an opposite effect on the motion of depressions from the west on which rainfall at this season depends. It may be remembered that all depressions which formed during the rains moved sooner or later towards the north-east of the province. Judging by the two slight cases of disturbed weather in December, the approach of depressions from the west will be retarded, and they will probably become too diffused to cause rainfall in the usual quantity in January and February in Bengal.

Pressure on an average for the month was practically normal, except in the west of Bihar, where there was defect of ·03 inch, and in North Bengal and the south of Assam, where there was excess of about ·02 inch. Generally in Lower Bengal, Orissa and Chota Nagpur, the difference from the normal was not above a few thousandths of an inch.

Pressure changes were almost always small, and the only occasion of comparatively high readings was in the second week, when excess in the north was between one and two-tenths of an inch, and there was a rather steep gradient over the Bay.

Temperature varied considerably from the normal for day readings; but there was little difference at night. The average variation in maximum temperatures ranged from excess of 3° in Orissa, Chota Nagpur, and the south of Bihar to defect of 2° in North and East Bengal and 3° to 4° in Assam. Owing to the smaller differences in minimum readings, the mean temperature for the month shows somewhat more uniformity than the mean day readings taken alone. Average excess was 2°·5 in Chota Nagpur, 1° in Orissa, and about half a degree in South-West Bengal and Bihar. In North Bengal defect was 0°·4, in East Bengal 0°·8 and in Assam 2°·3.

Rainfall as stated above was almost nil over the whole province, and was entirely absent in Chota Nagpur and Bihar. The light showers which fell in North and East Bengal about the end of the first week give an average for these divisions of less than ·1 inch, and in Orissa there fell on an average only ·04 inch.

* The following table gives the average rainfall for each division month by month throughout the year, expressed as a percentage of the normal fall for each month. It will be seen that Bihar has received 29 per cent. more than the normal, East Bengal 22, North Bengal 16 and South-West Bengal 9; and that Orissa and Chota Nagpur have received respectively 8 and 14 per cent. less than the average.

DISTRICT ROAD FUND.

No. 390R.C.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

ROAD CESS.

Dated Calcutta, the 22nd January 1900.

RESOLUTION.

READ—

Letter from the Accountant-General, Bengal, No. 481L.F., dated the 15th January 1900, submitting an abstract of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 30th September 1899.

RESOLUTION.—The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees in Bengal for the second quarter of the year 1899-1900 be published in the *Calcutta Gazette* and circulated to the officers concerned.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the abstract of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette*.

Ordered also that a copy of this Resolution, and of the abstract referred to, be forwarded for information to the Commissioners of the Rajshahi, Chittagong, Bhagalpur, and Chota Nagpur Divisions; Superintending Engineer of the Northern Circle; Inspectors of Works, Eastern and Western Circles; and Financial Department of this Government.

By order of the Lieutenant-Governor of Bengal,

D. JOSCELYNE,

Secretary to the Government of Bengal.

DISTRICT ROAD FUND.

Malda.—Rainfall at Sadar ·18, Chanchal ·30, Shibganj ·49. Weather cloudy. Gathering of *kalai* and mustard going on. Prospects of other *rabi* crops good. Cattle-disease reported from Gomastapur. Price of rice stationary. Fodder and water sufficient.

Sonthal Parganas.—Average rainfall ·57. Weather cool and cloudy. Harvesting of rice finished; outturn good. *Rabi* crops greatly benefited by the late rain. Cattle-disease reported from Rajmahal. Fodder and water sufficient. Average price of rice 14½ seers and of Indian-corn 20 seers per rupee.

Cuttack.—Rainfall nil. Weather seasonable. Harvesting of *guru sarad* and *arhar* going on. *Dalua* and tobacco doing well. Condition of cattle generally good. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	ch.	
Cuttack	...	...	...	14	7	per rupee.
Jajpur	...	...	...	17	1	
Kendrapara	...	...	...	18	6	
Banki	...	...	...	17	6	

Balasore.—Rainfall at Sadar ·12. Harvesting of *sarad* and *rabi* crops and pressing of sugarcane continue. Cotton growing well. Rice sells at 17½ seers per rupee in the interior of the district, and at 15 and 18 seers per rupee at Balasore and Bhadrak respectively. Cattle-disease reported from Balasore and Basudebpur Circles. Fodder and water sufficient.

Angul.—Rainfall in Angul ·31. Weather cold. Harvesting of sugarcane and *rabi* in progress. Common rice selling at 14 seers per rupee in Angul and 9 seers in Khondmals.

Puri.—Rainfall nil. Weather seasonable. *Sarad, kulthi,* and *arhar* are being harvested. *Dalua* and *mung* promising. Rain wanted for *rabi* crops. Miscellaneous crops doing well. Fodder and water sufficient. Test-works opened at Tua. Common rice sells as follows:—

	Srs.	c.	
Sadar	17	1	per rupee.
Khurda	17	1	
Interior of district	17	1	

Hazaribagh.—Rainfall at Sadar 2·16, Giridih 1·23. Weather cool. Some clouds. The recent rain has done good to the standing crops. Fodder and water sufficient. Common rice sells at Sadar and Giridih 13 seers per rupee.

Ranchi.—Rainfall 1·66. Weather cloudy. *Rabi* crops much benefited by this week's rain. Ploughing vigorously going on. Rice sells at Ranchi 10 seers and in the interior 11 seers per rupee. Cattle-disease continues. Fodder and water sufficient.

Palamau.—Rainfall at Sadar 1·92. Weather cloudy. General rainfall throughout the district. Prospects of *rabi* much improved. Cattle-disease continues in places. Fodder and water sufficient. Prices at Sadar are—Rice 12½ seers, gram 17½ seers, barley 16¾ seers, *makai* 14 seers, and wheat 18 seers per rupee.

Manbhum.—Rainfall at Sadar ·68, Gobindpur 1·30. Weather cloudy. *Rabi* crops promise well. Cattle-disease reported from thanas Purulia, Manbazar, Para, Topechanchi, and Tundi. Fodder and water sufficient. Average price of common rice at Sadar 13¾ seers and Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall ·29. There has been insufficient rainfall at head-quarters. *Rabi* crops need more rain. Common rice sells at 13 seers 14 chitaks per rupee.

General Summary.—General rain fell during the week throughout Bihar and Chota Nagpur, and showers are also reported from parts of Bengal Proper and from Balasore and Angul. The rain has been beneficial to the *rabi* and poppy crops, and prospects in Ranchi, Hazaribagh, and Palamau have improved. In Singhbhum, however, the fall was insufficient. Slight damage to the poppy by hail is reported from Patna and Shahabad. The pressing of sugarcane is going on. The price of common rice is practically stationary, there being slight variations in a few districts only. Cattle are generally in good condition, and there is plenty of fodder, but a few cases of disease are reported.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,

The 23rd January 1900.

	Inches.
The mean pressure of the seven days	30·085
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	30·022
	Hours.
The total number of hours of bright sunshine	53·4
The maximum possible number of hours of sunshine	76·1
The mean temperature of the seven days	67·9
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	67·6
The extreme variation of temperature	31·3
The maximum temperature	82·1
	Miles.
The highest velocity of the wind in one hour	10
	%
The mean relative humidity	71
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	70
	Inches.
The total fall of rain from 14th to 20th January 1900	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·05
The total fall from 1st to 20th January 1900	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·16

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

◠, dew; o, overcast; d, drizzling rain.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,

Calcutta, the 22nd January 1900.

G. W. KUCHLER,

for Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.

(a) The decrease is due to heavier passenger traffic in the corresponding period of 1898 on account of the moon eclipse.
(b) The increase is in upward despatches of food-grains, chiefly from Howrah and stations in the Loop Dinapore and Gaya districts.

* { Added number of passengers 1,911 and Rs 23,799 on account of difference between the approximate and audited figures for the week ended 25th November 1899

REGISTERED No. [illegible]

SPECIAL SUPPLEMENT TO

The Calcutta Gazette.

WEDNESDAY, JANUARY 24, 1900.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

The Council met at the Council Chamber on Monday, the 11th September, 1899.

Present:

The Hon'ble SIR JOHN WOODBURN, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.
The Hon'ble MR. W. B. OLDHAM, C.I.E.
The Hon'ble MR. R. B. BUCKLEY.
The Hon'ble MR. C. W. BOLTON, C.S.I.
The Hon'ble MR. E. N. BAKER.
The Hon'ble RAI DURGA GATI BANERJEA, BAHADUR, C.I.E.
The Hon'ble MR. C. E. BUCKLAND, C.I.E.
The Hon'ble MR. F. F. HANDLEY.
The Hon'ble MR. F. A. SLACK.
The Hon'ble KHAN BAHADUR MAULVI DELAWAR HOSAIN AHMED.
The Hon'ble BABU JATRA MOHAN SEN.
The Hon'ble MR. T. W. SPINK.
The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH, C.I.E.
The Hon'ble MR. D. F. MACKENZIE.
The Hon'ble Mr. J. G. APCAR.
The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, M.A., D.L., F.R.[illegible], F.R.S.E.
The Hon'ble BABU BOIKANTA NATH SEN.
The Hon'ble BABU SURENDRANATH BANERJEE.

CALCUTTA MUNICIPAL BILL.

The Hon'ble THE PRESIDENT said:—"We will now proceed with the discussion upon the amendments to section 8 (*now* 9),* taking first No. 39, standing in the Hon'ble Mr. Apcar's name."

SECTION 9.

The Hon'ble MR. APCAR moved (amendment No. 39) that in section 8 (*now* 9), sub-section (*1*), the words from and including "and the Chairman" to the end of the sub-section be omitted. He said:—"I propose that in this section the Chairman, who is the *ex officio* head of the executive, should not be the *ex officio* President of the General Committee.

"My first reason for moving this amendment is that there are appeals allowed, under this Bill, from decisions of the Chairman to the General Committee, and I think it is not right that, in these circumstances, the Chairman, from whose decisions the appeals lie, should be the President of the tribunal before whom the appeals would come. Then, again, I think that the head of the executive ought not to be the President of the General Committee. Now, the General Committee has been constituted to control the finances; and, in this way, by controlling the finances, the General Committee will be able to control the executive where their action depends upon expenditure. In nine cases out of ten, questions coming before the General Committee will be with reference to matters affecting the executive; and here again I think it inadvisable that the head of the executive should be the President of a body which will be considering these questions. It seems to me that the lessons which have been learnt in Bombay have been lost here. In Bombay, before the present Act came into force there, the Chairman was allowed to have a large measure of power as the head of the executive, and the Corporation there existed in a condition of suspended animation immediately after the Budget was passed. The head of the executive was permitted the control of the finances, and in the result the Corporation became bankrupt, and they had to conceive some new constitution in order to prevent any recurrence of the mischief which had occurred, and it was in these circumstances that they devised the scheme of three co-ordinate authorities, and the head of the executive was made an independent authority with independent powers in regard to a great many matters; and the Standing Committee, which answers there to the General Committee in this Bill, was designed for the purpose of controlling and checking the executive in regard to financial matters principally. Here the financial control in some questions is given to the head of the executive, in large questions it remains with the General Committee; but the head of the executive is allowed to preside over the deliberations of the General Committee, and so the balance of power becomes shifted. Now, in separating these functions, we do not in any way touch what we have been told is the main purpose of the Government, and that is to give absolute powers to the Chairman in regard to certain questions. The Chairman's executive functions are in no way interfered with, and he will retain all the full powers with which he has been vested under the Bill. If there is a change on the lines I have indicated, I submit that it will not conflict with the general object of the Bill. Whereas in Bombay, the three co-ordinate authorities do answer to the description of being co-ordinate, here, in this Bill, we have varied that. The head of the executive, corresponding to the Municipal Commissioner in Bombay, is allowed, under this Bill, as far as we have proceeded, to be the Chairman of the Corporation; and now we come to consider whether he is also to become the Chairman of the General Committee. If he is to have the controlling authority of presiding over the deliberations and proceedings of both the Corporation and the General Committee, then his position is not that of a co-ordinate authority, but he is to be a superior authority in regard to all the questions which may arise, because there is no doubt that there is a good deal of power in the Chairman of a meeting in controlling the discussions, and particularly so in municipal meetings, where discussion proceeds on statements that are made by the Chairman. I do

* The sections of the Bill having, under the direction of the Council, been re-numbered, the present number of each section is inserted in brackets, wherever the new numbering differs from the old.

not say that he will do so intentionally, but it may happen, because he has taken certain views on a question, that he will place before the meeting such materials only as will be favourable to his own views, without considering that there may be other materials which ought to be considered and which would not support his views. Therefore, it is very necessary to have an independent person in the position of Chairman, so as to enable the members of the Committee over which he is presiding to form an independent opinion as it were, an opinion independent of the Chairman. If the Chairman has to control and place before the General Committee such materials only as he thinks relevant, I submit it is not really an independent opinion which will be formed by the General Committee; and there is no doubt that in these circumstances the position will be very unsatisfactory. In our own experience, when we have had a new officer coming as Chairman, we have found that he necessarily, from the nature of things, depends in a large measure upon the heads of departments, and it comes to this, that the real controlling authority in regard to each department is the head of that department, and the Chairman, who depends upon the heads of departments to a great extent, is merely the mouthpiece of the heads of departments. No business in the world can be carried on profitably with supervision and control of such a character over its spending department. When there is opposition in Committee to the Chairman I have very often noticed that it is due to the view that the Chairman is simply the mouthpiece of the spending department, and is not exercising an independent opinion of his own. My contention therefore is this, that if you have a President chosen from amongst their own body by the General Committee, you will have some one who is experienced in the ways of the administration, who knows the history of the questions that come before it, and who has been in the Corporation for some time. We know that year after year the leading Commissioners, those who take the most interest in the municipal administration of the town, continue to be elected to the General Committee. I know from my personal knowledge that there has been in the General Committee the same group of about eight or ten Commissioners, who have been continuously there for about ten years, and some who have been there for a great many more years. My hon'ble friend to my left (Babu Surendranath Banerjee) informs me that he has been there for twenty-three years, and he knows of others who have been there longer So that you have a body of persons possessing knowledge of municipal matters of a character which will be of the most useful kind, and who will be at the service of the Committee; and when we have independent men like these available in regard to matters which are brought forward, I think it is entirely to the advantage of the administration that they should be made eligible for the Chairmanship. With regard to the Executive, there is too much reliance placed by young Chairmen upon the Executive of the municipality, and it has worked to our disadvantage. I propose to give instances in support of my statement, for I do not bring forward a single point that I am not prepared to support with illustrations, the facts of which are undeniable. I am glad of the presence of the Hon'ble Mr. Buckley, for he is an authority on all questions affecting the Engineering Department, and I ask his particular attention to what I am about to say. I should first explain, in order to make what I have to say intelligible, that the ordinary routine of business, in respect of works to be executed by the engineer's department, is first for a work to be sanctioned, then for the departmental estimates to be sanctioned, and thereafter for the tenders to be called for on approved specifications. Now it has happened, not once or twice, but within the last three years—and I say what I wish to be taken literally—there have been scores of instances in which tenders have been submitted by the Chairman to the General Committee, although no estimates have been submitted for sanction at all; and the General Committee, who are so much blamed for obstructing the Executive, relying on the Chairman keeping to the regular order of business, and under the impression that the estimates relating to the tender had been scrutinised and passed by them, have accepted tenders, although no estimates had been before them. Now, if there is blame thrown upon the Commissioners for not having exercised a proper check—for we sometimes are blamed for interfering with the Executive, at other times for not having exercised a proper check—I would reply, you cannot have

it both ways. Either you must admit it is necessary for the Commissioners to see that the Executive do their work and how they do their work, or you must cease to blame them for not having done so. In most instances they accept the action of the Chairman as to everything being rightly done. In connection with works having been undertaken without even being sanctioned—and, in this connection, I shall refer to what has happened within the knowledge of the Hon'ble Mr. Buckley—there is the great suburban drainage scheme, which is to cost us an immense sum of money. A certain scheme was sanctioned, and there were certain tenders in regard to parts of it submitted, which were taken to be in reference to the scheme which had been already sanctioned, and, in accordance with the advice of the Executive, they were accepted. But, after the works had progressed for some time, it came to the knowledge of one of the Commissioners that with regard to one portion it was altogether a new scheme, and that with regard to another portion of it there had been material alterations made, and he had to draw attention to the subject. It was a large work, which required not merely the sanction of the Commissioners, but also the sanction of the Government, and it was found that this scheme had not got the sanction of the Corporation and had not even got the sanction of the Government, and, although some portion of the works are under progress, other portions have been stopped by the Government, because sanction to them has not been obtained. And I must not omit to tell you that the work on the drainage scheme was commenced two years ago. How is it that this came about, that these immense alterations should have been taken in hand without sanction, and that tenders should have been called for for unsanctioned work and accepted? Why, partly because Chairmen have been continually changed; schemes have been sanctioned under one Chairman, and then a new Chairman has come who has not known what has been done and has accepted everything placed before him by the Engineer, or suggested by him as right; and the Commissioners have been willing to accept whatever the Chairman puts forward for sanction, as having been through the regular business routine, and as only requiring their consideration on the materials placed before them. I must explain: when tenders are submitted for acceptance, the material before the Commissioners is a note by the Engineer, comparing the several tenders received; and the Commissioners, believing all matters had been rightly done, have had regard only to the comparisons of the tenders placed before them, and have generally followed the recommendations of the Executive, and have generally accepted the lowest tender. These are familiar instances, and many are conversant with them. If it had not been that I accidentally discovered the divergence from the sanctioned scheme, the whole of the drainage project would have been completed, and many lakhs of rupees would have been paid on a scheme that had never received the sanction of the Commissioners, and had not been approved by the Government. It may have been discovered after the whole system had been completed, in consequence, perhaps, of a complete failure, and would have been instanced, when the details of the subject could not have been checked, as demonstrating the incapacity of the Commissioners, when they were the least to be blamed of the three parties concerned—the executive, the Government and themselves. With reference to this I have myself put in writing what I had to say in regard to it, in order to obtain a proper explanation on the subject: this was in January, and it was not till May that there was any attempt to answer these and other matters as mentioned in certain notes which I placed on record. And from one of these notes I shall read an extract to show how the Engineer actually had his statement of the changes from the sanctioned plan printed at the Municipal Press, but, by reason of the measures he adopted, he prevented the circulation of his note for the information of the Commissioners, to whom he was bound to submit it. The memorandum from which I am going to read is dated the 13th of March last:—

'The Engineer's note, dated the 23rd of February, 1897, as I have mentioned in my previous memorandum, dated 25th of January last, states the changes from the sanctioned plan. This note has a very curious history attaching to it. It was printed by order of the Engineer in our Municipal Printing Press, and sent, not to the Secretary, as had been the invariable practice before, but, by order of the Engineer, back to himself. Its existence was

unknown to the Secretary and, of course, it was not circulated among the Commissioners. The measure that the Engineer took secured this result. When the Vice-Chairman received the bills relating to Contract No. III, passed by the Engineer for payment, he was unable to understand them, and, after some trouble, the note in question was discovered, so late as the 29th of December, 1897, to be with the Engineer. I am assured by our Secretariat Officers that the course adopted by the Engineer in requiring the copies of his "Note" when printed to be sent to him is absolutely unprecedented, and the incident under notice has led the Secretary to issue a strict order to the printer in future to send all printed matter to his office. I find that the "Note" has not even yet been circulated.'

"The extract speaks for itself. No notice of it was taken until May last, and I particularly ask the Council's attention to the terms of the explanation in this most important matter:—

'Contrary to practice, the Printing Department seems to have sent the note straight back to the Engineer instead of through the Secretary's Office. In December, 1897, it was discovered that no copies were in the office, and the note was then searched for and finally received from the Engineer's Department in January, 1899.

'It was apparently not circulated to the Commissioners in March, 1897, as it was not in the Secretary's office.

'As far as can be ascertained at this distance of time, the note was sent to Government on the 13th July, 1897, with the tender and specification. I produce the covering letter. Sanction to the project as then sent up was received from Government in their No. 4209M., dated the 16th August, 1897. I produce this letter. As it appeared to me likely that Government had not realised that the scheme had been changed, I submitted it again for sanction, and have, in reply, received an exhaustive note from the Hon'ble Mr. Buckley, which is herewith circulated.'

"If there was the semblance of effective supervision and control exercised by the Chairman over the Engineer, the latter should have been sharply called to account. I am not aware whether the Chairman has said anything to the Engineer for such an extraordinary and objectionable proceeding as I have referred to; but I know this, that the question in regard to the conduct of the Engineer was not brought before us, and, so far as I know, the Engineer has not been held to blame. How is it that the Government gave their sanction? I have not seen the letter which purported to give sanction, but I have heard that a letter came back from the Local Government, approving of the tender which, however, they themselves take care to say was with reference to a scheme which had already been sanctioned. It is open to me to say that if Government expert advisers can be led to give their sanction in this way, I do not think that the Commissioners, who are laymen, can be blamed when tenders are sent up with reference to a scheme which, in fact, has not been sanctioned by them, and they on their part are led to give their sanction to it. It seems very strange that it was not pointed out, when the Government reply was received, that the tender was not for the scheme that had been sanctioned. Here was this business done in this very unbusiness-like way, and this gives force to my contention that those who have become experts in these matters would be more likely to control them if placed in the chair, than a Chairman who is new to the office, and who has to depend upon the heads of departments for information and guidance. I do not wish to blame the Chairman; it is natural that he should depend upon his subordinates when he is inexperienced, more than he should otherwise do; but it is to the prejudice of the administration, and it is for this that we are forced to appoint Committees, in order to exercise a proper check over our great spending departments. If there was a proper investigation and enquiry, the facts that would come out regarding the ways of the executive, even with the supervision that we can exercise, would be appalling. What the consequences will be when the executive have a free hand is beyond the limits of my imagination. I can only briefly refer to one or two points in this discussion. I will take the question of the Town Hall, in connection with which we were forced into an enquiry. I know we have been blamed in regard to the matter, but I can only refer very generally to the subject. It was incredible what was done, and it was because we were careful of the interests of the rate-payers that we set the enquiry on foot. This enquiry was of such a character that it required the examination of the Engineer's Department in regard to the work done, and charges and rates sanctioned by that Department;

and the Chairman was so ill-advised as to what had been done that so far back as 1897 he drew up a report accepting as correct practically all that had been done and everything told him by the Engineer's Department. But there were some of us who knew what was being done, among whom was one of the most industrious members of the Corporation, the son of a most distinguished and brilliant member of this Legislature many years ago, and he undertook a close investigation into the facts, and that investigation was of such a character that the Chairman was forced to admit that the whole report would have to be withdrawn. It was shown that the Engineer's Department had passed for payment sums in excess amounting to at least Rs. 18,000, while the Engineer's Department were protesting that there was an excess of only Rs. 500! I will give you one item in the enquiry, and it is of a character which you can easily understand. There was a question of an architrave of the south porch of the Town Hall. The rate was Rs. 5-12 per running foot for a certain quantity of material; more was required; a bill was submitted at the rate of Rs. 16, and the Engineer's Department described the difference as being only 4 annas: on enquiry it was discovered that the rate mentioned was per cwt., while the original rate had been per running foot, and when reduced to a common denomination the rate really was at Rs. 43-12, and in this one item there was a difference of Rs. 5,000! I wish to make it clear that I do not wish to cast a shadow of a reflection on the contractors. My sole puposo is to bring into relief that when the Engineer's Department was representing that the excess amount as passed for payment by them was only Rs. 500, in one item only we found that the excess was Rs. 5,000. All this ought to make us very anxious how we accept anything that is done by the Engineering Department without close scrutiny, but the Chairman is ready to accept their statements. These conditions have made it imperative on the Commissioners to institute enquiries on occasions. That they should have done so ought to have been the subject not of censure, but of praise. And yet this is one of the principal grounds on which this Bill has been formulated.

"I will give you another instance. It is a question in regard to several tenders, some of which were not submitted to the Commissioners. Seven tenders were submitted to the General Committee by the Chairman. I do not in the slightest degree attach blame to him in reference to this. The Chairman accepted what the Engineer had submitted. The General Committee accepted the lowest tender out of those that were submitted to them. I got some information in regard to the matter, and made enquiries, and I found that there were nine tenders, and that one of the two tenders not placed before the General Committee was the lowest of the nine that had been received. I do not want to multiply instances, but I think I have given enough to make the Council pause, and not be so ready to attach blame to the Commissioners as many are so willing to do.

"Then with regard to the way in which contracts are accepted. We have an instance in regard to some in connection with the Suburban Drainage Scheme now in progress, in regard to which it was stated that there was a difference between certain tenders and the revised estimate of only Rs. 15,000. The Vice-Chairman in his scrutiny showed that there was a difference of over a lakh of rupees. These intances show the undoubted need there exists for careful scrutiny in all matters which involve large expenditure. The Vice-Chairman submitted a series of notes in reference to certain items, and in every item it was shown that the amounts found by the Engineer varied from the tender. How do you suppose the Engineer met those statements which had been made? He said this in his printed reply:—

'I find it very difficult to find dignified language in which to frame this reply. I shall strictly confine myself to facts, stated in the briefest possible terms, and, as far as possible, leave the Committee to apply the necessary adjectives to the tone and character of the paper under reply and to the administrative anarchy it has produced in the municipal administration and the waste of time it has caused to the Commissioners.'

'In paragraphs Nos. 1 to 10 a statement is made that the provisions of the specification have not been enforced in ten items.

'All I have to say in reply to this statement is to ask the Committee to request the Vice-Chairman to say whom he got his information from. The work has been carried out to my satisfaction, and I consider it to be highly creditable to the contractors and the Corporation. The Vice-Chairman in these statements is travelling beyond the province of an accounts officer and dealing with matter he does not understand, and I assume that the Commissioners will take this view. Mr. Mandy will attend the Committee, and give any further information which may be required.' "

"Then he finishes off by suggesting certain rules in accordance with which the Vice-Chairman should do his duty. A very haughty line for our Spending Department to take. Is it not throwing dust in our eyes? Under these circumstances, when I give instance after instance of the system that gives us official Chairmen breaking down, and illustrations to show that the Executive are not to be trusted, I submit that where it is natural for the head of the Executive to be more or less a partisan of those who are working under him, it is undesirable that the head of the Executive should also be the Chairman of the Finance Committee."

The Hon'ble MR. BAKER said:—" The Council will see that this amendment is supplemented by another amendment, No. 53,* which also stands in the name of the Hon'ble Mr. Apcar, the object of which is to enable the General Committee to appoint their own President from amongst their own members. I do not think it will be necessary for me to take up the time of the Council at any great length in reply, because I imagine that the fate of this amendment and of the supplementary one was practically settled last Saturday, when the Council resolved to reject the Bombay system by which the head of the executive is distinct from the President of the Corporation, and resolved instead to adhere to the system with which we have been familiar in Calcutta for so many years. For if the Chairman is to be President of the Corporation, it follows *à fortiori* that he must also be President of the General Committee. That is the working body, the Cabinet Council of the Corporation. The Corporation has only to meet once in two months; it will only deal with large issues and settle broad questions of policy. It will have little or nothing to do with executive matters of detail. Now in the General Committee all this is totally different. The volume of the work which will devolve upon the General Committee will be enormous. It will have to deal with an immense number of matters of detail, many of which are of an intricate character. It is just conceivable that an honorary President might be found who could attend to the business of the Corporation, and make himself tolerably familiar with the few large matters of business with which that body deals. But on the General Committee I believe that to be utterly impossible. The knowledge of the town which the Chairman necessarily possesses, his acquaintance with the details of the business to be done, and all the technicalities of municipal administration, are so much greater than that which is possessed by any other member of the General Committee, that all of them will trust and rightly and naturally look to him for guidance and advice. He would certainly have to attend at all meetings of the General Committee; and, if he does attend them, it is anomalous and inconsistent that he should attend in any other capacity than that of President of that Committee.

"The hon'ble mover of the amendment has referred in the first part of his speech to the fact that the General Committee is to hear appeals from the orders of the Chairman, and he submitted that it was wrong and improper that he should preside over that body to hear appeals against his own orders. Well I think, in the first place, there are not a few precedents in which a judicial officer does form a member of an appellate body which hears appeals from his own decisions. Cases of that kind will be found in the House of Lords in England, and I believe also in the High Courts in this country. But I do not wish to lay any particular stress upon that, because we have no intention whatever of affirming that the Chairman shall assist in hearing appeals against his own orders. If the Council will look at section 88 (*now* 95) of the Bill, they will see that the General Committee has the power to appoint Sub-Committees, Committees supplementary to the General Committee, and to

* Printed on page 18, *post*.

delegate to them any or all of its duties and powers; and the intention is that one of these Sub-Committees shall be a Sub-Committee for appeals. All appeals from the orders of the Chairman will be heard by this Sub-Committee, and of that Sub-Committee the Chairman will not be a member.

"Then the hon'ble mover of the amendment said that a new Chairman would have to depend upon the heads of departments, and that if the General Committee were permitted to choose their own Chairman from amongst their own body, then, as the members of the General Committee usually go on from year to year, the President would always obtain a certain amount of experience before he filled the chair; and he gave certain instances to show that a new Chairman had in certain instances been relying on their guidance. I think he referred to the case of the Suburban Drainage scheme, in which certain alterations were made in the scheme which were not sanctioned by the Government; and he also said that certain tenders had been accepted, although the sanction of the Government had not been obtained. In the first place, I would point out that as the members of the General Committee go on from year to year, it follows that whoever the President may be of that Committee, he will have the benefit of their guidance and experience in every case, and in the cases to which the hon'ble mover of the amendment referred, it so happened that this was the very thing which occurred. In the case of the Suburban Drainage scheme, the tenders were accepted by the General Committee notwithstanding their accumulated knowledge and experience. In any case the error which had been committed was detected by a member of the General Committee, whose experience was at the service of the Committee throughout, and whose experience would continue to be available under this Bill. Similarly, in the case of the Town Hall. There was a very serious irregularity in the proceedings of the Engineer's Department in connection with the Town Hall. This happened long before the present Chairman assumed office, and I understood the Hon'ble Member to say he did not blame the Chairman in any way concerning that. But here again we have the fact that tenders which were irregularly accepted, were accepted and passed by the experienced members of the General Committee to whom the Hon'ble Member has alluded; and we have the further fact that the ultimate discovery of the irregularity was also brought to light by a member of the General Committee, notwithstanding the fact that the Chairman was President of that Committee. I cannot understand how the Hon'ble Member's arguments tend to show that the appointment of a non-official or honorary President would check all these irregularities. If these irregularities have occurred in spite of there being a whole-time Chairman, and in spite of the experience of members of the General Committee, why does he think they would not have occurred if one of these trained members had happened to be in the chair? I hope the Council will reject this amendment without further discussion."

The Hon'ble Babu Surendranath Banerjee said:—"I am free to admit that the tendency and the tone of the discussion which has taken place in this Council and the trend of opinion here are distinctly adverse to my hon'ble friend's amendment; but all the same I am not prepared to accept the views put forward by the Hon'ble Member in charge of the Bill, that inasmuch as the Council has decided that the Corporation is not to appoint a Chairman, therefore the Council has in a manner anticipated another principle connected with it, *viz.*, that the General Committee is not to elect its own Chairman. I think the two cases stand altogether upon a different footing. The Corporation may not have the power to elect its own President, but the General Committee may have the power to do so. The two cases, as I have remarked, stand altogether upon a different footing, and the acceptance of my hon'ble friend's amendment would not be at all inconsistent with the vote at which the Council has already arrived in regard to the other matter. The Hon'ble Member in charge of the Bill has been good enough to say that, if the Chairman is to be President of the Corporation, he must also be President of the General Committee. I confess I am unable to follow him in this line of argument. In the Bombay Corporation the President of the Corporation is

not the President of the General Committee. The two persons are altogether separate and distinct. I know, as a matter of fact, that the President of the Corporation at Bombay is not necessarily or usually the President of the General Committee. The President of the General Committee is a very hard-worked individual, and is altogether separate from the gentleman who presides over the deliberations of the Corporation. It has been said by the Hon'ble Member that the volume of work to be done by the General Committee is enormous, and that the time of the Chairman is to be devoted to this work; but that seems to be a reason why the Chairman should be relieved of the responsibility of presiding over the deliberations of that Committee. If you look at the details of the Bill, you will have some idea of the amount of work that has been thrown upon the shoulders of the General Committee. That process has gone on to such an extent that I think the Government of India has somewhere made the remark that the General Committee has been saddled and fearfully over-weighted with multifarious duties. That being so, it is desirable that the Chairman should not with his own multifarious duties be also made the President of the General Committee, which has multifarious duties of its own to perform. Speaking from my own experience of municipal work, I must confess that it would be almost a matter of impossibility for the General Committee to go through the vast mass of work imposed upon that Committee, and I must also express my serious apprehension as to the possibility of the Chairman being able to do justice to his various duties. If I am right in this assumption,—and I am speaking with some authority in the matter,—and I am entitled to speak with greater authority in this matter than others who have never been on the Committee,—then it is our duty, in order that the General Committee might not break down under the weight of these duties, and that the Chairman might also not break down, to completely sever the functions of the General Committee from the functions of the Chairman, that is to say, they ought not to be associated in performing their respective functions, but to allow the Chairman full time to do his own particular duties. Will he have the time to do justice to his own work under the new Bill? I do not think so. Therefore, apart from the question of principle, because the question of principle has been decided adverse to us—apart from it, I confine my attention to administrative considerations. You are, most of you, experienced administrators. I am not an administrator, but I have some knowledge of municipal business, and I put it to you, in all seriousness, that, having regard to these multifarious duties of the Chairman and the General Committee, is it desirable, on grounds of administrative efficiency, to practically amalgamate the two together by making the Chairman of the Corporation the President of the General Committee? I think you will find, although I am no prophet, that the system will not work, and I believe this will be the verdict of most people. That being the case, if the system will not work, if there is a reasonable probability that it is likely to break down, it is our duty to make an arrangement which will prevent such a calamity, for it will be a calamity if in the course of a few years it becomes necessary to revise the law which we are now passing. For all these reasons, I submit that we ought to accept the amendment of my hon'ble friend Mr. Apcar.

"Only one or two observations more, as I do not wish to detain the Council any longer. My hon'ble friend Mr. Baker has observed that the knowledge of the Chairman in regard to details is very great, and that knowledge it is necessary the General Committee should possess. My friend Mr. Apcar's motion does not stand in the way of the necessary information being furnished to the General Committee, as he has given notice of a motion that the Chairman may attend any meeting of the General Committee and place at the disposal of the Committee any information he may possess. Therefore, it will be open to him at these meetings to place before the General Committee any information which he may think necessary. I think that, that being the state of things, it is not necessary that the Chairman should be also President of the General Committee. Further, the law provides for many cases in which appeals against the orders of the Chairman will lie to the General Committee, and if he is to be the President of the Committee, he becomes a

Judge in his own cause. My hon'ble friend referred to some precedents of the High Court, but I understand that it is only in Full Bench cases that the Judge is allowed to sit in appeal with other Judges in cases tried by him. But whatever may be the case in the High Court, I think it is repugnant to our elementary principles of justice that any man should have any voice in appeals from his own orders. No satisfactory answer has been given by my hon'ble friend in regard to this part of the case. Therefore, having regard to all those considerations, I desire to record my vote in support of my friend's amendment."

The Hon'ble MR. BUCKLEY said:—"The Hon'ble Mr. Apcar, in the course of his arguments on his amendment, referred to my knowledge of certain circumstances in connection with the drainage works, and he argued from them that those circumstances tended to show that it is undesirable that the Chairman of the Corporation should be also Chairman of the General Committee. I will not follow the Hon'ble Member into the details of the instances to which he has referred, and by which he illustrated his views, further than to say that I quite admit that there is a good deal of substance in some of his arguments. But these circumstances, to my mind, lead to an entirely opposite conclusion to that which he has drawn from them. I do not say that they show, in themselves, that it is desirable that the Chairman of the Corporation should be also Chairman of the General Committee: but what they do show, to my mind, very clearly, is, that the system upon which the present Act is framed, and upon which the Municipality works, is a system of extreme centralization. In every direction the action of the Corporation, and of their Committees, makes effective work almost an impossibility. The particular instances which the Hon'ble Member has so fully detailed tend, I think, to show the absolute impossibility of any one man effectively carrying on the enormous mass of detail work thrown upon the Chairman and the Engineer. I do not speak without some experience, as I was for many months the Engineer to the Corporation, and I came away with the feeling of the utter hopelessness of the Engineer ever being able to do justice, not only to the great questions which were before him, but, what is perhaps of hardly less importance, to the many petty questions and petty works affecting the comfort of the people that he has to decide, and which can only be decided in the most perfunctory and unsatisfactory way. What the Corporation needs is decentralisation in every shape, and this Bill, I think, affords the necessary scope for this. The power of decentralisation between the Corporation, the General Committee and the Chairman and the several Sub-Committees, if it is really carried out, will effect an enormous improvement. This brings me to some remarks which were made by the Hon'ble Babu Surendranath Banerjee. He spoke of the impossibility of the Chairman being able to perform the duties which would devolve upon him under this Bill. The Chairman, according to a statement* which has been submitted to the Council, has 429 duties laid upon him by the different sections of the Bill. Under section 26 (*now* 18) he is forbidden to delegate his authority under only 61 of those sections, so that in more than 360 out of 429 cases he can delegate his duties and powers to lower authority if he thinks fit. The same thing applies to the General Committee. The General Committee have 203 distinct duties imposed upon them by certain sections of the Bill, and there is no restriction, so far as I can see, in the way of their delegating any of these duties to Sub-Committees; and by that delegation they get rid of a good deal of trouble and difficulty which now prevails. Nothing was more remarkable in the course of the consideration of this Bill in the Select Committee than the intense desire of the members of the Select Committee, who represented the Corporation, to centralise and centralise. They would allow nobody to have power in any matter if they could place that power with some higher authority. My experience is that the lower down the scale you give authority, with efficient supervision, the more you will benefit the people."

* Printed in paper No. 37 relating to the Bill.

The Hon'ble Babu Surendranath Banerjee said:—"May I be permitted to offer one [illegible] the question of centralisation? Our reason for centralisation is the profound distrust we have of the honesty and integrity of the underlings of the Municipality, and that is really the reason which [illegible] the great desire for centralisation which has been manifest in the proceedings of the Corporation."

The Hon'ble Mr. Bolton said:—"I think my hon'ble friend the Member in charge of the Bill has sufficiently answered the Hon'ble Mr. Apcar, but I rise to make a few remarks, chiefly with reference to what has fallen from the Hon'ble Babu Surendranath Banerjee. The Hon'ble Mr. Apcar has alluded to the appeal work of the General Committee, with reference to which it may be desirable that the Chairman should not preside over the General Committee; but the disposal of appeals forms a very small part of the work of the General Committee. There is, besides, a very large amount of administrative work which it has to perform, and it is manifest that, unless the Chairman is a member of the Committee, it could not accomplish more than a fraction of the work which it would have to get through. If the Chairman were not on the General Committee, it would be necessary, in a number of matters, for him to attend personally, or to submit lengthy notes, prepared by himself or his officers; and obviously great delay would be caused. The arrangement under the Bill is that there should be three co-ordinate authorities, the Chairman, the General Committee, and the Corporation. Appeals from the Chairman will go to the General Committee, and from the General Committee to the Corporation in certain matters. The Chairman will have a place in the General Committee and will be able personally to answer and explain matters, and he and the General Committee will be gathered up into the Corporation, where explanations from them could also be personally given. That, I think, is an arrangement which will facilitate the transaction of business. The Hon'ble Babu Surendranath Banerjee observed that the duties of the General Committee and of the Chairman, respectively, will be so onerous, that it is advisable to have a separate Chairman of the Committee, in order that the Chairman may be left freer for his own work. From what I have just stated, however, it is clear that the work of both the Chairman and the General Committee will be increased if they are not associated together, on account of the obligation of the Chairman to submit written explanations and the difficulty which the General Committee would often experience in coming to decisions on them in his absence. The Hon'ble Babu Surendranath Banerjee also observed that the Hon'ble Mr. Baker had not answered the point raised by the Hon'ble Mr. Apcar that the Chairman would be judge in his own cause. My hon'ble friend did, however, explain that under the Act a Sub Committee would be appointed, which would dispose of all appeals from the Chairman's decisions. But even if the Chairman were to sit on the General Committee and discuss matters in which he is himself personally concerned, I should see no strong objection. It would certainly facilitate the disposal of such questions if the Chairman gave explanations at once, instead of the matters being referred to a Sub-Committee for report, and the Sub-Committee's report being submitted at some future time to the General Committee."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"I regret to confess that I find myself in the somewhat unfortunate position of not being able to follow the line of reasoning adopted by the Hon'ble Member in charge of the Bill in answer to the arguments of the Hon'ble Mr. Apcar. That Hon'ble Member put forward two arguments in support of his motion. The first was that the General Committee had the right to hear appeals from the decisions of the Chairman, and that, therefore, the Chairman ought not to be the President of the General Committee. The second was that the Chairman, as the head of the Executive, should not also be the President of the General Committee. I propose to deal only with the first of these two arguments. It is repugnant to my instincts as a lawyer that any Judge, however eminent his position may be, however honest and impartial he may be, should sit not only as a member but as the President of a Court of Appeal,

when such Court is hearing appeals from his own decisions. The Hon'ble Member in charge of the Bill observed that exceptions to this rule might be found, both in this country and in the House of Lords in England, which justified such a course. But I am not aware of a single instance, either in this country or in the House of Lords, which would really justify such a proposition. The Hon'ble Babu Surendranath Banerjee said that only in Full Bench cases did a Judge, who had sat and decided a case in the Court of first instance, hear it on appeal. That is not so. In Full Bench cases the Judge who originally hears the case only decides that the case is a fit one to be heard by a larger body of Judges, but he does not give any decision at all. So that, when a case is heard before a Full Bench, the Judges who decide have not heard the case before. In the House of Lords difficulty might occur in the case of the Lord Chancellor, who is Chairman of the Committee of Appeal, and if an appeal is preferred from the Court of Appeal, and is brought before the House of Lords, he as President of the House of Lords may have to sit in judgment over his own decision. But, as a matter of fact, that has never been the case, because, if an appeal is preferred against his decision in the Court of Appeal, he takes no part in the decision of such appeal. I would further point out that section 4 of the Judicature Act, 1875, clearly lays down that no Judge of the Court of Appeal shall sit as a Judge on the hearing of an appeal from any judgment or order made by himself or made by any Divisional Court of the High Court of which he was and is a member; and similar statutory provision is to be found in this country in section 38 of Act XII of 1887.

"But, Sir, it is not necessary to deal at any length with this point, because the Hon'ble Member in charge of the Bill says that section 88 (*now* 95) provides against such cases. On reference to that section, I find it lays down that the General Committee may from time to time by specific resolution delegate any of their powers and duties to Sub-Committees, and I understand that there may be an Appeal Sub-Committee. By sub-section (5*a*) [*now* (9)] of the same section every Sub-Committee shall choose one of their own members to preside at their meetings, provided that the Chairman shall be President of any Sub-Committee of which he is a member; there is, therefore, no guarantee that if an Appeal Sub-Committee is appointed, the Chairman may not be a member, and if a member, *ex officio* President of such Sub-Committee. Therefore, I venture to think that to remove all grounds of apprehension some such provision as that now proposed should be added to section 88 (5*a*), [*now* 95 (9)] namely, that the Chairman shall take no part in the decision of appeals against his own orders. Such a provision can harm nobody, and it will, if accepted, give confidence in the decisions of the Sub-Committee. Unfortunately, I am not entitled to move such an amendment without special leave, and I leave the matter entirely in the hands of Your Honour."

The Hon'ble BABU BAIKANTA NATH SEN said:—"The creation of three co-ordinate authorities seems to me to be one of the principal objects of this Bill. If the principle adopted in this Bill is carried to its legitimate length, it will be the perfection of legislation if in practice we find that the three co-ordinate authorities work independently of each other. Great difficulties will, I think, be found in keeping entirely separate the duties imposed on each of such authorities and preventing them from interfering with one another. If a General Committee can be constituted in such a way that it would have no connection with either of the other authorities, that is to say, the Chairman and the Corporation, then there can be no harm in accepting this amendment. I think the proper course for the Council to take is to do as much as it can to disintegrate all these authorities. Therefore I submit that this amendment ought to be adopted."

The Hon'ble MR. OLDHAM said:—"There appears to be some misapprehension on this subject in the Bill. It is clearly understood that it is the intention of the Government that the Chairman will not sit to hear appeals in cases against his own orders, and therefore the Chairman will never be either a member on such occasions, nor the President of such a Committee. That is,

I understand, clearly the intention of the Government. Reverting to some remarks made by the Hon'ble Member who represents the Corporation, I remember very well the cases to which he alluded, the termination of which occurred during my own time, and they were undoubtedly very grave scandals; and I hope that my hon'ble friend will allow me to congratulate him upon the moderate and temperate tone in which he described all these matters, though they were subjects which were considerably criticised. He laid his hands upon them, and all these matters were dealt with by him in very temperate and moderate terms, and I may add by way of explanation that it was the temperateness of his methods which made me a standing adherent of his in the business of the Corporation, just as a reversed line of conduct has placed me in a position of antagonism to him here; but I cannot see how in any way the proposal which he has made will provide the remedy. He appealed to the Hon'ble Mr. Buckley, and I anticipated the answer which my hon'ble friend Mr. Buckley would give him. The remedy against the repetition of such occurrences will, I believe, be found in the provisions of the Bill and the greater time that will be given to the Chairman and also to the Engineer, and they will allow the members of the General Committee to use just as much interference in the future as in the past in checking matters of this sort. It will in no way diminish the activity of my hon'ble friend, nor of the other gentleman to whom Mr. Apcar has referred. I also am quite ready to acknowledge all that gentleman's efforts, though sometimes I must confess that they interfered seriously with the progress of the work of the General Committee; but as regards the proposal itself, speaking from my own experience, I must say I cannot imagine who among the 18 members of the last General Committee, or the 18 members who now form that Committee, would accept the office of President of the Committee. I, therefore, think the proposal an impracticable one"

The Hon'ble Mr. Apcar in reply said:—"If this is the result of an endeavour to express what is the clearly understood intentions of the Government, that the Chairman is not to sit in appeals in matters coming up from any questions in which he is concerned and which he has decided in the first instance, then I am afraid there is very little chance of the Bill, when it becomes law, working smoothly, because from first to last I see no indication in the Bill that in any way shows that the clear intention of the Government is that he shall not preside over the General Committee when hearing such appeals. The intention may be so, but it does not appear here. With reference to what the Hon'ble Member in charge says of judges sitting in appeal in their own cases, I ask that this should not be lost sight of: these cases to which I refer are cases in which the Chairman sits in appeal in his own cause: it may be his own action which may be challenged. These are not questions which have been raised upon points of law or any abstract question of any kind when possibly the Judge may occasionally sit in appeal, but they are matters in which he may take a partisan view. I think it is not desirable for the Chairman to be President of the General Committee to try any such case.

"I cannot help wondering why there is this striving in order to keep the Chairman of the Corporation as President of the General Committee. I am greatly in sympathy with much of what fell from the Hon'ble Mr. Buckley, but not to the extent he goes. There may be an improvement by decentralisation, but there has been no investigation or consideration of such points as to how improvements should be effected. I by no means say that the administration is not capable of improvement, but we ought to proceed soberly in order to see what will be an improvement. But, accepting what he has said, surely it would be an advantage to the Chairman not to be burdened with so much extra work as the hearing of appeals in addition to what has been thrown upon him by reason of his being Chairman. The effect of my amendment would be, if carried, to decentralise work. The effect, if it is rejected, would be to centralise power and work in the head of the executive. I think that, when we have these constant changes of Chairmen, there is a great deal of waste of time, and when there are these questions of detail, a Chairman without experience could not

get through the business unless assisted by members of the General Committee. He is dependent in 99 out of 100 cases for guidance from members of that Committee, and I cannot agree with the Hon'ble Mr. Bolton that there is so much superiority in the knowledge of the Chairman in regard to details. Certainly the volume of work which would fall to his share, I think, would be diminished very much if he were not also President of the General Committee.

"With regard to the remarks that fell from the Hon'ble Mr. Buckley, I am afraid that I have not made myself understood. What I meant was this: if the Chairman is not an experienced administrator, one who from his training has had no knowledge of business, and would, therefore, have ordinarily to rely upon the Heads of Departments and accept everything placed before him without question, the result is that we have so much business done in an unbusiness-like way that I wish to see a change in this respect.

"The Hon'ble Mr. Oldham has said that there would be no person found equal to the duties of the Chairman in the General Committee: in reply I say that I have been a member of a Committee in which most important work has been done and at which the Chairman has not been present, and I am bound to say that on the whole the order and despatch with which business was done, according to my humble idea, were better than when the Chairman has been present, because we had some one presiding who has been in the habit of doing business in Committees, and we have certainly progressed better than when the work has been done under the presidency of the Chairman. Then with regard to what has been said by the same Hon'ble Member that the work would be still better done by the Chairman under the remodelled Bill: with all these safeguards that are to be provided, and if the General Committee is remodelled, why not, under such circumstances, give them the power to elect their own Chairman? If the General Committee cannot properly exercise the power to elect its own Chairman, what is it fit for? As for the practicability of this amendment, we know from experience, as a matter of fact, that the Bombay system, under which the Chairman is elected by the members of the Corporation, has worked well. We do find there men who are thoroughly competent to preside at their Standing and other Committee meetings and we know that the system acts very well there. Therefore, under the circumstances, I submit that this amendment should be carried."

The motion was then put and lost.

The Hon'ble Babu Surendranath Banerjee moved that the word "eighteen" be substituted for "twelve" in line 2 of section 8 (*now* 9).

He said:—"The object of the amendment is to retain the present number of the General Committee. The present number of the General Committee is 18; the Bill proposes to reduce the number to 12. I say that the present number ought not to be reduced. It is incumbent on those who press for a reduction to make out their case, and I humbly contend that they have not been able to make out a case. I believe the present Chairman of the Corporation considers that the number 18 is too large. I am in a position to show that perhaps the greatest Chairman who ever adorned the Corporation as its head, Sir Henry Harrison, was of opinion that the number 18 is not too large. Under the Calcutta Municipal Act of 1876 the number was fixed at 30. When that Act came under revision in 1888, Sir Henry Harrison was in charge of the Bill which was introduced into this Council, and he proposed to reduce the number to 18; and we find, from the debates which then took place, that he was prepared to raise the number to 20 or even to 24. Therefore, if the present Chairman of the Corporation finds the number 18 to be too large, there was another Chairman, who was at least as great a Chairman as the present Chairman, and who was deliberately of opinion, after a much longer experience, that the number of the General Committee should be 18. And, further, the opinion of the non-official members of the Corporation is also entitled to some consideration. Some of the members,

whose experience extends over nearly a quarter of a century, are distinctly of opinion that the present number of 18 is not excessive. If you say you follow the Bombay model, my reply is that you do nothing of the kind. You follow the Bombay model when it suits you, and you discard the Bombay model when it suits you. The Bombay Act provides a General Committee with 12 members, with a non-official Chairman elected by the Committee The proposal of the Hon'ble Member in charge of this Bill is a General Committee of 12 members with an official Chairman appointed by the Government. That is not the Bombay system, and it is a distinct advantage, when you have large and varied interests, such as you have in Calcutta, to have a considerable numerical representation of those interests, because the augmentation of numbers involves a wider diffusion of local interest. It is the essence of local self-government that a considerable number of the rate-payers should take an interest in their own local affairs; and, having regard to the interests involved in the Municipality here, it is desirable to keep the number of the General Committee at its present strength, which has not proved in any way inconvenient, but has on the contrary worked satisfactorily. And the average attendance at meetings of the General Committee has been from 12 to 13. Therefore, although you have 18 as the number of members on the General Committee, usually you do not have more than 12 or 13 members present; consequently you secure what you want by keeping the number at 18. I know what the answer of the Hon'ble Member in charge of the Bill will be. We are going to pay fees, and therefore everybody will attend. To that my reply will be, don't pay fees; it is a waste of public money. Many competent and experienced men, both Hindus and Muhammadans, can be found to serve on the General Committee and attend and take interest in the work without the payment of any fees. If without the payment of fees you can secure the attendance of 12 or 13 members on the General Committee, I do not see the reasonableness of paying fees. Therefore, it seems to me that the present number should not be reduced. It has stood the test of experience; it enables you to provide for a wide diffusion of local interest; the larger number has not been attended with inconvenience, then why do you wish to reduce it? Under the circumstances, I hope the Council will see its way to accept my amendment."

The Hon'ble MR. BAKER said:—"The hon'ble mover of the amendment began by saying that it is incumbent on those who seek to make a change in the law to prove their case, and I listened with some interest to hear whether he would make any reference to the reduction which it has been decided to make in the total number of members of the Corporation. But he made no allusion to it. Yet it is a very relevant matter. At present the number of members on the General Committee is 18, out of a Corporation of 75. But under the Bill we have decided to reduce the number of the Corporation by one-third; therefore it seems perfectly reasonable that the number on the General Committee should be reduced in a corresponding proportion. That is a very simple and obvious conclusion. But I do not wish to rely solely on that consideration, because the intention of the Government was to reduce the number of the General Committee to 12 even if the number of the Corporation had remained unchanged. The Hon'ble Member referred to the opinion of Sir Henry Harrison that you might go up to 20 or even to 24 as the number of the General Committee. But as a matter of fact Sir Henry Harrison proposed and carried a motion that the General Committee should consist of 18 members, and he expressed the opinion that the work of the Committee was best done when the number of members present was from 12 to 14. Then the Hon'ble Member said that as a matter of fact the average attendance at meetings of the General Committee was a little over 13 in one year and in the following year it was a little over 11, and the average of the two years was about 12. We have frequently been told that the General Committee as it is now constituted has worked well, and if that is so, then the work has been done by a Committee which is exactly of the number which we seek to provide for in the present Bill. In the Port Trust the total number of members is 14, and the average

attendance has been about 12, and in the Port Trust a great quantity of business is done with a minimum of talk, a minimum of friction, and a maximum of efficiency. Then in Bombay with a Corporation of 72 members the number of the Standing Committee is 12, and I understand that that Committee has worked well. Therefore in taking that number we are standing on the sure ground of experience elsewhere. The only argument against the change of the number from 18 to 12 is that it does not give sufficient scope for the representation of different interests. That is to a certain extent true, but I would remind the Hon'ble Member that in 1888, when the number on the General Committee was reduced from 30 to 18, Sir Henry Harrison expressed the opinion that a larger representation of separate ward interests on the Committee would militate against the true interests of the Corporation. Making all due allowances, there can be no doubt that the balance of advantage is on the side of the smaller number."

The Hon'ble Mr. Oldham said :—"I have one word to say. I only wish to offer one remark on my hon'ble friend's remark with regard to the diffusion of representation, and in theory I agree with him; but I may remind the Council that both in the old law, in the present law and in this Bill there is no provision for the representation of different interests on the General Committee; and as a matter of fact, so far from the constitution of the General Committee being based on that principle, in the last General Committee there were four members who resided in one single ward, and that is a small ward."

The Hon'ble Mr. Apcar said :—"I wish to draw attention to this, that the maximum number proposed in the Bill is 12, and we have had it pointed out that Sir Henry Harrison considered 12 or 14 to be a good number to work with; but because we have 12 members on the Committee it does not mean that 12 will attend. With 18 members we now get 12 or 14 to attend; so that by cutting down the number of the Committee we are reducing their effective strength, because we know from experience that all the members will not attend. The only point against the larger number is that there will be so many more fees to be paid. We must hope for the best and hope that the provision entitling the members to be paid fees will not be enacted into law. Another point in favour of the larger number, and I support it very strongly, is that I think there is safety in numbers. I need not enter into my reasons for supporting this view, because I have already stated them in my speech when the Bill was referred back to the Select Committee. I, therefore, think there ought to be 18 members. I do not like a body working with closed doors to deal with the rate-payers' money. In ordinary circumstances I think 12 members are enough for a meeting, but under all the circumstances I think it would be wise that we should have a larger number. It is for these reasons that I give my support to this amendment. The General Committee will deal with very large questions, and we ought to have the benefit of such advice as we can get, and I do not think we ought to limit the number to 12 out of which some may not attend. Under the present arrangement the General Committee permit any member of the Corporation who desires to attend meetings of the General Committee to do so and bring forward any matter relating to his ward. Under the new constitution that idea will not be entertained. Under the Bill the members of the general body are not even to be allowed to have copies of the proceedings of the General Committee. I think this will be a very material danger in the administration of the affairs of the Municipality."

The Hon'ble Babu Surendranath Banerjee, in reply, said :—"I have one or two observations to make in reply to what has fallen from the Hon'ble Member in charge of the Bill. The Hon'ble Member has observed that to reduce the number of the General Committee is reasonable having regard to the reduced number of members on the Corporation. There is a little anachronism in that argument. The reduction in the number of the General Committee was provided in the Bill before the reduction in the number of the members of the Corporation was even dreamt of. The Hon'ble Member has been good enough to quote Sir Henry Harrison to the effect that the work of the General

Committee was best done when there have been few members attending. In this connection I am reminded of a little story for which I am indebted to an English friend, viz., that the ideal, the best, the most perfect Committee consists of three members, one of whom is always sick in bed, the second abstains from attending, and the third does the work. That was the best and most perfect Committee. The Hon'ble Member is endeavouring to have something between the two which is attended with all the inconveniences I have referred to. At the present moment all the resolutions passed by the General Committee are subject to confirmation by the Corporation; that is done away with under the Bill; therefore there is all the greater reason why we should have a larger representation on the General Committee. It becomes the supreme judge with regard to matters which come before it; the Corporation will know nothing of them, and, if you look at the question from this point of view, you will see that it is important that you should not reduce the number of the General Committee, but keep it at its present strength. I hope the Council will give this amendment the consideration it deserves."

The Hon'ble Mr. Baker said :—"The hon'ble mover of the amendment has introduced new matter in the course of his reply, namely, that the proceedings of the General Committee will not in future go before the general body of the Corporation, and I ask permission to say one word on that point. The greater part of the work of the General Committee will not be done in its own person, but by reference to Sub-Committees, and the members of such Sub-Committees need not be members of the General Committee. It will be at liberty to select members from any section of the Corporation to serve on such Sub-Committees, and we hope this power will be very widely exercised. Therefore, the number of Commissioners who will actually have an opportunity of taking a part in the work of the General Committee will be very much larger than the number who are on the General Committee itself."

The Hon'ble Babu Surendranath Banerjee said :—"The maximum number of members on these Sub-Committees is 6, and the minimum number is 3. The appointment of Sub-Committees is wholly in the discretion of the General Committee, and they will appoint the members of the Sub-Committees. We must take human nature as it is. If I can get myself appointed on a Sub-Committee and get the fees, naturally enough I would not care to see some other person appointed. Whom can they appoint but themselves! They are the best persons to be appointed! I am no prophet, but let the General Committee appoint these Sub-Committees, and let us see what the *personnel* of such Sub-Committees will consist of. There is nothing to prevent the General Committee from appointing the members of Sub-Committees from among their own body; but if you declare that members of the General Committee shall not be members of Sub-Committees, then I can understand the force of the argument adduced by my hon'ble friend the Member in charge of the Bill. There would be then greater diffusion of interest among the members of the Corporation."

The motion was then put and lost.

The Hon'ble Mr. Apcar's amendment of section 8 (*now* 9) having been lost, the Hon'ble Babu Surendranath Banerjee, by leave of the Council, withdrew his amendment No. 45, namely, that for the words "and the Chairman, who shall be President of the Committee" in lines 2 and 3 of section 8 (*now* 9), the following be substituted :—

"and the General Committee shall at their first meeting in each financial year appoint one of their own number to be their President until the first meeting of the said Committee in the next following financial year."

The Hon'ble THE PRESIDENT ruled the following motions, standing in the name of the Hon'ble Babu Surendranath Banerjee, to be out of order:—

(1) that the following be substituted for sub-section (*2*) of section 8 (*now* 9):—

"The said eighteen members shall be Commissioners, and shall be elected as follows:—

(*a*) twelve shall be elected by the Ward Commissioners, and

(*b*) six shall be elected by the Commissioners appointed under clauses (*a*), (*b*), (*c*) and (*d*) of section 7 (*now* 8);"

(2) that the following be substituted for sub-section (*2*) of section 8 (*now* 9):—

"The said twelve members shall be Commissioners, and shall be elected as follows:—

(*a*) eight shall be elected by the Ward Commissioners, and

(*b*) four shall be elected by the Commissioners, appointed under clauses (*a*), (*b*), (*c*) and (*d*) of section 7 (*now* 8);"

(3) that the following be substituted for sub-section (*2*) of section 8 (*now* 9):—

"The said twelve members shall be Commissioners, and shall be elected as follows:—

(*a*) six shall be elected by the Ward Commissioners, and

(*b*) six shall be elected by the Commissioners appointed under clauses (*a*), (*b*), (*c*) and (*d*) of section 7 (*now* 8);"

(4) that the letter "(*a*)" in line 3 of sub-section (*3*) of section 8 (*now* 9) be omitted.

The Hon'ble THE PRESIDENT also ruled the following motions, standing in the name of the Hon'ble Babu Boikanta Nath Sen, to be out of order:—

(1) that in section 8 (*now* 9), sub-sections (*1*) and (*2*), "eighteen" be substituted for "twelve;" that in sub-section (*2*), clause (*a*), "nine" be substituted for "four;" that in sub-section (*2*), clause (*b*), "three" be substituted for "four;" and that in sub-section (*2*), clause (*c*), "six" be substituted for "four;"

(2) that "six" be substituted for "four" in section 8 (*now* 9), sub-section (*2*), clause (*a*), and that "two" be substituted for "four" in sub-section (*2*), clause (*b*).

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 8 (*now* 9), sub-section (*2*), clause (*a*), for "Ward Commissioners" the words "Commissioners elected under section 7 (*now* 8), sub-section (*1*)," be substituted. This, he said, was a purely verbal amendment, and he hoped it would be accepted.

The Hon'ble MR. BAKER having explained why the words objected to were inserted in the Bill, the Hon'ble DR. ASUTOSH MUKHOPADHYAYA, by leave of the Council, withdrew his amendment.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA's motion for the amendment of section 7, sub-section (*1a*) [*now* section 8, sub section (*2*)], having been lost on the 9th instant, he, by leave of the Council, withdrew the motion standing in his name, that in clause (*b*) of section 8 (*now* 9), for "and (*d*)" be substituted "(*d*) and (*e*)," and that after the figure "7" (*now* 8) be added "sub-section (*1a*) [*now* sub-section (*2*)]."

NEW SECTIONS.

The Hon'ble MR. APCAR's motion for the amendment of section 8 (*now* 9), sub-section (*1*), having been lost, he, by leave of the Council, withdrew his amendment No. 53, that after section 8 (*now* 9) the following section be inserted:—

"8A. (*1*) The General Committee shall, at their first meeting in each financial year, appoint one of their own number to be their Chairman until the first meeting of the said Committee in the next following financial year.

"(*2*) A member of the General Committee who ceases to be Chairman shall be re-eligible.

"(*3*) If any casual vacancy occurs in the office of Chairman, the General Committee shall, as soon as they conveniently can after the occurrence of such vacancy, choose one of their number to fill such vacancy; and every Chairman so chosen shall continue in office so long only as the person in whose place he is appointed would have been entitled to continue if such vacancy had not occurred."

The Hon'ble MR. APCAR, by leave of the Council, also withdrew the motion, standing in his name, that the following section be inserted:—

"The General Committee shall meet for the despatch of business in the chief municipal office, and may, from time to time, make such regulations with respect to such meetings and with respect to the scrutiny of the municipal accounts, as they think fit, subject to the following conditions:—

(a) there shall be a meeting of the General Committee once a week, and at such other times as may be found necessary;

(b) the first meeting of each General Committee shall be held on a day and at a time to be fixed by the Commissioner, and, if not held on that day, shall be held on some subsequent day to be fixed by the Commissioner; and every subsequent meeting of the General Committee shall be held on such day and at such time as the said Committee from time to time determine;

(c) the Chairman of the General Committee shall, upon a written requisition signed by the Commissioner, call a special meeting of the said Committee within twenty-four hours for the transaction of any business which, in the opinion of the Commissioner, cannot be delayed until the next ordinary meeting of the said Committee;

(d) no business shall be transacted at a meeting of the General Committee unless at least six members are present from the beginning to the end of such meeting;

(e) every meeting of the General Committee shall be presided over by the Chairman, if the Chairman is present at the time appointed for holding the meeting, and, if the Chairman is absent, by such one of the members present as may be chosen by the meeting to be Chairman for the occasion;

(f) every question shall be decided by a majority of votes of the members of the General Committee present and voting on that question, the presiding authority having a second or casting vote when there is an equality of votes;

(g) subject to any bye-laws made in this behalf, the General Committee may from time to time, by a specific resolution in this behalf, delegate any of their powers or duties to Sub-Committees, consisting of such members of the said Committee, not less in number than three on each Sub-Committee, as they think fit; and any Sub-Committee so formed shall conform to any instructions that may from time to time be given to them by the General Committee; and the said Committee may at any time discontinue or alter the constitution of any Sub-Committee so formed;

(h) a Sub-Committee may elect a Chairman of their meetings, and if no such Chairman is elected, or if he is not present at the time appointed for holding any meeting, the members of the Sub-Committee present shall choose one of their number to be Chairman of such meeting:

(j) Sub-Committees may meet and adjourn as they think proper, but the Chairman of the General Committee may, whenever he thinks fit, and shall, upon the written request of not less than two members of a Sub-Committee, call a special meeting of such Sub-Committee;

(k) questions at any meeting of a Sub-Committee shall be decided by a majority of votes of the members present, and, in case of an equality of votes, the Chairman of the meeting shall have a second or casting vote; but no business shall be transacted at any such meeting unless at least two-thirds of the members of the Sub-Committee are present from the beginning to the end thereof;

(l) a minute shall be kept by the Secretary of the names of the members present and of the proceedings at each meeting of the General Committee and at each Sub-Committee's meeting, in a book to be provided for this purpose, which shall be signed at, and by the presiding authority of, the next ensuing meeting;

(m) a member of the General Committee shall not vote or take part in the discussion before the said Committee, or before any Sub-Committee, of any matter in which he has, directly or indirectly, by himself or by his partner, any share or interest, such as is described in section 31 (*new* 39), sub-section (2), or in which he is professionally interested on behalf of a client, principal or other person;

(n) the Commissioner shall have the same right of being present at a meeting of the General Committee, and of taking part in the discussions thereat, as a member of the said Committee, but he shall not be at liberty to vote upon, or make, any proposition at such meeting"

SECTION 9.

The Hon'ble THE PRESIDENT ruled the following motion, standing in the name of the Hon'ble Raja Ranajit Sinha, Bahadur, of Nashipur, to be out of order:—

that the word "six" be substituted for "four" in clause (*a*) of section 8 (*now* 9); that "three" be substituted for "four" in clause (*b*); that the words "and (*d*)" in clause (*b*) be omitted; and that the word "three" be substituted for the word "four" in clause (*c*).

SECTION 11.

The Hon'ble Mr. Apcar's motion for the insertion of a new section numbered 6AA having been lost on the 9th instant, the Hon'ble BABU SURENDRANATH BANERJEE, by leave of the Council, withdrew his amendment No. 55, namely, that the words "of the Corporation" in line 3 of sub-section (*1*) of section 10 (*now* 11) be omitted, and that the following proviso be added to the section:—

"Provided that the Corporation shall at their first meeting in each financial year appoint one of their own number to be President until the first meeting of the Corporation in the next financial year, unless the Commissioners retire from office, and then until the day of such retirement."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 10 (*now* 11), sub-section (*2*), for the words "Commissioners present at the meeting" be substituted the words "entire body of the Commissioners".

He said:—"If the amendment which I now propose is made, the clause will read thus:—

'The Chairman may be removed from his office by the Local Government at its discretion, and shall be removed from his office if his removal be recommended by a resolution which has been passed at a special meeting and in favour of which not less than two-thirds of the entire body of Commissioners have voted.'

"The object of this amendment is to make the provision regarding the removal of the Chairman more stringent than it at present is. Such an important matter ought not to depend upon a mere chance vote. Under section 75 (*now* 82), twelve members will form a quorum, and according to the Bill, as it now stands, it will be possible for eight members to make a recommendation for the removal of the Chairman. Referring to the Bengal Municipal Act, section 24, it will be found that the Chairman elected under the last preceding section may at any time be removed by a resolution in favour of which not less than two-thirds of the whole number of Commissioners have voted. In the Bombay Municipal Act, section 54, sub-section (*2*), we find this:—

'But he shall be forthwith removed from office by the Government if, at a meeting of the Corporation held under section 61, forty-five Commissioners have so voted."

"In the Bombay Corporation there are 72 members; therefore, there must be a vote of five-eighths of the total number. The same proportion here would give 32, which is a little less than two-thirds of 50. Similarly, if we look to the Madras Act, section 35, we find that the President may be removed by a vote of not less than three-fourths of the Commissioners who have voted, provided the majority consists of one-half the entire number. So that in Madras you require an absolute majority. Therefore, if my amendment is adopted, it will make the provisions of this Bill harmonious with the provisions of similar Acts elsewhere."

The Hon'ble MR. BAKER said:—"This amendment to some extent took me by surprise, because it will have the effect of lessening the degree of control which the Corporation have hitherto possessed. Under section 39 of the present Act, the Chairman must be removed if a resolution is passed by two-thirds of the members actually voting at the meeting. Personally I do not wish to oppose the amendment. I understand that it will be opposed by Hon'ble Members who represent the Corporation, and I think it doubtful whether a sufficient case has been made out for making the law more stringent than it is at present."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"We, on this side of the House, entirely share the feeling of surprise and astonishment which has been given expression to by the Hon'ble Member in charge of the Bill. The amendment embodies the section in the original Bill (section 10) introduced in April, 1898, which required a vote of 50 members out of a body of 75 Commissioners, or two-thirds of the entire Corporation, before the Chairman could be removed. The matter came up before the Select Committee; we went carefully into the question, and I think we came by a unanimous vote to the modification now embodied in the Bill, and which my hon'ble friend the mover of the amendment wants to supplant and substitute in its place the original section of the Bill, viz., that two-thirds of the entire Corporation must pass a resolution in favour of the removal of the Chairman before he can be removed; and I may add that this is a contingency which will never happen. I do not think there has been any occasion in the history of the Municipality when such a thing has happened. There have been Chairmen of the Corporation who have been very unpopular; there have been Chairmen between whom and the Justices there were often fierce matters of contention; but they never could come to a resolution of this kind. This identical provision, as I have remarked, was inserted in the original Bill; it was considered by the Select Committee, and the Select Committee by a unanimous vote altered it and substituted the section which appears in the present Bill. Having regard to this circumstance, is it desirable to change the law in such a way that the provision regarding the removal of the Chairman will be to all intents and purposes a practical nullity? This is the first time, I find, when the Municipal Law of the benighted Presidency has been referred to. There are only 32 Commissioners in Madras, of whom three-fourths are elected. The constitution of the Madras Municipality has no sort of analogy or approximation to that of the Calcutta Municipality. And let the Council bear in mind that the amendment proposes to change what has been a part of the Municipal Law since 1863. Under the Act of 1863 this was the law, under the Act of 1876 this was the law, and under the Act of 1888 this is the law. What are the arguments used in favour of this amendment? The Madras Municipality has some such provision! Is that a sufficient reason? Why should we accept such a reason as this? The Hon'ble Member also referred to the Mufassal Municipal Act. Surely he does not want to drag the Municipality of the metropolis down to the status of the mufassal Municipalities? I trust there will be a unanimous vote with regard to this matter. We are legislating for some practical purpose. Let us not reduce legislation to a farce by enacting a provision of law which never will or can be enforced in practice. Let us have the semblance of reality about our legislation. I hope the Council will vote against this amendment."

The Hon'ble MR. BOLTON said:—"My surprise is not that the Hon'ble Member should have moved this amendment, but that the provision in the original Bill should have been excised by the Select Committee. The Bill does not provide for an absolute majority. It mentions two-thirds of the Commissioners *present*, and there is thus uncertainty as to what the majority may be with reference to the whole number of the Commissioners. The quorum for the Corporation meetings having been fixed at 12 Commissioners, the Chairman might be removed on a vote of only 8 members. I submit that it would be monstrous to provide absolutely for the removal of the Chairman on so small a vote. In the mufassal municipalities, of which the Hon'ble Babu Surendranath Banerjee has spoken contemptuously, the proportion required for a vote of this nature is two-thirds of the total number of Commissioners. The Hon'ble Member observes that the provision proposed by the mover of the amendment would be unworkable. Is it unworkable in a mufassal municipality? It seems to me that an absolute majority of the total number of the Commissioners should be insisted on, and not a proportion of those present at a meeting. In a matter of so delicate a nature as the removal of the Chairman, many Commissioners would be unwilling to attend and vote, and the motion might be carried by a small section hostile to him, who do not represent the true feeling of the Corporation."

The Hon'ble MR. APCAR said:—"I hope I shall also be permitted to express my surprise that this amendment has been moved, but for a very different reason. I do not suppose, if there was such a feeling against a Government officer who was the Chairman of the Corporation, that the Government would ever permit a discussion relating to him to take place at a public meeting. For my part, if this section were not included in the Bill, I should not be very much concerned, but if it is in the Bill itself, I am bound to say there is a consideration which has been lost sight of It is all very well to say that you may have a vote of such great importance passed by 8 members, but I lay stress on the circumstance that it is a vote of a most important character and must attract the attention of all the members of the Corporation; and, if there were not more than 12 present, we should know the reason of it. There would be those who if they were to come would support the motion, but they choose to absent themselves because they do not wish to openly vote against the Chairman. I am not very much impressed with the idea that this provision is taken from the Bombay Municipal Act; and, with regard to the appointment of the Chairmen of mufassal municipalities, it does not rest with the Government It does rest with the Government in Calcutta, and I am constrained to vote against my hon'ble friend, for reasons which I have stated, but at the same time I must say that I do not think this particular provision is of much importance."

The Hon'ble BABU JATRA MOHAN SEN said:—"I do not think I should give a silent vote on this subject. The Hon'ble Mr. Bolton has said that, the removal of the Chairman being a very delicate matter, many Commissioners would not attend and vote, and therefore it should be made imperative that two-thirds of the entire body of Commissioners should be required to vote for the removal of the Chairman. That, I submit, is a practical impossibility. The *agenda* paper is always circulated, and if those who wish to take an interest in the matter do not choose to attend, nobody but themselves is to blame. If they do not care to see their intention carried out, they have only to thank themselves. If I understand the rules for voting in municipal bodies rightly, votes by proxy are not allowed; and therefore if we provide that the votes of two-thirds of the entire body are necessary for the removal of the Chairman, and if they do not choose to attend, then some provision will have to be made to receive votes by proxy in this matter, which is against the existing practice. It is only just and fair that Commissioners who take an interest in the matter and who intend to vote should attend and record their votes in public at a meeting."

The Hon'ble BABU BOIKANTA NATH SEN said:—This section governs the question of the removal not only of the Chairman, but of the Vice-Chairman and the Deputy Chairman as well, although ostensibly it provides for the case of the Chairman only. The Vice Chairman and the Deputy Chairman, as I understand, share with the Chairman this liability to removal from office. With regard to other officers and servants, having regard to the scope and spirit of the Bill, it would seem that the Vice-Chairman and the Deputy Chairman are not treated as Municipal officers and servants for the purpose provided in this section. [The Hon'ble MR. BAKER:—"Not for any purpose."] This, I submit, is the only section which will govern the case of the Vice-Chairman and the Deputy Chairman; therefore, it is very desirable that the provision should be made of a practical character The apprehension entertained by the Hon'ble Mr. Bolton is, I think, of a minor character; for when a special meeting is called to consider an important matter such as is provided for in this section, there will naturally be great excitement among the Commissioners, and there need be no apprehension that a Chairman or Vice-Chairman or Deputy Chairman will be removed by a chance vote. On the contrary, I think there would be a very full attendance of Commissioners."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, in reply, said:—"I am very much surprised, Sir, at the expression of surprise all round, though I am aware Hon'ble Members are entitled to have their own views upon particular topics.

The great point of my argument was that such a serious matter as the removal of the Chairman ought not to depend upon a mere chance vote. In answer to this, one of my hon'ble friends said that, when a question like this comes up for discussion, a great many Commissioners would be sure to attend. I have never had the honour of a seat on a Municipal Board, and, therefore, I cannot speak from experience; but from what I have heard, I think the contrary would be true. In 1891, there was a question of the increase of the Chairman's salary—a proposal the fairness of which was not appreciated by many of the independent Commissioners; there was a small attendance, and the proposal was carried be a narrow majority. Your Honour's predecessor did not accept that recommendation, because no reasons had been assigned, and also because the motion had been carried at a small meeting by a narrow majority. The matter was sent back for reconsideration, the Commissioners attended in troops, and the whole thing was upset; but in the beginning the Commissioners, independent or otherwise, made themselves scarce. Therefore, I adhere to my motion upon the ground that a serious matter like this should not depend upon a mere chance vote. My hon'ble friend Babu Boikanta Nath Sen rightly said that this section applied not only to the Chairman, but also to the Vice Chairman and to the Deputy Chairman. I submit that that is the strongest reason to induce him to support my motion; the Chairman and the Deputy Chairman will ordinarily be members of the Covenanted Civil Service; the very strength of their position will be a protection against their removal; the Vice-Chairman, however, has been and is likely to continue to be an Indian non-official, and to enable him to discharge his duties with efficiency and uprightness, we ought certainly to strengthen his position; and this my amendment, if accepted, will most effectively achieve."

The Hon'ble the PRESIDENT said:—"Like the Hon'ble Member in charge of the Bill, I do not wish in any way to influence the opinion of the Council on this amendment."

The motion being put, the Council divided as follows:—

Ayes 7.	*Noes 10.*
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Babu Surendanath Banerjee.
The Hon'ble Mr. Mackenzie.	The Hon'ble Babu Boikantu Nath Sen.
The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.	The Hon'ble Mr. Apcar.
The Hon'ble Mr. Slack.	The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
The Hon'ble Mr. Handley.	The Hon'ble Mr. Spink.
The Hon'ble Mr Buckland.	The Hon'ble Babu Jatra Mohan Sen.
The Hon'ble Mr. Bolton.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Buckley.
	The Hon'ble Mr. Oldham.

So the amendment was lost.

SECTION 12.

The Hon'ble MR. APCAR moved that in section 11 (*now* 12), sub-section (*1*), after the word "by" the words "the Corporation with the approval of" be added.

He said:—"On a previous motion in an earlier part of to-day's proceedings the Hon'ble Mr. Oldham made some general observations of a personal character in which I understood him to compliment me on the moderate and temperate tone in which I criticised certain proceedings of the executive of the Municipality, and went out of his way to contrast this with the intemperate tone which he alleged against me with regard to other questions during the earlier proceedings in this Council. I ask the Hon'ble Member whether I am right in saying that he again has asserted that my conduct was intemperate on a previous occasion. [The Hon'ble MR. OLDHAM assented.] Then, Sir, I am constrained to notice the matter. I warned the Hon'ble Member on a previous occasion that while I passed by the attack then, I would not do so if it were

repeated. I avoided replying to him to-day when I was replying on the subject of my previous amendment, and I now refer to the subject to give him free opportunity of answering me, which he would not have had if I had exercised my right of reply with regard to himself before. Sir, if any person outside the Council were asked what were the relative positions of its Members—the supporters of the Government have been indulging in the classics, and I may perhaps be permitted to explain myself in the same way—he would say *omnes inter se pares.* If, however, the same person were to come here into the Council chamber, he would really think that some Members were superiors and others were their inferiors. I must tell the Hon'ble Member that I cannot admit any such idea. I before have explained, as I have understood, with the assent of Your Honour, that he was under a misapprehension in charging me with attacking the municipal executive or any individual of it, that I would not come to the Bengal Council in order to attack them, and that I had been stating facts in support of my contention, which it was open to him to challenge if inaccurate. The Hon'ble Member has chosen not to give any consideration to my disclaimer, and he takes an early opportunity of repeating a wholly unjustifiable charge against me. I cannot acquiesce in any such proceeding. I regret that what I on the previous occasion said has met with no consideration from the Hon'ble Member; it is my anxious desire to show every consideration to my colleagues, but I must ask for the same treatment from them. I cannot allow the Hon'ble Member to lecture me in this way; I do not admit him as an arbiter as to my conduct, and I do not want his certificate as to my conduct. I repeat I hope I shall be treated with the same consideration with which I desire to treat every Councillor here, but I will not submit to any as the arbiter of my conduct.

"The motion now before the Council I have already read. We have always hitherto fixed the salary of the Chairman, and I would ask that we should not depart from the old practice in a matter of such importance. There is no reason why our power should be taken away from us. We have shown no desire to refuse to increase the salary of the Chairman when we think it is called for. In Bombay the salary of the Municipal Commissioner cannot be raised until after a service of three years. We do not ask you to limit the power of the Commissioners by a provision of that nature. Here the salary of the Chairman may be raised soon after his appointment. If there is an idea that we have been found wanting in the exercise of our discretion in connection with the question of raising the salary of the Chairman, I will venture to say that the idea is not justified. My hon'ble friend referred to an instance with regard to which I have come prepared with the facts. I hold in my hand the *précis* of the proceedings of the Commissioners, which I shall read to the Council:—

'Mr. Lee was appointed Chairman with effect from 16th April, 1890, on Rs. 2,500 a month, *vice* Sir Henry Harrison, resigned. At the special general meeting of the Commissioners held on 12th February, 1891, at which the budget estimates for 1891-92 were presented, an elected Hindu Commissioner moved that the executive be instructed to enter in the draft budget for 1891-92 the salary of the Chairman at Rs. 3,000 *per mensem*. The motion was carried by 13 votes against 3, seven Commissioners having declined to vote.

'A copy of the resolution was submitted to the Local Government for approval. The Local Government in reply said that, considering the salary of the Chairman was fixed at Rs. 2,500 so short a time ago as April, and that it was then understood that the Commissioners felt strongly on the subject, the Lieutenant-Governor would have expected that some explanation of the present resolution would have been submitted, showing that either the conditions had changed or something had occurred to convince the Commissioners that the former attitude was no longer tenable. The Lieutenant-Governor was unable to accord his approval to a resolution which gave no reasons and was supported only by 13 out of 75 Commissioners at a meeting at which only 23 Commissioners were present. If it was, however, the deliberate wish of an absolute majority of the Commissioners, that is to say, not less than 38, to increase Mr. Lee's salary to Rs. 3,000, the Lieutenant-Governor had no desire to oppose such a resolution; but he must be satisfied that they had good reasons for it with which their constituents would be satisfied.

'When the question came up for reconsideration, it was recognised by none more clearly than by Mr. Lee that the financial position of the Corporation was unfavourable, and a resolution that the consideration of the question of the increase of the Chairman's salary should be postponed, and be taken up next year in connection with the budget estimates, was carried by 26 *votes against 17*.

'At a special general meeting held on the 17th December, 1891, a Hindu elected Commissioner moved that Rs. 500 a month be allowed as house-allowance to the Chairman, and the motion was carried by 21 votes against 13. The resolution was in due course forwarded for the approval of the Local Government. In reply, the Chairman was informed that in the Lieutenant-Governor's opinion the proper measure of the house-rent to be allowed to the Chairman should be, not the entire amount which he might reasonably be expected to pay for a house in Calcutta—it was parenthetically observed that even on this supposition Rs. 500 seemed to be too much—but the difference between the rent of a good house in Calcutta and the rent that an officer of the Chairman's standing would have to pay for a house in the mufassal: taking the former sum at Rs. 350 to Rs. 400 and the latter at Rs. 100 or Rs. 150 *per mensem*, it seemed to the Lieutenant-Governor that Rs. 250 a month would be a fairly liberal sum to allow the Chairman for house-rent in Calcutta; and, if on further consideration the Commissioners decided to grant this amount, the Lieutenant-Governor would be prepared to accord his approval to such a resolution.

'At a special general meeting held on the 13th January, 1893, an elected Hindu Commissioner moved that the sum of Rs. 250 a month be allowed to the Chairman as house-rent from the beginning of the current calendar year. The motion was carried and the grant of the allowance of Rs. 250 was in due course approved by the Local Government.'

"It will be seen from what I have read that as far as the Commissioners were concerned they were on their part ready to increase the salary; it was on the part of Government that objections were raised. I submit that as far as the Corporation are concerned they have never exercised their discretion arbitrarily, and if there was any hesitation in voting on that occasion, it was because Mr. Lee came very lately to the Corporation, and, as the Hon'ble Mr. Bolton knows, the Corporation were prepared to allow a salary of Rs. 3,000 a month for another officer whom they were not permitted to have, and a junior officer was given instead. In a few months it was sought to raise his salary, and many Commissioners refrained from voting. The Government would not permit the salary of that officer to be raised, and, therefore, the *onus* was not on the Commissioners. In these circumstances, and now that we are to have a remodelled Corporation, now that we have removed obstacles which were supposed to exist, we should expect something very different from what has been heretofore. I think that a matter of this kind should in all self-governing bodies be left to the body itself."

The Hon'ble Mr. Apcar also moved—

(*1*) that in section 11 (*now* 12), sub-section (*1*), after the words "*per mensem*" the words "and not being more than three thousand rupees *per mensem*" be added; and

(*2*) that in section 11 (*now 12*), sub-section (*2*), for the words "the Local Government may, if it thinks fit, direct" the words "the Corporation, with the approval of the Local Government, may, if they think fit, sanction" be substituted.

He said:—"Under section 11 (*now 12*), sub-section (*1*), there is no limit to the salary of the Chairman. It is to be in the discretion of an authority outside the Corporation to give him Rs. 3,000 or Rs. 5,000 or Rs. 10,000 a month. There is no restraint whatever, and I do not think it right that such absolute power should be given. In Bombay the minimum is Rs. 2,000 and the maximum Rs. 3,000; here we have a minimum of Rs. 2,500, with no limit as to the maximum, and we also give Rs. 500 a month as house-allowance, and if it is endeavoured to add to that a contribution for pension, it would come to a still larger sum. So that I think it is not right to leave the question so entirely open and to say that no sort of limit should be imposed. I believe that the higher appointment of a member of the Board of Revenue carries with it a pay of Rs. 4,000 a month. Under all these circumstances, I consider that a maximum limit of Rs. 3,500 a month should be sufficient, and that the salary of the Chairman should be fixed by the Corporation with the approval of the Local Government. The Corporation ought to have entire discretion in the matter."

The Hon'ble BABU SURENDRANATH BANERJEE moved—

(*1*) that before the words "Local Government" in line 3 of subsection (*1*) of section 11 (*now 12*), the words "Corporation with the sanction of the" be inserted;

(*2*) that for the words "two thousand five hundred rupees *per mensem*," at the end of sub-section (*1*) of section 11 (*now 12*), the following words be substituted:—

"two thousand five hundred rupees and not exceeding three thousand rupees *per mensem*;" and

(*3*) that for the words "Local Government," in line 3 of sub-section (*2*) of section 11 (*now 12*), the word "Corporation" be substituted.

He said:—"I desire to state briefly what the present law is, and to state also as briefly as I can the changes proposed by this Bill, and to point out that no case has been made out for these changes. The salary of the Chairman is fixed by the Corporation, subject to a minimum of Rs. 2,500 a month. That minimum was first introduced by the law of 1888. Before that, under the law of 1876 and the law of 1863, the Corporation had full, absolute and unfettered discretion in fixing the salary of the Chairman, without any reservation of any kind being made for the benefit of the officer concerned. In 1888, for the first time, a reservation was introduced, but the Corporation had still the power of fixing the salary. The Corporation fixes the salary; it grants the increments; it grants house-rent; but it cannot go beyond the maximum of Rs. 3,000, which is fixed under the existing law. It is now proposed to introduce a material modification. The Chairman will be appointed by the Government as before, but the salary will also be fixed by the Government. Increments of salary and the grant of house-rent will also be determined by the Government. The increments may be raised to any figure the Government may please. No maximum is fixed. The maximum was imposed in the original Bill, but it was withdrawn. In the Select Committee I undertook, at the instance of a Committee of the Corporation, to point out that the Corporation had always been generous in granting house-rent and increments; and that, if the Government was prepared to raise the increments to any figure it thought proper and to grant such house-rent as it liked, it would interfere very seriously with the financial independence of the Corporation. The law, which was the law to-day, has been the law since 1863, subject to the slight modification to which I have called attention. We deny that there is any justification for a change in the law. I find the following in the Statement of Objects and Reasons attached to the Bill when it was introduced by the Hon'ble Mr. Risley:—

'The Chairman of the Corporation is placed in a false position by his salary being made to depend on the good-will of the Corporation.'

"Why, Sir, it is of the greatest possible advantage to the Chairman and to the Corporation alike that he should cultivate the good-will of the members of the Corporation. On what does the efficient working of the Corporation depend? It depends on the harmony and cordiality that exist between the Chairman and the members of the Corporation. If you make the Chairman independent of the Corporation and of the good-will of the Commissioners, you place him in a false position; you withdraw from him the incentive which he now possesses of cultivating the friendship of the Commissioners. The efficiency of the Corporation depends on harmonious co-operation between the Chairman and the Commissioners. I remember a time when the Commissioners were fighting with the Chairman and the Chairman was fighting with the Commissioners; and also when the Justices were fighting with their Chairman. It was a scandal the like of which has not taken place since, and I ask whether you wish to revive the opportunities for such a scandal? It is the interest and the duty of the Chairman under the existing law to cultivate harmonious relations with the Commissioners, and you deprive him of a strong motive for doing so, by making him independent of

them. I think there is a fatality, following this Bill all through. There is a supreme disregard shown throughout of the ordinary considerations of prudence and sound sense which I should not have expected in the case of Hon'ble Members of this Council. There is a suggestion that the Commissioners have not behaved handsomely to their Chairmen. My hon'ble friend Mr. Apcar read out a statement from which it appeared that Sir Charles Elliott positively declined to confirm a vote of the Commissioners granting a sum of Rs. 500 to one of their Chairmen as house-allowance. Then in the case of Mr. Williams, Mr. Greer and Mr. Bright, the Corporation simply followed the recommendations of the Government. I was associated for a long time with the Corporation, and my associations with the several Chairmen have been of the pleasantest character; and I can say this on behalf of the Corporation, with which my connection has now been severed, that there was hardly any suggestion or expression of a wish emanating from the Government which was not treated with the utmost possible respect. All that the Government had to do in the case of Mr. Williams, Mr. Greer and Mr. Bright was to make a suggestion that they should get so much, and the Commissioners accepted the views of the Government. What, then, is the justification for withdrawing this power from the Corporation. Has there been any case of recusancy or wilful disregard of any recommendation made by the Government? On the contrary, the Commissioners have been highly deferential to the wishes of the Government. And yet, in the face of these facts, which cannot be denied, you propose to enact a provision the effect of which will be to make the Chairman independent of the Corporation, and sow the seeds of dissension, strife and discord, to the serious detriment of the business of the Corporation. I hope and trust that, having regard to these considerations—and they ought to weigh with the practical administrators whom I see around me—the Council will see its way to accept the amendments which stand in my name."

The Hon'ble Mr. Baker said :—"I am very ready to admit that the Corporation have, so far as I am aware, always treated their Chairmen in a generous and liberal spirit. I have never known any instance in which they have shown niggardliness or an ungenerous spirit in settling questions connected with the salary of the Chairman. But the present law is nevertheless bad and unsound, and I consider it wiser that, as the Government has to select the Chairman and to make the appointment, the Government should also fix his pay. The power to fix the initial pay of the Chairman must in the nature of things be exercised at a time when he is a stranger to almost all the Commissioners, and they can have no personal knowledge of his capacity and usefulness. They can have no knowledge of him, compared to what the Government has of one of its own officers for a period of 15 or 20 years. Similarly, with reference to his future increase of pay, to make the Chairman dependent upon the Commissioners must place both them and him in a more or less false position. The Hon'ble Babu Surendranath Banerjee said it was most important that the Chairman should cultivate the good-will of the Commissioners, and that the efficient working of the Corporation depends on the existence of harmony, good-will, and cordiality between the Chairman and the Commissioners. But I am sure that the Hon'ble Member never intended to suggest that the Chairman should be induced to cultivate the good-will of the Commissioners with the hope of obtaining increments to his pay. If we allow the Commissioners to fix the initial pay of the Chairman or to regulate the subsequent increases to his pay, there might be a party among the Commissioners who would favour the Chairman and a party who would be in opposition; and it is neither expedient nor politic that we should place either him or them in a position in which their personal and their public interests might be in opposition. It is true that the good feeling of the Commissioners has hitherto prevented any scandal arising, but the danger is there, though dormant. It is not an imaginary danger. The Hon'ble Mr. Turner told us in the Select Committee of an incident in the Bombay Municipality. He said that on one occasion a rumour got abroad in Bombay that the action of the Municipal Commissioner in some matter had been influenced by the fact that

be was then expecting an increase to his pay. He told us that he did not believe that there was an atom of truth in the rumour; but the mere fact that such a rumour should have been possible shows that the law is unsound. It would, I think, be unwise to wait until such a rumour arises here before we change the law.

"The present maximum salary of the Chairman is Rs. 3,000 a month. It is proposed to abolish the maximum, and to authorise the Government to fix the salary at any amount it thinks necessary from time to time. There was a strong representation made both by the Chamber of Commerce and the Trades Association that on the ground of efficiency the Chairman of the Corporation should be permanent and that he should make his career in the appointment; and they urged that it was only possible to secure that result if the Government were empowered to award to the Chairman the salary which from time to time was appropriate to his standing in the service. That argument I consider to be unanswerable. There can be no question that the tenure of the Chairman's appointment should be as prolonged as possible. The holder of the office of Chairman must certainly, for some time to come, be taken from some branch of the Government service; and, if he is to remain in that office, he must receive a salary from time to time proportionate to his standing in the service of the Government.

"There is another consideration also, which, though of minor importance, is worth mentioning. Since the passing of the Act of 1888 the relative value of the salary attached to the office of Chairman has depreciated. In the year 1893 exchange compensation allowance was sanctioned by the Government of India, but such compensation has not been received by the Chairman of the Corporation, and the effect of that disallowance has decreased the relative value of the Chairman's pay by about Rs. 150 a month. The question of the Chairman's house-rent has been referred to, along with the question of his pay. I need not dwell on it further, because the arguments in regard to it are exactly the same in nature. The arguments are not perhaps quite as strong in degree in the case of house-rent as in the case of pay, but they are precisely similar in kind. The Hon'ble Mr. Apcar said that the Corporation would have to pay the contribution on the Chairman's salary on account of leave and pension allowances. That, I beg to say, is a misapprehension. The Civil Service Regulations provide that no contribution is payable on the salary of the officer who is Chairman of the Calcutta Corporation."

The Hon'ble Mr. Mackenzie said:—"Sir, I am free to admit that as regards the past the Corporation have treated their Chairman liberally, but we are now legislating for the future, and as I consider it a wise provision that the fixing of the salary of the Chairman should be in the control of the Government I shall oppose the amendment."

The Hon'ble Mr. Bolton said:—"The proposal to leave the question of the Chairman's pay to the Corporation appears to me inconsistent with the provision of sub-section (*1*) of section 10 (*now* 11) which vests the appointment of the Chairman in the Local Government. The authority which appoints should also obviously fix the pay. If the Corporation refused to fix the pay which the Government considered necessary for the officer whom it has selected, a deadlock would arise. The Hon'ble Babu Surendranath Banerjee spoke of the desirability of establishing cordial relations between the Commissioners and their Chairman. As the Hon'ble Member in charge of the Bill has already observed, the Hon'ble Babu Surendranath Banerjee does not, it is hoped, desire to imply that the Chairman should seek to secure the good-will of the Commissioners through the expectation of receiving higher remuneration. An amendment put on so sordid a basis cannot claim support. Cordial relations should be established by reciprocal consideration and courtesy, and not by subserviency on the part of the Chairman."

The Hon'ble MR. APCAR, in reply, said:—"With reference to the remark which fell from the Hon'ble Member in charge of the Bill that an allowance of Rs. 3,500 a month is not sufficient to retain for any considerable time the services of the Chairman of the Corporation, I would point out that there is nothing to prevent a maximum being fixed by law. In the case of the high office of the Viceroy, a maximum salary is fixed, and so also in the case of other high officers of the Government, and it seems to me so very unbusiness-like, not to fix a maximum, that I think the provisions of the Bill should not be permitted to remain in their present form. If the maximum pay is required to be Rs. 4,000 a month, let it be so; but some maximum should certainly be fixed, because otherwise there might be no limit whatever to the pay which might be drawn by the Chairman of the Corporation."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"The Hon'ble Member in charge of the Bill opened his reply by admitting that the Corporation have always treated their Chairman in a generous spirit. If they have done so, then why take away this power of fixing the pay of the Chairman from the Corporation? If the treatment of the Chairman has always been such as to elicit such deserved praise from the Hon'ble Member, it stands to reason that things should be left severely alone. That seems to be the dictate of reason and sound sense. If, on the other hand, the Corporation had not treated the Chairman generously, if they had treated him in a niggardly spirit, or if, in defiance of the orders of the Government or of the spirit of those orders, the Corporation had acted in an unjust and ungenerous spirit in fixing the pay of their Chairman, then I could understand the present proposal for a change of the law. But when they have all along treated their Chairman handsomely, I submit that no case has been made out for such a change.

"The Hon'ble Mr. Bolton has observed that the Government should fix the pay of the Chairman inasmuch as it has the making of the appointment. But the Government has been making the appointment ever since 1863. Has the Government all this time been guilty of an illogicality or of an anomaly? And is the Government only now going to correct the anomaly? I think anomalies of long standing which have not worked any harm should be left alone. If there has been an anomaly, I submit that it has been consecrated by prescription and long usage.

"Then the Hon'ble Member in charge of the Bill observed that if the salary of the Chairman of the Corporation was made dependent upon the good-will of the Commissioners, there would be two parties in the Corporation. We have an emphatic, though not an elegant, expression in the English language, viz., that the proof of the pudding is in the eating of it. Have we two parties in the Corporation now? The Hon'ble Member was for some time himself a distinguished and conspicuous nominated member of the Corporation; he belonged to no party, because there were none in the Corporation. Such a calamity has never occurred; therefore this is an anticipation which is not likely to be realised.

"Then with reference to the rumour that in Bombay at one time the Municipal Commissioner was about to do something which he ought not to have done, in consequence of a proposal for increasing his pay, that I submit is a rumour which should be brushed aside as irrelevant to the issue before us. If my hon'ble friend could say that in the Calcutta Corporation it was an authenticated and well-established fact that the Chairman had done something which he ought not to have done, in the hope of getting an increase of pay from the Commissioners, that would be an argument which we should be bound to take into consideration. We in this Council have nothing to do with vague and unauthenticated rumours; and inasmuch as we have not even a rumour here, we should take it for granted that even the basis for such a rumour has never existed in connection with the working of this section in Calcutta.

"The Hon'ble Mr. Bolton has been pleased to remark that there might be a deadlock if the authority who fixes the pay of the Chairman is a different authority from the authority who makes the appointment. I again reply, as I did to the Hon'ble Member in charge of the Bill, that there has been no deadlock within the last forty years, although there were ample opportunities for it, and that therefore we should be justified in anticipating that there would not be a deadlock in the future.

"No doubt, so far as logic and sound sense are concerned, you have them in your favour when you say that the Government should fix the pay of the Chairman because the Government has better opportunities of knowing the merits and the status of the officer whom they appoint than the Corporation; but when the Government has fixed the pay of the Chairman, why should not the Commissioners fix the increments? Whether the Chairman should get an increment of pay or not is a matter which the Corporation is best able to judge. The Corporation had to deal with their Chairman from day to day; they had opportunities of judging his work, and they were distinctly in a position to know what increase of pay, if any, he deserved, and that is what the Bombay Municipal Act provides. The Bombay Government fixes the salary of the Municipal Commissioner, but when an increment was to be given, it could not be given without the consent of the Corporation, because the Bombay Act recognises the fact that the Corporation, coming as they do in daily contact with the Chairman, would be in the best position to know whether he was entitled to an increment of pay or not. I should have less objection to this provision of the Bill if the Government, having fixed the salary, gave the Corporation the right to fix the increments, because the question whether the increments were deserved or not would be more within the knowledge of the Corporation than of the Government. That would be a rational position to take up.

"I entirely sympathise with the remarks made by the Hon'ble Mr. Apcar with regard to the maximum of the Chairman's pay not being fixed in the Bill. There was a maximum fixed to the salary of every officer under the Corporation, but under this Bill there would be one officer, and only one officer, in the Corporation and in the Indian Empire who would have no maximum fixed to his pay, and whose pay might be any sum in the discretion of the Government. This, I submit, is an anomaly. Let the maximum be Rs. 3,500, or let it be even Rs. 4,000 a month. I would have no serious objection to offer; but let there be a maximum. The maximum has been withdrawn at the instance of the Chamber of Commerce. I greatly respect the wisdom of the Chamber of Commerce, but that excellent body is not infallible."

The motions were then severally put and lost.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that in section 11 (*now* 12), sub-section (*1*), line 4, after the word "rupees" be added the words "and not being more than three thousand five hundred rupees."

He said:—"I only wish to say that it seems to me not only illogical, but somewhat unreasonable, to fix a minimum for the Chairman's salary, but not the maximum. My good friend asks me, why should I presume that the Government will do something very unjust in the exercise of their discretion? Well, if you have so much confidence in the Government, why is the minimum salary of the Chairman fixed in this Bill? Why not say that the Chairman is to receive such salary as may from time to time be fixed by the Local Government? But I venture to think that, as you have a minimum salary laid down, you should also fix the maximum salary to be paid to the Chairman."

The Hon'ble Mr Baker said:—"I do not think there would be much practical inconvenience in fixing the maximum salary of the Chairman at Rs. 3,500 a month, because I think that for a long time to come at least no higher salary will ever be given. I admit that the Hon'ble Mover of the amendment scores

a point logically when he says that, if you have no maximum salary fixed, there ought to be no minimum. But the reason for fixing a minimum salary is historical. It was introduced in 1888. Before that time the pay of the Chairman was entirely left to the Corporation, but in 1888 both a minimum and a maximum were fixed to prevent the Corporation from hampering the Government in making the appointment by fixing a lower salary than that which was appropriate to the position and the status of the officer selected. Although it is very unlikely that a higher salary than Rs. 3,500 a month would be given to the Chairman of the Corporation, yet I do know of one officer who did receive as much as Rs. 4,165 a month, and that was Mr. Sidney Wauchope; and I apprehend that many members of the Corporation would have been glad to give Sir Henry Harrison an even higher salary to induce him to remain on as Chairman of the Corporation."

The Hon'ble MR. OLDHAM said:—"Sir Henry Harrison did actually receive Rs. 4,000 a month at the close of his service as Chairman of the Corporation, because the Corporation were anxious to retain his services for some time longer."

The motion was then put and lost.

The Hon'ble Mr. Apcar's second amendment of section 11 (*now* 12), sub-section (*1*), having been lost, the following amendment, of which the Hon'ble RAJA RANAJIT SINHA BAHADUR of Nashipur had given notice, viz., that the words "more than three thousand nor" be inserted after the words "not being," in line 3 of section 11 (*now* 12), was not put.

The Hon'ble MR. BAKER, with the permission of the Hon'ble the President, moved that the words "not being less than two thousand five hundred rupees *per mensem*" be omitted from section 11 (*now* 12), sub-section (*1*).

The motion was put and agreed to.

SECTION 13.

The Hon'ble MR. APCAR, by leave of the Council, withdrew the motion, standing in his name, that section 23 (*now* 13), sub-section (*1*), be omitted.

The Hon'ble BABU SURENDRANATH BANERJEE moved that sub-section (*2*) of section 23 (*now* 13 be omitted.

The Hon'ble MR. APCAR moved that in section 23 (*now* 13), sub-section (*2*), for the words "the Chairman" the words "any one of the municipal authorities" be substituted, and that for the words "Local Government" the words "Advocate-General of Bengal" be substituted.

The Hon'ble BABU SURENDRANATH BANERJEE also moved that for the words "the Chairman shall refer the matter to the Local Government, whose decision shall be final," in lines 3 and 4 of sub-section (*2*) of section 23 (*now* 13), the following be substituted:—

"the Corporation shall take such action as they may deem fit."

The Hon'ble BABU SURENDRANATH BANERJEE also moved that for the words "the Chairman shall refer the matter to the Local Government, whose decision shall be final," in lines 3 and 4 of sub-section (*2*) of section 23 (*now* 13), the following be substituted:—

"the Chairman shall refer the matter to the Advocate-General of Bengal for the time being, whose decision shall be final."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"The object of my first amendment is to omit sub-section (*2*). I find that section 23 (*now* 13) of this Bill is exactly the same as section 64 of the Bombay Act, with the exception of

sub-section (2), which I want to be omitted. What I contend for is this: that in the Bombay Act there is no provision such as we have in sub-section (2) of section 23 (*now* 13). The sub-section provides that in case of a difference of opinion the matter shall be referred to the Local Government, and the decision of the Local Government shall be final. They have not felt any necessity for such a provision in the Bombay Act. Why should there be such a provision in our Act? If there is a difference of opinion, the matter should be referred to the Advocate-General, who would be in a position to give an opinion which ought to commend itself to all the authorities concerned. We do that now. If a doubt arises with regard to the legality of any proceeding or the exercise of any function, and there is no provision of law on the subject, or only a doubtful provision, we send the question up to the Advocate-General, and there is an end of the matter. I will give a concrete instance: there was a very important matter with reference to the power of the Commissioners to interfere with any appointment carrying a salary of Rs. 200 a month or under. All such appointments are made by the Chairman. Some Commissioners raised the question whether, having regard to the general powers of revision which the Corporation possessed, it was not open to them to enquire into and, if necessary, to cancel or modify an order of the Chairman suspending or dismissing any such officer. The matter was referred to the Advocate-General, and everybody was satisfied with his opinion. I submit it is a very plain and simple issue which I raise, and I hope this amendment will be accepted."

The Hon'ble Mr. Baker said:—"I cannot agree to either of these amendments. It may be convenient and even necessary to have some means of readily deciding as to the authority which is to exercise particular functions. We have done our best to indicate in every case the authority by which a function is to be exercised, and I do not know of any case in which this has not been done. But the Bill has 668 sections, and is a very intricate one, and it is possible that we have not provided for every case. It is therefore necessary to prescribe the way in which any doubt or difficulty which may arise is to be settled. The suggestion has been made that in such a case the matter should be referred for the opinion of the Advocate-General. It is unfortunate that the Advocate General is not here, for I think he would have objected to such a proposal very strenuously. The sole question for decision is the particular municipal authority to which it was the intention of the Government to delegate its power in respect of the function under consideration. That is a question upon which the Government is the best possible authority to give a definite opinion. If in determining any such matter a question of law is found to arise, the Government is able to consult its own legal advisers; but for the most part these are administrative questions, and it is only right and proper that they should be decided by the Head of the Administration."

The Hon'ble Mr. Apcar said:—"If a speedy means of ascertaining such matters is necessary, which there is no doubt it is, and as the Government is often in Darjeeling, delays must occur. But the Advocate-General is on the spot, and it will be easy to refer to him. The Chairman or the Secretary to the Corporation can go to the Advocate General, and obtain a decision in five minutes. The Local Government may be at Darjeeling, and if a reference is required to the Advocate-General, there may be delay. It does not follow that because the Government has a certain intention with regard to the particular authority by which a certain function should be exercised, they are the best judges of the interpretation of the law as expressed in an Act. There is no question that if the question is referred to the Advocate-General, it will be speedily and satisfactorily decided."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"My hon'ble friend the Member in charge of the Bill has remarked that what has to be determined is the intention of the Government to delegate any particular function to any particular authority. But the question is how is such intention to be determined? It must be determined by the wording of the law. My

hon'ble friend may be translated to a higher office; his successor may not be possessed of the same advantages as the Hon'ble Member as to the intentions of the Government, and he will necessarily fall back upon the interpretation of the law as conveyed by the words of the law; and when the intention is to be inferred from the construction of a statute, a lawyer is always the best person to furnish the interpretation. In the great sedition case which recently occurred in Bombay, it was held that any statement regarding the intention of the Legislature to be derived from the discussions in Council was absolutely irrelevant. What the Judge and the jury have to go upon is the clear meaning of the words before them. I do not think we ought to allow ourselves to be entangled in the meshes of a legal interpretation which seeks to unravel the intention of the Legislature. We ought to take the plain meaning of the words, and the fittest person to interpret the meaning of the words in the law is a trained lawyer like the Advocate-General; and, the Advocate-General being the head of the legal profession here, he is the person who ought to be consulted."

The motions were then severally put and lost.

The Hon'ble THE PRESIDENT ruled the following motion, standing in the name of the Hon'ble Babu Jatra Mohan Sen, to be out of order:—

"that at end of sub-section (3) of section 23 (*now* 13), the words 'and they (the Corporation) shall have a general power of control over, and power to revise the proceedings of, the General Committee, the Chairman, the Vice-Chairman, the Deputy Chairman, and other officers and their delegates' be added."

The Hon'ble BABU JATRA MOHAN SEN withdrew the following motion, standing in his name:—

"that in section 23 (*now* 13), sub-section (3), the words 'except as is in this Act otherwise expressly provided' be omitted."

The Hon'ble Babu Surendranath Banerjee's motion that section 23 (*now* 13), sub-section (2), be omitted having been lost, the Hon'ble BABU JATRA MOHAN SEN withdrew the similar motion standing in his name.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 23 (*now* 13), sub-section (2), line 1, for "doubt" be substituted "dispute".

The Hon'ble DR ASUTOSH MUKHOPADHYAYA also moved that in section 23 (*now* 13), sub-section (2), line 4, all words beginning with "Local Government" be omitted and the following substituted:—

"Corporation for decision.

(2a) An appeal shall lie to the Local Government from the decision of the Corporation, and the decision upon such appeal shall be final."

He said:—"My reason for these amendments, shortly stated, is this. I must confess that the word 'doubt' does not seem to me to be very clear or appropriate. Suppose a new Chairman has a doubt in his mind as to what particular authority has jurisdiction in a particular matter. If he has such a doubt, it will be obligatory for him to refer the matter to the Local Government. Suppose he has a doubt whether he or the General Committee should exercise a particular function: he cannot refer it to the General Committee, and apparently the Local Government has to decide without consulting that body or the Corporation. I think the better course will be to substitute the word 'dispute' for the word 'doubt'. That implies that the matter has gone beyond the stage of a mere doubt. And, when a dispute is raised, I propose that the question should go before the Corporation in the first instance, where it will be discussed and decided in the presence of the Chairman as well as the members of the General Committee, and an appeal will lie to the Local Government from such decision."

The Hon'ble MR. BAKER said:—"I regret I cannot accept either of these amendments. As regards the first, the substitution of 'dispute' for 'doubt', it is partly a matter of drafting. The word 'doubt' is wider than 'dispute', and includes it, and it would not be wise to wait until an actual dispute occurred between two municipal authorities. Moreover, there may be no dispute, because both the municipal authorities may agree that the matter is doubtful; and therefore I think the word 'doubt' is better than 'dispute'. As to the other part of the amendment, that the question should be laid before the Corporation in the first instance and that an appeal shall lie from the Corporation to the Local Government, I cannot accept it. The most frequent doubt is likely to be whether any particular function pertains to the Corporation on the one hand, or to the General Committee or the Chairman on the other: and it would be quite improper to allow the Corporation to be the judge in its own cause. Therefore, I think the Chairman ought to refer the matter at once to the Local Government; and I need hardly say that the Chairman will never be likely to do so, nor will the Government be likely to decide it, before hearing what is to be said on the other side."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, in reply, said:—"It seems to me to be opposed to the true principles of justice that a matter should be referred to the Local Government without a preliminary discussion by the municipal authorities. Suppose a member of the General Committee has some doubt, it will be obligatory on the Chairman to send the matter to the Local Government. If a member of the Corporation has some doubt, it will also be equally obligatory. I do not think the Local Government should be troubled with such matters until they have first been discussed in the Corporation."

The motions were then severally put and lost.

SECTION 14.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the word "alteration" be inserted between the words "construction" and "maintenance" in line 1 of clause (*ii*) of section 23A (*now* 14).

He said:—"This is a very small amendment, and I think the Hon'ble Member in charge of the Bill is prepared to accept it. Clause (*ii*) of section 23A (*now* 14) lays down the details of the duties of the Corporation, and by this clause it will be in their discretion to provide for the "construction, maintenance and adornment of public halls," &c. I have in my mind the case of the Town Hall, to which we might make alterations; and I, therefore, move this amendment."

The motion was put and agreed to.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, by leave of the Council, withdrew the motion standing in his name that in section 23A (*now* 14), clause (*vii*), the words "primary and technical" be omitted.

He said:—"Having regard to the decision to which the Council have already come upon the question of allowing the University to send a representative on the Corporation, I do not think any practical good can result from this amendment."

SECTION 15.

The Hon'ble THE PRESIDENT ruled the following motion, standing in the name of the Hon'ble Mr. Apcar, to be out of order:—

that in section 24 (*now* 15), after the word "Act" in line 6, the words "and subject to the general supervision and control of the Corporation" be inserted.

SECTION 16.

The Hon'ble MR. BAKER moved that the following section be inserted, namely:—

"24A (*now* 16). (*1*) In any case in which it is provided by or under this Act that the Chairman may take action subject to the approval, sanction, consent or concurrence of the General Committee, such Committee may, by resolution in writing, authorise him to take such action in anticipation of their approval, sanction, consent or concurrence, as the case may be, subject to such conditions (if any) as may be specified in such resolution.

Power of General Committee to authorise the Chairman to take action in anticipation of their approval, sanction, consent or concurrence.

(*2*) Whenever the Chairman, in pursuance of any such resolution, takes any action in anticipation of the approval, sanction, consent or concurrence of the General Committee, he shall forthwith inform the Committee of the fact."

He said:—"I will briefly explain the object of this amendment. In a number of sections of the Bill we have enacted that the Chairman may take certain action subject to the approval or sanction of the General Committee, and in others we have provided that the Chairman may take action subject to the previous sanction of the General Committee. In reference to the latter class of cases, in which previous sanction is required, I do not propose to make any alteration. The condition as to previous sanction was inserted deliberately, and I do not seek to qualify or restrict it. But with regard to the other class of cases, in which it is not laid down whether the sanction should be previous or not, it seems proper that the General Committee should have power to decide in which cases previous sanction is necessary and in which previous sanction is not necessary. It may frequently happen that delay in obtaining the sanction of the General Committee might be the occasion of serious inconvenience to the public. I will give one or two illustrations Section 269A (*now* 290) authorises the Chairman, with the consent of the General Committee, to carry a drain through or across a street, or to construct a new drain in place of an old one. A work of that kind might be a matter of extreme urgency. A road might be broken up, and, if previous sanction were required, it might be necessary to wait for a week to obtain the sanction of the General Committee. Then, again, under section 279A (*now* 296), the Chairman may, with the consent of the General Committee, close any connection of a house drain which has been made in contravention of the law. A connection of that kind, if improperly made, might be a source of great danger to the public, and it would be impossible for the Chairman to wait for sanction before closing such connection I will give one more illustration. By section 463 (*now* 434) the Chairman may, with the sanction of the General Committee, prescribe the route by which carts or other receptacles employed for the removal of sewage should travel. It might be necessary to change the route all of a sudden, and it might be impracticable to wait for the sanction of the General Committee. These examples will show the kind of cases which the new section, which I propose to introduce, contemplates. In all such cases it would be the duty of the Chairman to take immediate action, whatever the law might be. It would be his duty even to violate the law if the previous sanction of the General Committee is required. But it is not right that the Chairman should be forced to break the law in order to do his duty. We should therefore empower the Chairman to act without the previous sanction of the Committee in those classes of cases in which it may be absolutely necessary for him to act in anticipation of sanction, subject to his subsequently reporting the facts to the Committee."

The Hon'ble MR. APCAR said:—"We were warned when this Bill was introduced that one of the reasons for its introduction was the very fluid state of the law with regard to the functions of the executive; and here, although this Bill has been before the Council for many months, this proposal has not been brought forward during that time, but has to-day for the first time been brought forward here. It is said that in certain cases it will be harmful if there is any delay. There was no such difficulty anticipated when this Bill was introduced. The difficulty, I submit, may be met in this way. The Chairman may have

his own special functions in these very matters, and there might be an appeal to the General Committee; but under this section the General Committee may altogether give up all their functions and delegate them to the Chairman. I do not think it is the intention of the Act that, when the functions of the General Committee are defined, they may get rid of them and give them to the Chairman. It will depend entirely on the General Committee to say whether they will perform any of their functions at all, or whether they will abide by the decision of the Chairman and simply endorse what is done by him. Under these circumstances, I think such a provision very harmful, for it seems to me to nullify the provisions of the Act. Why not abolish the Corporation altogether, and make it a department of the Government?"

The Hon'ble Babu Surendanath Banerjee said:—"I must join in the protest of my hon'ble friend against the passing of this new section. The ground for its introduction is that the delay in obtaining the sanction of the General Committee might in some cases cause serious inconvenience. But we have the fact that the General Committee will meet once a week, and, if necessary, it might meet twice a week or even oftener. My great objection to the proposal of the Hon'ble Member in charge of the Bill is this: I am in strong sympathy with the executive in doing their duty, but I as strongly object to the delegation of powers to unscrupulous underlings who are likely to exercise them in a manner highly oppressive to the poor, who would not be in a position to protect themselves. I will take, as an instance, the power to cut off any connection made in contravention of the law. Who is to decide whether the connection has been made in contravention of the law? I suppose an underling will decide it; and he will decide according to the amount of the fees he may get. If he finds it to his advantage to decide that there has been a contravention of the law, we know what his decision will be. I speak as a householder; I speak as one who is in touch and sympathy with householders, and I may say this, that when I read this new section, I consulted several friends who were lately leading members of the Corporation, but whose services are now lost to the Corporation, and it is their desire that I should as strongly as I possibly can oppose this provision. It may be necessary on occasions, but the good expected from it will far outweigh the evil which is sure to follow Therefore, having regard to these circumstances, I hope my hon'ble friend will see his way to drop this section altogether. It will be difficult for the General Committee to have all the circumstances before them; they could not possibly anticipate the whole situation. The Chairman will delegate the power to his subordinates, who are not always men of principle and honour, and they will work this provision to their own advantage. I think we have given sufficient powers for purposes of sanitation; and such a dangerous power as is now asked for is not needed. It is bound to be attended with oppression, and it is because it will lead to such a result that I earnestly appeal to the Council not to accept this motion."

The Hon'ble Mr. Baker, in reply, said:—"The Hon'ble Member who has just spoken has drawn a very vivid picture of the evils he anticipates at the hands of the underlings of the Corporation if this section is passed into law. But I think he has overlooked the fact, and so also have the friends whom he consulted, that under the present Act the Chairman can exercise all the powers of the Commissioners except those which are expressly reserved for exercise by the Commissioners in meeting. Every one of these powers which it is now proposed that the Chairman may exercise in anticipation of the General Committee's approval, the Chairman does actually exercise now. My hon'ble friend says that under the present Act the actions of the Chairman are subject to the supervision of the Corporation. That is so; but that supervision is exercised subsequently to the action taken by the Chairman. He is not required to obtain their previous approval. Under this provision it will be only in those cases in which the General Committee think fit to authorise the Chairman to act without their previous sanction, that he will be able to do so, and it will be for the sole purpose of avoiding public inconvenience."

The motion was then put and agreed to.

SECTION 17.

The Hon'ble MR. APCAR moved that in line 5 of the proviso to section 25 (*now* 17), sub-section (*3*), after the word "forthwith", the words "if such documents have then been for a clear week before the General Committee and for a like period before the Corporation" be inserted.

He said:—"The object of my amendment in inserting these words is to allow an opportunity to the Corporation to discuss the annual report, because from my own experience I know the long delay there is in the presentation of these reports. It is one of the points on which the Corporation has insisted very strongly, and it has impressed upon the Chairman the necessity for the presentation of this report in proper time. The Government, too, has been very severe in their censure at its delay. There is nothing in the law to prevent the Administration Report being presented a day before the last day when the period for its presentation expires, and that will allow no opportunity to members of the Corporation to look through the report or to state anything in reference to matters which require review or comment; and this amendment is intended to give an opportunity of this being done. I think, therefore, it is necessary to have these words inserted. It is simply to give the Corporation, and the General Committee as well, the opportunity to consider the report, which I think is reasonable."

The Hon'ble MR. BAKER, with the permission of the President, moved by way of amendment that the following proviso be added to sub-section (*3*) of section 25 (*now* 17):—

"Provided further that such documents shall not be forwarded to the Local Government until they have been for seven clear days before the General Committee and for a like period before the Corporation."

The Hon'ble MR. APCAR, by leave of the Council, withdrew his motion.

The Hon'ble MR. BAKER's amendment was then put and agreed to.

The last-mentioned amendment having been carried, the Hon'ble DR. ASUTOSH MUKHOPADHYAYA, by leave of the Council, withdrew the following motions standing in his name:—

(1) that in section 25 (*now* 17), sub-section (*1*), line 2, after the word "April" be added "but not later than the 31st day of May"; and

(2) that the proviso to sub-section (*3*) of section 25 (*now* 17) be omitted.

SECTION 18.

The Hon'ble MR. APCAR moved that in section 26 (*now* 18), sub-section (*1*), proviso (*d*), the words "between sunset and sunrise" be omitted.

He said:—"There is great importance, to my mind, in the circumstance that, when an entry is permitted into any house by any subordinate of the Municipality, the name of the officer should appear. It is considered by the framers of the Bill that it is sufficient for the name of the particular officer to be inserted only if the entry is made between sunset and sunrise. I say that these words should be eliminated. It is always an important question as to who the officer is, and it will be wise to enter the name of the officer, whoever he may be, when he is given the power to enter a house, in order to fix the officer whose action may be complained against."

The Hon'ble MR. BAKER said:—"I am very strongly opposed to this amendment, as I think it will be the cause of a great amount of delay and trouble and annoyance. There are various sections under which the Chairman has the power to enter premises for various purposes. Under section 189 (*now* 196) he has the power to enter any stable or coach-house to ascertain the number of horses and of carriages kept in it; then again under section 253 (*now* 261) he has the power to enter a house to inspect the water-pipes and

water-fittings, and to see whether they are in proper order; under section 293 (*now* 317) he can enter a house to inspect the house-drains and privies, to see that the connections are in proper order; under section 391C (*now* 382) he can enter a house which is under construction in order to see whether the provisions of the Building Regulations have been adhered to. It is not intended that the Chairman should perform all those duties with his own hands, but that he should delegate them to the appropriate members of the municipal establishment, and, ordinarily, all these inspections will be made by them. The amendment of the Hon'ble Mr. Apcar will have this effect that whenever any person is deputed to enter a house for any of these purposes, either to see the number of horses kept in a stable or to examine the drainage connections, or to see that the Building Regulations are being observed, it will be necessary for the Chairman to record an order in which the officer's name must be entered. Whenever one of these officers is changed, or whenever any one of them goes on leave, and another is appointed to act for him, it will be necessary for a fresh order to be recorded. That will give rise to a great deal of trouble, and give an opportunity, possibly, to raise purely technical objections as to the legality of the inspection which may be made. I think the proper principle to follow is that there should be a special order containing the name of the officer deputed only when the entry is to be made at night. When the entry is made in the ordinary course of business by day, it will be sufficient for the order to contain the designation of the officer empowered to make the entry."

His Honour THE PRESIDENT said:—"Will the Hon'ble the Mover of the amendment withdraw his amendment?"

The Hon'ble MR. APCAR said:—"I wish it put to the vote. I think it necessary that the name of the officer should be entered in all cases."

The motion was then put and lost.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the words "conferred by section 59 (*now* 65)" at the end of proviso (*b*) to section 26 (*now* 18) be omitted.

He said:—"This is in the nature of an enquiry. I do not see any power of delegation under section 59 (*now* 65)."

The Hon'ble MR. BOLTON said:—"I also see no delegation given under section 59 (*now* 65)."

The Hon'ble MR. BAKER said:—"I did not at first understand what was meant, but on consulting the learned Assistant Secretary, who is an accomplished draftsman, I was told that the words referred to relate to the Chairman's power to appoint."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"As the matter appears to be so doubtful, and as both the Hon'ble Members who have spoken were in doubt, I think the point ought to be cleared up."

The Hon'ble MR. BAKER said:—"As the Act will be construed by lawyers, I think it is better to leave it as it is. I do not attach much importance to it. As a matter of drafting, the Secretary prefers to leave the words in."

The motion was then put and lost.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 26 (*now* 18), line 3, after the word "officer" be added "appointed under section 28A (*now* 25), section 28B (*now* 26), or section 57 (*now* 63), clause (*a*)."

He said:—"I confess I am not in favour of an unlimited power of delegation of authority being vested in the Chairman; and the object of this amendment, therefore, is to enable the Chairman to delegate his authority only to the superior officers of the Corporation. I ask the Council to accept this amendment on the ground that the Chairman ought not to delegate his powers, except to the officers named in the sections referred to. It has often been said that the justification for vesting so much power in the Chairman is that he is an officer of high rank and character and of great experience; but if you

leave it open to the Chairman to delegate his power under this Bill to any municipal officer he thinks fit, the advantages of that guarantee will vanish. You will have no guarantee that the same qualifications and judgment and the same uprightness will be found also in the officer to whom these powers will be delegated. If it were true that the powers vested in the Chairman are purely ministerial, that is, if the exercise thereof did not involve discretion and confidence, then there would be no objection whatever to allow him to delegate such powers; but it seems to me that, having regard to the very large powers conferred upon the Chairman, it would not be safe to allow him to delegate those powers to any and every municipal officer. I am prepared to be told that my amendment will be very inconvenient. But if there is a limited delegation, you have every chance of the delegated authority being exercised skilfully and without oppression; and as the officers to whom I have referred are many and represent almost all departments of the Municipality, I do not think any inconvenience would be caused if the delegation of the Chairman's powers is confined to these officers."

The Hon'ble Mr. Baker said:—"I am not going to say that the amendment is inconvenient. I am going much further than that. I am going to say that it is absolutely impossible, and that it would bring the whole work of the Municipality to a standstill in 24 hours. My hon'ble friend, the mover of the amendment, has not realised the effect of it, or I am certain he would not have moved it. The effect of the amendment would be to prevent the Chairman from delegating any of his powers except to the Vice-Chairman, the Deputy Chairman, and the eight heads of departments mentioned in section 57 (*now* 63). In the first place, the Vice-Chairman and Deputy Chairman are not municipal officers at all. They hold a status intermediate between municipal officers and the Chairman, and, therefore, the form of the amendment in respect of them is incorrect. But that is a matter upon which I lay no stress. The Bill imposes a very great number of powers and duties, nominally upon the Chairman, not with the intention that he should perform all these duties with his own hands, which is manifestly impossible, but with the intention that in each case he should delegate them to the appropriate member of the municipal establishment to carry out. By section 253 (*now* 261) the Chairman is empowered to enter any premises for the purpose of examining pipes, taps, and other water-fittings. It is not intended that he should examine every house himself and see that these things are in proper order, or that the Engineer should go and examine these things. What it means is that they are to be inspected by the Water-works Inspectors, of whom there are a certain number and whose business it is to go to the houses and make an examination under the supervision of the Engineer and the Chairman. Similarly, under section 293 (*now* 317), the Chairman is empowered to examine house-drains to see that they are in proper order. This work is actually done by the Drainage Inspectors under the supervision of the Engineer. I could give a number of instances to explain further what I mean, but it is unnecessary to do so. If this amendment is carried, the actual work of inspecting and examining some 20,000 water-connections, 5,000 connected and 50,000 unconnected privies, would have to be carried out by the Chairman himself. I need say nothing more to show how impracticable the amendment is."

The Hon'ble Mr. Buckley said:—"I wish to add one word to what the Hon'ble Member in charge of the Bill has said. To my mind the object which these gentlemen have in view in refusing to delegate this authority will defeat their purpose. As the Hon'ble Mr. Baker has pointed out, there are a number of duties to be performed by these officers. In connection with these duties there are a number of detailed rules, and it is physically impossible that the Engineer, who has to deal with all these things, can inspect more than a small fraction of them. I believe myself that one great reason why so much bribery and corruption exists amongst the lower subordinates of the Municipality is that very fact that some one specified authority has not the power to deal with these matters. I have had considerable experience in my dealings with large irrigation works, where a number of petty officers have to exercise large powers concerned with the doling out of water to cultivators.

who are always ready and willing to pay a great deal to get more than they are entitled to get. The system which we have there is one which, I think, is wanted here, and which will in a very great degree check the corruption and bribery which, I believe, goes on more or less in the Municipality. We have, in every sub-division, an officer getting very much less than Rs. 1,000 a month who has absolute authority up to a certain point. On certain days of every week cultivators can come to him personally and state their grievances, and he passes orders personally in each case. If you have officers, of the standing of the men I have referred to, with definite powers in certain matters, I believe they would do a great deal to check the enormous inflictions upon the people here which are said to be practised. It was stated in the Select Committee that it is no uncommon thing for applicants to pay as much as Rs. 20 for permission to erect privies. I believe the motion now before the Council will have the very worst effect, and entirely defeat the object of the proposal."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"My advice to my hon'ble friend will be to withdraw this amendment, because I feel the force of the remarks which have been addressed to the Council by the Hon'ble Member in charge of the Bill and by the Hon'ble Member who has just spoken."

The amendment was then, by leave of the Council, withdrawn.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA also moved that in section 26 (*now* 18), proviso (*b*), line 4, after "employé" for the comma be substituted a semi-colon and for "or" be substituted "nor shall the Chairman delegate to any municipal officer."

He said:—"I hope this amendment is not open to the objection of impracticability. As I understand this proviso, it means that the delegation of power to a particular officer includes the power of fining, reducing, suspending or dismissing his immediate subordinates; and the object of my amendment is to make the Chairman the sole authority in the Corporation to fine, reduce, suspend, or dismiss an employé. No doubt it will be said that this is illogical, and that the same authority which appoints a particular officer should also have the authority to dismiss him. That may be good logic, but it seems to me that things would work better if the Chairman had final authority in this matter. I submit there is a good deal of difference between appointing an officer and dismissing him under delegated authority. If he has been improperly appointed and does not do his work satisfactorily, he may be turned out, but if he has been unjustly turned out, then he has no remedy; besides it may often happen that the man who has appointed him under delegated authority is his immediate superior, and he may not be in a position to form an impartial opinion upon the conduct of the man he has appointed. I admit that in the first instance action will have to be taken upon the report of the immediate superior, but the final decision in the matter ought to rest with the Chairman. I do not make any secret of the fact that I have greater confidence in the judgment and uprightness of the Chairman than in those of any inferior authority."

The Hon'ble MR. BAKER said:—"I think that the principle that the power to appoint an officer or servant, carries with it the power to punish, is not only good logic, but is also eminently practical. The effect of this amendment, if carried, will be that if any municipal servant, however low his rank, even if he be a menial, absents himself from his duties, or commits a small offence, it would be impossible for the head of the department to fine or dismiss him, and it would be necessary for him to refer the matter for the orders of the Chairman. I cannot see that there will be any advantage in adopting this amendment, either in the interests of the servant or the administration. The hon'ble mover of the amendment admitted that, in the first instance, the Chairman would have to act upon the written report of the officer or superior servant. That is one of the objections I have to the amendment. If the power of fining or suspending or dismissing is delegated along with the power of appointing, then an appeal can be allowed to the Chairman quite independently. But if you insist that the Chairman shall actually pass orders in every case of the infliction of punishment, then you take away the whole power of appeal, because the Chairman, not knowing the facts, will have to depend upon the report of the head of the department."

The Hon'ble Babu Surendranath Banerjee said:—"I wish to say one word in support of the amendment of my hon'ble friend. The amendment embodies the existing practice; that is to say, orders for fining, suspending and dismissing subordinate officers and menials are passed by the Chairman on the report of the departmental head. I do not think that practice has been attended with inconvenience. On the other hand, I do not know that any complaint has ever been made, and the system has worked satisfactorily. I quite admit that, if the immediate head of the department had the power to suspend, there should be an appeal to the Chairman. But what is the value of an appeal in most cases in this country? There is a feeling, an *esprit de corps*, running through all ranks of the service which induces a superior to support his subordinate. It is, therefore, as well that the full responsibility of an order of dismissal or fine should rest with the Chairman. This is the existing practice, and it has worked well."

The Hon'ble Mr. Oldham said:—"I remember that my hon'ble friend Babu Surendranath Banerjee took the same objection in Select Committee, and used the same arguments there, and I thought we had been able to explain the matter to him there. When he says that in this country the appellate authority as a formal matter declines to interfere, that applies to the fourth or fifth stage of an appeal. That is the order of the final revisional authority after the appeal has passed through the gauntlet of two or three appellate authorities. He is mistaken in thinking that in every case it would be possible to deal with an appeal in that way. An appeal must be heard by one authority, and probably also by a second authority. It is only the final authority that may use the formula of rejection: certainly not the second authority. Therefore I from my own experience in such matters fully concur with the objection taken by the Hon'ble Member in charge of the Bill. I think the provisions of the Bill, as they stand, are very much more in favour of subordinate officers, who will have a very much more favourable chance if their cases can be heard by the Chairman in appeal than if they are finally punished in the first instance by the Chairman acting on departmental reports."

The Hon'ble Dr. Asutosh Mukhopadhyaya, in reply, said:—"It strikes me that on Saturday last we started with a very unsound principle. We were told that there are to be three co-ordinate authorities. That is a rosy myth. It now appears that there are a hundred co-ordinate authorities, namely, the Corporation, the General Committee, the Chairman and the numerous band of his subordinates. You justify this by alleging that it is impracticable for the Chairman to do all that the law requires him to do, and that he must necessarily delegate his powers; but what guarantee is there that he will exercise any effective control over his subordinates? You practically abandon the principle of three co-ordinate authorities."

The motion was then put and lost.

The Hon'ble Babu Jatra Mohan Sen, in the absence of the Hon'ble Raja Ranajit Sinha Bahadur of Nashipur, moved, on behalf of the latter, that the words "with the approval of the General Committee" be inserted after the words "The Chairman may" in sub-section (*1*) of section 26 (*now* 18).

The Hon'ble Mr. Baker said:—"I cannot agree to this amendment. I think it is quite wrong in principle. The Chairman is a co-ordinate authority, and he is empowered to delegate powers in respect of which he has independent authority; and, in respect of powers in regard to which he is independent, it is not right that his powers of delegation should be subject to the control of any of the other co-ordinate authorities."

The motion was put and lost.

The Council was then adjourned to Tuesday, the 12th September, 1899.

Calcutta;

The 16th January, 1900.

F. G. WIGLEY,

Assistant Secy. to the Govt. of Bengal,

Legislative Dept.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

The Council met in the Council Chamber on Tuesday, the 12th September. 1899.

Present:

The Hon'ble Sir John Woodburn, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.
The Hon'ble Mr. W. B. Oldham, C.I.E.
The Hon'ble Mr. R. B. Buckley.
The Hon'ble Mr. C. W. Bolton, C.S.I.
The Hon'ble Mr. E. N. Baker.
The Hon'ble Rai Durga Gati Banerjea, Bahadur, C.I.E.
The Hon'ble Mr. C. E. Buckland, C.I.E.
The Hon'ble Mr. F. F. Handley.
The Hon'ble Mr. F. A. Slack.
The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
The Hon'ble Babu Jatra Mohan Sen.
The Hon'ble Mr. T. W. Spink.
The Hon'ble Sahibzada Mahomed Bakhtyar Shah, C.I.E.
The Hon'ble Mr. D. F. Mackenzie.
The Hon'ble Mr. J. G. Apcar.
The Hon'ble Dr. Asutosh Mukhopadhyaya, M.A., D.L., F.R.A.S., F.R.S.E.
The Hon'ble Babu Boikanta Nath Sen.
The Hon'ble Babu Surendranath Banerjee.

THE CALCUTTA MUNICIPAL BILL.

SECTIONS 21 TO 24.

The Hon'ble THE PRESIDENT said:—"We now come to item No. 83 on the *agenda*."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I have the honour to move the amendments which stand against my name, and I think, Sir, it would be as well to take all these amendments together, so that there might be one speech upon them. I just wish to make one correction."

The Hon'ble THE PRESIDENT said:—"Will the Hon'ble Member explain to the Council which amendments he refers to."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"The numbers are 83, 84, 85, 86, 87, 88, 92, 93 and 94. I just want to make one correction, with Your Honour's permission. It may be my mistake or the printer's, but there is a mistake. In item 85 we have section 459. There is no such section in the Bill—it ought to be section 459A, and the same correction has to be repeated in item 86."

[The Hon'ble BABU SURENDRANATH BANERJEE'S amendments were as follows:—

No. 83.—That the following words be inserted after the words "The Local Government may," in line 1 of section 26D (*now* 22),* namely:—

"on complaint made."

No. 84.—That after the word "duties" in line 1 of clause (*a*) of section 26E (*now* 23), the following words be inserted:—"relating to matters concerning the public health;" and that the words "inefficient or unsuitable" in line 5 of the same clause be omitted.

No. 85.—That for clause (*a*) of section 26E (*now* 23), the following be substituted:—

"that the provisions of section 23A, clause (*1*), and of sections 24, clause (*c*), 127, 221, 225, 254C, 268, 269, sub-section (*1*), 292G, 327, 328, 453, sub-section (*1*), 459A, sub-section (*1*), 459D and 497 (*now* sections 14, clause (*1*), 15, clause (*c*), 133, 237, 240, 267, 288, 289, sub-section (*1*), 309, 337, 338, 422, sub-section (*1*), 429, sub-section (*1*), 432 and 475 have not been duly carried out or enforced, and the default made is of a serious character."

No. 86.—That for clause (*a*) of section 26E (*now* 23), the following be substituted:—

"that the provisions of section 23A, clause (*1*), and of sections 24, clause (*c*), 127, 221, 225, 254C, 268, 269, sub-section (*1*), 292G, 327, 328, 453, sub-section (*1*), 459A, sub-section (*1*), 459D and 497 (*now* sections 14, clause (*1*), 15, clause (*c*), 133, 237, 240, 267, 288, 289, sub-section (*1*), 309, 337, 338, 422, sub-section (*1*), 429, sub-section (*1*), 432 and 475 have not been duly carried out or enforced."

No. 87.—That the words "in an imperfect, inefficient or unsuitable manner or" in lines 4 and 5 of clause (*a*) of section 26E (*now* 23) be omitted

No. 88.—That the following amendments be made, namely:—

(*1*) that the words "or unsuitable manner or" in line 5 of clause (*a*) of section 26E (*now* 23) be omitted;
(*2*) that clause (*b*) of section 26E (*now* 23) be omitted;
(*3*) that clause (*ii*) of section 26E (*now* 23) be omitted;
(*4*) that at the end of sub-section (*2*) of section 26E (*now* 23), the following be added:—

"and, upon the receipt of such petition of appeal by the Local Government, no further action shall be taken by the Local Government without the orders of the Government of India;" and

(*5*) that sub-section (*3*) of section 26E (*now* 23) be omitted.

* The sections of the Bill having, under the direction of the Council, been re-numbered, the present number of each section is inserted in brackets, wherever the new numbering differs from the old.

No. 92.—That the lines beginning with the words "and, if necessary, that any one or more of the rates or other taxes" up to the end of clause (*c*) of section 26F (*now* 24), be omitted.

No. 93.—That sub-section (*3*) of section 26F (*now* 24) be omitted.

No. 94.—That sub-section (*4*) of section 26F (*now* 24) be omitted.]

"Well, Sir, in moving these amendments, I desire to guard myself against any misapprehension to which my remarks may give rise. I fully recognise the fact that the Corporation exercises delegated authority; authority derived from the Government, which is the fountain source of all legal authority. The Corporation is an emanation, an off-shoot, of the sovereign power, and the sovereign power has the right to exercise adequate check and control over the proceedings of the Corporation. Sir, nobody disputes that the Government has the right in the abstract to assume those very large powers which it proposes to assume under the provisions of this Bill. But, Sir, as one of the greatest philosophers that ever lived—Edmund Burke, a name honoured and respected throughout the civilised world—observed, the limits of moral competence are not to be confounded with the limits of competence in the abstract. There are a great many things which a Government may do in the exercise of its supreme and sovereign authority, but these things a Government never does, being deterred by the highest considerations of morality and expediency. I am free to admit, therefore, that the Government of Bengal has in the abstract the competence to assume the powers of control which it proposes to assume under the provisions of this Bill; but the question which we have to consider is this: whether, having regard to all the circumstances of the case, it is right and proper and expedient in the highest sense that these drastic—I was going to say dangerous—provisions of the Bill should be enacted into law.

"Sir, the object of these amendments which stand against my name is to place the provisions of the Bill upon the same footing as the provisions of the English Public Health Act, or at any rate those of the Bombay Municipal Act. Sir, let me briefly explain the nature of my amendments. In the first place, I recommend that the intervention of the Government should be confined to matters relating to public health, and to them alone. If this view be not acceptable to the Council, then I suggest that the Bombay model should be followed, and the interference of the Government should be restricted to default committed by the Corporation in respect of specific duties imposed by specific sections of the Act. In regard to both these recommendations, I suggest that in no case should the Government have the power of raising the rates or contracting a loan on behalf of the Corporation. I have no hesitation in saying that the provisions of the Bill are far more stringent and drastic than the provisions of the English Public Health Act, or the Bombay Act, or the Calcutta Municipal Act, or, indeed, the provisions of any Municipal Act with which I am acquainted. Let me for a moment institute a comparison between the provisions of the Bill and the existing law. Under the existing law the Government can only interfere on complaint made. Under the Bill, Government may interfere in any case whether a complaint is made or not. I am glad to be able to say, from information given to me yesterday by the Hon'ble Member in charge of this Bill, that the Government proposes to make a modification in this respect, and the Government has signified its intention not to interfere except upon information given. That is a concession for which we are thankful; but, Sir, the point of difference between the existing law and the Bill is that the provisions of the Bill go very much beyond the present law. Under the existing law, the Government can only interfere when general default, and that of a serious character, is made. Under the Bill the Government may interfere when any default of any kind, general or particular, serious or otherwise, is made. Nor is this all. The intervention of the Government as provided in the Bill extends over the entire domain of municipal administration and even to the manner in which the work is performed, because the Bill lays down that, when work is done imperfectly or in an unsuitable manner, the Government may interfere. Then, Sir, under the present law, if an appeal be preferred to the Supreme Government by the

Corporation against the order of the Local Government, the work must be suspended. Under the Bill the work will proceed. Under the existing law the Government may recover from the Corporation the expenses of any work carried out under its orders in pursuance of these sections. Under the Bill the power of raising the rates or contracting a loan is reserved to the Government. Sir, it has been said more than once—said by hon'ble gentlemen from their places in this Council, said in the public prints—that we have no right to complain. These provisions may be very drastic, very stringent, very rigorous in their character, but they are all based upon the English Public Health Act. Sir, it has been with me a matter of oft-repeated complaint—and I desire to repeat the complaint once again—that while the municipal system of the Empire is laid under requisition to pile one drastic provision upon another, the beneficent provisions of that legislation are completely hidden from our view. You tell us that these provisions are based on the English system, but you deny to us the beneficent provisions of the English system. The Municipal Councillors in England exercise supreme and paramount authority as forming the Corporation. The executive is responsible to the Municipal Councillors. There is no sort of interference with the internal administration of British Corporations. Naturally enough, the measure of control from without is proportionately more rigid. But, Sir, I dispute the proposition altogether that these provisions are drawn from, or are substantially analogous to the provisions of, the Public Health Act. The English Public Health Act restricts the interference of the Government to matters of public health and to matters of public health alone. As for the provisions in the Bill, the interference of the Government may be invoked in respect of any matter relating to the municipal administration of the town, and, as I have already pointed out, the Government may interfere if municipal work has been performed in an unsuitable manner. Then, Sir, under the English Public Health Act, the Local Government Board may recover the expenses from any municipal authority, but the Local Government cannot raise the rates or incur any loan on behalf of any Corporation. Therefore, Sir, the provisions we are now considering go very much beyond the provisions of the Public Health Act on which they are ostensibly based, and they go very much beyond the powers conferred on the Government by the Bombay Municipal Act. Let me recall to the minds of Members of this Council the provisions of section 518 of the Bombay Municipal Act. It is not necessary for me to read the section. Section 518 lays down that the Governor in Council may interfere only when default has been made in respect of duties imposed upon the Corporation by specific provisions of the Act which are mentioned in the section.

"I follow the lines of the Bombay Act, and I say if the provisions of section 23A (*now* 14), clause (*1*), of section 24 (*now* 15), clause (*c*), and of the other sections mentioned in my amendment; if these provisions are not carried out, then the Local Government may interfere. In fact, the sections which I have inserted in my amendment go very much beyond the provisions found in the Bombay section 518. Therefore, Sir, we have it under the Bombay Act that upon complaint made in respect of any default committed, in respect of certain specific duties imposed upon the Corporation by specific sections, the Government may interfere. But the provisions of the Bill go very much beyond that. Therefore, Sir, I am right in my contention that the sections relating to control as provided in this Bill are far more stringent than those to be found in the English Public Health Act; they are far more stringent than those of the Bombay Act, and far more stringent than the present Calcutta law. And, Sir, I am justified in asking the question, what is the excuse, what is the justification, for such stringent and drastic legislation? Have you tried the existing sections, and have you found them to be inadequate? Have you put them to the test, the ordeal of actual experiment? Have you tried them and have you found that they have failed? No, Sir, you have slept over them; the Government of Bengal has been wanting in its duty so far as the carrying out of the sections of control is concerned. These sections were there in the statute-book, giving the Government vast and varied powers. Those powers were never once put into requisition for the benefit of

the Corporation, and then you come forward, and say: 'We want more powers.' I ask, is this a rational or a logical proceeding to adopt? I could understand the proceeding if the powers had been tried and had been found wanting, and if the Government had come forward with a request, as the result of actual experience, that those powers should be enlarged; but the Government never put to the test the powers of control it possessed. We know not what may be the faults of omission or commission on the part of the Corporation, but this I will venture to say with all emphasis, that for their faults of omission and commission the Government of Bengal is directly responsible. It was the business of the Government to have guided, led and controlled the Corporation in its arduous duties. The Government did nothing of the kind. If faults have been committed (and what institution is there in the world which is free from faults?), the Government is responsible. And not only that; the Government has approved of everything contained in the Municipal Administration Reports year after year. And, Sir, I have a lurking suspicion in my own mind that if a Commission of Enquiry was appointed, and if some of us had the opportunity of giving evidence before such a Commission, a case would be made out, if not against the Corporation, at any rate against the Government of these Provinces. I cannot dive into the secrets of Government, but it seems to me that, having regard to the circumstances to which I have adverted, having regard to the duty which was incumbent upon the Government, and to the non-performance of that duty, the Government owed it to itself to appoint a Commission of Enquiry to clear itself of an imputation which men like myself would bring against the Government for laxity in the supervision of the work of the Corporation. Well, Sir, however that may be, there is the fact that these powers were there embodied in the law of the land. These sections gave Government vast and varied powers of control; these sections were a dead letter; they were never enforced; and the Government now ask for more powers. Sir, I venture to say that if ever there was an occasion for the relaxation of the powers of control, that occasion has now arrived. Let me remind the Council of the state of things which existed during the days of the Justices. In the law of 1863 you do not find any powers of control deserving the name. And why not? Because at that time the Municipality formed more or less a department of the Government. The Justices were all the nominees of the Government. The Justices were in many cases the servants of the Government. As Sir Richard Temple said from his place in this Council, that, being the nominees of Government, they were in sympathy with the views of Government; they might be trusted to carry out the wishes and intentions of Government. The Municipality, therefore, being more or less an official bureau, it was not necessary for the Government to reserve powers of control from without. As they were exercising active powers of interference from within, powers of control from without were considered superfluous. And now, Sir, under the Bill that is before us, are we not going back to the days of the Justices? *The Times* newspaper is my authority. *The Times* says that this Bill contemplates 'a partial reversion,' I quote the words, 'to the methods of centralised official control.' We are going to have official control substituted in the place of popular control. We are going to have the Municipality reduced once again to a department of the Government. If so, is it necessary to reserve these stringent powers of control? At any rate, is it necessary to make these powers of control more stringent than they are at present? It is reversing the natural order of things, and that is what this Bill does, not only in this case, but throughout. Let me point out to the Members of this Council that in 1876, for the first time, the powers of control were reserved to the Government. When the Corporation was constituted upon a popular model, such powers of control became necessary. The Government, having given up the right of active interference from within, claimed and asserted their right to control the Municipality from without. Well, Sir, the powers of control being assumed by the Government, provisions were introduced into the Bill of 1876 which were very similar to the provisions we are now considering, and what was the result? There was a strenuous opposition offered to these provisions of the Bill, and a petition was presented to the Government of Bengal. I will read an extract from that petition. I have, however, to point out in the first place that it was a petition not presented merely by the Indian inhabitants of

the town; it was a united representation emanating from both sections of the community—a representation headed by the illustrious leaders of both the European and Indian communities. I will read an extract:—

'That your memorialists would suggest for Your Honour's consideration in Council that in their view the principle of free election contained in the Bill is completely nullified by the absolute power of active interference reserved to the Government; and that, even on the supposition that the power would never be exercised, still so grave a distrust is exhibited of the possible abuse of the franchise proposed to be conferred, that no citizens possessed of self-respect and enlightened views, and commanding the confidence of the public, would consent to act as the members of a Municipality subjected as they would be by the provisions of the Bill to the perpetual threat of the interference of the Government; and your memorialists entertain grave forebodings that the Municipality would in consequence be deprived of the services of the most zealous, conscientious, and upright of the residents in Calcutta.'

"This was a memorial submitted in 1876, and it bore the names of the most distinguished citizens of that time. I will refer only to six names; three from the European community and three from the Indian community. Among the European signatories were Mr. Brooks, at one time the respected President of the Trades Association; Dr. Ewart, a Professor in the Medical College—those were the halcyon days when Government servants retained a much larger measure of independence than they now possess. And then the last of the names to which I shall refer is the honoured name of John Blessington Roberts. The Indian signatories contain the most illustrious names of this generation—I might almost say of this century. Foremost among them were the honoured names of Kristo Dass Pal, and of Rajendralal Mitter and Degumber Mitter. Sir, I have a question to ask of my two hon'ble friends who so worthily represent the interests of the European community in this Council—whether they are prepared to affirm, as their leaders affirmed in 1876, that if these drastic provisions of the Bill are embodied in the law of the land, no self-respecting members of the European community will consent to act as Municipal Commissioners? I know not, Sir, what their answer will be. I have no right to know—I have hardly a right to ask. But, as representing the Hindu community, as a member of that community, I will say this, that we venerate the memories of our great dead; of those men who fought for us in the past; fought valiantly for us in the past; fought, it may be, alas, too often unsuccessfully. We venerate their names, and we once more re-affirm in 1899, as they affirmed in 1876, that if these drastic provisons become the law of the land—if local self-government is reduced to a nullity—no self-respecting member of the great Hindu community will consent to have part or share in the municipal administration which is to be inaugurated on the 1st of April next."

The Hon'ble MR. BAKER said:—"The Hon'ble Member began his exceedingly interesting and eloquent speech by stating that the control powers of the Bill were much more stringent than those of the English Public Health Act or of the Bombay Act, and that the object of his amendments was to place the provisions of the Bill on the same footing as those of the English statute and the Bombay Act. It will be my duty to show that the provisions of the Bill are not one whit more stringent than those of the English Public Health Act, and that, in some important particulars, they are less stringent. The Hon'ble Member, referring to the constitution of 1863, stated that at that time no provision was made for Government control for the reason that under the administration of the Justices the Municipality was a department of the Government. Now he said Government is going to revert to that system; the old system. The Municipality, he said, is going once more to be a department of the Government. Therefore, the time has come when we should withdraw the powers of control hitherto reserved to Government. Sir, I challenge that statement altogether. I deny absolutely that local self-government is being withdrawn from Calcutta. As you, Sir, pointed out in your speech of the 7th August, what we are doing now is merely to change the form of local self-government. The essence and the substance of it will remain as flourishing and vigorous as before What we do is to withdraw the undue preponderance of power which has hitherto rested in the hands of a single class, and to arrange that it shall be distributed for the future on a more equitable and proportionate basis. As to the memorial of 1876, in which it was stated

that if similar provisions to these were enacted into law, no self-respecting citizens would consent to serve on the Corporation ; it is a sufficient reply to say that, under provisions exactly similar to those, self-respecting men of every class and of every rank in life are at this moment, and have been for many years, sitting in Municipal Corporations in England.

"I will now turn to the specific amendments which the Hon'ble Member has moved. These four sections—sections 20C to 20F (*now* 21 to 24)—are among the most important sections in the Bill. They were most carefully considered by the Local Government in detail before they were submitted to the Select Committee. They were approved by the Select Committee almost without modification. They have been singled out by the Government of India for special and hearty approval, and I hope they will commend themselves to this Council without further change. As the Hon'ble Member has said, Sir, it is intended to consent to one small modification to meet his views as expressed in his first amendment. In section 20D (*now* 22) the Hon'ble Member has proposed to insert the words 'on complaint made.' To meet those views you have consented, Sir, to accept the insertion of the words 'on receipt of any information.' I understand that the Hon'ble Member will be satisfied with that alteration."

The Hon'ble Babu Surendranath Banerjee:—"There is one observation I will make later on. I cannot say I am satisfied. I have to make the best of what I can get."

The Hon'ble Mr. Baker:—"I understood yesterday that the Hon'ble Member accepted this. However, let that pass. I should like to give a very short sketch of the history of these control sections. It has been one of the weakest parts of the municipal system in the past that neither under the law of 1876 nor under the law of 1888 has there been any effective system of control, and it is my belief that many of the shortcomings which have been noticed in the Calcutta Corporation have been due to that defect. In the Act of 1876 it was provided that if it shall appear to the Local Government that the Commissioners have failed to make adequate and suitable provision for the cleaning and the conservancy of the town to an extent likely to be prejudicial to the inhabitants of the town, or of any part thereof, the Government was empowered, by notification in the Gazette, to appoint a special Commission. One of the members of the Commission was to be the Sanitary Commissioner; another was to be appointed by Government, and the third was to be the representative of the Corporation. The Commission was to make enquiry, and was to report, within a fixed time, whether in its opinion the cleaning and conservancy of the town were deficient to an extent likely to be prejudicial to the health of the inhabitants, and, if so, to specify what further provision should be made. On receipt of their report, the Government was empowered to fix a time within which the default should be made good, and, if that order was not complied with, the Government was empowered to cause the work to be done at the cost of the Corporation. That, Sir, briefly was the system of control adopted in 1876. Now the most obvious defect in this form of control is that it seeks to make the exercise of the Government control subject to the decision of a species of court. The enquiry made by the Commission was a sort of judicial trial in which the Corporation were the defendants. Witnesses had to be called and examined and cross-examined, and the decision had to be based on definite and precise findings on the evidence. Not the least drawback to this arrangement was the irritation which the proceedings caused in the minds of the Commissioners themselves, who found themselves publicly charged and brought to trial almost as if they were criminals. Instead of regarding the orders of Government as the injunctions of a superior authority based on wider experience and fuller knowledge, they were encouraged to dispute the premises and resist the conclusions of Government by all the devices and artifices with which courts of law in this country are only too familiar. A still more serious objection to this system was that it sought to substitute judicial for administrative control. Professor Maltbie, in his standard work on *English Local Government of To-day*, in describing the three forms of central control for self-governing

bodies—legislative, judicial, and administrative control—makes the following remarks:—

'The judicial control aims primarily to protect private rights and to prevent the officers of the Government from exceeding their powers. It is only occasionally and incidentally that other purposes are sought in its exercise. As a form of central control, whose object is administrative efficiency, it is unimportant.'

"No judicial body, whether a special tribunal such as was provided in 1876, nor the ordinary courts of the country, is capable of exercising administrative control efficiently. Any system which seeks to impose that duty upon them is unsound at its root.

"Well, Sir, the system of 1876 was only brought into operation on one occasion—in 1885—on the complaint of the Calcutta Public Health Society. That was the occasion when Mr. Beverley's Commission was appointed. I will not weary the Council by describing the proceedings of that Commission, which were not very edifying. A considerable delay took place before the report was submitted; an immense amount of ill-feeling and irritation was occasioned, and the final results were scarcely commensurate with the trouble which had arisen. That single instance was sufficient to show that the system of 1876 was cumbrous and ineffective. Accordingly, when the law was amended in 1888, the opportunity was taken to revise the system of control, and, on that occasion, the framers of the law had recourse to the English Public Health Act of 1875. The clause, which became law as section 38 of the Act of 1888, runs as follows:—

'Upon complaint made to the Local Government that the Commissioners have made general default in the performance of any of the duties referred to in the last preceding section, the Local Government, if satisfied, after due enquiry, that general default has been made, and that it is of a serious character, may make an order intimating a time, not less than thirty days from the date of the order, for the performance of such duty by the Commissioners; and, if such duty is not performed within the time limited in the order, the Local Government may appoint some person to perform the same, and may direct that a reasonable remuneration to the person so appointed, the amount whereof is to be specified, and also the expenses of performing such duty, shall be paid by the Commissioners out of the moneys levied by them under this Act.

'Any person appointed under this section to perform any duty of the Commissioners shall, in the performance and for the purposes of such duty, be invested with all the powers of the Commissioners.'

"There was also a provision by which the Commissioners might submit an appeal to the Government of India against the orders of the Local Government, and it was provided that no action should be taken in pursuance of the order, pending the decision of the Supreme Government.

"This arrangement avoided the defects of the former system of 1876, but, unfortunately, it included other defects of its own, and these defects have rendered the system of 1888 as inoperative as the system which it superseded. That, Sir, is the explanation why Government has not been able to put this system actually into force. I will specify what these defects were. In the first place, action can only be taken by Government upon complaint made. Well, I do not wish to dwell very much upon this, because after all complaints would no doubt come in quickly enough if it was known that they were desired. But I may mention that the framers of the law of 1888 overlooked the fact that, in the English Public Health Act, there is another provision in section 293 by which the Local Government Board is empowered by means of its travelling inspectors to make an enquiry into any matter within the purview of the Act in any Corporation, and they may take—this is not expressly provided for in the Act, but I am informed that is the practice—they may take action upon the report of one of these inspectors. Then, Sir, under the Act of 1888, action can only be taken where there has been general default by the Corporation in performing its obligatory duties, and also where such default is of a serious character. There is no such limitation or restriction in the Public Health Act. The provisions of the English Public Health Act authorise the Local Government Board to intervene not only in a number of cases specified in section 299 of the statute, but also whenever a local authority has made

default in enforcing any of the provisions of the Act, which it is their duty to enforce. In other words, Sir, the Local Government Board has the power to take action in case of default in respect of every matter covered by the Public Health Act. It is not necessary that the default should be general or that it should be of a serious character. Then, again, the Act of 1888 provides for an appeal by the Corporation to the Government of India, and lays down that all action is to be stayed pending the decision of the appeal. I need hardly say that, under the provisions of the Public Health Act, there is no appeal whatever to a higher authority. The decisions of the Local Government Board are final in every case. It is possible that the Hon'ble Member may say that the Local Government Board is a Board of high dignity; that it is presided over by a cabinet minister, and that it includes among its members all Her Majesty's principal Secretaries of State. If the Hon'ble Member thinks so, I would point out now, by way of anticipation, that the Local Government Board is not in practice constituted in this way. The Local Government Board is a Board of the class which the Hon'ble Member described yesterday in terms of approval; it is a one-man Board. The principal Secretaries of State are only nominally on the Board; the papers are never sent to them; they have nothing whatever to do with the orders issued in its name.

"Now that the present law of 1888 is under amendment, we consider it expedient to recast the sections of control, and to endeavour to eliminate the defects I have described; to assimilate the provisions of our law more closely to those of the English statute, with such modifications as may be necessary to suit the conditions of Calcutta. And I will describe briefly what the provisions are which it is now proposed to enact. In the first place, in section 26C (*now* 21), we take power to Government to call on the Chairman for reports or returns on any matter under the control of any municipal authority. This section is new, as part of the law, but it merely gives effect to the existing practice, and the necessity and the propriety of it are obvious. Secondly, in section 26D (*now* 22), we give Government power to inspect and enquire into any work or department under municipal control. The enquiry is to be carried out by means of officers deputed for the purpose, and we give those officers the necessary powers for carrying out that inspection. This provision is based on section 293 of the English Public Health Act, and it corresponds to the power which is exercised by the Local Government Board through its travelling inspectors. The powers are supplemental to the power of calling for reports from the Chairman, and they are obviously necessary if Government is to obtain the requisite information before taking action. Then, Sir, we provide in section 26E (*now* 23) that, if, as a result of such report or enquiry, the Government is of opinion that any of the duties imposed on any municipal authority under the Act have not been performed or have been performed in an imperfect or inefficient or unsuitable manner, or if financial provision has not been made for the performance of any duty, Government may call upon the municipal authorities to make good the default or to show cause to the contrary. This provision corresponds to section 299 of the English Public Health Act, but there is a significant point of difference. Under the English statute the defaulting party has not the option of showing cause against the order of the Local Government Board. When the Hon'ble Member denounces the stringency of the provisions in the Bill, I hope he will take note of this important difference. Then in section 26F (*now* 24) it is provided that if the municipal authorities fail to show cause, and if they make default in carrying out the order, the Local Government may appoint some person to carry it out at the cost of the Corporation, and may authorise him to increase the rates for that purpose, but not in excess of the legal maximum, and can empower him to raise a loan. The Hon'ble Member stated that under the English Public Health Act there was no power to increase the rates or to raise a loan. The Hon'ble Member has been misinformed. In both those matters we have followed the provisions of the section of the English Public Health Act. If he turns to section 300, taken in conjunction with sections 301 and 302, he will see that both those powers are provided there, with one difference. In the English Public Health Act there is no limit to the rate which may be imposed. In the English statute there is no maximum fixed for the local rate which may be imposed. Under the Bill we expressly provide

that the rates may not be raised above the ordinary legal maximum. That is another point in which the provisions of the Bill are less stringent than the provisions of the English Public Health Act. Lastly, Sir, we propose that an appeal shall lie to the Government of India against the orders of the Local Government, but we provide that action shall not be suspended in the meantime. That provision has been expressly approved by the Government of India, and, as I have already pointed out, there is no provision in the English statute for any appeal whatever. I consider, Sir, that these provisions, to which the greatest amount of thought has been devoted, are as simple and effective as it is possible to make them; and I hope, when they are enacted, that the charge which the Hon'ble Member has brought against the Government that it has slept over its duty in the past will no longer have any justification.

"The Hon'ble Member made it a complaint against these provisions that the Government power of control extends to every part of the work of the Municipality, great or small, important or unimportant, and he said that the English law on the subject applied only to defaults in connexion with public health. He further said that in Bombay the corresponding powers are limited to duties specified in certain sections of the Bombay Act, and he said that the provisions of the Bill go beyond those which are enumerated in section 518 of the Bombay Act. Now, Sir, as regards the Bombay Act, the latter of these statements is literally correct. Section 518 deals with control and enumerates only certain cases in which there is power of intervention. But I would ask the Hon'ble Members to refer to those sections. The first section which is enumerated in section 518 of the Bombay Act is section 61, and section 61 includes the whole of the obligatory duties of the Corporation. Every obligatory duty from first to last, whether connected with the public health or not, every one of those duties is brought *en bloc* under the operation of the Bombay sections relating to control. I do not think, therefore, that the Bombay precedent can help the Hon'ble Member very much. Then, Sir, as regards the English precedent, it is quite true that the Public Health Act confers on the Local Government Board only powers which relate to the public health; and the reason for that is obvious. The statute in question is not a general Municipal Act; it is a Public Health Act. Obviously its provisions and the powers under it can only extend to the purview of the statute itself. There is no single comprehensive municipal law in England such as the Bill we are now discussing. As a matter of fact, the provisions of the English Public Health Act have been extended by other statutes to other matters also. Not very many, but a few. Thus, by Statute 41 & 42 Vict., cap. 77, the provisions of the control sections of the Public Health Act have been extended to all matters connected with highways. By the Statute 56 & 57 Vict., cap. 73, they have been extended to highways in rural areas. And if the Hon'ble Member will refer to section 106 of the Public Health Act itself, he will see that the statute itself empowers the Local Government Board, through the police, to intervene summarily in respect of nuisances. Now, even if it be the case—and I admit it is so—that the duties connected with the public health are more important than all others, let us consider how much of the Bill would be left if we confined the operation of these control sections to matters connected with the public health. I have taken the trouble to draw up a list of the chapters which relate to public health in the Bill. These chapters are those which deal with water-supply, conservancy, drainage (including privies and latrines), hospitals and the treatment of disease, slaughter-houses, markets perhaps, buildings, congested areas, bustees, and the sale of food and drugs. To these I would add roads, because, as I have shown, the provisions of the Public Health Act in England have been extended to highways also. The only material functions which remain are those which relate to the taking of a census, to vital statistics, to lighting, to the naming of streets, and the numbering of houses. There may be possibly a few minor matters besides these, but I think that, of all the matters which do not come under the definition of matters relating to the public health, it will be found that those four matters are the chief, if not the only ones. I would like to read to the Council some remarks which Sir Henry Harrison made on this very subject in 1888. It was then proposed that the scope of the section relating to control should be limited to

matters connected with the public health. Sir Henry Harrison challenged that principle, and he made remarks to the following effect :—

'**It is not** possible to deny that the maintaining of a system of registration of births and deaths for instance, or the naming of streets and the numbering of houses, are duties of the Municipality. Then, if it is the duty of the Municipality to do these things, ought they to be omitted from the section of the Bill over the operation of which a power of control is given to the Government? I admit that for all practical purposes it will, perhaps, be sufficient if the power of control is confined to matters affecting the public health, because it is essentially in such matters that there will be a probability of difference of opinion. But as a question of principle, why should the other clauses of the section be excluded? The probability is that there will be no likelihood of default in such matters. But suppose the Commissioners were to commit default in respect of such matters? Suppose the Commissioners discontinued the maintenance of a system of registration of births and deaths? There are statistics of births and deaths, extending over a series of years, of extreme value, to which constant reference is needed. Would it not then be necessary that the Government should have power to say to the Commissioners, you shall not discontinue those registers? Take another case. Take the naming of streets and the numbering of houses. Conceive the total confusion which would result from total neglect of this duty. Consider the total prostration of the Postal Department and of all inter-communication in Calcutta. Is there one single duty of the Commissioners regarding the performance of which it would be more incumbent on the Government to interfere than that—supposing it neglected? As a question of principle, I cannot see why we should take away the control of the Government over duties of this kind which, supposing they are not performed, will lead to disastrous results, simply because we think there will be no necessity for such control. The chances are a hundred to one that the Commissioners would not commit default in such matters; if so, no harm would be done, and the section would remain a dead letter. But suppose the Commissioners did commit general default, then there is no single matter amongst the duties of the Corporation, control over which would more meet with the approval of the entire population, than some of the matters which I have instanced.'

"That is what Sir Henry Harrison said in 1888. He gave two instances of matters not connected with the public health in which the power of interference by Government was manifestly desirable. I will add to these two instances more. Next year we shall be taking a census of the whole Indian Empire, probably of the whole British Empire. It is the duty of the Corporation to carry out the census of Calcutta when required. Let us suppose that the Commissioners, either from motives of economy or for any other reason, were to refuse to do so. Is it possible that Government should be compelled to tolerate the scandal of a general census being taken and the capital of the Indian Empire being omitted from that census? Again, let us take the case of lighting the public streets. Lighting is a matter which affects the public safety. Suppose, in consequence of some quarrel with the Gas Company or otherwise, the Commissioners were to decide to discontinue the lighting of the streets of Calcutta with gas. Suppose that they decided to go back to the old system of oil lamps in Chowringhee and Old Court House Street. Can any one say that Government ought not to be permitted to interfere in such a matter as that? I will read one more extract, and one only, from Sir Henry Harrison's most interesting speech on this subject. He said :—

'And now that the law is being amended, I am bound to say that in my opinion the Council will do wrong unless it lays down most distinctly that the authority in all such matters rests with the Government. There is a great deal of difference between the Government interfering in matters concerning the duties of a Municipality and in matters affecting private rights, in which case the decision of a perfectly independent tribunal is necessary. There is a wide difference between such rights and rights and duties which are really part of the work of Government. The Municipality is a body vested with some of the authority of the Government of the country, and it should be properly regarded as a body which is subordinate to the Government of the country, and so it is regarded in every country in the world. In Paris, in Berlin, in London, the Government of the country is vested with the supreme authority and the supreme responsibility of disposing of public duties, but, as it cannot attend to everything itself, it has its subordinate officers, and, where it is possible, local bodies are constituted for local purposes. But who in the long run is responsible to the individuals of each community against gross abuse of authority, but the Government of the country? Therefore, I submit, that as a matter of Government we must have a hierarchy of institutions, and subordinate authorities must be placed under superior authority. The Government ought to make up its mind with the utmost care, prudence, discretion and forbearance; but, when the Government has made up its mind that something is wrong, it is erroneous in principle to say that it should not have power then and there to act, but that authority should be given to some other tribunal to judge between it and the subordinate authority.'

"It seems to me, Sir, that Sir Henry Harrison's arguments are unanswerable. The ultimate responsibility for every branch of the municipal administration rests with Government. It is impossible for Government to divest itself of the ultimate responsibility in any single particular, and Government must therefore retain the power to interfere in every single particular. There is one branch of the municipal administration in which this principle has been fully accepted from the first without objection. I refer to matters connected with the municipal accounts. In connexion with the accounts, the Government appoints independent outside auditors who are in no way under the control of the Corporation. The auditors go through the accounts, and, if they detect any irregularity or find anything wrong, they point out these defects at once to the Corporation, and it is the duty of the Corporation to put them right without hesitation or demur. So far as my acquaintance with the Corporation goes, they have never objected to that principle. Now, Sir, if that principle is sound in the case of what is after all a subordinate though important branch of the municipal administration, why should it be contested in such important matters as water-supply, drainage, lighting of streets, or the registration of vital statistics? I readily admit that Government should not lightly exercise its powers of interference, and I can confidently point to the experience of the past to show that it will not do so in the future. But it must have the power to interfere in all cases of need, and, when it does, the Corporation must be as fully bound to obey the orders of Government without hesitation or demur, as they are in the case of orders passed by the auditors of accounts.

"Then, Sir, the Hon'ble Member has said that Government possesses strong powers of control from within the Corporation, and he considers, therefore, that the time has come when we should abandon our powers of control from without."

The Hon'ble Babu Surendranath Banerjee:—"I said 'relax,' not 'abandon'."

The Hon'ble Mr. Baker:—"But the reasons why Government have always possessed and must continue to possess powers of control from within are special to Calcutta, or rather special to this country. By the power of control from within I take it that the Hon'ble Member means primarily the two powers which Government possesses; the power of appointing the Chairman, and the power of nominating certain of the Commissioners. Those are the principal powers of control which Government possesses from within. Now, Sir, what are the reasons why Government has always reserved those powers in the past, and must continue to retain them now? As regards the power of appointing a certain proportion of the Commissioners, the reason is that Government is bound to provide for the due representation of minorities. English towns contain a comparatively homogeneous population, and the principle of election in English towns gives fairly representative results. We know that in Calcutta, if we left everything to the chances of election, the whole preponderance of power would fall into the hands of one class. Therefore, Government must retain the power to appoint a certain number of the Commissioners in order to provide for the due representation of all interests. Then, as regards the power of appointing the Chairman. Government is bound to retain that power in order that the administration of the Municipality may be carried on upon European and progressive lines. If the essentially British character of the Municipality is to be maintained, it is imperative that the Chairman should be an Englishman, and an officer able to devote his whole time to the duties of his office. He must be a permanent salaried official, and, in selecting an official for the post, Government must be in a far better position to judge as to who should be appointed than the Corporation itself."

The Hon'ble Babu Surendranath Banerjee:—"I did not object to those two powers; I objected to additional powers."

The Hon'ble Mr. Baker:—"The Hon'ble Member objected to Government possessing power of control from within as well as power of control from

without. I have shown to-day that the powers the Government now propose to take are less stringent than those exercised by the Local Government Board in England. That is the justification for their adoption in the new Bill. I do not think I need say anything further now. I am willing to accept the first amendment moved by the Hon'ble Member, with a small modification, but the others, I fear, it is quite impossible for me to agree to."

The Hon'ble MR. APCAR said:—"There is a small amendment of mine, Sir, which I find is in exactly the same terms as that moved by my hon'ble friend. Item 96*, which stands in my name, is identical with item No. 92†, which has been moved by my hon'ble friend. I did not notice this until my hon'ble friend was speaking, when I did not care to intervene.

"I confess I cannot follow the Hon'ble Member in charge of the Bill when he says that under the Public Health Act there is power given to the officer superseding a defaulting Corporation to raise the rates. I find in section 299 this proviso:—

'Any person appointed under this section to perform the duty of a defaulting local authority shall, in the performance and for the purposes of such duty, be invested with all the powers of such authority other than (save as hereinafter provided) the powers of levying rates.'

"So that he is precluded from raising the rates; and, with regard to section 302, it only gives power to recover as a debt any sum that may have been expended. Now, in the clause to which I have put my amendment, there is a provision that the remuneration to be paid to the officer and the cost of taking action under clauses (*i*) or (*ii*) of section 26E (*now* clause (*i*) of section 23) shall be defrayed out of the municipal funds, and—

The Hon'ble MR. BAKER:—"I beg the Hon'ble Member's pardon. I find I made a misquotation; the clause in the English Public Health Act which I quoted was No. 300."

The Hon'ble MR. APCAR:—"I trust Your Honour will pardon me. I have been rather taken by surprise. With your permission I will read the section:—

'300. Any sum specified in an order of the Local Government Board for payment of the expenses of performing the duty of a defaulting local authority, together with the costs of the proceedings, shall be deemed to be expenses properly incurred by such authority, and to be a debt due from such authority, and payable out of any moneys in the hands of such authority or of their officers, or out of any rate applicable to the payment of any expenses properly incurred by such authority, which rate is in this Part of this Act referred to as "the local rate."

"If the defaulting authority refuses to pay any such sum, with costs, as aforesaid, for a period of fourteen days after demand, the Local Government Board may, by order, empower any person to levy, by and out of the local rate, such sum (the amount to be specified in the order) as may, in the opinion of the Local Government Board, be sufficient to defray the debt so due from the defaulting authority, and all expenses incurred in consequence of the non-payment of such debt.

'Any person or persons so empowered shall have the same powers of levying the local rate, and requiring all officers of the defaulting authority to pay over any moneys in their hands, as the defaulting authority would have in the case of expenses legally payable out of a local rate to be raised by such authority; and the said person or persons, after repaying all sums of money so due in respect of the order, shall pay the surplus, if any (the amount to be ascertained by the Local Government Board), to or to the order of the defaulting authority.'

"That is not authority to raise the rates to any sum at all; it is simply a provision to enable the officer to recover expenses that may have been incurred.

"I feel, Sir, that after the declaration of the Hon'ble Member in charge of the Bill any discussion becomes academic, because I must look forward to defeat on the amendments. But on principle my sympathies are entirely with my hon'ble friend who has moved the amendment, and it seems to me, Sir, that one point is being lost sight of now. It is that we have now reduced the number of elected Commissioners by 25, and that consequently the power will

* Printed on p. 64, *post*. † Printed on p. 44, *ante*.

be entirely in the hands of those from whom there will be no fear of any kind of obstruction of the Government. The Bill has been based on the supposition that the numerical predominance of the Hindu Commissioners would be continued under the new law. It seems to me there ought to be some difference now made in regard to the stringent terms of this Bill. And on principle I should support my hon'ble friend, because in practice I have always contended that the Government can get anything done they choose through the Chairman, who is under their authority. My experience is, I repeat, that whenever the Chairman has chosen to appeal to the Corporation he has invariably had his way. Therefore, whatever may be decided here, I feel that the power always rests with the Government to carry such measures as they may desire.

"If there is going to be an acceptance of a small portion of the proposed amendment, I do not understand why there is a change made in the wording of my hon'ble friend's proposal, which was that the words 'on complaint made' should be inserted after the words 'The Local Government may.' The words suggested by my hon'ble friend form a specific expression containing a distinct idea, and they follow the provisions of the Public Health Act of England. But my hon'ble friend the Member in charge does not accept those words, and has varied them to 'on receipt of any information.' I do not understand the reason why he shies at the proposal made by my hon'ble friend, and substitutes the qualification I have just quoted. I did not hear any explanation of it. I suppose there must be some reason why the words used are not to be 'on complaint made,' but I do not understand why, and I confess I should have been better satisfied if there had been some reason given for the change.

"I do not desire to occupy the Council any further with regard to this question, but for myself I desire to say that I am very strongly in favour of powers of intervention on the part of Government; but I do think those powers ought to be limited to matters affecting the public health and that alone. Sir Henry Harrison's opinion has been quoted. Well, Sir, I find that the opinions of Sir Henry Harrison are quoted when they happen to be in favour of some contention, but they are disavowed when they happen to be the other way. In the present Bill the broader principles of the Bombay Act are left out and the more stringent provisions are included. Sir Henry Harrison's opinion was relied upon when the Government desired to press the latter point, but, when his opinion was pressed against them in regard to the former, he was not supposed to be such a weighty authority. That is a peculiar system, and I confess I should have been better pleased if we had had some definite course laid down for us with regard to this Bill. My hon'ble friend the Member in charge of the Bill has relied on the opinion he has quoted to show that it is unwise for Government not to have powers of intervention if the registration of births is not obligatory. But I understand that under the Bill the matter will be in the hands of the executive, so that apparently this provision is required to order the Chairman to do his duty."

The Hon'ble Mr. Baker:—"The provision of funds."

The Hon'ble Mr. Apcar:—"Well, that would be a matter which would come before the Corporation; but the Corporation has never failed, and they never are likely to do so, in this respect. Then, as regards the numbering of houses and the naming of streets, I did not understand that that related to funds. It seems to me to be a matter relating entirely to the executive. It seems impossible to conceive that there should be any kind of obstruction, and, therefore, I cannot say that the arguments which have been used in favour of those powers being given have much force. I have heard the remarks of the Hon'ble Member in charge of the Bill, but I cannot find that he has made out any ground for the more stringent terms, as it seems to me that the provisions of the Bill are more stringent than in England. As regards an appeal, considering that the Local Government Board is a department of the State over which a Cabinet Minister presides, I do not know—"

The Hon'ble MR. BAKER:—"I said there was no appeal."

The Hon'ble MR. APCAR:—"Exactly: I was just saying that, looking to the fact that the Local Government Board is a Board of such strength and power, it is quite sufficient that the determination of all questions should be left to its decision without any appeal. It is a department of the Government under the presidency of a Cabinet Minister, and open to the criticism of the House of Commons. I think that there could be no more effective form of control. If we had such a department here, of such weight and authority, and with the same form of control, there would be no necessity for an appeal."

The Hon'ble MR. OLDHAM said:—"Sir, there is one argument used by my hon'ble friend who has just spoken with which I cannot agree, and that is that because of the new constitution of the Corporation with 25 nominated and 25 elected Commissioners, there should be less need than now for these provisions. I do not think I am indiscreet in expressing the view that the new Corporation will probably be a more unruly—I mean less docile—body than the existing Corporation in which the Hindus have predominated. And in Select Committee it was a strong reason with me for urging these provisions that the body would be so constituted. That is not merely a problematical and theoretical view. It is founded on reasons which I think are very apposite. These provisions which my hon'ble friend the Member in charge of the Bill has defended have been applied in England, certainly in Ireland in some prominent instances, so that they are not merely speculative provisions, but they have been found to be required in practice. The case I remember giving to the Select Committee was a very prominent case, in which I was almost personally interested. It occurred in February, 1890, when the Corporation of the city of Cork—claiming to be the second city in the kingdom of Ireland—was superseded. Its place was taken by two Commissioners sent down by Government, and the rates were levied by those gentlemen. That is a case in point, and it shows very clearly how essential it is to have these provisions, and it also shows that they have had to be applied even in the United Kingdom.

"While I am on my legs, I should like to remonstrate with my hon'ble friend Babu Surendranath Banerjee for the closing part of his speech. I wish to ask him if he thinks it right to use that gift of eloquence with which he is endowed in blackening—well, that is too strong a word—in detracting from—the characters of his co-religionists who may be members of the Corporation under these provisions of the Bill which is to be passed. My hon'ble friend knows now that these precise measures received the express approval of the Government of India. They are certain to be passed. The Bill will certainly be put into operation, and with it these provisions, and the stigma which he has in anticipation placed upon his fellow members of the Hindu community who may be willing to serve under the Bill and to co-operate with Government, is, I think, much to be regretted, for the time is near and the obloquy has been already cast. I would ask my hon'ble friend whether it is a fair attitude for him to take up. We know what action he and his friends have taken, and we regret their loss. I do not think it is fair to prejudge the members of the new Corporation. They will doubtless do their best. The chief text on which my hon'ble friend founded his remonstrance was that we are going back. We do not deny it. We profess to be going back to that starting place from which we have so widely diverged. I have often heard my hon'ble friend say that we are suffering from a reactionary tide. If that is the case, surely, Sir, that is the result of experience, and who dwells oftener on the lessons of experience than my hon'ble friend? If these restrictive measures have to be admitted, it is because they have been found by experience to be necessary. It is certain also that the most eminent authorities upon municipal administration in England are in favour of a strong measure of Government control. I will only quote one such authority. Sir Henry Fowler—who is admittedly one of the strongest advocates of municipal institutions—speaking on the addresses to Her Majesty the Queen at the opening of Parliament, insisted that they can only carry out successfully the duties they are called upon to discharge, when

it is provided that they should be subject to the fullest measure of Government control."

The Hon'ble Mr. Buckley said:—"Sir, I take it that these four sections of the Bill which deal with control are the most important sections it contains. Indeed, given these four sections, and perhaps 25 or 30 others referring to the water-supply, drainage, and other practical matters of the kind, I think you have the gist of the whole matter of this Bill.

"The Hon'ble Member, Babu Surendranath Banerjee, in speaking of the powers of the Local Government Board under the Public Health Act, seemed to think that the Board only issued orders or gave instructions under that Act. It is true that, with reference to certain matters, they only have powers of control under sections 293 to 305 of the Act, but they issue, I find, a great many orders and instructions under innumerable other Acts under which they have authority. The Hon'ble Mr. Baker mentioned some of these, but I believe they are very numerous, and the powers of the Board are very much greater than the Hon'ble Member appears to think. For instance, I find that, under the Contagious Diseases Act, the Board issued instructions about cowsheds; under the Margarine Act they issued orders about margarine manufactories; under the Local Government Act of 1878 they issued definite instructions about the authorities and duties of medical officers, and in other matters also they appear to take a very prominent part under many Acts of Parliament besides the Public Health Act.

"The Hon'ble Babu Surendranath Banerjee and the Hon'ble Mr. Baker have both followed in some little detail the manner in which the power of control of the Government in this country has gradually increased. The hon'ble mover of the amendment referred to the fact that in the time of the Justices there was practically little or no control; in 1876 that was increased; in 1899 it is increased again. Sir, I think that, in this, history is only repeating itself. If you look through the history of the powers of control of the Local Government Board in England, you will find precisely the same thing. In early days, long before local self-government was thought of in this country, local self-government existed in England, mainly in the hands of the Boards of Guardians. They exercised their authority, with more or less efficiency, subject mainly to the control of the Secretary of State and the Privy Council. At that time such powers of control as existed were in the hands of those two authorities. The action of the local authorities was not always satisfactory. I find, some time in the forties, that a critic of the Boards of Guardians wrote as follows:—

'The utter failure of the system of local self-government for sanitary purposes is notorious to all who have taken any pains to enquire into the subject.'

"Between 1840 and 1845 there was a special Commission appointed, which in time resulted in the Act of 1848, which created the General Board of Health. This body exercised a certain amount of control, but still nothing like that which was conferred subsequently on the Local Government Board. Again, in the sixties, the matter attracted public attention, and I find this description of the state of affairs:—

'The Privy Council had aided aspiring localities with much information and advice, and, where there existed an earnest desire for improvement, successful results were obtained. But many other localities which were indifferent, apathetic and careless, were not doing much to better conditions. It was not because ample power could not be easily obtained, but because the sense of duty was not sufficiently strong, and no superior authority existed which could compel the execution of the law. Local self-government pure and simple had proven a failure. * * * public opinion was ready for the insertion of the word *must* in this department of local government as it had been in another. The Act of 1866 was the result.'

"Sir, I take it that public opinion in India has arrived at precisely the same conclusion as it did in England in 1866. So far as there is any public opinion in this town, it says the word 'must' shall be brought into operation in regard to this Municipality. It is supported by eminent authorities: by His Excellency the Viceroy of India, the Secretary of State, the late Lieutenant-Governor, and yourself, Sir. It says that the word 'must' will have to come into this law. Now, Sir, going a little further (I am quoting here

from Professor Maltbie's book, which was mentioned by the Hon'ble Mr. Baker), I find that when in 1871 the Local Government Board was established, and when in 1875 its powers were definitely increased and made similar to those which are now incorporated in this Bill, there was a remarkable and steady decrease in the death-rate in the towns affected. It is certainly remarkable to me to see, Sir, that Professor Maltbie—an American gentleman, and not an Englishman—should argue—and the figures support his opinion—that it was these powers of control which we have in this Bill which actually reduced the death-rate in many of the English towns. I would be prepared to admit that these powers constituted one of the causes, but to say that they were almost the the only cause is to me a very striking assertion. I will not trouble the Council with the figures, but in his book Professor Maltbie gives figures which show conclusively that immediately after these powers of control were brought into force the general death-rate decreased, and particularly the death-rate from those diseases which can be combated by attention to sanitary matters. Here in this town we have not decreased the death-rate. We have one which, certainly for the last ten years, has been steadily increasing. I believe I am right in saying that the increase is mainly in those diseases which are most easily preventible by sanitary measures."

The Hon'ble Babu Surendranath Banerjee:—"It is only in cases of fever there has been an increase; all other diseases show a decrease."

The Hon'ble Mr. Buckley:—"I do not say that these powers will immediately produce a reduction, but they will tend in that direction. With reference to the effect produced by these powers, I would ask you to permit me to read a further extract from Professor Maltbie's book:—

'The power of the Board over defaulting authorities is far-reaching and effective. It is necessary that a complaint be filed before an enquiry can be held, but, as any one can make complaint, and as it has been found that if an authority is negligent there will be at least *one* person willing and ready to so report, this provision has not restrained the activity of the Board. * * * * * Although stringent methods are provided in case the local authority refuses to act within the allotted time, it is seldom that it is necessary to go thus far. * * * It is not to be concluded, however, that the power possessed is not far-reaching in its influence. The few cases in which it is exercised are sufficient to convince all that it is not a mere form, but a genuine reality, and that in case of negligence it will be exercised.'

"I am glad, Sir, to learn that the Government of Bengal has been pleased to make the concession notified this morning, that the Government will not enforce these sections of control except on receipt of information, and I think the concession is one we can regard with satisfaction, and one which is most reasonable. But, although stringent measures are provided in case the local authority refuses to act within the allotted time, it is, as I have shown, seldom necessary to go so far. The power of these rules consists in their existence, not in their operation. The mere fact that Government does possess these powers will and does produce that activity in municipal bodies which is necessary for the public health. There must be present in the minds of many gentlemen here instances which show that the similar existence of power is often sufficient to produce great results, although those powers are seldom put into operation. What is it that maintains peace in this country? It is the British army, which I am happy to say has not been used within the boundaries of British India for many years. What is it that enables any little British cockle-shell to float in peace over the waters of the world? It is the existence of the British navy, which has not been in any general engagement since the battle of Trafalgar. It is the fact that the Government will have, when this Bill becomes law, the power to enforce these provisions which will bring about the desired result. But Sir, I must confess that I resent rather strongly the feeling which I see exists in the minds of the Hon'ble Members who are opposing this measure—the feeling that any action of the Local Government under these powers of control must be an unfriendly action. I deny that altogether. I have some little—very little—acquaintance with the Local Government Board at home. I have been there more than once. I know some of the gentlemen who carry out the inspections which have to be made; I have seen several of their reports, and I have read records of their doings. I may say parenthetically that there are some eight or ten of them, and that they spend

something like twenty days in a month making inspections all over the country. Now, the inspections which these gentlemen make are not unfriendly, except in very few cases, and, as a matter of fact, they are not resented by the authorities who are inspected; and I would venture to ask the two hon'ble gentlemen who are leading the opposition to-day whether they cannot recall here in Calcutta within the last few months an inspection—a very informal inspection—which was not altogether dissimilar to the inspections which will be made when these control sections are in force."

The Hon'ble MR. APCAR:—"I may explain that, so far as my opposition is concerned, my objections have no reference to control in connection with the public health. It is only in connection with control in matters beyond the definition of public health that I am opposed to the powers being given."

The Hon'ble BABU SURENDRANATH BANERJEE:—"That is my view also. I do not oppose the control sections so far as the public health is concerned."

The Hon'ble MR. BUCKLEY:—"The illustration I wish to give is in connection with a point raised by Mr. Apcar himself; it is in connection with the sewers of the town. I made an inspection similar to those which will be made under this Act. The Engineer to the Corporation went with me, and I submitted a report, which was similar to what will be made in the case of inspections under the Bill."

The Hon'ble MR. APCAR:—"That is what I want done very much. The subject mentioned by my hon'ble friend is distinctly one that affects the public health."

The Hon'ble MR. BUCKLEY:—"It seems to me that here in India we have, as they did in England, granted too free a hand to these youthful municipalities. In England they have been 50, 60, 70 years before they reached this stage of control. Here we have given these children, these inexperienced municipalities, much their own way. Is it astonishing if they have gone a little astray—if they resent the control their parent now seeks to put upon them? Is it astonishing if they sulk a little and say they wont 'play in our yard' any more? I do not blame the child one bit. A petulant child, to my mind, is often quite as attractive as one in its sunniest humour. The child who is now put out, and is sitting sulking in the other yard, will as soon as he hears the hurdy-gurdy strike up in our yard once more, playing all the old tunes with a few new ones thrown in,—he will, I say, soon smile and give way, and will come back to his old friends, and will dance once again to the old tunes and to the new ones also as happily as before, to his own interest and to the good of those about him.

"There is only one point to which I now wish to refer, and that is what was mentioned by the Hon'ble Mr. Apcar. The Hon'ble Member in charge of the Bill pointed out that in the English law there is no appeal. I understood the Hon'ble Mr. Apcar to say that this is reasonable, because an order in England which was issued by the Local Government Board was issued by the Secretary of State. Does he mean to imply that an order issued by the Government of Bengal after a proper investigation by its officers, and after submission to yourself, Sir, the Lieutenant-Governor, will not have at least as much justice in it as an order issued by the Secretary of State at home? I feel sure the Hon'ble Member does not mean to imply that, and I feel quite sure also that the orders which may be issued under the control sections of this Act will be taken in the right spirit, as being orders which will tend to perfect the good results which we hope will flow from the operations of the Municipality."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"In the first place, Sir, I should like to ask my hon'ble friend who has just sat down whether the petulant children he has referred to in his speech are the gentlemen who have resigned their seats in the Corporation. If they are the petulant children

referred to by my hon'ble friend, he will find, if he judges them by the criterion he has himself laid down, that they are not children, but that they are grown-up men who have acted on a difficult occasion with a full sense of the responsibilities of their situation. And what is more—I desire to impress this fact upon the attention of my hon'ble friend—in acting in the way they have done they have had behind them the full, the unanimous support of the enlightened, the educated, and the advanced section of the community to which they belong. My hon'ble friend may treat them as children, but they have acted as responsible persons who were confronted with a grave crisis which they have met in a manner which has received the unstinted approval of their constituents.

"In a very different tone and manner has my hon'ble friend referred to other matters in regard to which I am sorry to have to say that I must also challenge his conclusions. My friend has remarked, with regard to the powers of control exercised by the Local Government Board for the various English municipalities, that these powers have been steadily increased. I should like to ask my hon'ble friend whether along with the increased powers of control assumed by the Government there has been any change in the constitution of the various municipalities. I, for my part, would not have objected to these powers of control if the constitution had been left untouched. But what I object to is this—you mutilate the constitution; you make the constitution an official constitution, and at the same time you greatly extend the powers of control which you already possess, and which, as a matter of fact, you have never exercised. I think the position taken up by my hon'ble friend is a strangely illogical position.

"My hon'ble friend has referred to the increase in the mortality, and he seems to be of opinion that this increase of mortality in Calcutta is due to the negligence of the Municipality and partly to the negligence of the Government in not enforcing the provisions of the municipal law. Here, again, I am sorry I cannot agree with my hon'ble friend. If my hon'ble friend will read the Resolutions of the Government upon the Administration Reports of the Corporation, and especially that particular Resolution of the Government bearing the signature of Mr. Risley in connection with a communication addressed to the Government by the Chamber of Commerce, he will find that the Government completely exonerates the Corporation from being in any way responsible for the increase in the rate of mortality. The Chamber of Commerce complained of the increase in the rate of mortality; they drew special attention to the increase in the rate of mortality in regard to typhoid and enteric fevers; and the Government pointed out that, though there had been an increase in the rate of mortality due to fever, it was due to general causes prevalent over the whole Province. It was part of a universal increase not confined to the City of Calcutta. And, what is more, the Government went out of its way to say that probably the sanitary works of the Corporation served as a protection against a further rise in the mortality.

"There was a remark made by the Hon'ble Mr. Buckley, and I must say that I am surprised that a remark of that kind should have been made by a responsible administrator in the position of my hon'ble friend. What he said in substance was this: no matter whether you enforce the sections relating to control or not; if you have the sections embodied in the law, that is all that is necessary; they will exercise a moral influence over the Municipality. I understand the whole of our complaint at the present moment to be that, these provisions being embodied in the law, they were never enforced—they remained a dead letter, and they failed to exercise even the semblance of anything like moral pressure upon the proceedings of the Corporation; and, with these considerations before him, I am surprised that my friend should have urged a proposition of this kind before this Council.

"I must reciprocate the kindly and sympathetic spirit in which my hon'ble friend Mr. Oldham has addressed to me certain remarks in connection with a certain course of action which my friends and myself have thought fit to take on a recent occasion; but I think my friend is labouring under a misapprehension.

I have not passed by anticipation an adverse judgment upon those who, in March or April next, may think fit to be associated with the municipal administration of Calcutta. Sir, here I am a member of Your Honour's Council, bound by my duties to give faithful, loyal and adequate expression to the sentiments of the public so far as those sentiments can be ascertained by me. When I said that no self-respecting member of the Hindu community will consent to share in the municipal administration of Calcutta that is about to be inaugurated, I not only gave expression to my own opinion, but I expressed the universal feeling of the Hindu community of Calcutta. My hon'ble friends in this Council have no conception of the depth and intensity of the feeling which this Bill has awakened. They do not know the Indian community. It may be their fault or it may be our fault, but there is the fact that they are not acquainted with the deep under-currents of feeling and opinion which at the present moment are stirring the minds of the native community; and the one thought that is uppermost in the community is a sense of the gravest disappointment that the Government of this country should have felt it necessary to pass into law a Bill of this nature; and it is in consequence of that disappointment that we have taken the action to which my friend has referred. I will not, Sir, dilate further upon that subject. It is a controversial matter, and no useful purpose is to be served by referring to it further in this Council.

"I desire, however, to correct one or two mistakes which the Hon'ble Member in charge of the Bill has made. In the attempt to correct my mistakes, may I be permitted to remind him that he has fallen into one or two mistakes of his own? The Hon'ble Member, I think, has given us to understand that under the English Public Health Act the Local Government is permitted to contract loans on behalf of the corporate bodies, and further to raise the rates. I do not read the sections of the English Public Health Act at all in that way, and I think, after I have stated my case, Members of this Council will come to the conclusion that the English Public Health Act does not confer the power of raising the rates upon the Local Government Board. I will give you the words of section 302, which is as follows:—

'302. Any principal money or interest for the time being due in respect of any loan under this Act made for payment of the expenses incurred or to be incurred in the performance of the duty of a defaulting local authority shall be taken to be a debt due from such authority, and, in addition to any other remedies, may be recovered in the manner in which a debt due from a defaulting authority may be recovered in pursuance of the provisions of this Part of this Act. The surplus (if any) of any such loan, after payment of the expenses aforesaid, shall, on the amount thereof being certified by the Local Government Board, be paid to or to the order of the defaulting authority.

'"Expenses," for the purposes of the provisions of this Part of this Act relating to defaulting local authorities, shall include all sums payable under those provisions by or by the order of the Local Government Board or the person appointed by that Board.'

"My friend has asked me to read this in connection with section 209. Section 209 is as follows:—

'In the district of every urban authority whose expenses under this Act are directed to be defrayed out of the district fund and general district rate, there shall be continued or established a fund called the District Fund. A separate account, called "the District Fund account," of all moneys carried under this Act to the account of that fund shall be kept by the treasurer of the urban authority, and such moneys shall be applied by the urban authority in defraying such of the expenses chargeable thereon under this Act as they may think proper.'

"Sir, if the expenses are not covered by the debt, the rates will have to be raised. I think that is how the Hon'ble Member in charge of the Bill reads the section. But who raises the rates? Not the Local Government Board. The rates have to be raised by the local body itself."

The Hon'ble Mr. Baker:—"Certainly not. If you look at section 300 of the Public Health Act, you will find it is the person appointed by the Local Government Board. I can assure the Hon'ble Member that what I have said is perfectly correct."

The Hon'ble BABU SURENDRANATH BANERJEE :—"You have not got there the power of raising. This is what section 300 says:—

'If the defaulting authority refuses to pay any such sum, with costs as aforesaid, for a period of fourteen days after demand, the Local Government Board may, by order, empower any person to levy by and out of the local rate such sum, etc.'

"That does not mean to raise the rates. 'Levy' means to collect the rates."

The Hon'ble MR. BAKER :—"'Levy' does not mean only to collect. It also means to raise."

The Hon'ble MR. HANDLEY :—"'Levy' certainly means 'to raise.' It is derived from the French *lever*, to raise."

The Hon'ble BABU SURENDRANATH BANERJEE :—"These English statutes are so carefully worded that, if the object was to 'raise' or 'increase' the rates, the word 'increase' would appear. There is not the slightest doubt in my mind that if the object was to give the Local Government Board power to increase, the word 'increase' would have been there. 'Levy' means 'to collect,' and I think I have made out my case that power is not given to raise the rates. Will the Hon'ble Member in charge of the Bill consent to the word 'levy' being substituted in the Bill for the word 'raise'?

The Hon'ble MR. BAKER :—"No. The whole of this section is worded differently. We have expressly provided that the rates may not be raised above the legal maximum. I can assure the Hon'ble Member that what I said was entirely correct. The meaning of the English statute is that the person who is appointed by the Local Government Board may levy a local rate for the purpose of carrying out the work which is in default. That local rate is entirely over and above the ordinary rates levied by the local authority."

The Hon'ble BABU SURENDRANATH BANERJEE :—"Would you object to drop the words 'or increase'?"

The Hon'ble MR. BAKER :—"I object altogether to any change in the section."

The Hon'ble BABU SURENDRANATH BANERJEE :—"Then I am powerless. Then, Sir, section 26D (*now* 22) of the Bill follows the lines of section 293 of the Public Health Act. I venture again very respectfully, Sir, to point out that the section in the Bill goes much further. I am sorry to have to take up the time of the Council, but it is necessary to show that all the logic and reason is on our side, and that all the weight of authority and power of votes is on the other side. There is a very considerable difference between section 293 of the Public Health Act and section 26D (*now* 22) of the Bill. Section 293 is as follows:—

'The Local Government Board may from time to time cause to be made such enquiries as are directed by this Act, and such enquiries as they see fit in relation to any matters concerning the public health in any place, or any matters with respect to which their sanction, approval or consent is required by this Act.'

"Section 26D (*now* 22) of the Bill is as follows:—

'26D (*now* 22) (*1*) The Local Government may depute any officer or officers to make an inspection or examination of any department, office, service, work or thing under the control of any municipal authority, and to report to it the result of such inspection or examination.

'(*2*) Any officer so deputed may, for the purpose of making such inspection or examination, inspect the condition of any part of Calcutta, and may require the Chairman—

(*a*) to produce any record, correspondence, plan or other document which is in his possession or under his control as Chairman, or which is recorded or filed in his office or in the office of any municipal officer or servant,

(*b*) to furnish any return, plan, estimate, statement, account or statistics, or

(*c*) to furnish a report by himself, or to obtain a report from any head of a department subordinate to him and furnish the same with his own remarks thereon.

'(*3*) Every requisition made under sub-section (*2*) shall be complied with by the Chairman without unreasonable delay.'

"I do not think that the Hon'ble Member in charge of the Bill can say that the one is based on the other. The section in the Bill goes very much beyond the section in the Public Health Act.

"I have to make some remarks as to section 26E (*now* 23). The Hon'ble Member in charge of the Bill was pleased to say that section 26E (*now* 23) is based upon section 299 of the Public Health Act. I will read the section and point out that the provisions of the Bill are much more comprehensive. Section 299 is as follows:—

'Where complaint is made to the Local Government Board that a local authority has made default in providing their district with sufficient sewers or in the maintenance of existing sewers or in providing their district with a supply of water, in cases where danger arises to the health of the inhabitants from the insufficiency or unwholesomeness of the existing supply of water, and a proper supply can be got at a reasonable cost, or that a local authority has made default in enforcing any provisions of this Act which it is their duty to enforce, the Local Government Board, if satisfied, after due enquiry, that the authority has been guilty of the alleged default, shall make an order limiting a time for the performance of their duty in the matter of such complaint.

'If such duty is not performed by the time limited in the order, such order may be enforced by writ of mandamus, or the Local Government Board may appoint some person to perform such duty, and shall, by order, direct that the expenses of performing the same, together with a reasonable remuneration to the person appointed for superintending such performance, and amounting to a sum specified in the order, together with the costs of the proceedings, shall be paid by the authority in default; and any order made for the payment of such expenses and costs may be removed into the Court of Queen's Bench and be enforced in the same manner as if the same were an order of such Court.

'Any person appointed under this section to perform the duty of a defaulting local authority shall, in the performance and for the purposes of such duty, be invested with all the powers of such authority other than (save as hereinafter provided) the powers of levying rates; and the Local Government Board may from time to time by order change any person so appointed.'

"Therefore, I think I am right in maintaining this view: that the provisions of the Bill, notwithstanding the elaborate and the very able explanation of the Hon'ble Member in charge of the Bill, go very much beyond the provisions of the Public Health Act. My hon'ble friend may shake his head, but here are the facts. Here are the sections. It is a matter in regard to which a difference of opinion is impossible; and, having compared the sections of the Public Health Act with the sections of the Bill, I am constrained to come to the conclusion that the provisions of the Bill are far more drastic than the provisions of the Public Health Act. The Public Health Act deals only with matters relating to public health; the provisions of the Bill deal with all matters relating to municipal administration.

"I do not know that I should be justified in taking up more of your time. We have had an exhaustive discussion upon this most important subject. The name of Sir Henry Harrison has been taken freely in connection with this and other matters relating to this Bill, and he has been cited as an authority. As I have said already, he stands in the unique position of being one who is cited as an authority both by the friends as well as by the opponents of the Bill. I think, Sir, the opponents of the Bill are really in sympathy with his utterances. If Sir Henry Harrison were living now, I know what his feelings and opinions would have been in regard to this Bill. I never knew a stauncher friend of local self-government, and I am perfectly certain that his eloquent words would have been heard the loudest amid the storm and stress of this discussion. If Sir Henry Harrison's authority could really be adduced in support of these stringent provisions of the Bill, does it not stand to reason that when he legislated in 1888 he would have embodied similar provisions in the Act of 1888? He did nothing of the kind, and, therefore, I think it is hardly fair to the honoured memory of Sir Henry Harrison that his name should be quoted in support of stringent provisions which he himself would have been the first to repudiate.

"Then, as to 'information' upon which action is to be taken, is it to be public information?"

The Hon'ble MR. BAKER:—"Certainly not. It is worded in this way, 'on receipt of any information'."

The Hon'ble BABU SURENDRANATH BANERJEE:—"Suppose the Chairman and the Corporation have a fight about certain matters, and the Chairman writes, say, a demi-official letter to the Secretary to the Government, would that be 'information' according to this Bill"?

The Hon'ble MR. BAKER:—"Yes, any information of any kind."

The Hon'ble BABU SURENDRANATH BANERJEE:—"In that case I protest. It ought to be public information. I do not think the Government ought to act upon information of a private character."

The Hon'ble MR. BAKER:—"The information is only to enable the Government to institute an enquiry. It may obviously be information of any kind, coming from any source, even an anonymous petition."

The Hon'ble THE PRESIDENT:—"The better plan will be to put to the Council the alternative motions: the one which stands in the name of the Hon'ble Babu Surendranath Banerjee and the other one, that of the Hon'ble Mr. Baker, proposed as a substitute."

The Hon'ble BABU SURENDRANATH BANERJEE's amendment No. 83* being put, the Council divided as follows:—

Ayes 5.	*Noes 12.*
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Buckley.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Mr. Handley.
The Hon'ble Mr. Apcar.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Mr. Mackenzie.
	The Hon'ble Mr. Spink.
	The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
	The Hon'ble Mr. Oldham.
	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

So the amendment was lost.

The Hon'ble MR. BAKER then moved that the following words be inserted after the words "the Local Government may," in line 1 of section 26D (*now* 22), namely:—

"on receipt of any information."

The amendment was put and agreed to.

The Hon'ble BABU SURENDRANATH BANERJEE's amendments Nos. 84, 85, 86, 87, 88, 92, 93 and 94† being severally put, the Council divided in each case as in the case of amendment No. 83.

So the amendments were lost.

The Hon'ble BABU SURENDRANATH BANERJEE's amendment No. 92,‡ relating to section 26F (*now* 24), clause (*c*), having been lost, the Hon'ble MR. APCAR, by leave of the Council, withdrew his amendment (No. 96) that in section 26F (now *24*), clause (*c*), the words from "and, if necessary," to the end of the clause be omitted.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 26E (*now* 23), line 14, for "the municipal authorities, or any of them," be substituted "such municipal authority".

* Printed on p. 43, *ante*.
† Printed on pp. 43 and 44, *ante*.
‡ Printed on p. 44, *ante*.

He said:—"It requires considerable courage to move any amendment in these control sections after the statement made by the Hon'ble Member in charge of the Bill that they have been very carefully considered by the Government of Bengal and have received the approval of the Government of India. My amendments, however, do not touch any questions of fundamental principle. They deal with matters of detail, and I am hoping that they may not receive the same amount of crystallised opposition. Section 26E (*now* 23), sub-section (*1*), clause (*a*), provides that 'when any of the duties imposed on any municipal authority by or under this Act has not been performed or has been performed in an imperfect, inefficient or unsuitable manner,' the Local Government may direct the municipal authorities, or *any of them*, to do certain things.

"My amendment is that for the words 'the municipal authorities or any of them' be substituted 'such municipal authority,' so that the section as amended will read 'the Local Government may by written order direct such municipal authority' to do those things. It seems to me that this is the logical consequence of the fundamental principles with which we started: that there are to be three co-ordinate authorities, each of which is to have certain powers which it is to exercise without control and interference by the others. Take a concrete case. Suppose the General Committee have failed to do something which they are by the provisions of this Act required to do. Under section 26E (*now* 23), as it stands at present, it would be open to the Local Government to direct, not necessarily the General Committee, but the Corporation, to do the necessary acts without even giving the General Committee an opportunity of explaining or defending their action. This in fact appears to be inconsistent with what follows. It seems that the Local Government may direct the municipal authorities to do one of three things—either to make arrangements to the satisfaction of the Local Government for the proper performance of the duties, or to make financial provision to the satisfaction of Government for the performance of any such duty, or to show cause why arrangements should not be made. Suppose the Local Government, instead of asking the General Committee, asks the Chairman to show cause why such an arrangement should not be made? The Chairman could very well say 'It is no part of my duty. I am not acquainted with the details.' The General Committee should in such a case be asked, in the first instance, to show cause or to make the necessary provisions. Then section 26F (*now* 24) provides that, if neither cause is shown nor the necessary directions carried out, the authority in default may be superseded; but the supersession comes only if, after warning, no satisfactory explanation is given or the necessary precautions are not taken. Therefore, it seems to me that section 26E (*now* 23) as it stands makes it impossible for any municipal authority in default to be superseded without being given an opportunity of showing cause or of taking the necessary measures. It is a section which ought not to be allowed to stand. I venture to think that it would be logical to say that in the first instance notice is to be served not upon 'any one of the municipal authorities' but upon 'the municipal authority in default.'"

The Hon'ble Mr. Baker said:—"I am sorry I cannot accept this amendment. Many of the duties that have to be performed have to be carried out by the conjoint action of all three municipal authorities or by two of them. Therefore, the order which is to be issued by the Local Government must be directed to all the municipal authorities who may be concerned in carrying it out. For instance, if an order related to the improvement of an unhealthy area, all three municipal authorities would be concerned in giving effect to that order. The Corporation would have to provide the funds, the General Committee would have to prepare the plans, and the Chairman would have to carry out the work. It is impossible to hamper the Government by restricting the order to the individual authority which was originally in default. No doubt the Hon'ble Member will say it is very hard that a municipal authority should be made to suffer because of the default of one of the other municipal authorities. I can only say that it is a law of nature unfortunately that the misdeeds of one person affect other people besides himself. The fact is that the idea which

underlies this amendment is that the ruling principle of the control sections is the idea of punishment. That is entirely incorrect. The ruling principle is not punishment; it is efficiency. The object of Government is to get the work carried out, and for that reason it is necessary that Government should have power to direct its order, not merely to the particular municipal authority who might happen to be in default, but to all others whose co-operation might be necessary for the carrying out of the work."

The motion was put and lost.

The Hon'ble DR ASUTOSH MUKHOPADHYAYA also moved (amendment No. 90) that in section 26E (*now* 23), after line 15, the word "either" be added; that clauses (*i*) and (*ii*) be amalgamated; and that clause (*iii*) be numbered (*ii*).

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA also moved (amendment No. 97) that in section 66F (*now* 24), line 3, the words or "clause (*ii*)" be omitted, and that in line 4 for the words "and cause has not" the words "nor has cause" be substituted.

He said:—"These amendments really relate to a matter of drafting, I have no desire to conceal the fact that I have felt some difficulty in making out the meaning of the section as it stands, but I believe I have succeeded in attaching a meaning to it. Clauses (*i*), (*ii*) and (*iii*) are not, as I understand them, co-ordinate. Clause (*iii*) provides that cause is to be shown to the satisfaction of the Local Government if neither adequate arrangement nor financial provision is made for the proper performance of a function in respect of which any municipal authority is directed by the Government to take action. In other words, the section means that the Local Government may require a municipal authority in default to do one of two things, not one of three things. The Local Government may require that authority either to make arrangements or to make financial provision as the necessity of the case may require; or the Local Government may require such authority to show cause why action should not be taken; that is to say, as I understand it, it is not open to the municipal authority in default to decide whether the arrangement is to be made to the satisfaction of the Government, or whether merely financial provision is to be made and, as an alternative to either of these, to show satisfactory cause. Therefore, I think it would be better if clauses (*i*) and (*ii*) were amalgamated, and clause (*iii*) put as an alternative to the whole. And this brings me to section 26F (*now* 24), sub-section (*1*), which is as follows:—

'If, within the period fixed by any order issued under section 26E (*now* 23), any action directed under clause (*i*) or clause (*ii*) of that section has not been duly taken, and cause has not been shown as aforesaid, the Local Government may,' &c.

"I suggest that the words 'or clause (*ii*)' be omitted, and for the words 'and cause has not' I would substitute 'nor has cause'; because, as I understand it, the showing of cause is an alternative to doing the things provided in clauses (*i*) and (*ii*). It is not required that cause is to be shown in addition to action taken under clauses (*i*) and (*ii*). I had considerable difficulty in making out the meaning of the section, but I believe the interpretation I have put on it is the correct one."

The Hon'ble MR. BAKER said:—"The Hon'ble Member has quite correctly described the meaning of section 26E (*now* 23), and I am bound to say I feel the difficulty which he has described about the arrangement of clauses (*i*), (*ii*) and (*iii*). But it is a pure matter of drafting, as he will recognise, and the Secretary of the Council considered that this arrangement is preferable to the one which was suggested in the amendment. That is the only reason I can give for not assenting to this amendment. As regards the subsequent amendment, No. 97, that falls into two parts. The first is dependent or consequential on amendment 90. The second part—that the words 'nor has cause' should be taken instead of 'and cause has not'—I think is not correct. I think the words 'and cause has not' correctly express the meaning. Both alternatives have to be excluded, and if the words used were 'nor has cause,' that would not be strictly the case.

I think, if the Hon'ble Member will, as regards amendment 90, refer to the Secretary, he will see what the reasons are for which the Secretary considers that the drafting in the Bill is preferable. If you, Sir, have no objection, amendment 90 might stand over. I myself rather share the view of the hon'ble mover of the amendment, but, not being an expert draftsman, I am not in a position to press the point."

The Hon'ble THE PRESIDENT said:—"Let the mover consult the Secretary, and we will take up the amendment again to-morrow."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I want to point out in this connection that it would be as well to make the drafting clearer than what it is. We have, as members of the Corporation, experienced great difficulty in administering the present Act where alternatives of this kind have occurred. For instance, a notice is issued upon a party to excavate or fill up or de-water a tank. Now, who is to decide what course of action is to be taken? Section 315 of the present Act provides—

'When any well, tank or marshy ground, or any waste or stagnant water, whether within any private enclosure or not, appears to the Commissioners to be injurious to health or to be offensive to the neighbourhood, the Commissioners may require, by notice in writing, the owner of the same to cleanse or fill up such well, tank or marshy ground with suitable material, or to drain off or remove such stagnant water; and, if he shall refuse or neglect to comply with such requisition during one month from the service thereof, the Commissioners may enter into the said premises and do all necessary acts for all or any of the purposes aforesaid as they shall think fit;

and the expenses thereby incurred shall be paid by the owner, and until so paid the Commissioners may retain possession of the land or tank or the site of such tank and utilise the same for public purposes.'

"Who is to decide the point? Is the Corporation to decide, or the party on whom the notice is served? I think the matter ought to be made clearer. I think a matter of this kind, if left in doubt, would be attended with considerable administrative inconvenience."

The Hon'ble THE PRESIDENT:—"We will postpone the consideration of these two questions until to-morrow."

The further consideration of amendments Nos. 90 and 97 was accordingly postponed till the next meeting of the Council.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 26E (*now* 23), sub-section (*3*), after the word "petition" the words "unless the Government of India, upon receipt of the petition, so direct" be added.

He said:—"Sub-section (*3*) as it now stands reads as follows:—

"No action directed by any such order shall be suspended in consequence of the transmission of any such petition."

"This is in accordance with the fundamental principle that the mere preferring of an appeal to a higher tribunal is not necessarily to lead to stay of proceedings; but it is an equally elementary principle recognised by the Courts, not only of this country, but also of England, that if an appeal is preferred, an application for stay may be made to the appellate authority, and if such authority is satisfied that there are good grounds for the appeal, it may stay proceedings. I think no practical inconvenience will be caused if my amendment is carried. In substance, it means that as soon as a petition of appeal is transmitted to the Government of India, application may be made to that Government for an order that proceedings may be stayed, and we may take it that unless the Government of India is satisfied that there are good grounds for the appeal, they will not direct such a stay."

The Hon'ble MR. BAKER:—"I am ready to accept the amendment."

The motion was then put and carried.

The Hon'ble MR. APCAR moved that in section 26F (*now* 24), sub-section (*1*), line 4, for the word "and" the word "or" be substituted.

He said:—"The preceding section, 26E (*now* 23), is with regard to the power to require a municipal authority to take action as in clauses (*i*) and (*ii*). Clause (*i*) empowers the Local Government to direct the municipal authorities to perform certain duties imposed on them, and clause (*ii*) empowers the Government to direct the said authorities to make financial provision for such performance. Then, as I read it, the alternative of those two clauses is to show cause, and therefore I have suggested that instead of the word 'and' we should have 'or,' because the first two clauses relate to action being taken, while the alternative is cause being shown. That is the reason why I have suggested this verbal amendment, in order that the matter might be better understood."

The Hon'ble MR. BAKER said:—"To use the word 'or' instead of 'and' would have exactly the opposite effect to what the Hon'ble Member intends. The intention is that both these alternatives must have failed before the Local Government can take action. The two alternatives are, first, that the action directed by clauses (*i*) and (*ii*) has not been taken, and, second, that cause has not been shown. The meaning is that the Local Government may only intervene and appoint some one to do the work if both alternatives have failed: if the Corporation have neither carried out the order nor shown cause to the contrary. Therefore, the correct word to use is 'and'. It joins two alternatives together. If the word 'or' were used, the result would be that the Local Government could intervene even if the work had already been carried out, provided cause had not been shown, or it could intervene if cause had been shown and the work had not been carried out."

The Hon'ble MR. BOLTON said:—"I do not see that any alteration is needed in the section. 'And' is the proper word to use."

The amendment was then, by leave of the Council, withdrawn.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 26F (*now* 24), sub-section (*2*), after the words "municipal authority" the words "so superseded" be added.

He said:—"I need not detain the Council long over this amendment, as it is governed by the same principles as a previous one, upon which an adverse decision has been recorded. The sub-section, as it stands at present, reads:—

'The person appointed under sub-section (*1*) may, for the purpose of taking the action directed as aforesaid, exercise any of the powers conferred on any municipal authority by or under this Act which are specified in this behalf in the order issued under sub-section (*1*).'

"I propose to make the sub-section read:—

'...may...exercise any of the powers conferred on any municipal authority so superseded...'

"I do not think there can be any answer to this, except perhaps the one suggested by the Hon'ble Member in charge of the Bill that one man ought to suffer for the misdeeds of another."

The Hon'ble MR. BAKER said:—"I cannot agree to this amendment. I did not suggest that one man ought to suffer for the misdeeds of another. I said it was unfortunately a law of nature that frequently one man had to suffer for the misdeeds of another, and this is one of the cases in point. The *rationale* of this amendment is the same as that of the Hon'ble Member's previous amendment. The idea is that there is some notion of punishment running through the whole of this section. That is not the case at all. He thinks Government should only confer on its agent the powers of the particular municipal authority which was in default. That would be perfectly right and proper if the appointment of an agent to carry out the work were intended as an act of punishment; but it is not so. The sole object of Government in exercising these powers under these sections is to promote efficiency and to secure that the work which is in

default shall be carried out. For that reason, it may be necessary to give to the agent more extensive [illegible] exercised by the particular authority in default."

The motion was then put and lost.

SECTION 26.

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I am going to suggest that the following amendments might be taken together, because they all refer to the Deputy Chairman."

No. 99 (brought forward by the Hon'ble BABU SURENDRANATH BANERJEE): that section 28B (*now* 26) be omitted;

No. 100 (brought forward by the Hon'ble BABU SURENDRANATH BANERJEE):—

(*1*) that before the words "Local Government" the words "Corporation with the approval of the" be inserted in line 1 of sub-section (*1*) of section 28B (*now* 26), and

(*2*) that before the words "Local Government" the words "Corporation with the approval of the" be inserted in line 3 of sub-section (*2*) of section 28B (*now* 26);

No. 101 (brought forward by the Hon'ble MR. APCAR): that section 28B (*now* 26) be omitted.

He said:—The object of these amendments is in the first instance to dispense with the necessity of providing for the appointment of a Deputy Chairman in the Bill. I do not consider it is necessary that we should specifically legislate in this behalf. But, Sir, if it should be the opinion of this Council that such a provision should be made, then I say that the appointment should rest with the Corporation. The Corporation should appoint a Deputy Chairman subject to its discretion and subject to the approval of the Local Government. My first contention is that it is not necessary to make any provision for this appointment in the Bill; and here I am fortified by the testimony of recent facts and the arguments which such testimony affords. At the present moment the Corporation does not possess under the law the power to appoint a Deputy Chairman. The present Act makes no provision for such an appointment. But, as a matter of fact, we have been appointing a Deputy Chairman from time to time during the plague. We may call him Deputy Chairman or not; but we have been making appointments of Covenanted Civilians who have acted as Personal Assistants to the Chairman. Therefore, I say that, without a provision of this kind, we have been making appointments of Deputy Chairmen. During the time of the plague, when Mr. Bright was overburdened with work, he suggested that he should have a Personal Assistant, and we gave him one. Therefore, I say, there is absolutely no necessity for making a distinct and specific provision in the Bill for the appointment of a Deputy Chairman. But if the Council has made up its mind that there should be such a provision, then I would invite the Council to follow the Bombay Act, to which we are so largely indebted. Let me read to you section 55 of the Bombay Act:—

'(*1*) Subject to confirmation by the Governor in Council, the Corporation may at any time and from time to time appoint a person to be a Deputy Municipal Commissioner, if it shall appear to it expedient so to do.

(*2*) Every person so appointed shall be subject to the same liabilities, restrictions and conditions to which the Commissioner is subject.'

"And the salary is fixed entirely by the Corporation without reference to Government. Then section 58 of the Bombay Act provides:—

'A Deputy Municipal Commissioner shall receive such monthly salary, not exceeding Rs. 1,500 and not less than Rs. 1,200, as the Corporation shall from time to time determine.'

"I suggest that the provisions of the Bombay Act should be introduced and in fact I do not even go so far as the provisions of the Bombay law; but I recommend, in the matter of fixing the salary, that the Corporation should

fix it subject to the approval of the Local Government. In Bombay the salary is fixed by the Corporation, without reference to the Governor in Council; therefore, Sir, my amendment does not even go so far as the Bombay Act, and, under the circumstances, it ought to be accepted by the Council. There is a very strong reason why, in a matter of this kind, the Head of the Local Government should make the Corporation rather than the Municipal Secretary his adviser. I think it is a matter of the utmost importance that the Corporation should be permitted to say what it has got to say, and I will refer to a recent instance in illustration of my contention. Your Honour's Government was pleased to recommend the other day to the Corporation the propriety of appointing a Personal Assistant to the Chairman, in view of the disorganised state of the Conservancy Department, and with a view to more satisfactory arrangements being made in connection with that Department. The matter came up before the General Committee. It was carefully considered, and we all came to the conclusion that a Personal Assistant for the supervision of the Conservancy Department was unnecessary. Mr. Bright agreed in that opinion. We felt that what was needed for the Conservancy Department was, not the addition of a supervising officer, but an addition to the menial staff: coolies, carts, bullocks, peons, and so forth. Suppose the Government and the Government alone had the power to make this appointment. The Corporation would not have been consulted, and an officer, upon a high salary, would have been appointed to perform a duty for which no one need have been appointed. Therefore, the intervention of the Corporation in a matter of this kind is likely to prevent mistakes which might otherwise be committed. I think it is a safeguard, and surely the Corporation, which is entrusted with such responsible functions, ought to be taken into confidence in the matter of the appointment of a high officer of the status of the Deputy Chairman."

The Hon'ble Mr. Apcar said:—"My amendment is in identical terms with the first amendment of my hon'ble friend Babu Surendranath Banerjee, and I have no desire to take up the time of the Council in repeating what has been stated by him. The Corporation have now got the power of appointing a Deputy Chairman, and I think they ought to be allowed to judge whether a Deputy Chairman is necessary or not. It may be that Government will be appointing a Deputy Chairman when there is no need for him. The instance referred to by the Hon'ble Babu Surendranath Banerjee with regard to the appointment of a conservancy supervisor is in point. The conservancy arrangements depend on getting the proper number of drivers, bullocks, &c., and I do not see how the Deputy Chairman can help in that. So that it is seen at once that the Government are not always in the best position to judge whether a Deputy Chairman should be appointed or not."

The Hon'ble Mr. Apcar also moved (amendment No. 102):—

(*1*) that in section 28B (*now* 26), sub-section (*1*), after the word "The' in line 1, the words "Corporation with the approval of the" be inserted;

(*2*) that in section 28B (*now* 26), sub-section (*1*) and sub-section (*2*), for the word "Deputy" the words "Personal Assistant to the" be substituted; and

(*3*) that in section 28B (*now* 26), sub-section (*2*) after the words fixed by," the words "the Corporation with the approval of" be inserted.

He said:—"It strikes me that a more appropriate term would be 'Personal Assistant to the Chairman.' With regard to the Deputy Chairman, if it had been that he was to be the personal adviser of the Chairman, with regard to engineering questions, &c., as against the spending department, and was to possess qualifications as an architect, I should have had very much less objection to the proposal."

The Hon'ble Mr Baker said:—"The reason why Government considers it essential to have the power of appointing a Deputy Chairman is briefly that

since 1888-89 there has been a very large increase of work in almost every branch of the administration, and it is every year becoming more and more difficult for the Chairman to attend to it properly.

"At the outset it should be pointed out that the Act of 1888 itself made a large addition to the area of Calcutta and to the work of the Chairman. By that Act the suburbs were incorporated in Calcutta, thus increasing the area by 13 square miles and a population of 178,000. It is obvious that this large addition to the Chairman's charge must have involved a great increase of work, and I only refrain from dwelling upon it because it was accompanied by the separation of the office of Commissioner of Police, hitherto held by the Chairman in addition to his own duties. The relief to him was nothing like so great as the addition to his work, because in practice the Calcutta police was administered by the Deputy Commissioner. But I will not lay any stress on the point, and will take for my starting point the first year after the present Act came into force.

"Comparing 1888-89 with 1898-99, therefore, we find that during these ten years the revenue of the Corporation has risen from 43 lakhs to 54¾, or by 27 per cent. The length of roads has risen from 184 miles to 201 miles, or by nearly 10 per cent., while the amount expended on their up-keep has risen from Rs. 1,72,000 to Rs. 2,70,000, or by 57 per cent. The filtered water-supply has risen from 16 million gallons a day to 20½ millions, or by 28 per cent., and the unfiltered supply has been increased from 2¾ million gallons to 4¾ millions, or by 72 per cent. The number of streets supplied with filtered water has risen by 72 per cent., and of those supplied with unfiltered water by 63 per cent. The length of brick sewers has risen by 13 per cent., and that of pipe sewers by 7 per cent., while they are flushed and cleansed twice as often as before in the former case, and 2½ times as often in the latter. Meanwhile the quantity of refuse removed daily from the town has increased by no less than 70 per cent. The correspondence has increased from about 10,000 letters a year to more than 20,000, *i.e.*, it has just about doubled. The number of files submitted to the Chairman has risen from 4,039 to 8,483. Under the Act of 1876, building applications, a very fertile source of work and trouble, were practically unknown. These have developed enormously, there having been only 277 during 1888-89, whereas in 1898-99 there were no less than 4,199. Lastly, during these ten years there has been spent, on account of works charged to capital, no less than 167 lakhs of rupees. This vast sum has been devoted to the extension of the water-supply, both filtered and unfiltered; to the new sewage outfall; to large drainage works both in the town and suburbs; to the reclamation of bustees; and to the Harrison Road. It is manifest that this great outlay, sunk in works of permanent utility and improvement, must have left a huge legacy of work behind it. When a great scheme of drainage or waterworks is carried out, the Chairman's work does not cease when the last contractor's accounts are made up and the final bills are paid.

"Add to all this the fact that year by year a higher standard of efficiency is demanded in every branch of the administration, and it will, I think, be admitted on all hands that the burden of supervision has grown enormously in the past, and is now beyond the power of one man to cope with.

"During the whole of this period no assistance has been given to the Chairman in the superior or personal staff. During the present year, when plague work was heavy, the Corporation sanctioned a Personal Assistant as a temporary measure. But this officer has no legal status, and can exercise none of the Chairman's powers; and can never render assistance in the form in which it is most required.

"It is for these reasons that Government is satisfied that it is no longer safe to leave the Chairman to grapple with his growing burden of work without assistance. It is the Lieutenant-Governor's intention, as soon as the Bill comes into force, to appoint a Deputy Chairman at once for a period of two years. We hope that under the new constitution the Chairman will obtain some relief by no longer being compelled to do his work twice or three times over. If this should turn out to be the case to any considerable extent, it will be possible to dispense with the Deputy Chairman hereafter, and the section is so framed that this course will be open. But I must distinctly explain that this is

a possibility, and not a probability: and I give no pledge whatever that will interfere with the discretion of Government to act as it thinks fit when the time comes.

"Amendments have been moved to the effect that if a Deputy Chairman is to be appointed, this should only be done at the instance of the Corporation, who should select the officer and fix his pay. It has also been proposed by Mr. Apcar to substitute a Personal Assistant for the Deputy Chairman. The only argument in favour of this course seems to be that in Bombay the matter rests with the Corporation. I cannot regard this as a sufficient ground. The Deputy Chairman is the Deputy of the Chairman. The justification for appointing him, if he is appointed, is that without his aid the Chairman will not be able to discharge the duties imposed on him by the Act—duties I would point out in which he is not subject to the control or interference of the Corporation. It seems clear and logical that the Deputy should be appointed by the same authority which appoints the Chairman himself, and that his pay should be fixed by the same authority which fixes the pay of the Chairman.

"The question is not one of principle, but purely one of expediency. Is it expedient to delegate this power to the Corporation, or should it be retained by Government? I hold that it is not. The decision of the question whether a Deputy is required or not turns on the quantity of work which devolves on the Chairman, and the nature and mass of the details with which he has to cope. I cannot admit that the Corporation is well qualified to decide these questions. Even under the present system, when all acts of the Chairman are subject to constant interference, and all proceedings of Committees require confirmation, they are not well informed as to the quantity and importance of the Chairman's work. We have been told that 95 per cent. of the work done by the General Committee is confirmed without discussion. In these circumstances, what degree of acquaintance with the burden of business is likely to be possessed by the bulk of the Corporation? Under the new system, where the Corporation will be confined, and rightly, to the consideration of large issues, they will be still less able to appreciate the burden that devolves on the executive. On the other hand, the Government is only too familiar with applications for increase of establishment, and is thoroughly accustomed to weigh the evidence on which they are based. It is much more probable that Government will be able to judge correctly and impartially of the necessity for the appointment at any particular moment; and I therefore hold that it should rest with the Government and not with the Corporation."

The Hon'ble Mr. Apcar, in reply, said:—"With regard to what the Hon'ble Member in charge of the Bill said, that the members of the Corporation do not know what work is—I do not know what the newly constituted Corporation may do. I certainly challenge that statement with regard to the Corporation as now constituted. Many of the European members of the Corporation also, I know, study the papers, and among them possibly there is a larger proportion who do not. I do not think, Sir, that the Corporation should have no voice in questions such as these. With regard to the work of the Chairman, I really cannot accept the statement that his work has increased. We have no extra Engineer, nor have we an extra Health Officer. Sir Henry Harrison said they were not required. It was never suggested that we should have an extra Engineer, except a subordinate officer who does local work with regard to the Engineering Department in the suburbs. In these circumstances, I do not think there has been any case made out why there should now be a change. If there is to be a Deputy Chairman, the Corporation can well be trusted to decide when one may be required. I do not think, in a matter such as this, the Government should legislate that this appointment should be made by them."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"I have heard a great deal during the course of this discussion about the enormous quantity of work thrown upon the Chairman. I should like to point out, for the information of the Hon'ble Member in charge of the Bill, that when the amalgamation took place the Corporation offered Sir Henry Harrison the services of a Personal Assistant, but Sir Henry Harrison declined to accept such help. That Personal

Assistant is now in charge of the Warrant Department, the Printing Department and the Loan Department. That Personal Assistant is a most worthy officer, namely, Mr. Owen. Therefore, if Sir Henry Harrison, who had a larger quantity of work thrown upon him than had ever fallen to the lot of any other Chairman,—because the whole of the new arrangements subsequent to the amalgation had to be made by him, his personal attention being needed in a variety of ways,—had deliberately refused to accept the services of a Personal Assistant, where is the need for the appointment of a Personal Assistant to any of his successors who have been relieved of some of that work which Sir Henry Harrison voluntarily imposed upon himself? Being the author of the new sections relating to assessments, Sir Henry Harrison used to hear appeals against assessments Who hears the appeals now? The Vice-Chairman;—and they constitute a very important portion of his work. Therefore, the work of the Chairman has been considerably lightened by reason of these appeals being taken up by the Vice-Chairman. Then, Sir, the work has no doubt increased, but adequate agency has been found for that work. What does the Chairman do? I do not wish in the smallest degree to belittle the work of the Chairman, but it is altogether a portentous myth to say that the work thrown upon the Chairman has been so heavy that some of the Chairmen have been obliged to take leave and that even worse consequences have followed. What is the work of the Chairman now-a-days? He supervises, but he does not and need not go into the details of municipal administration. There is the Assessor, the Engineer, the Vice-Chairman, the Secretary and the Health Officer—the Heads of the great Municipal Departments. These departments are fully equipped, and they lay their reports before the Chairman, and he passes orders. Of course the Chairman has to be in touch with every branch of the administration. But that does not involve hard work; it is more a matter of capacity than work. Therefore, it seems to me that what we want is not so much hard-working men as capable men. For these reasons, I beg to join issue with my hon'ble friend in charge of the Bill in the statement that such a quantity of work has been thrown upon the Chairman since the amalgamation that it is necessary to have a Deputy Chairman. At any rate, the Corporation ought to have the power to decide when a Deputy Chairman is required.

"I must say that I was somewhat taken by surprise at another statement made by the Hon'ble Member in charge of the Bill. He said that the authority that appoints the Chairman ought also to be the authority that should appoint the Deputy Chairman. If that argument is carried to its logical conclusion, the Vice-Chairman should also be appointed by the Government, for the Bill places the Vice-Chairman and the Deputy Chairman exactly upon the same footing; but, as a matter of fact, the Vice-Chairman is not appointed by Government. He is appointed by the Corporation, and it is right and proper that the Corporation should retain this right.

"Now, Sir, I must say one word about the work of the Corporation being done two or three times over. I must demur to any such statement, and I think my hon'ble friend knows that the work is better done, by being done in this way, and he ought to know that it is better done. Fifty to sixty items of business, sometimes more, which have been decided by the Committees, come up before the Corporation; and sometimes at a meeting of not more than three-quarters of an hour all these items are disposed of. And the amount of talk! How many talk! How few speeches are made! The meetings of the Corporation, unless there is any contentious matter, are more or less formal meetings, because every item has been carefully gone into at the meetings of the Committees. These Committee meetings have been objected to, but I venture to say that the system of working by Committees is the best, the most efficient, and the most acceptable feature in the administration of the Corporation. It is this system of working by Committees that makes it possible for the Chairman to discharge the various duties that he has to discharge, and it ensures the harmonious working of the Corporation. I venture therefore to say that it is an error and an antiquated delusion to say that business is brought up two and three times and time is wasted. The items of business are merely brought up for formal confirmation. No speeches are made, no time is spent, and I think it is a distinct advantage that

they should be brought up in that way for confirmation before the Corporation, because if mistakes are committed there is an opportunity of rectifying them at the meetings of the Corporation.

"I really must deplore the attitude of the Hon'ble Member in charge of the Bill in connection with this amendment. We have been moving amendments—I do not know how many. Amendments after amendments have all been vetoed. What is the legitimate conclusion to which we are driven? It is this: that this Council is not open to conviction by public discussion or debate, that the Council has definitely made up its mind with regard to this Bill. It seems to me under the circumstances to be a mere waste of time to move these amendments. Here is a most rational amendment, based upon the Bombay system, based upon considerations of convenience and administrative experience, but I am certain it will be lost. What is the good of arguing? If the Council has made up its mind, I think the best course is to tell us so. We should in that case retire; I say so with some little earnestness, because we feel very strongly about the matter. We have been devoting our time to this work in the hope that we might be able to convince the Council by the arguments we bring forward that our amendments are based upon reason and sound sense; but we find argument, reason, remonstrance all wasted. What is the good of our persevering in this hopeless task? I am perfectly certain Your Honour will sympathise with the feeling which underlies the expression of opinion to which I have felt it my duty to give utterance."

The Hon'ble THE PRESIDENT said:—"I do not think the Hon'ble Member will deny that the Council has listened with the most perfect patience to all the arguments brought forward in support of his motion, and if the decision of the Council after hearing the arguments *pro* and *con* on various amendments happen, to be against the Hon'ble Mover, he is not justified in saying that the Council is irrational in not given effect to his views."

The Hon'ble BABU SURENDRANATH BANERJEE's amendments being severally put, the Council divided in each case as follows:—

Ayes 5.	*Noes 12.*
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Buckley.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Mr. Handley.
The Hon'ble Mr. Apcar.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Mr. Mackenzie.
	The Hon'ble Mr. Spink.
	The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
	The Hon'ble Mr Oldham.
	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

So the amendments were lost.

The last-mentioned amendments having been lost, the Hon'ble MR. APCAR's motion that section 28B (*now* 26) be omitted was not put, and he, by leave of the Council, withdrew his other amendments of this section.

SECTION 27.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 28C (*now* 27), sub-section (*1*), after the word "employer" be inserted "or employé".

He said:—"This, Sir, seems so reasonable on the face of it, that I trust it is not necessary to advance any lengthy arguments to support it. I had originally suggested that the word 'employé' might be substituted for the

word 'employer,' but the Hon'ble Member in charge of the Bill has been good enough to point out to me that it would be safer not to omit the word 'employer'."

The Hon'ble Babu Surendranath Banerjee, with the permission of the President, moved that in section 28C (*now* 27), sub-section (*1*), the words "or any relative" be omitted, and that before the word "interest" the word "pecuniary" be inserted.

He said:—"I have already spoken to the Hon'ble Member in charge of the Bill about this amendment. It is an amendment which has become necessary in view of certain changes which I shall presently lay before the Council. The section, with my amendments, would run as follows:—

'No person shall be eligible for the office of Chairman, Vice-Chairman or Deputy Chairman if he has, directly or indirectly, by himself or his partner or employer, any share or pecuniary interest in any contract or employment with, by or on behalf of, the Corporation.'

The Hon'ble the President:—"I do not quite understand this. The Hon'ble Dr. Asutosh Mukhopadhyaya's amendment was that for the word 'employer' be substituted 'employé'."

The Hon'ble Babu Surendranath Banerjee:—"If this provision in the Bill were to pass into law, the Corporation would lose the services of one or other at least of its most trusted servants, against whom there does not exist the shadow of a suspicion, *viz.*, the Vice-Chairman, or the License Officer, Babu Romani Mohan Chatterjee. One of these officers must go. I think that would be a distinct loss to the Corporation, and we ought not to insert a provision the effect of which would be to produce such a result. Therefore, having regard to this particular instance and other instances of the same kind, it seems to me that my amendment is one which ought to be accepted by this Council, and I have the assurance of the Hon'ble Member in charge of the Bill that he considers it to be a proper amendment."

The Hon'ble Mr. Baker said:—"I have considered this matter in communication with the Chairman, and I sent the Hon'ble Babu Surendranath Banerjee the letter I have received from Mr. Bright on the subject. I think the amendment ought to be accepted, namely, to omit the words 'or any relative'. I am also prepared to accept the amendment of the Hon'ble Dr. Ashutosh Mukhopadhyaya, and also the further amendment by the Hon'ble Babu Surendranath Banerjee to insert the word 'pecuniary' before the word 'interest'."

The Hon'ble the President:—"Then the section will run thus:—

'No person shall be eligible for the office of Chairman, Vice-Chairman or Deputy Chairman if he has, directly or indirectly, by himself or his partner or employer or employé, any share or pecuniary interest in any contract or employment with, by, or on behalf of the Corporation.'"

The Hon'ble Babu Boikanta Nath Sen moved that the words "or any relative" and the words "or employment" in section 28C (*now* 27), sub-section (*1*), be omitted.

The Hon'ble Mr. Baker said:—"The Hon'ble Babu Boikanta Nath Sen sent in a list of amendments on Sunday, the 10th instant. Under the rules he is bound to give three days' clear notice of any amendments he wishes to move. As that period has not elapsed, I submit his amendments are out of order and cannot be considered."

The Hon'ble Babu Boikanta Nath Sen:—"It is in Your Honour's power to suspend the rules. I suggest that the word 'pecuniary' be inserted before 'interest' and 'any relative' be omitted, also that 'or employment' be omitted."

The Hon'ble THE PRESIDENT:—"I think the Hon'ble Member's object is met by the amendments which the Hon'ble Member in charge of the Bill has intimated his readiness to accept."

The Hon'ble BABU BOIKANTA NATH SEN:—"Partly, but not as regards the words 'or employment'."

The Hon'ble MR. BAKER:—"I submit, Sir, having regard to the enormous number of amendments, that it would be well not to consider anything which does not conform to the rules."

The Hon'ble THE PRESIDENT said:—"As a pure matter of grace, I shall admit the Hon'ble Babu Boikanta Nath Sen's amendment, but I hope Hon'ble Members will take notice of the objection which the Hon'ble Member in charge of the Bill has taken, and consult as far as possible the convenience of the Council by adhering to the ordinary rule of giving proper notice of any amendments they wish to bring forward.

"At the present moment the proposal of the Hon'ble Dr. Asutosh Mukhopadhyaya, I understand, is to be withdrawn in favour of the motion which the Hon'ble Member in charge of the Bill has brought forward."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA:—"I have modified my motion in accordance with that suggestion."

The Hon'ble THE PRESIDENT:—"The motion is that in section 28C (*now* 27), sub-section (*1*), for the words 'or employer or any relative, any share or interest in any contract or employment with, by, or on behalf of, the Corporation' the following be substituted—" or employer or employé, any share or pecuniary interest in any contract or employment with, by, or on behalf of the Corporation'."

The Hon'ble MR. BOLTON said:—"If the words 'or employment' are omitted, the words 'or any relative' should be retained. It is desired to omit the words 'any relative' because they refer to 'employment'. The omission of 'employment' would render the retention of 'relative' unobjectionable."

The Hon'ble BABU SURENDRANATH BANERJEE:—"I would rather omit the word 'relative'."

The Hon'ble MR. BOLTON:—"The motion of the Hon'ble Babu Boikanta Nath Sen as regards the omission of 'or employment' should be voted on first. The retention or omission of 'or any relative' is dependent on that vote."

The Hon'ble BABU SURENDRANATH BANERJEE:—"There is considerable force in the argument of the Hon'ble Mr. Bolton."

The Hon'ble THE PRESIDENT:—"Now we come to the substantive proposal of Dr. Asutosh Mukhopadhyaya, which I have twice read out to the Council."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA's motion was then put and agreed to.

The Hon'ble BABU SURENDRANATH BANERJEE's motion was also put and agreed to.

The Hon'ble BABU BOIKANTA NATH SEN's motion that the words "or employment" be omitted was put and lost.

The Hon'ble BABU SURENDRANATH BANERJEE's motion that "pecuniary" be inserted before "interest" in section 28C (*now* 27), sub-section (*1*), having been carried, the Hon'ble BABU BOIKANTA NATH SEN, by leave of the Council, withdrew the similar motion standing in his name.

The Hon'ble THE PRESIDENT announced that section 28C (*now* 27), sub-section (*1*), as amended in Council, ran as follows:—

"(*1*) No person shall be eligible for the office of Chairman, Vice-Chairman or Deputy Chairman if he has, directly or indirectly, by himself or his partner or employer or employé, any share or pecuniary interest in any contract or employment with, by, or on behalf of, the Corporation."

SECTION 28.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 28D (*now* 28), sub-section (*1*), for the words "seriously indebted to any person" be substituted "an uncertificated bankrupt or an undischarged insolvent."

He said:—"My object in moving this amendment is to bring this section into conformity with section 31 (*now* 39), clause (*c*). Section 31 (*now* 39) deals with disqualifications for being a Commissioner, and clause (*c*) lays down that a person shall be disqualified if he is an uncertificated bankrupt or an undischarged insolvent. That seems to me to be more specific than the language used in the present section, namely, 'seriously indebted to any person.' I would point out to the Council that the language of section 31 (*now* 39), clause (*c*), is taken from the English Municipal Act, 45 & 46 Vict., chapter 50, section 39. That section says:—

'(*1*) If the mayor or an alderman or councillor—

(*a*) is declared bankrupt or compounds by deed with his creditors, or makes an arrangement or composition with his creditors, under the Bankruptcy Act, 1869, by deed or otherwise, or

(*b*) is (except in case of illness), continuously absent from the borough, being mayor, for more than two months, or, being alderman or councillor, for more than six months,

he shall thereupon immediately become disqualified and shall cease to hold the office.

(*2*) In any such event the Council shall forthwith declare the office to be vacant, and signify the same by notice signed by three members of the Council, and countersigned by the town clerk, and fixed on the town hall, and the office shall thereupon become vacant.

(*3*) Where a person become so disqualified by being declared bankrupt or compounding or making an arrangement or composition as aforesaid, the disqualification, as regards subsequent elections, shall, in case of bankruptcy, cease on his obtaining his order of discharge, and shall, in case of a compounding or composition as aforesaid, cease on payment of his debts in full, and shall, in case of an arrangement as aforesaid, cease on his obtaining his certificate of discharge.

(*4*) Where a person becomes so disqualified by absence, he shall be liable to the same fine as for non-acceptance of office recoverable summarily, but the disqualification shall, as regards subsequent elections, cease on his return.'

"That is practically the same as the language used in section 31 (*now* 39), clause (*c*). I have not been able to understand why in section 28D (*now* 28) the somewhat vague expression 'seriously indebted to any person' is put in. What amount of indebtedness would be called 'serious', and who is to decide it? Suppose, again, a man is indebted to a person in Delhi or Agra. Would he be disqualified from becoming a Vice-Chairman? I think the proper test is whether the man is bankrupt or not. He may have debts, and at the same time he may be a perfectly solvent man. Indeed, if I may say so without impropriety, the language used in this section is so vague that, though it may satisfy lay minds, it would not be tolerated for a moment by any lawyer accustomed to accurate habits of thought."

The Hon'ble MR. BAKER said:—"I do not agree to this amendment. The Hon'ble Member has omitted to notice that this section deals with the disqualification of the Chairman, Vice-Chairman or Deputy Chairman, who are the executive officers of the Corporation. Section 31 (*now* 39) relates only to the disqualification for Commissioners. Now, Commissioners are not part of the executive. It may be quite right that a person should not be disqualified from being a Commissioner unless he is an uncertificated bankrupt, but a very much less degree of indebtedness would be sufficient to disqualify a man from occupying the responsible executive position of Chairman, Vice-Chairman or Deputy Chairman. The Hon'ble Member referred to the English Statute, and he said that the terms used there in respect of the mayor, alderman and councillors

were 'uncertificated bankrupt' and 'undischarged insolvent'; but the mayor, alderman and councillors of an English Corporation are not executive officers; they simply correspond to the Commissioners in Calcutta, and therefore section 31 (*now* 39) has been framed so as to use the same terms. He said also that the term 'seriously indebted' is vague, and he wished to know whether, if one of these officers was seriously indebted to a person in Delhi, he would be disqualified from holding office in Calcutta. The answer is, yes, he would, and that was inserted deliberately by the Select Committee. In the original Bill the words were 'seriously indebted to any person in Calcutta,' and that was struck out by the Select Committee, I think on the motion of the Hon'ble Babu Surendranath Banerjee, because he considered it improper—and we all considered it improper—that the Vice-Chairman or Deputy Chairman should hold office if they were seriously indebted to anybody any where. I hope this amendment will not be accepted."

The Hon'ble MR. APCAR said:—"My difficulty is the construction to be placed upon the term 'seriously indebted.' Who is going to decide whether a person is seriously indebted? The wording is so vague that it leaves the question in a very unsettled position. It will depend on one person thinking he is seriously indebted when another person would think that, although he is indebted, he is not seriously indebted. So that, since it is a disqualification, it is too vague, as it is now drafted, for me to accept the section. If I could only see my way to accepting any section which would preclude any one who is in a position of indebtedness from being elected to a responsible position such as those referred to in this section, I would certainly give my support to it; but I find a very great difficulty in this section: it is undefined what is 'seriously indebted,' and I do not know who is to decide that question."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I am partly responsible for this provision in the Bill. As my hon'ble friend in charge of the Bill has observed, originally the section was as he described it to be: 'seriously indebted to any person in Calcutta,' and then at my suggestion it was put in its present form. There is a good deal of force in the arguments of my hon'ble friends Dr. Asutosh Mukhopadhyaya and Mr. Apcar, that 'seriously indebted' is an expression which is somewhat vague; but it seems to me that in actual practice there will not be much difference of opinion as to what is meant by 'serious indebtedness.' A great many things appear vague when they are down on paper, but when we come to deal with them, we find they are not really so, and we are able to arrive at a satisfactory conclusion. I do not think there will be any serious difficulty in deciding as to whether a particular case is a case of serious indebtedness or not; and, inasmuch as we are all interested in maintaining and preserving the purity of the highest executive officers of the Corporation, it is a matter of importance that we should legislate in such a way as to ensure that purity of administration is a supreme consideration."

The amendment was put and lost.

The last amendment having been put and lost, the Hon'ble DR. ASUTOSH MUKHOPADHYAYA, by leave of the Council, withdrew the motion standing in his name that in section 28D (*now* 28), sub-section (2), for the words "so indebted" be substituted "an uncertificated bankrupt or an undischarged insolvent".

SECTION 29.

The Hon'ble BABU SURENDRANATH BANERJEE moved that section 28DD (*now* 29) be omitted.

He said:—"This section provides that when a servant of the Government is appointed to be Chairman, Vice-Chairman or Deputy Chairman, the Corporation may pay, in addition to his salary and house-allowance (if any), any contribution which may, for the time being, be levied by the Government in respect of his pension or leave-allowances. Such contributions have never been paid by the Corporation. This section is put in a permissive form, but

I regret to say that there is a tendency to interpret the word 'may' to mean 'shall,' and therefore it is necessary to guard against the provision becoming compulsory in actual practice. The Corporation have never made such payments, and I am afraid that the discretion here vested in them is likely to operate in a manner prejudicial to the interests of the Corporation. Things should be left as they are: there is no reason for a change. A mere desire for change ought not to be a sufficient reason for enacting a provision of this kind."

The Hon'ble Mr. Apcar said:—"I agree with the hon'ble mover of the amendment that as a rule in construing the Municipal Acts the word 'may' will always be read as if it was 'shall,' and the result would be that, instead of there being really an option left to the Corporation, it will become a compulsory provision. The next point in connection with this section is this: my hon'ble friend in charge of the Bill told the Council that under the Civil Service Regulations the Chairman of the Corporation has not to pay any contribution towards pension or leave-allowances; so that, as far as the Chairman is concerned, the expression may, for all practical purposes, be dropped from this section, but if it is left there, changes might be made which are not anticipated now, and it is not right that there should be an opportunity for that to be possible. The Vice-Chairman at present pays his contribution to the funds of the Municipality, and I don't see why he should cease to do so. Then, with regard to the Deputy Chairman, I cannot understand, when the Corporation pays his salary, why they should also have to contribute towards his pension and leave-allowances. There is, moreover, this little difficulty, that the payment here referred to is in addition to salary and house-allowance. There is no specific provision for the Vice-Chairman being allowed house-allowance, and no provision either with regard to the Deputy Chairman being given house-allowance. But this section applies to the Vice-Chairman and the Deputy Chairman as well as to the Chairman as being officers to be allowed house-allowance. That brings in a complication in the situation which I should be glad to see avoided. The result is this, that the Chairman, as a matter of fact, is not called upon to contribute towards pension and leave-allowances; so that his name may be eliminated from the section. The Deputy Chairman will get a certain salary, and the Corporation should not be forced to contribute towards his pension and leave allowances as well. And the Vice-Chairman does now contribute towards his pension. This section does not apply to any one, unless he happens to be a Government servant. I have strong reasons for not wishing the Vice-Chairman to be a Government servant. He may be a Government servant when he offers himself for election, but he should not continue to be a Government servant after he has been appointed Vice Chairman. I desire to see in the position of the Vice-Chairman one who would look to his position there as his future career; not one who would come to the Corporation for a short time and then go back to the service of the Government. We want one who will be able to turn to good use the benefit of his experience in the Municipality; the longer the better, so that his experience may be of use when he is called upon to give advice with regard to the administration of the affairs of the Corporation. If, however, there is going to be house-allowance in any form, it should be made definite and clear, because under this Bill the payment of house-allowance refers to the Chairman alone, or it should be made clear that the Vice-Chairman and the Deputy Chairman shall not be allowed house-allowance; but at present no such provisions appear in the Bill.

"Then I have a further amendment which follows immediately after, and which it may be convenient to mention now, namely, that the words 'Vice-Chairman or Deputy Chairman' be omitted from this section 28DD (*now* 29). The amendment brings my objections to a point. These officers are not permitted house-allowance, and their names, therefore, should not appear in this section; otherwise it might be taken to imply that house-allowance is to be given to them."

The Hon'ble Dr. Asutosh Mukhopadhyaya asked permission to take up an amendment of which he had given notice and which covered the same ground, namely, that in section 28DD (*now* 29), line 3, for the word "may" be substituted "shall not".

He said:—"It was my intention, in placing this amendment on the agenda, to avoid the possibility of the word 'may' being taken to mean 'shall'; therefore I suggest that 'shall not' be substituted for 'may'. My reasons are shortly these: as far as the Chairman is concerned, we have already decided in dealing with section 11 (*now* 12) that the Local Government is to fix his initial pay and annual increments at any amount which the Government thinks proper; and, if so, it is unnecessary to have any provision such as this, because the Government is entitled to fix the salary at a figure sufficient to cover both his pension and leave-allowances. As far as the Vice-Chairman and Deputy Chairman are concerned, no case has been made out why house-allowance, which has never been given before, should be given now."

The Hon'ble MR. BAKER said:—"There seems to be some misapprehension regarding the provisions of this section. It seems to be supposed that it imposes some novel and additional kind of expenditure upon the Corporation. That is not the case. It merely states what is the Government rule in regard to officers of Government whose services are lent to a Municipality. When the services of a Government officer are lent for a period not exceeding six months, it is unnecessary under the rules of the Civil Service Regulations for any contribution to be made towards pension and leave-allowances. All that this section does is to give legal effect to the rule as to the payment of contribution when the period of service exceeds six months. A single exception, as I mentioned the other day, has been allowed by the Government of India in favour of the Chairman. In his case no contribution is levied, and I should not have mentioned it but for the fact that the question has been raised. It is also my duty now to say that the reason assigned in the Government regulations for exempting the Chairman is the fact that that officer was also the Commissioner of Police. That reason has ceased to operate ten years ago, and when the attention of the Government of India is called to that fact, that rule may possibly be changed, though I hope they will not make any alteration in the present arrangements. If the services of a Government officer are employed in any of these appointments, the Corporation must accept whatever terms the Government chooses to exact, otherwise they will not get the services of that officer. Moreover, the payment will cost the Corporation nothing; because, if the contributions are not paid by the Corporation, the officer so transferred will have to pay them himself and a higher salary would in that case have to be assigned to him. It can make no possible difference to the Corporation whether they pay the contribution towards pension and leave-allowances to Government or to the officer for payment to Government. The amount of contribution is calculated on actuarial principles on the actual pay, so as to exactly cover the pension and leave-allowances. It is not very likely that the Vice-Chairman will ever be a Government officer. I am very much in agreement with the Hon'ble Mr. Apcar in considering it undesirable that the Vice-Chairman should be a Government servant. But we do not know what the Corporation may wish to do. Why should we make it impossible for the Corporation to secure the services of a Government officer in that capacity if they desire it?"

The Hon'ble MR. APCAR said:—"With regard to this question of contribution for pension and leave-allowances, I am a little taken by surprise, because, when I mentioned that there might be an addition to the salary of the Chairman in the shape of these contributions, I was met by the statement that the Chairman of the Corporation is specially exempted from such contributions. Now I find that there is a prospect that the present rule granting such exemption may be annulled. The Government has absolute discretion to give any salary it likes to the Chairman. Why then force the Corporation under another guise to contribute to the Chairman's salary? The Government can direct that a salary of Rs. 5,000 a month should be given to the Chairman; then why should the Corporation be saddled with additional expenditure on account of contribution?"

The Hon'ble MR. BAKER:—"The Corporation is not saddled with any additional expenditure."

The Hon'ble Mr. Apcar:—"If an officer of the Corporation seeks to get a pension out of our pension fund, he has to pay contribution to that pension fund; so that, as I understand this section of the Bill, we shall have to pay something additional; but if the payment on account of contribution for pension and leave-allowance is to come out of what the Chairman receives as salary, let it be in some clear form, so that the public may know what the Corporation has to pay, not that he shall receive a certain sum under the name of salary, and that he shall also benefit from the rate-payers' funds under a form they would not appreciate. Then, with regard to the Deputy Chairman, if he comes for a short period, the amount would have to be contributed for him, and after he leaves the Corporation will have no further interest in him. Then, with regard to the Vice-Chairman, he may be a Government servant, but it will be very mischievous if there is any possibility of the Vice-Chairman not severing his connection with any other service whatever. And as to the proposed house-allowance to the Vice-Chairman and the Deputy Chairman, the objection to that proposal has not been met. The payment of house-allowance to the Vice-Chairman and the Deputy Chairman has not been provided for in specific terms, but it is brought in in this way, and I fear that it may be made use of as an indication that they may be paid house-allowance. For these reasons I object, first, to this section being left in the Bill, and I move accordingly that the section be omitted; and, secondly, if it is to be left in the Bill, I contend that the words 'Vice-Chairman or Deputy Vice-Chairman' should be omitted."

The Hon'ble Mr. Baker:—"I forgot to say anything with regard to the remarks which fell from the Hon'ble Mr. Apcar on the question of the inclusion of the Vice-Chairman and Deputy Vice-Chairman in this section. This section gives no authority for the payment of house-allowance to the Vice-Chairman or the Deputy Chairman."

The Hon'ble Mr. Buckley said:—"I do not consider this matter to be of any great importance one way or the other. There is another section (section 61C—*now* 69) which applies to contributions to be paid on account of officers of the Municipality. In a particular case which I have in mind, an Engineer in the service of the Government was appointed to be Engineer to the Corporation; his salary was arranged at so much, and the Corporation did agree to pay his contribution or rather, speaking more correctly, the Engineer's salary was fixed so as to cover his contribution to Government. It so happened that two or three years after that Engineer ceased to pay contribution to the Government, and the Corporation found it very difficult to reduce his pay and, as a matter of fact, they did not do so, and he continued to obtain the advantage of receiving an addition of some Rs. 200 or Rs. 300 to his pay, which he was not, strictly speaking, entitled to at the time."

His Honour the President said:—"The effect of keeping in this section as it stands will be that, as the Vice-Chairman may either be an official or a non-official, the existence of this clause may possibly turn the scale in favour of a non-official."

The motion of the Hon'ble Babu Surendranath Banerjee and the Hon'ble Mr. Apcar's motion that section 28DD (*now* 29) be omitted was then put and lost.

The Hon'ble Mr. Apcar's motion that in section 28DD (*now* 29) the words "Vice-Chairman or Deputy Chairman" be omitted was also put and lost.

The Hon'ble Dr. Asutosh Mukhopadhyaya's amendment of section 28DD (*now* 29) was also put and lost.

The Hon'ble Babu Surendranath Banerjee moved that the following proviso be added to section 28DD (*now* 29):—

"Provided that no contribution under this section shall be paid, except by a resolution of the Corporation in favour of which not less than two-thirds of the Commissioners voting have voted."

He said—"In this motion I follow the analogy of section 65 (*now* 73) of the Bill. If you turn to that section you will find that, as far as the pension rules are concerned, they cannot be adopted by the Corporation except by a resolution in favour of which two-thirds of those voting have voted. This is found to be a very necessary safeguard, because the section deals with a question of money; and inasmuch as the Council has not adopted the motion which I have just moved, I think it would be as well to have this safeguard, namely, that when a contribution is paid it shall be paid by a vote of two-thirds of the Commissioners voting. It is a very simple matter."

The Hon'ble Mr. Baker said:—"There is no sort of analogy between this section and section 65 (*now* 73) of this Bill. If the Corporation choose to avail themselves of the services of a Government officer who comes under the rules of the Civil Service Regulations, they have to pay this contribution, for the Government will not lend the services of such an officer except on payment of the contribution. The Corporation do not require a vote of two-thirds to appoint the officer; then why should they require a vote of two-thirds for the formal act of paying his contribution for pension and leave-allowances? It is immaterial whether the Corporation pay the contribution directly to the officer in the shape of an addition to his salary, or whether they contribute towards his pension and leave-allowances to the Government."

The Hon'ble Mr. Apcar said:—"Then, as I understand the Hon'ble Member in charge of the Bill, the word 'may' in this section means 'shall'; for, from what the Hon'ble Member has said, the Government will not lend the services of their officer unless the Corporation are prepared to pay the contribution. Then what is the use of this option? Why not say directly that the Corporation 'shall pay', instead of leaving the section in this way?"

The motion was then put and lost.

Section 30.

The Hon'ble Mr. Baker moved that the following section be inserted after section 28DD (*now* 29), namely—

"28EE (*now* 30). When the Vice-Chairman is not a servant of the Government, the Corporation may, with the sanction of the Local Government, grant him a pension or gratuity on retirement, or grant a compassionate allowance to his family on his death."

Grant of pension or gratuity to Vice-Chairman.

He said—"It was assumed, when the sections were drafted authorising the Corporation to grant pensions to their officers, that the Vice-Chairman was a municipal officer, but we overlooked the fact that the Select Committee decided that neither the Vice-Chairman nor the Deputy Chairman was technically a municipal officer. They occupy an intermediate status between the Chairman and the officers of the Corporation. Therefore, the provisions of section 65 (*now* 73), which regulate the pensions payable to municipal officers, are not applicable to the case of the Vice-Chairman, and there therefore remains no power in the Corporation to grant a pension to the Vice-Chairman. This oversight was brought to my attention about a month ago, and I then arranged to give notice of the introduction of these words. I have, however, since ascertained that under the present rules the Vice-Chairman contributes towards his pension, and that he will receive his pension when he becomes entitled to it, and that in the event of his death before retirement on pension a compassionate allowance will be allowed to his family, the particular members of which who are so entitled being specified in the rules, such as wife, son, &c. It is intended not only that we should empower the Corporation to grant a pension to the Vice-Chairman, but also to give his family some compassionate allowance, such as is provided for under the present pension rules. In all cases the sanction of the Government will be required to the particular amount to be paid as compassionate allowance, but I have no doubt that whatever reasonable amount may be proposed will be sanctioned by the Government."

The Hon'ble Babu Surendranath Banerjee said :—"I will support this motion, and I may say that my gratification is all the keener because it is one of the very few amendments which the Hon'ble Member has proposed that I have been able to support."

The motion was put and agreed to.

Section 31.

The Hon'ble Mr. Apcar moved that in section 28E (*now* 31), proviso (*a*), the words "Vice-Chairman or Deputy Chairman" be omitted.

He said:—"I have already indicated the reasons for this amendment. I do not want to see either the Vice-Chairman or the Deputy Chairman a Government officer, because I wish to secure their services on a permanent footing. It is to the interest of the Corporation that these officers should not be changed every few years."

The Hon'ble Mr. Baker said:—"The effect of this amendment will be to make it impossible to appoint a Government officer to be either Vice-Chairman or Deputy Chairman of the Corporation. As regards the Vice-Chairman, it is not of very great consequence, because he is not likely ever to be a Government officer. But even in his case, if the Corporation desire to select a Government officer, I do not see why permission should be refused. They might be willing to choose a senior Deputy Magistrate within a year or two of his retirement and one who would retire from Government service thereafter. In such a case, by including him in this section he could complete his service for pension without reverting to the active service of the Government. But with regard to the Deputy Chairman, the objection is much stronger, because it is intended that either a Civilian or an Engineer in the service of the Government should be so employed. He would be an understudy to the Chairman; and it is undesirable to incorporate in the Bill any provision which would make it impossible to employ such an officer in that position."

The Hon'ble Mr. Apcar, in reply, said:—"A Government officer will always be eligible for appointment; but when he is elected he should be made to choose between the service of the Corporation and that of the Government. With regard to the appointment of a Deputy Magistrate within a year or two of his retirement, I am not prepared at the moment to say what the effect of such an appointment will be. I strongly deprecate the idea that we should have a Government servant in an office in which it is very necessary that the incumbent should be a permanent officer, and that he should not make a convenience of the service of the Corporation."

The motion was put and lost.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that in section 28E (*now* 31), proviso (*b*), sub-clause (*ii*), the words "an additional member of the Council of the Governor General of India for making laws and regulations or" be added.

He said :—"This amendment, Sir, I may fairly claim, is absolutely harmless. If the Chairman can be allowed to be a member of this Council, there is no reason why he should not be allowed to be a member of the Supreme Council, if the Government of India so appoint him."

The Hon'ble Mr. Baker said:—"I am ready to accept this amendment."

The Hon'ble Babu Surendranath Banerjee said :—"I strongly object to this amendment. It is not harmless; it is positively mischievous. The Chairman deals with local matters, and it is only right and proper that he should be allowed to be a member of the local Council, but not a member of the Imperial Legislative Council. Has the Chairman of the Corporation anything to do with

matters which are dealt with in the higher Council? I am not aware of any Chairman of the Corporation having been a member of the Imperial Legislative Council. You have it in the Bill that the Chairman and the Vice-Chairman shall devote their whole time to the duties of their office. If the Chairman or the Vice-Chairman or the Deputy Chairman is to be a member of the Imperial Legislative Council, it will be taking them away from their duties to which by law they are obliged to devote their whole time and attention. Is my hon'ble friend, the mover of the amendment, really serious when he suggests that the Deputy Chairman, who is likely to be a member of the Indian Civil Service, say of seven or eight years' standing, should be a member of the Imperial Legislative Council? I do not think he could have suggested this amendment in seriousness, or that the Council will, for a moment, think of acting in accordance with his suggestion. This amendment is not, as the Hon'ble Member says, harmless. It is mischievous. The question we have to decide is not whether it is harmless, but whether it is useful. To say that it is harmless is a very negative sort of qualification."

The Hon'ble Mr. Apcar said:—"I cannot understand the object of this amendment, and I think the Hon'ble Member in charge of the Bill is inconsistent in agreeing to it if he thinks that the Chairman is or will be overwhelmed with work and will require the assistance of a Deputy Chairman."

The Hon'ble Mr. Oldham said:—"I, too, oppose this amendment. Hon'ble Members have more than once said that the suggestion of any possible situation in the Bill must ultimately have the effect of making that possibility a reality. If this is true, we should see the Deputy Chairman, possibly a civil servant of two or three years' standing, forced into becoming a member of the Imperial Council!"

The motion being put, the Council divided as follows:—

Ayes 7.	*Noes 9.*
The Hon'ble Mr. Buckley.	The Hon'ble Babu Jatra Mohan Sen.
The Hon'ble Mr. Buckland.	The Hon'ble Babu Boikanta Nath Sen.
The Hon'ble Mr Handley.	The Hon'ble Babu Surendranath Banerjee.
The Hon'ble Rai Durga Gati Banerjea, Bahadur.	The Hon'ble Mr. Apcar.
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Mr. Mackenzie.
The Hon'ble Khan Bahadur Moulvi Delawar Hossain Ahmed.	The Hon'ble Mr. Spink.
The Hon'ble Mr. Baker.	The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
	The Hon'ble Mr. Oldham.
	The Hon'ble Mr. Bolton.

So the motion was lost.

Section 33.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that in section 28G (*now* 33), line 1, for the first "or" be substituted a comma, and for the second "or" be substituted "and".

He said:—"I must confess that I do not understand the intention of section 28G (*now* 33). It says—

'The Chairman or the Vice-Chairman or the Deputy Chairman shall, except upon such holidays as are allowed by the Government, and unless prevented by sickness or other reasonable cause, attend daily at the municipal office for the transaction of business connected with or arising under this Act.'

"The object of my amendment is to make it obligatory for the Chairman, the Vice-Chairman and the Deputy Chairman to attend daily at the municipal office. I do not understand how the absence of one of these gentlemen is atoned for by the presence of the others."

The Hon'ble Mr. Baker said:—"I see no objection to this amendment."

The motion was put and agreed to.

Section 34.

The Hon'ble Babu Surendranath Banerjee's motion that section 28B (*now* 26) be omitted having been lost, the Hon'ble Mr. Apcar, by leave of the Council, withdrew the motion, standing in his name, that in section 28H (*now* 34), sub-section (*1*), the words "and the Deputy Chairman" be omitted.

The Hon'ble Mr. Apcar moved that in section 28H (*now* 34), sub-section (*1*), after the words "same authority" the words "and shall exercise the same powers" be inserted.

He said:—"I wish to bring the provisions of this section into conformity with the law as it now is. Under the present Act the Vice-Chairman has the same powers as the Chairman, but subject to the Chairman's authority, and subject also to the exercise of any particular powers being taken from the Vice-Chairman by the Chairman. That has been a very useful provision. The power remains in the Chairman to allow such powers only to be exercised by the Vice-Chairman as he thinks fit. Many matters may arise in which the Vice-Chairman may be of great use. We have seen that his services have been of the most beneficial character. Many questions might not occur to the Chairman in which the Vice-Chairman may be of use. I will give one instance. There was a comparison made with regard to certain quantities between the tender and the sanctioned estimates, and the result of that comparison was stated by the Engineer to be a loss of Rs. 15,000. The Vice-Chairman, when the bills came before him, went personally into the matter to see how the matter stood, and he was able to show that there was a difference, not of Rs. 15,000, but of a lakh of rupees, and also after personal inspection of certain works found that there had been many charges made which ought not to have been made. All this was in the interest of the rate-payers. It did not require the authority of the Chairman for him to scrutinise the bills or to personally inspect the works. It is one thing for the Vice-Chairman to have full powers conferred upon him and any to be taken away, and another thing for the Chairman to choose the powers which should be given to the Vice-Chairman. That I think should be deprecated, and for the benefit of the rate payers full powers should be conferred upon the Vice-Chairman."

The Hon'ble Mr. Baker said:—"As the amendment is worded, I think it makes nonsense of the section. I think that what the hon'ble mover of the amendment really means is that the last three and-a-half lines of clause (*1*) of section 28H (*now* 34) should be omitted also; clearly the latter part of the clause is inconsistent with the first. I think probably that the Hon'ble Member intends that the last three-and-a-half lines of clause (1) of this section should be omitted. [The Hon'ble Mr. Apcar:—"Yes, I do."] I entirely object to this proposal, for the effect of it will be to make the Vice-Chairman and the Deputy Chairman in some undefined and not very intelligible way independent of the Chairman, which, I submit, is an absolutely impossible position. The Vice-Chairman and the Deputy Chairman will not be Commissioners; they are simply the Chairman's assistants, and it is a quite impossible position to recognize them as deriving their authority in some way or other from the Corporation. They must be solely responsible and subordinate to the head of the executive. Any other arrangement would lead to friction and all manner of confusion. You cannot split up the powers of the Chairman between the Vice-Chairman and the Deputy Chairman. In drafting the section we intended to make it clear that the Vice-Chairman and the Deputy Chairman, who are the lieutenants of the Chairman, should have full authority to exercise all the legal powers of the Chairman, but should only exercise such powers as the Chairman may delegate to them from time to time and within such spheres as he may prescribe for each of them. That is the only intelligible position."

The Hon'ble Mr. Bolton said:—"I read the section as the Hon'ble Member in charge of the Bill reads it. The section is inconsistent. If the Vice-Chairman and the Deputy Chairman are vested with all the powers of the Chairman, it would manifestly be inconsistent to say that they shall exercise only such powers as the Chairman may make over to them. They might claim to exercise

all powers independently of any delegation, and that would be entirely at variance with their position as assistants to the Chairman. The work of the Corporation might seriously suffer if this amendment were carried."

The Hon'ble Babu Boikanta Nath Sen said:—"The amendment is to the effect that the words from 'and shall exercise' to 'respectively' in section 28H (*now* 34), sub-section (*1*), be omitted. I submit that they are quite redundant and unnecessary. Sub-section (*4*) of section 28H (*now* 34) provides that all acts and things performed and done by the Vice-Chairman or the Deputy Chairman during his tenure of office and in virtue thereof shall for all purposes be deemed to have been performed and done by the Chairman. The first portion of sub-section (*1*) of section 28H (*now* 34) makes the duties of these two officers complete; then the delegation under the subsequent portion of that sub-section must at times bring about great confusion. If it is provided that all acts performed by the Vice-Chairman and the Deputy Chairman will be as valid as if they were performed by the Chairman, then in the case of delegation there must arise some confusion. There is the direct provision that they are to act under the general direction and control of the Chairman, and therefore, instead of delegation, the Chairman may supervise and keep their proceedings under control. I submit that the latter portion of sub-section (*1*) of section 28H (*now* 34) is redundant and unnecessary, as it would lead to confusion."

The Hon'ble Babu Surendranath Banerjee said:—"I think I raised this very point in the Select Committee, but the Hon'ble Member in charge of the Bill would not accept my amendment, though he made a certain modification in the section. The object of the Hon'ble Mr. Apcar's amendment, as far as I understand it, whatever may be the phraseology, is to restore the law to its present position. Under section 61 of the present Act you will find that the Vice-Chairman may exercise on behalf of the Commissioners the same authority as the Chairman, subject to his general direction and control. The authority of the Vice-Chairman is co-extensive with the authority of the Chairman, but he is subordinate to the Chairman. The object of the amendment is to vest in the Vice-Chairman the same authority which is now exercised by him, and to place him, as under the present law, in a position of subordination to the Chairman. The Vice-Chairman will not be independent of the Chairman. My friend's amendment will not militate against the principle of co-ordinate authorities which has been accepted by the Council; and, having regard to the instances alluded to by the Hon'ble Mr. Apcar, it is undeniable that the exercise of such powers as he now possesses by the present Vice-Chairman of the Corporation, Babu Nilamber Mukerjee, has been attended with substantial benefit to the rate-payers. Suppose a Chairman, who had this power of general control and direction, did not delegate his power to the Vice-Chairman, then it would have been impossible for the Vice-Chairman to have undertaken that extensive and thorough enquiry into the working of the Warrant Department which has been attended with such admirable results. Suppose the Chairman did not delegate these powers to the Vice-Chairman, it would have been impossible for him to have undertaken the scrutiny which he exercised in connection with the large drainage works now under construction. If you have a good man as Vice-Chairman, it would be as well to trust him wholly. The Corporation may be trusted to appoint the best man they could get as their Vice-Chairman; and, if you have a good man, it would not be wise to place him in a position of subordination such as is provided in the Bill. There may, perhaps, be a risk in making him independent of the Chairman, but that is avoided when he is to exercise his powers subject to the general control and direction of the Chairman. But serious inconvenience might in some cases arise in the absence of delegated authority."

The Hon'ble Mr. Apcar, in reply, said:—"What I wish to bring about is that the law should be allowed to remain as it is. I do not wish to put the Vice-Chairman on the same plane as the Chairman. It would be impossible to carry on the administration of the municipality if that was so. The section under consideration provides that the Vice-Chairman shall be subordinate to the Chairman. But suppose power was delegated to the Vice-Chairman to check the

Engineer's bills and he said to the Chairman 'I have great suspicions about certain matters; give me power and authority to see whether certain works have been carried out in a proper manner,' it would throw an invidious duty upon the Chairman to give him that sanction. If matters were left as they now are, then the Vice-Chairman, although delegated to do certain works, might usefully employ himself in certain other work if he were to see an opportunity of usefulness. The power now vested in the Vice-Chairman has been found useful in practice and has not been found embarrassing, nor has there been any suspicion on insubordination. I say let the whole section remain as it is in the present Act and according to the amendment I have submitted. Evidently it is intended that the Deputy Chairman should have certain powers and the Vice-Chairman certain other powers, but at the same time there seems to be an intention of depriving them of the independent powers conferred upon the Chairman by this Bill."

The motion was then put and lost.

The Hon'ble Mr. Apcar's last amendment having been lost, he, by leave of the Council, withdrew the motion, standing in his name, that section 28H (*now* 34), sub-section (*2*), be omitted.

For the same reason the Hon'ble Babu Boikanta Nath Sen, by leave of the Council, withdrew the motion, standing in his name, that the words "and shall exercise such of the powers . . . . respectively" in section 28H (*now* 34), sub-section (*1*), be omitted.

The Hon'ble Babu Jatra Mohan Sen moved that in sub-section (*2*) of section 28H (*now* 34) the words "and the General Committee" be inserted after "Corporation."

The motion was put and agreed to.

Section 35.

The Hon'ble Mr. Apcar, by leave of the Council, withdrew the motion, standing in his name, that in section 28J (*now* 35), sub-section (*2*), proviso, the word "Vice-Chairman" be omitted.

The Hon'ble Mr. Apcar moved that in section 28J (*now* 35), sub-section (*2*), proviso, after the word "class" the words "and shall be paid by the Government, except when the Chairman or the Deputy Chairman is on privilege leave" be added.

He said:—"I believe that, at present, when the Chairman goes on privilege leave, the Corporation pay his salary, but when he goes on furlough or on sick leave or leave on private affairs, the Corporation do not pay. We have had instances when a Chairman has gone on furlough and has not returned to the service of the Corporation. It may be that the views of the Government in regard to the gentleman who is Chairman have changed, or it may be that the views of the Chairman himself have changed, and he has not desired to come back as Chairman. I say it will not be fair to saddle the Corporation with furlough and leave-allowances under such circumstances, and, as a matter of fact, they don't pay such allowances now, and I see no reason why there should be any increase of such charges upon the rate-payers."

The Hon'ble Mr. Baker said :—"There is the same misapprehension here to which I drew attention in reference to a previous amendment. The Civil Service Regulations lay down equitable rules regarding the leave-allowances of Government officers whose services have been lent on foreign service. The Government will only lend the services of their officers on certain specified terms; and, if the Corporation desire to have the services of a Government officer, they will have to pay such allowances, otherwise they will not get the services of a Government officer. If you go into a shop and want to buy a hat, you will have to pay the price of that hat; otherwise you will not get the hat.

If the Corporation want the services of a Government officer, either as Chairman, Vice-Chairman or Deputy Chairman, they will have to pay whatever is necessary on account of the furlough and leave allowances of such officer, and I hold that the Bill ought not to make that impossible."

The Hon'ble MR. APCAR said that he understood that the Corporation were not paying the price of the hat now.

The Hon'ble MR. BAKER:—"The Corporation get their hat for nothing now, and unless the rules are changed they will not have to pay for their hat in future."

The motion was put and lost.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the words "or Deputy Chairman" in line 2, and the words "or Deputy Chairman, as the case may be," in line 4, of sub-section (*3*) of section 28J (*now* 35), be omitted.

He said:—"I cannot persuade myself that either of these amendments has the smallest chance of being carried. They are practically a corollary of an amendment which has already been rejected. But, since I have a duty to perform, I shall do it. To some extent these amendments are consequential upon those which have gone before."

The Hon'ble MR. BAKER said:—"These amendments are entirely consequential. They follow upon the amendment moved by the Hon'ble Babu urendranath Banerjee that section 28B (*now* 26) be omitted."

The Hon'ble BABU SURENDRANATH BANERJEE:—"Except this, that, as the Government makes the substantive appointment, the Corporation might be permitted to make the acting appointments."

The Hon'ble MR. BAKER:—"That is not what the amendment provides. The amendment is that the words 'Deputy Chairman' be struck out."

The motion was put and lost.

The Hon'ble BABU SURENDRANATH BANERJEE also moved that the words "and the salary of any person acting as Deputy Chairman under this section," in lines 3 and 4 of sub-section (*4*) of section 28J (*now* 35), be omitted.

The motion was put and lost.

The Hon'ble BABU SURENDRANATH BANERJEE also moved that the following be added at the end of sub-section (*4*) of section 28J (*now* 35)—"and the salary of any person acting as Deputy Chairman shall be fixed by the Corporation."

He said:—"As regards salary and house-allowance, there is just one point I wish to lay before the Council. The Council decided that the Government should fix the pay of the Deputy Chairman. But the pay of an acting Deputy Chairman may be fixed by the Corporation. That is a concession which the Council may make to the Corporation, and it is in that hope that I move the amendment that, although the principle has been accepted that the salary of the Deputy Chairman is to be fixed by the Government, the salary of an acting Deputy Chairman may be fixed by the Corporation."

The Hon'ble MR. BAKER said:—"The acceptance of such a principle is quite impossible."

The motion was put and lost.

SECTIONS 37, 38 AND 51.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved—

(*1*) that in section 29 (*now* 37), sub-section (*1*) and sub-section (*3*), after the word "company" the words "body corporate" be added;

(*2*) that in section 30 (*now* 38), proviso, after the word "company" the words "body corporate" be added; and

(*3*) that in section 42 (*now* 51), clause (*a*), after the word "company" the words "body corporate" be added.

He said:—"This amendment is a purely verbal one. What I have in view is the body I have the honour to represent in this Council, which will not come under any part of the description 'a person, or a company, firm, or other association of individuals'; therefore, I venture to suggest that the words 'body corporate' be added."

The Hon'ble MR. BAKER said:—"I have been advised that this amendment is unnecessary, because in the term 'association of individuals' every thing of the kind the hon'ble mover of the amendment contemplates is included."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA:—"An association of individuals will mean a voluntary association of individuals, and will not apply to a Corporation created by statute, like the University of Calcutta; therefore it will be safer to adopt this amendment. It will clear up any possible misapprehension."

The Hon'ble MR. HANDLEY said:—"I think the contention of the Hon'ble Member for the University is a sound one, as the words 'association of individuals' might mean a voluntary association of individuals; whereas, as the Hon'ble Member has explained, the University will be included in the term 'body corporate'."

The Hon'ble MR. BAKER:—"The words proposed to be added will not only include the University but other bodies corporate, such as the Port Trust; but I do not see any harm in doing so."

The Hon'ble MR. APCAR said:—"I am not able to say at the moment that the words of the section would include a body of persons such as the University. If the Government are willing to give votes to such a body of persons—and I see no reason why they should not do so—it seems to me that it would be better to add the words proposed by the hon'ble mover."

The Hon'ble MR. BAKER:—"In view of what has fallen from the hon'ble the Legal Remembrancer, I have no objection to accept these three amendments."

The motions were then put and agreed to.

The Council adjourned to Wednesday, the 13th September, 1899.

CALCUTTA;
The 16th January, 1900.

F. G. WIGLEY,
Assistant Secretary to the Govt. of Bengal,
Legislative Department.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

The Council met at the Council Chamber on Wednesday, the 13th September, 1899.

Present:

The Hon'ble SIR JOHN WOODBURN, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.
The Hon'ble MR. W. B. OLDHAM, C.I.E.
The Hon'ble MR. R. B. BUCKLEY.
The Hon'ble MR. C. W. BOLTON, C.S.I.
The Hon'ble MR. E. N. BAKER.
The Hon'ble RAI DURGA GATI BANERJEA, BAHADUR, C.I.E.
The Hon'ble MR. C. E. BUCKLAND, C.I.E.
The Hon'ble MR. F. F. HANDLEY.
The Hon'ble MR. F. A. SLACK.
The Hon'ble KHAN BAHADUR MAULVI DELAWAR HOSAIN AHMED.
The Hon'ble BABU JATRA MOHAN SEN.
The Hon'ble MR. T. W. SPINK.
The Hon'ble RAJA RANAJIT SINHA BAHADUR, OF NASHIPUR.
The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH, C.I.E.
The Hon'ble MR. D. F. MACKENZIE.
The Hon'ble MR. J. G. APCAR.
The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, M.A., D.L., F.R.A.S., F.R.S.E.
The Hon'ble BABU BOIKANTA NATH SEN.
The Hon'ble BABU SURENDRANATH BANERJEE.

THE CALCUTTA MUNICIPAL BILL.

SECTIONS 23 AND 24.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved, in substitution for his former motions to the same effect for the amendment of section 26E (*now* 23), sub-section (*1*), that clauses (*i*) and (*ii*) of section 26E (*now* 23) be amalgamated so as to run thus:—

> "(*i*) to make arrangements to its satisfaction for the proper performance of the duties referred to clause (*a*), or to make financial provision to its satisfaction for the performance of any such duty, as the case may be, or",

and that the present clause (*iii*) be numbered (*ii*).

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA also moved, in substitution for his former motion for the amendment of section 26F (*now* 24), sub-section (*1*), that in section 26F (*now* 24), line 3, the words "or clause (*ii*)" be omitted.

The Hon'ble MR. BAKER said:—"I considered this yesterday with the Hon'ble Member and the Secretary. We came to the conclusion that this was the best arrangement, and I therefore recommend that the Council accept the amendments as now put."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I suppose, Sir, it is merely a question of verbal arrangement."

The Hon'ble MR. BAKER:—"Entirely."

The motions were severally put and agreed to.

SECTION 39.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the words "or employment" in lines 3 and 4 of clause (*f*) of section 31 (*now* 39) be omitted.

He said:—"Section 31 (*now* 39) lays down the conditions disqualifying persons from being elected or appointed as Municipal Commissioners. Clause (*f*) says that a person is disqualified if he has directly or indirectly, by himself or by his partner or employer, any share or interest in any contract or employment with, by or on behalf of, the Corporation. I move that the words 'or employment' be omitted, and then the clause will read as follows:—

> '(*f*) has, directly or indirectly, by himself or by his partner or employer, any share or interest in any contract with, by or on behalf of the Corporation.'

"I must say I cannot understand what is meant by interest in any employment. That seems to me to be a difficulty, and it is a difficulty not only with me, but with several friends whom I have consulted. I think I may mention the name of one of them whom the Hon'ble Member in charge of the Bill knows very well, *viz.*, Babu Kali Nath Mitter; this amendment was in fact suggested by him. I had an opportunity of talking the matter over with him, and he did not understand what was meant by interest in any employment. I beg to move as an amendment that the words 'or employment' be omitted."

The Hon'ble MR. BAKER said:—"I have given some consideration to this amendment, and I am sorry I have not had an opportunity of discussing it with the Hon'ble Member, because it seems to me that the effect of it might be rather unfortunate. I will give him an illustration, in order to make my meaning clear. Take the case of the well-known firm of solicitors, Sanderson and Company. Sanderson and Company are the standing Solicitors to the Corporation, and are in their employment. The effect of striking out these words 'or employment' would be that a partner in the firm of Sanderson and Company or one of their salaried assistants would be eligible to hold the office of Commissioner. There is no other provision in the Bill that I can find which would prevent them from being so. Now, Sir, it seems to me doubtful whether it is desirable that a member of a firm or an assistant in a firm which is in the employment of the Corporation should be eligible to be a Commissioner. I think the Hon'ble Member will probably agree with that view. If so, I think,

The sections of the Bill having, under the direction of the Council, been re-numbered, the present number of each section is inserted in brackets, wherever the new numbering differs from the old.

he will be willing to withdraw this amendment. I have no/her objection than that. I might mention that the words occur in the Bombay/t."

The Hon'ble Babu Surendranath Banerjee:—"I cainly do not wish that any gentleman connected with any firm which/oes work for the Corporation should be a member of the Corporation. lo not think it is desirable, and I certainly would not suggest anything the ect of which would be to introduce such persons as members of the Corporaon. But it strikes me, even after the explanation that has been given, as beg doubtful if these words cover the case. Of course it is a matter of drafti, and I am not an expert. But even after the explanation which my hon'ble end has given, with the spirit of which I am in complete accord, it does n seem to me that the wording is as clear as it ought to be."

The Hon'ble Mr. Baker:—"Might I explain furth, Sir, that a member of the firm of Sanderson and Company, taking them as a illustration, would unquestionably, being interested in an employment ider the Corporation, be excluded from being a member of the Corporatin, if these words are allowed to remain. There is no other provision in the Bill under which he would be excluded."

The Hon'ble Babu Surendranath Banerjee:—"Suppose, Sir, a barrister is a member of the Corporation, would he be exclued from employment by the Corporation? Suppose the Advocate-Generalor a barrister of equal eminence—Mr. Pugh, say—was a member of the Coporation, and it became necessary to employ him in connexion with the wo of the Corporation, would he be disqualified, if he took up that work?"

The Hon'ble Mr. Baker:—"If he were employe on a standing salary, I think he probably would be; but if he only took up a single case, I understand that, as a matter of law, he is not disqualified. The same question has arisen in connexion with mufassal municipalities. Th learned Legal Remembrancer will probably be able to state what the result was."

The Hon'ble Mr. Handley:—Yes; you have state it correctly."

The Hon'ble Babu Surendranath Banerjee:—"After that explanation I will withdraw the amendment."

The amendment was then, by leave of the Council, withdrawn.

The Hon'ble Dr. Asutosh Mukhopadhyaya movd that in section 31 (*now* 39), clause (*f*) and proviso, after the word "empbyer" be added "or any employé or relation".

He said:—"The object of this amendment is to bring this section into harmony with section 28C (*now* 27), where a similar amendment has been made."

The Hon'ble Mr. Baker said:—"I strongly object to the insertion of the words 'or relation'. It would absolutely disqualify any man who has any relation employed in the Corporation from being a Commissioner."

The Hon'ble Babu Surendranath Banerjee said:—"Who is a relation? Can anybody define the term? I do not believe the word 'relation' is capable of definition. I am entirely in sympathy with the Hon'ble Member in charge of the Bill."

The Hon'ble Mr. Baker:—"I accept the words 'or any employé'."

The Hon'ble Dr. Asutosh Mukhopadhyaya then proposed the omission of the words "or relation" from his amendment.

The motion was then put in the amended form and agreed to.

The Hon'ble Mr. Apcar moved that clause (*iv*) of section 31 (*now* 39) be omitted.

He said:—"Sir, I have placed this amendment on the paper after having given very considerable attention to the subject, and I think that the only effectual way of meeting the difficulty that is involved in the question is to place all those who may have a share in any incorporated company contracting with the Corporation on precisely the same footing as the members of a private firm. I desire, in fact, to place all those who have shares in incorporated companies exactly on the same footing as is provided for persons who are included under clause (vi) of sub-section (1) of this section. Clause (vi) is for the purpose of declaring persons disqualified from being Commissioners."

The Hon'ble Mr. Baker:—"There is no clause (vi)."

The Hon'ble Mr. Apcar:—"I beg your pardon; clause (*f*), I mean. It reads:—

(Any person who) 'has, directly or indirectly, by himself or by his partner or employer, any share or interest in any contract or employment with, by or on behalf of, the Corporation.'

"Any such person is disqualified from being a Commissioner. The clause the omission of which I now move runs as follows:—

(A person shall not be disqualified only by reason of his having a share or interest in) 'any incorporated company which contracts with, or is employed by, the Chairman on behalf of the Corporation.'

"Now, Sir, my attention was drawn to this section by the circumstance that in the present day there is a strong tendency to convert private firms into limited liability companies. At present, therefore, a person who may be disqualified to-day from being a Commissioner on the ground of his being a member of a private firm will next year, if his firm has been converted into a limited liability company, be qualified to be a Commissioner, with the sole reservation that he will be disqualified from taking part in any discussion relating to any matter in which he is interested. Well, under these circumstances, the mischief is very great, because we do not know who may be shareholders in these companies, and, therefore, we should have persons who are interested in any particular question perhaps taking part in the discussion of it—interested pecuniarily perhaps—so that they would not be able to come to the consideration of the question free from all influence. I do not know how we are able to defend ourselves under the circumstances. The day after I had sent these amendments on the paper to the Secretary of the Council, we had an instance which brings the point out very clearly. Perfectly innocently, without knowledge of the law as it stands in the present Act, and as it is laid down in the Bill; taking it, I repeat, as being perfectly innocently done; nevertheless we had at the last meeting of the Corporation an example of the danger of this section as it is here drafted. We had not merely a shareholder, but a director of a limited liability company, getting up to speak with regard to a contract with that company, involving a large sum of money. Well, Sir, it was not an ordinary person; it was no less a person than the Vice-President of the Chamber of Commerce. When this can occur innocently, and pass at the time without observation, lesser lights of the commercial community may fall into the same error and remain undiscovered. It was by a chance of the most fortuitous character that I was subsequently informed that the speaker on that occasion was one who was interested in that company. Under these circumstances I think that the only method by which we can avoid this mischief is by disqualifying such persons from being Commissioners at all. It is not a new principle, because I only seek to place shareholders in incorporated limited liability companies on the same footing as those who are interested in private firms. A person may be holding a very large share as a member of a private firm and still continue to hold as large a share after the incorporation of that firm into a limited liability company. It is easy to know if a person belonging to a private firm has any interest in any business or contract before the Corporation; but when it comes to a company it is not so easy to know who are the shareholders, particularly if a company is registered in England. So in these circumstances, if we are to give any effect to the principle which underlies this section, it has occurred to me that the only method by which we can really secure that effect is by putting any person, whether a shareholder in a limited company, or one who holds a share in a

private firm which does business with the Corporation, on exactly the same footing."

The Hon'ble MR. MACKENZIE said:—"To omit section 31 (*iv*) would be to effectually bar any business man, and I might say any official, from being a Commissioner; for seeing that there are in Calcutta about five hundred limited companies registered, it is more than probable that in some way or other some of those who would otherwise offer themselves for service would be connected in an indirect way, either as directors or shareholders of these companies, in supplying the wants and requirements of the Municipality, and would therefore be 'interested'.

"With reference to what fell from the Hon'ble Mr. Apcar in his remarks relating to his amendment as to omission of clause (*iv*) of section 31, I crave Your Honour's indulgence, and that of the Council, to enable me to make a personal explanation.

"I am, as Your Honour is no doubt aware, a nominated Commissioner—nominated by the Bengal Chamber of Commerce, of which body I have the honour of being Vice-President.

"At the time of my nomination I was pressed by the Committee to stand, it being considered that under the new Bill it would be incumbent on the mercantile community to have a strong representation, and I accepted on the express condition (which is embodied in the minutes of the Chamber) that I would not serve under the present Act.

"I was appointed a Commissioner in April and never attended a meeting of Commissioners until Wednesday last, the 6th instant. My attendance on that date was due to the receipt by me the previous evening (5th instant) of the following letter from Mr. Bright, the Chairman:—

'Owing to 28 of the Ward Commissioners having resigned their office as Municipal Commissioners, it is very important that the nominated Commissioners and those appointed by the Chamber of Commerce, by the Port Commissioners, and by the Trades Association, should make a point of attending the general meetings of the Commissioners and the meetings of the Committees of which they may be members.

'Yesterday afternoon a meeting of the Water-supply Committee was convened, but out of nine members only two were present, and it is evident that if members do not attend the meetings, and there is a succession of "No quorum," public business will be at a standstill. I trust, therefore, that you will make a special effort to attend.'

"Having no desire to see 'public business at a standstill,' I attended the meeting. On the *agenda* of business were the following items:—

to confirm generally the proceedings of the 16th meeting of the General Committee held on the 25th July, 1899 (pages 191-96) (copy herewith);

to confirm the following Resolutions of the 18th meeting of the General Committee held on the 4th August, 1899:—

that Messrs. Burn and Company be informed that the Corporation (page 207, paragraph 2) decline to admit their claim to the payment of Rs. 28,890-3 on account of the loss sustained by them by the cutting of the bund across Tolly's Nala by the Port Commissioners.

"And regarding these the Chairman, on page 192, made the following remarks. He stated that—

'the Government gave sanction to bund the nala for a certain time for the purpose of syphoning the nala in connection with the sewerage works in the added area; the work was commenced under a contract to complete it within the sanctioned time, but during that period the Vice-Chairman of the Port Commissioners found that, the water of the nala having been embanked was not flowing into the Docks, and unless the bund was cut there was every chance of the vessels in the Docks being stranded. He, therefore, asked the Chief Engineer to the Government to order the bund to be cut. The Chairman went to the office and protested, but was told that it was extremely urgent and that nothing else could be done. Then Messrs. Burn and Company pressed for the damages they had sustained, and they were referred to the Government and the Port Commissioners; and now after a year the Government said they were not liable to pay damages.'

"On the first item being called on I spoke as follows:—

'With regard to item No. 2 and item No. 6 on the *agenda*, I regret I cannot see my way to voting in support of the resolution now proposed; for, with all due deference to the

opinion of the learned counsel that is referred to in the proceedings in question, I feel strongly that the attitude proposed to be taken by the Commissioners is not one they should assume towards Messrs. Burn and Company. There can be, I consider, no doubt that, when Messrs. Burn and Company entered into this contract, they did so in the full faith and reliance on the Commissioners doing all they could do assist them in the performance of their contract, and that they were entitled to conclude that, when the Commissioners undertook to obtain the sanction of the Government to the canal being bunded, they could look upon that undertaking as an assurance that the canal would be closed, and kept closed, until they had completed the work they had contracted to do. Messrs. Burn and Company are, I consider, entitled to better treatment at the hands of the Commissioners than a mere denial of liability. I consider that under the circumstances they are fairly entitled to all the support the Commissioners can give them. The Government gave the sanction to the Commissioners to have the canal bunded for the purpose of having the work comprised in Messrs. Burn and Company's contract carried out, and then the Government, before the work could be completed, accord their sanction to the Port Commissioners to break the bund. Apart from any question of the Commissioners being liable to Messrs. Burn and Company direct, I am inclined to think that Government are, in common fairness, liable to some one—be it the Commissioners or them (Burn and Company)—for the result of their action with regard to this canal, and I should therefore suggest that, instead of carrying out the resolution minuted on these proceedings, the Commissioners should again approach Government on the subject with the view of getting some fair adjustment made of Messrs. Burn and Company's very reasonable and proper claim.'

"On the 7th instant I received from the Secretary to the Corporation the following letter:—

'I am directed by the Chairman to forward the enclosed copy of a letter from the Hon'ble Mr. J. G. Apcar, with a request that you will be good enough to state whether the hon'ble gentleman's information as stated in his letter is correct. Section 32 of the Municipal Act deals with the question of when a Commissioner cannot vote or take any part in the proceedings of a meeting.'

"The enclosure is as follows:—

'I have the honour to bring to your notice, with reference to the advocacy by the Hon'ble Mr. D. F. Mackenzie of the claim of Messrs. Burn and Company, Limited, against the Corporation, that Mr. Mackenzie is a *Director* of that Company - a fact which he did not disclose in his written speech by which he supported his contention; and I leave it to you to bring the matter to the notice of the General Committee without any delay, if you find that my information is correct.'

"I would invite Your Honour's attention to the term 'advocacy' made use of by the Hon'ble Member.

"To this I replied on the 8th instant as follows:—

"I have the honour to acknowledge receipt of your letter No. 4223 of 7th instant, forwarding copy of one from the Hon'ble Mr. J. G. Apcar with a request that I will state whether the hon'ble gentleman's information as stated in his letter is correct. That I am a Director of Burn and Company, Limited, is quite correct. At the same time, although a Director of Burn and Company, Limited, as a reference to my remarks will show, I spoke as a representative of the interests of the rate-payers; and, so far from asking that the money should be paid, I merely moved that, in order to avoid, if possible, the expenses of a law suit, the matter should be again referred to Government, who, in my opinion, are the proper persons to pay.

'I may mention that, when I was being pressed to frame the exact wording of my amendment, it was suggested to me by a fellow-Commissioner that I should move "that the money be paid," but this I declined to do.

'If under the circumstances the Commissioners consider my action improper, I can only express my extreme regret, and ask that the Chairman will consider any action taken by me at the meeting in connection with the subject as withdrawn and cancelled. I was not acquainted with the provisions of section 32 of the Municipal Act quoted by you, and no one drew my attention to them.'

"I may mention, Sir, that my action, so far from being that of a delegate from Burn and Company, was entirely spontaneous, and prompted entirely by the statement of the Chairman which I have quoted. The matter has never yet been before us as Director of Burn and Company, Limited.

"This, then, Sir, is the plain, unvarnished account of the incident referred to by the Hon'ble Member.

That I erred in ignorance of the law I frankly admit; that the interests of the rate-payers were in the slightest degree imperilled by my action I absolutely deny; and I consider that it would have been more in keeping with the principles of honour among gentlemen, if the Hon'ble Member himself, if he were at the time aware of the fact of my being a Director of Burn and Company, Limited, and, if not, other Commissioners present at the meeting

who I know were aware of the fact, and who are no doubt better acquainted with the law governing the procedure in such matters, had there and then challenged my action, instead of adopting the tactics they have. That the Hon'ble Member was aware of the existence of my letter of 8th instant to the Secretary before he made his remarks to-day and before he submitted his amendment is, to my knowlege, a fact.

"I thank you, Sir, for the opportunity afforded me of making this explanation, and I leave it to you and the Council to decide whether my action in the matter is deserving of the insinuations made."

The Hon'ble MR. OLDHAM said :—"I trust I shall not give offence, not excessive offence at all events, to the Hon'ble Mr. Apcar if I congratulate him on the extreme moderation with which he has referred to this incident. Bearing that in mind, I must say that I rather regret the closing words of the explanation which has been given by the Hon'ble Member who has just sat down. But, Sir, the incident was even more ludicrous than the description of it that has been given in the speeches of my two hon'ble friends would make it appear to the Council. And in this I would even correct my hon'ble friend Mr. Mackenzie in his description of it, for he really made no motion. He stood up and read out what I understood was a general protest, or a sort of personal statement, against the line proposed to be taken. I myself was not in the least aware that he was connected with Burn and Company at the time I replied. I did not understand that a motion had been made, and I proposed as a substantive motion that the proceedings of the General Committee should be confirmed. My hon'ble friend Mr. Apcar was in exactly the same position. I believe I am right when I say he is our chief authority in the Corporation on points of order, and he pointed out that there had been no motion in my hon'ble friend's speech. Finally, the Chairman, in his desire to befriend a new member, fished out and formulated for Mr. Mackenzie a motion from his speech, and he was carried away by the exertions of his own friends in the vortex, and broke the law. Otherwise, he would not have done so, I think. At all events, the incident was so absolutely ludicrous and so trivial that I do not think any amendment of the law could possibly be based upon it."

The Hon'ble MR. BAKER said :—"I wish to say just one word with reference to the substantive amendment which has been moved by the Hon'ble Mr. Apcar. I need not say more than two or three words, because the opening words of the Hon'ble Mr. Mackenzie's speech showed that the effect of the amendment, if it were adopted, would be to disqualify every person who holds shares in any Incorporated Company with which the Corporation has dealings. It is one of the objects of this Bill to introduce a larger proportion of the business element into the Corporation, and it seems to me inconsistent with that object that we should strike out of the law a provision which would enable business men to sit on the Municipal Board. Every gentleman who holds shares in Jessop and Company, Burn and Company, or John King and Company, or in any of the numerous Coal Companies, would be disqualified under the operation of this amendment from sitting on the Municipal Board. I think, Sir, that is quite sufficient to show that the amendment is an impossible one. The Hon'ble Member made no allusion to the proviso to the section. The proviso to the section lays down that no Commissioner who has a share or interest in any matter shall vote or take part in any proceeding relating to that matter."

The Hon'ble MR. APCAR:—"I think the Hon'ble Member is mistaken there. Perhaps he did not hear, but I laid stress on the circumstance that the Commissioner was not allowed to speak or vote. The existing law will be unaltered by the Bill."

The Hon'ble MR. BAKER:—"I apologise, but the effect of the proviso is to disqualify any Commissioner who is a shareholder in the manner I have described from taking any part in proceedings relating to the affairs of the Company of which he is a shareholder or from voting in such proceedings. That rule, if strictly carried out, is quite sufficient to protect the interests of the Corporation in all respects. I am not going to refer to the incident which

Mr. [illegible] made the justification [illegible] amendment beyond saying that the Hon'ble Member (Mr. [illegible]) was admittedly a new member of the Corporation, and that he was [illegible] the existence of this rule, and it was not brought to his notice at the time by any other Commissioner or by the Chairman. If that rule is enforced in the future, as I have no doubt it will be, there will be none of the risks to which the hon'ble mover of the amendment has alluded."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I desire for one moment, Sir, to refer to the personal explanation which my hon'ble friend has given. Sir, the conduct of the Hon'ble Member has been challenged in several newspapers, and I think it is as well that Your Honour has permitted him to enter into that full explanation of his personal conduct which he has made here to-day. Sir, having listened carefully and attentively to that explanation, I am bound to say that it completely absolves him from any blame whatever in the part he took. He was a new member of the Corporation. He did not know the rules, but thought he was entitled to make a motion or to speak in support of a particular matter in which he happened to be interested. The mistake he committed was not brought to his notice, and in these circumstances I do not think it can be said that he did something which ought to expose him to public blame or censure. The explanation is satisfactory, and I am certain that the public will regard it as satisfactory. However that may be, I think that, with a view to guard against the possibility of mistakes of this kind occurring in the future, it is necessary to amend the law on the lines suggested by my hon'ble friend. The most important objection which has been brought forward by the Hon'ble Member in charge of the Bill is that if this amendment is accepted a large number of business men will be excluded from taking part in the municipal affairs of the town, a result which the Government would deplore, and which the Indian public would also deplore, because in our view the Corporation is the Corporation not only of the Indian community, but also of the European community, though I do think that the Indian community ought to have a preponderating voice in the Corporation. I should be very sorry indeed, Sir, if my friend's amendment would have that effect, but I do not think it would. My friend has mentioned four or five firms which do business with the Corporation, and has referred to certain coal companies which are in the same situation. I do not know that these coal companies are incorporated companies, with the exception of the Equitable."

The Hon'ble MR. MACKENZIE:—"Almost all of the coal companies are limited companies."

The Hon'ble BABU SURENDRANATH BANERJEE:—"With the exception of the coal companies and the firms to which my friend has referred, the gentlemen connected with other firms would not be excluded from being members of the Corporation, and it strikes me that it is desirable that perfectly independent men should be associated with the Corporation in the responsible work of the Corporation. It is a move in the right direction. The object of my friend's amendment is the absolute elimination of all personal interest in the deliberations of the Corporation. Nobody having any personal interest, or even the semblance of personal interest, in the Corporation ought to be a member. I think Your Honour's Government must agree to accept an amendment which proposes to raise to a higher level the purity of the Corporation. I strongly support this amendment, and I cannot think it is one which it is undesirable for the Council to accept."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"Looking into the English Municipal Corporations Act of 1882, 45 & 46 Vict., cap. 50, section 12, I find that section 31 (*now* 39) of the present Bill as drafted practically reproduces the provisions of the former section as limited by section 22, clause (3). I think it would be an advantage to know, if any Member of this Council is in a position to give us the information, whether these provisions have worked well in London, and, if they have worked well, whether there is any reason why we should have a different law here."

The Hon'ble Mr. Apcar, in reply, said:—"With regard to the grounds on which my amendment is objected to, I think if we are to have only persons discussing questions in the Corporation who are disinterested, it would be advisable to have this particular clause, for which I seek elimination, omitted, because I do not think it is advisable that parties who are personally interested in a pecuniary way should speak or vote on these questions. I gave what I mentioned as an illustration of how it may be possible for what I consider to be the mischief in retaining this clause, to happen. I stated facts and nothing more, but unfortunately that statement of fact, although not denied, has been taken as a personal attack upon an individual. I for my part am not so much concerned whether there is a law bearing on the point or not, but if we find one in the position of the Hon'ble Member voluntarily taking part in these discussions without disclosing his connection with the business, the danger is great that we may have discussions in the future of the same character in which the persons who are interested will also take part. I, on my part, here disclaim any idea of fixing any motive in the sense that it was with the knowledge of what the law was that the law was being broken. I said here is an illustration where innocently the law may be contravened, and it is on that ground I put my contention so strongly, because persons may so easily contravene the law without being conscious that there is such a law. I am sorry that there should have been such a long discussion in regard to what happened at the Corporation meeting. I avoided any such description as has been given. I am glad of the opportunity to say that, so far from taking offence from what was said by the Hon'ble Mr. Oldham, I would rather thank him for his reference to what happened, when the reference is made in the spirit in which it has been made. So far as I am concerned, I certainly am not open to the charge of having kept back any knowledge that I might have had at the time. I must take it that the Hon'ble Member, having come prepared with a written speech, has omitted to alter a statement that was already prepared, to meet my statement that my present amendment was sent in before the meeting of the Corporation where the incident I have referred to occurred, and that I had no idea of the Hon'ble Member's connection with the company until after the meeting of the Corporation. I have not now, nor had I at any time, the slightest suspicion that the Hon'ble Member would take part in the discussion of a matter in which he was interested in the hope that the fact of his interest might not be disclosed. I repeat that at the time I was wholly and absolutely ignorant of the circumstance, and it was by the merest chance that I learned the fact which has led me to quote the instance as an illustration. With regard to what happened at the meeting of the Corporation, I confess that it was extraordinary, and I have myself never seen in any proceedings there anything of the kind occur, because the standing orders and the laws of the Corporation were contravened in a greater degree, at that one meeting, than I remember as having happened in a whole year's proceedings. When it is made such a point of that I wrote that there had been 'advocacy' of the claim of Burn and Company, why, the speech that the Hon'ble Member has read out has indicated how it was that I was led to make use of such a term. It has been mentioned and relied upon by the Hon'ble Member here that he desired that Burn and Company, 'Limited', should be 'admitted to better treatment,' and that the Company were 'entitled to all the support' that could be given to them. And when it came to the point that an amendment had to be formulated, why the first amendment that was put forward by the Hon'ble Member was, as the Hon'ble Mr. Oldham will remember, to the effect that the resolution of the General Committee that the Corporation declined to admit the claim of Burn and Company, should not be confirmed. That was the original amendment, and it was not put in the form that it was cast, as the Hon'ble Mr. Oldham will remember, because I pointed out that it only negatived the resolution of the General Committee, and, therefore, was not an amendment at all. I think I am right, therefore, so far as I am concerned, in having said that the Hon'ble Member was supporting the claim of the company. I have no wish or desire to make any personal attack or to go any further into this incident. I have put what I had to put only on general grounds; and this particular amendment was drawn long before the incident occurred, and was sent in to the Secretary to the Council before the meeting of the Corporation, so that it cannot be suggested that it was in consequence

of anything that happened there that I have brought forward my amendment. I have merely quoted what happened as strong support to my contention in this particular question. I have proceeded on the basis that the Hon'ble Member erred in innocence. He was a new member in the sense that he had never attended a meeting before, and he had not made himself acquainted with the standing orders. Now, Sir, my whole argument has proceeded on the footing that I say honourable men may make a mistake on such a point. That is the danger, and on that very ground—it is one of my strongest grounds—I maintain that the omission of this clause is necessary. I gave the illustration, because, when I can quote an actual example which has really happened, it has much greater weight than if I spoke in general and vague terms. My point is that whatever occurred was done in ignorance of the law. But the fact remains that there was interest on the part of a member of the Corporation in the question under discussion. That fact, however, did not deter him from intervening in the discussion. Those were the grounds of my argument, and I confess that I cannot think it right that now, when we have so many private firms converting themselves into limited liability companies, the members of those firms when their liability was unlimited should be disqualified for membership of the Corporation, and the very same men, when their liability becomes limited, should be eligible for membership. I cannot myself recognise that they become qualified any more than they were before because their liabilities have become limited."

The motion was then put and lost.

SECTION 41.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 33 (*now* 41), line 9, for the words "the Chief Judge of the Court of Small Causes of Calcutta" be substituted "a Judge of the High Court exercising original jurisdiction."

He said:—This question, Sir, is one of some importance; and, although I have had an opportunity of talking it over with the Hon'ble the Legal Remembrancer, I regret to say that my difficulties have not been removed, and I am obliged to press the matter before the Council. The question is one of law, but I undertake, if Hon'ble Members will follow the discussion, to make it intelligible even to lay minds. Section 31 (*now* 39) specifies the circumstances which disqualify a person for being a Commissioner, that is to say, for being elected or appointed, as well as for continuing, a Commissioner. One of the circumstances so specified in clause (*f*) is the acquisition of an interest in any contract or employment with the Corporation. Section 32 (*now* 40) then proceeds to lay down that a person so disqualified ceases to be a Commissioner, and section 33 (*now* 41) follows with a provision regarding the Court which is to decide such question of disqualification. The section then relates to a case in which a question of disqualification is raised when a person has been appointed and continues to hold office as a Commissioner. Now, let us turn to section 50 (*now* 56). That deals with a case in which, among other things, a similar objection may be taken just at the time of appointment or election of a Commissioner. You will remember that the same set of circumstances which disqualify a man from being elected also disqualify him from continuing to be a Commissioner. Now, section 50 (*now* 56) deals with a case at the time of election, and provides that, in a case of disputed validity, the trial is to be by the High Court. It is manifest, therefore, that if, as soon as a person is returned a Commissioner, somebody comes forward and says that he cannot be returned for the reason that he has an interest in some contracts with the Corporation, the matter has to be fought out before a Judge of the High Court exercising original jurisdiction. If, on the other hand, a man is appointed a Commissioner, and subsequently, say a month afterwards, he places himself in such a position that he has interest in some contract with the Corporation, then, under section 33 (*now* 41), the application has to be made to the Chief Judge of the Court of Small Causes. Now, I really cannot see the distinction between the two cases. The object of both the proceedings is to unseat the Commissioner. The object of the proceeding under section 50 (*now* 56) is to unseat a man who has been elected but has not yet entered into office. The object of the proceeding under section 33 (*now* 41) is to unseat a man who has been elected a Commissioner and has been holding office as

such. I venture to think that it would be reasonable to place the two on the same footing. The disqualification of a person as a Commissioner, whether such objection is taken at the time of election or subsequently, is a serious matter, and, if cases of the one class are tried by a Judge of the High Court exercising original jurisdiction, I fail to see why cases of the other class should not also be so tried. This is my first reason, but there is a stronger reason. By section 33 (*now* 41) you confer jurisdiction upon the Chief Judge of the Court of Small Causes of Calcutta, but you cannot take away the jurisdiction the High Court possesses under the charter. My hon'ble friend to my left will bear me out when I say that, if section 33 (*now* 41) had not been in the Act at all, it would have been quite open to any person to make an application to a Judge of the High Court exercising original jurisdiction, asking him to deal with such a matter as this upon proceedings in the nature of a *quo warranto*. Simply because you put in section 33 (*now* 41) here, you cannot take away the jurisdiction which is vested in the High Court under its charter. I say, therefore, that section 33 (*now* 41) is unnecessary. It will only give a Judge of the Court of Small Causes a co-ordinate jurisdiction, but it will still be possible for any person to make an application to the High Court."

The Hon'ble MR. BAKER:—"I might mention to the Hon'ble Member that there is a section in the Bombay Act,* section 33, which gives jurisdiction to the Chief Judge of the Bombay Small Cause Court."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA continued:—"I am very much obliged to my hon'ble friend for the reference, because it materially strengthens my argument. In Bombay they are consistent. In Bombay they authorise the Chief Judge of the Small Cause Court to decide both classes of cases. I say that in section 50 (*now* 56) you provide that the matters specified therein are to be disposed of by a Judge of the High Court exercising original jurisdiction; you should lay down the same rule in the case of section 33 (*now* 41). There is no reason why the two should be placed on different footings.

"Then in the third place I desire to point out that this is just one of those cases which are taken out of the jurisdiction of the Court of Small Causes by the Act relating to that Court. If you turn to the Presidency Small Cause Courts Act,† section 19, clause (*s*), you will find that the Small Cause Court has no jurisdiction over suits to obtain an injunction, and if the Act which created the Small Cause Court says that the Small Cause Court shall have no jurisdiction in certain things it is not desirable, I think, that this Council should authorise the Chief Judge of that Court to do those things.

"Fourthly, suppose you authorise the Chief Judge to do these things, there would be no finality. You cannot take away the power which is vested in the High Court—the power of supervising the proceedings of lower Courts. Therefore, although you say that the decision of the Small Cause Court Judge shall be final, the High Court will still be entitled to interfere. On the whole, therefore, it would be more satisfactory if section 33 (*now* 41) and section 50 (*now* 56) were placed on the same footing."

The Hon'ble BABU BOIKANTA NATH SEN said:—"I regret, Sir, that I cannot give support to this amendment which has been proposed by the Hon'ble Member. In the first place, he observes that he does not see any distinction between the provisions of section 33 (*now* 41) and section 50 (*now* 56). Section 33 (*now* 41) contemplates the existence of an occasion for adjudication after one is in office. Section 50 (*now* 56) contemplates a different state of things. It contemplates a state of things when a person is obtaining a seat in the Corporation. So that there is this distinction. Then I do not think that the Specific Relief Act, which was evidently in the mind of my hon'ble friend, gives to the High Court jurisdiction for trying cases contemplated under section 33 (*now* 41) of this Bill. It can issue a *mandamus* under certain circumstances, but those circumstances are not covered by this section 33 (*now* 41). Reference has also been made to the Presidency Small Cause Courts Act, under which no injunction can be issued. This is not a case of an injunction; it would require an adjudication upon other grounds."

* Bombay Act III of 1888.
† Act XV of 1882.

The Hon'ble MR. BAKER said:—"I do not wish to discuss the question as a matter of law at all, Sir, but I should like to explain the circumstances under which there is a difference between section 33 (*now* 41) and section 50 (*now* 56). In the original Bill the reference was to be made in both cases to the Chief Judge of the Small Cause Court; but, when we came to discuss the matter in the Select Committee, the members who represented the Corporation, and who, I may say, were more interested in the matter of elections than any other member of the Committee, considered that the decision of election petitions had better be referred to a Judge of the High Court rather than to the Chief Judge of the Small Cause Court."

The Hon'ble BABU SURENDRANATH BANERJEE:—"That is so."

The Hon'ble MR. BAKER:—"But they both agreed that in the case of Commissioners who had already obtained their seats it was sufficient to follow the Bombay practice, and make the reference to the Judge of the Small Cause Court only. As a matter of expediency, and not at all as a matter of law, it seems to me desirable that the reference should be confined to the Small Cause Court, and that we should not trouble the High Court in matters of this kind unless we are obliged to do so."

The Hon'ble MR. HANDLEY said:—"Mr. President and gentlemen, I only wish to make a few remarks upon this question, which has somewhat of a legal aspect. I do not follow the objection of the Hon'ble Member for the University as to the necessity for bringing the two sections into union. To my mind there is, as the Hon'ble Member in charge of the Bill has already indicated, a very distinct question of principle between the two sections. As probably most of the Council are aware, in former days election petitions used to be tried by Committees of the House of Commons, and, as that was not satisfactory, the work was transferred to a judicial tribunal—that is, one of the Judges of the Queen's Bench. Similarly, I presume that is the reason why the Hon'ble Member requests that these election petitions should be tried only by a Judge of the High Court who is absolutely independent of the Government of Bengal, or the Government of India, or the Secretary of State, as he holds his commission direct from the Queen herself. And I presume that is the reason why a Judge of the High Court was substituted in section 50 (*now* 56). That is a concession rather beyond what the Bombay Act provides for. As I understand the Bombay Act, the elections are tried by the Chief Judge, who is really an officer under the orders of the Local Government. Therefore, in that respect, the Bill goes beyond what the Bombay Act is, and is a concession beyond what the Hon'ble Member requires It is exactly as the Hon'ble Babu Boikanto Nath Sen states in one case; it is the purity of elections which is in question, and that has to be decided by a Judge of the High Court. Section 33 (*now* 41) refers only to the disqualifications of a Commissioner when elected. If any one will take the trouble to read the section detailing the disqualifications, surely he will admit that a decision in reference to them will not require abilities of a very high order. They are that the person disqualified—

'(*a*) is of the female sex; or

(*b*) has been sentenced by any Court to transportation, imprisonment or whipping for any non-bailable offence, such sentence not having been subsequently reversed or quashed, and such person's disqualification on account of such sentence not having been removed by an order which the Local Government is hereby empowered to make, if it thinks fit, in this behalf; or

(*c*) is an uncertificated bankrupt or an undischarged insolvent; or

(*d*) is the Chairman or Vice-Chairman or Deputy Chairman or a municipal officer or servant or a plumber licensed under this Act; or

(*e*) is a Judge of a Court of Small Causes, or a Municipal Magistrate, or is acting in either of those capacities; or

(*f*) has directly or indirectly, by himself or by his partner or employer, any share or interest in any contract or employment with, by or on behalf of, the Corporation.'

"The only clause likely to give rise to much discussion is the last one, with regard to a share or interest in contracts. But, as section 33 (*now* 41) runs, the enquiry will only go on when the Commissioner does not admit the allegation, or when he is himself in doubt about it. If he admits the allegation, the enquiry is at an end at once. It is only if he denies or is in doubt that it proceeds, and I

must say that does not strike me as being a very difficult matter for the Chief Judge of the Small Cause Court to decide upon, and I do not think any better arrangement could be made. I am not quite sure about the force of the legal argument the Hon'ble Member has advanced, because a Judge of the High Court sitting in original jurisdiction has only jurisdiction in the town proper. Suppose one of these cases referred to a Commissioner for a ward outside the town. I do not quite see how the Judge sitting on the Original Side would have jurisdiction to entertain an application in a case like that. It might possibly be done by a reference to a Bench for a *mandamus*, but it is a difficulty I have not yet seen disposed of. In my opinion the principles underlying the two sections can be clearly distinguished: the one where it is a question of purity of elections, which is reserved for the High Court; the other, a simple matter concerning a Commissioner personally, is one which can well be disposed of by the Chief Judge of the Small Cause Court."

The Hon'ble Babu Surendranath Banerjee said:—"I am happy to say that in this matter I am entirely in accord with the Hon'ble Member in charge of the Bill. It is, more or less, a lawyer's argument, but, behind the arguments which lawyers bring forward, there are important considerations of expediency. Sir, it is only natural that High Court Pleaders and Advocates should be very anxious to have cases tried by the tribunals before which they practice. But it is not always convenient to suitors to be brought to the High Court, and to go through all the expensive forms of litigation which are incidental to cases being tried by that Court. I think it was that consideration, more than anything else, which determined the Select Committee to accept the section which confers jurisdiction on the Chief Judge of the Small Cause Court. I do not know what the fees in the High Court are, but they are considerable, and a person appearing before that Court has to pay those fees. If he has to go before the Small Cause Court, he pays fees on a lower scale, and, therefore, I think it is a distinct advantage that the tribunal before which he has to appear should be the Small Cause Court. Let me not be misunderstood. I have the greatest respect for the High Court, and I do not for one moment wish to say anything which might tend to lessen the respect in which the High Court is held as the protector of popular rights and liberties. But all the same I think the Small Cause Court is, in matters of this kind, a better tribunal than the High Court. I have not been altogether content to rely upon my own judgment in regard to this question, and I have had an opportunity of consulting friends on whose judgment I am in the habit of placing reliance in matters connected with the Municipality, and they are distinctly of opinion that the section should remain as it is"

The Hon'ble Mr. Apcar said:—"With reference to the appeal rather pointedly made to me by the hon'ble mover of this amendment, I beg to say that I am not here as the legal adviser of the Council, and I am perfectly sure that any legal opinion differing from that given by the Hon'ble Member who represents the legal views of the Government will be treated as superfluous. There is another point also with respect which I have to make a disclaimer, and that is that I was not the representative of the Corporation when this particular section was agreed to in Select Committee. With regard to what has fallen from my hon'ble friend who has just sat down, I think he is a little in error if he thinks that the proceedings of the Small Cause Court will be of a less expensive character than the proceedings of the High Court, because we may take it that any question of this kind which has to go before a legal tribunal will be fought out very seriously, as persons of the standing of the Commissioners of the Corporation would be concerned. As a matter of fact, it would be infinitely better for the advocates of the High Court that the cases should be tried in the Small Cause Court, because, naturally, their fees will be much higher when they go to a tribunal before which they do not ordinarily practise, than in the Courts in which they do ordinarily practise. With regard to procedure, with all deference to those who have spoken, I think that the procedure, if the question is left to the High Court, would be more expeditious, and would be less costly, than if the cases went before the Small Cause Court; because, if I may venture to give an opinion at variance with that of the Hon'ble the Legal Remembrancer, the proceedings, if they came before the High Court, would be heard on affidavits and heard very expeditiously on a motion

day, and the whole matter would be decided in a very short time. If the proceedings come before the Small Cause Court, they will take the form of a *vivâ voce* examination of the parties; so that the procedure would altogether be of a different character and would be more prolonged. I had myself intended to notice these sections, but in the crowd of business they escaped my notice."

The Hon'ble Dr. Asutosh Mukhopadhyaya, in reply, said:—"Sir, I do not wish in reply to repeat the arguments I have already advanced, but there is one point which I must notice. My hon'ble friend Babu Surendranath Banerjee may have his own reasons for seeking to restrict the jurisdiction of the High Court, but he ought to have known that, if the procedure embodied in section 33 (*now* 41), of the Bill stands, it will be to the benefit of my branch of the profession, because we are shut out from the Original Side of the High Court; therefore, it was from no personal feelings that I brought forward this motion."

The Hon'ble Babu Surendranath Banerjee said:—"I beg to disclaim any aspersion of that sort. I did not think my hon'ble friend would take it in the earnest fashion in which he has taken it. It was merely a good-humoured joke, and I think the profession to which he belongs is strong enough to bear a joke of that description."

The motion was then put and lost.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that in section 33 (*now* 41), the following words be added after the word "and" in the last line, namely:—

"subject to the provisions of section 6 of the Presidency Small Cause Courts, Act, 1882."

He said:—"This is, I believe, what is intended by section 33 (*now* 41), because I have been assured by the Hon'ble Member in charge of the Bill that there is no intention whatever of restricting the powers of revision which the High Court possesses under its charter. Section 6 of the Presidency Small Cause Courts Act simply provides that the High Court can supervise the proceedings of the Small Cause Court under the powers which it possesses under 24 & 25 Vict., cap. 104, section 15, over all Courts of inferior jurisdiction. In other words, the finality which is mentioned in section 33 (*now* 41), is only a qualified finality, that is, finality subject to the supervision of the High Court. If my amendment be adopted, it cannot subsequently be argued that by section 33 (*now* 41), the jurisdiction of the High Court has been ousted or that there was any intention to interfere with the powers the High Court possesses under its charter."

The Hon'ble Mr. Baker said:—"It seems to me that the amendment is superfluous if the Hon'ble Member is correct in saying that we cannot interfere with the jurisdiction of the High Court under its charter, and I believe that to be entirely correct. That being so, whether we insert these words or whether we leave them out, the jurisdiction of the High Court remains the same."

The Hon'ble Babu Jatra Mohan Sen said:—"Sir, if the object of this section is to leave the jurisdiction of the High Court untouched, I should think the matter might be made clear by the insertion of the words moved by the Hon'ble Member who proposed the amendment."

The Hon'ble Babu Surendranath Banerjee said:—"Is it competent to this Council to pass any law which will interfere with the powers of the High Court?"

The Hon'ble Mr. Handley said:—"I think the Hon'ble Member for the University is quite right in his contention that any settlement in this section must be subject to the general law laid down in section 6 of the Presidency Small Cause Courts Act. But why draw attention to the fact? It will only encourage many people to appeal who might otherwise not be aware of the section in the Presidency Small Cause Courts Act. The intention of this Council is, as far as it can, to make this section final and to discourage appeals as much as possible. If attention is drawn to the fact that it is possible to appeal, is there anybody who knows Bengal who does not believe that advantage will be taken of it? This Council expresses its wish

that this should be final; but this addition would stultify the Council's desire expressed for finality. If there is a possibility of getting it revised, no doubt the legal profession will find it out, but I do not see the necessity of drawing attention to means whereby that finality should be set aside."

The Hon'ble MR. APCAR said:—"I am sorry that the Hon'ble the Legal Adviser of the Government thinks it is a right policy to adopt to keep covered up the rights individuals may have. If they have got the right of appeal, I think it is only fair that they should be informed of that fact. I cannot agree that it is right to pursue a policy which would deliberately keep that important circumstance hidden from persons interested, and to refuse this amendment because it would bring pointedly to their attention that they have the right of appeal."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, in reply, said:—"I am bound to say that the argument which has been advanced against my motion has taken me by surprise. I thought it was our duty to make the provisions of this Act absolutely clear. It has been said that I correctly stated that this Council has no authority to limit the powers of the High Court, and although we expressly say in section 33 (*now* 41), that the decision of the Chief Judge of the Small Cause Court shall be final, we mean only qualified finality. Surely, this is not a very straightforward way of putting things."

The Hon'ble MR. BAKER:—"Does the Hon'ble Member refer to what I said? I said that we had no power to interfere with the jurisdiction of the High Court under its charter."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA continued:—"Not many years ago the question was raised whether the Supreme Council is competent to interfere with the jurisdiction which the High Court possesses under its charter. There was a hopeless difference of opinion among the Judges of the High Court, and on an appeal to the Privy Council the decision of the majority of the Judges was reversed. Therefore, I say, that to prevent any possibility of a similar question being argued as to whether finality under this section is absolute or qualified, the words I have suggested should be put in. If it is the intention of the Council not to interfere with the jurisdiction of the High Court, why not say so plainly?"

The motion was then put and lost.

The Hon'ble DR. ASUTOSH MUKHOPADYAYA also moved that in section 33 (*now* 41), line 11, for the words "making such inquiry as he deems necessary" be substituted the words "taking such evidence as may be adduced before him".

He said:—"Sir, this is really a matter of drafting. I want to have it made clear that the inquiry is to be a judicial one; that it is not to be in the nature of an executive inquiry, which it would practically be if the Small Cause Court Judge were in a position to say 'I have made sufficient inquiry, and I make an order disqualifying the Commissioner.' My contention is that there should be what is called a judicial inquiry, and that the evidence which may be adduced may be taken in a judicial manner. I have been looking into the corresponding sections of the English Act, and I find elaborate provisions of a similar description."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I think there ought distinctly to be a judicial inquiry. I hope my hon'ble friend will not object to this amendment. It is really carrying out the spirit of the section. Being a judicial inquiry, the evidence ought to be recorded in a judicial manner."

The Hon'ble MR. BAKER said:—"There is every intention that the inquiry shall be a judicial inquiry. It seems to me that the words used by the hon'ble mover of the amendment would make the scope of the inquiry narrower than the words which now stand in the section. The words he proposes are—'taking such evidence as may be adduced before him'. On the face of it those words would preclude the Chief Judge from calling for evidence of his own motion. It might be the case that the evidence adduced by the parties

before him might be insufficient. Surely it is not the intention to prevent the Judge from calling for such evidence as he may consider necessary."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA :—"That is not my intention. I think the words I propose are wide enough."

The Hon'ble MR. BAKER :—"You say he can only have such evidence as may be adduced before him, which practically means that he cannot call for evidence."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA :—"That is included."

The Hon'ble MR. BAKER then proposed that the words to be substituted should be—

"making such inquiry and taking such evidence as he deems necessary."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA :—"This will, to some extent, meet the object I have in view."

The Hon'ble MR. BOLTON said :—"I object to any change in the section. The inquiry obviously implies the taking of evidence, if evidence is needed. The amendment, as put by the Hon'ble Member, restricts the Chief Judge to the evidence which may be adduced by the parties. That evidence may be insufficient for the inquiry, or it may be needlessly long and unnecessary, causing much waste of time. The Chief Judge should not be fettered by any provision as to the taking of evidence. I should, for my part, be glad to see the election petitions also made over to the Chief Judge of the Small Cause Court instead of being reserved for an elaborate hearing before a Judge of the High Court exercising original jurisdiction."

The Hon'ble BABU SURENDRANATH BANERJEE said :—"Possibly ten years hence election petitions will be taken up by the Small Cause Court, but we have not got to that stage of perfection yet. I cannot advise my hon'ble friend to accept the words now given, because in that case the Judge would be at liberty to shut out evidence. I do not think he ought to be allowed to do that."

The Hon'ble MR. BOLTON :—"My contention is that there should be no restriction at all. Leave it to the Judge to accept or reject evidence. The Judge to whom this power is committed should be trusted."

The Hon'ble BABU SURENDRANATH BANERJEE :—"We trust the Judges certainly, but at the same time we trust them subject to certain conditions, and I think we ought to make the conditions as clear and as stringent as possible. I do not think it is necessary to allow an unlimited power of discretion to Judges, and therefore I consider it would be as well if we legislate so that it should be obligatory upon the Judge to take such evidence as may be adduced. He ought to go thoroughly into the evidence. I would not give him any discretion to act otherwise."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA :—"In spite of what has fallen from my hon'ble friend, I will accept the amended words proposed by the Hon'ble Member in charge, as he is apparently not prepared to make any further concession."

The Hon'ble BABU JATRA MOHAN SEN said :—"I would suggest 'due inquiry'."

The Hon'ble MR. BAKER :—"If the hon'ble mover of the amendment has accepted the amended form I proposed, it will be unnecessary to discuss the matter further."

The Hon'ble MR. HANDLEY said :—"I do not know what reason my hon'ble friends have for supposing that the Chief Judge will not do his obvious duty, that is to say, he will make an inquiry, and, in order to come to a right decision, he will call for such evidence as he may consider necessary. He has to come to a

legal decision on a question of law and fact as it may be, and I don't see what possible reason there can be for supposing that he will not do what is his plain and obvious duty. I should think that the amendment accepted by the Hon'ble Member in charge would specify everything that is necessary that is to empower him to make such inquiry and to take such evidence as he may deem necessary."

The Hon'ble Mr. Apcar said :—"I conclude that it is intended that whatever matter may come before the Small Cause Court will be tried under the ordinary procedure of that Court. I do not know if it is intended that there should be any difference. That has not been made quite clear to me, because I take it that, if the cases are tried according to the procedure of the Court under the law governing that Court, such evidence will be included as the Judge in his discretion thinks is relevant, and the ordinary procedure will take its course."

The motion was then put in the form proposed by the Hon'ble Mr. Baker, and was agreed to.

Section 43.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that in section 34 (*now* 43), sub-section (*4*), for the words "or may distribute them amongst the candidates in such manner as he thinks fit" be substituted "but no voter shall be entitled to vote for more than one candidate".

He said:—"As only one Commissioner is to be returned by each ward, it seems to me that the change proposed is necessary. Suppose there are half a dozen candidates, and a man has ten votes, I do not see the logic of his voting for three of them; only one Commissioner is to be returned; and, if he votes for three, it seems to me that he does not exercise his choice at all. I find on looking into the English Municipal Act that every person entitled to vote may vote for any number of candidates not exceeding the number of vacancies. I think a provision of the same sort is required here. There is only one person to be returned, and, if a man votes for two or three candidates for the one vacancy, I do not consider that he votes at all. To make the absurdity of the position manifest, you have only to consider the case in which the electorate consists of only one voter."

The Hon'ble Mr. Baker said:—"This is an oversight on the part of the Select Committee. We overlooked the fact that there would no longer be more than one seat for each ward, but instead of putting the amendment quite in the way the Hon'ble Member has proposed, I think it would be simpler if we left out the last two lines, viz., 'or may distribute them among the candidates in such manner as he thinks fit'."

The Hon'ble Babu Surendranath Banerjee:—"Am I to understand that the effect of this amendment would be to prevent voters from distributing their votes"?

The Hon'ble Mr. Baker:—"Yes, that is it exactly."

The Hon'ble Babu Surendranath Banerjee:—"Then I strongly object to it. I am most distinctly in favour of the continuance of the present system, although only one candidate is to be returned for each ward. In the first place, it is a question of principle. I do not think it right that any restriction should be placed on the voter as to the way in which he should exercise his power of voting or give away his votes. The voter ought to be left the fullest discretion as to how he will distribute his votes if he has more than one. In the second place, I object to the proposal because it would in many cases mean the return of inferior candidates. Take my own ward, for example, which is a mixed ward consisting of Hindus and Muhammadans Now, supposing there is an inferior Muhammadan candidate—I am not referring to my colleague, who is an able and a thoroughly respected man—but suppose he retires, and an inferior Muhammadan candidate, who does not enjoy the confidence of the electors, comes forward. Now, Sir, in such a case the procedure many a voter will adopt would be somewhat as follows. He will give one or two votes to his co-religionist, not because he wants him to be returned, but because he belongs to the same faith, and he will transfer the

balance of the votes to the superior candidate. If this amendment be accepted, he will not be able to do this. Suppose there are two candidates, as there would be in my ward, myself being one, and a Muhammadan gentleman—not my colleague at the present moment—being the other. There is a large number of Muhammadan voters, and they will feel it their duty to give one vote to their co-religionist, and if you compel them to confine their votes to only one candidate, the other will not get any votes at all, though he may be the superior candidate. The same thing might be repeated in other wards, and I think, Sir, in a matter like this we ought not to be guided by abstract principles, but rather proceed upon the basis of actual experience. This is the point which I desire to submit for the consideration of my hon'ble friend in charge of the Bill, and I should like to know how he proposes to deal with it. Cases of this kind will occur, and in a number of wards having a mixed population, such as wards 9, 13, 14 and others, serious difficulties will arise, and you will not get the best candidates. The course proposed by the Hon'ble Member would, I admit, be perfectly logical, but we are not governed by logic, but rather by common-sense. Leaving, therefore, the barren ground of logic, I take my stand on the fertile soil of common-sense and past experience. Here we have experience, and I ask Hon'ble Members whether they have had the experience in these electioneering contests that I have had. I have passed through eight contests, and I can say positively that the certain result of this proposal would be that, in the mixed wards I have referred to, you would create difficulties in the way of the return of the better candidates. Is that a difficulty which the Government wants to create? I feel sure it does not."

The Hon'ble Mr. Baker:—"It certainly had never struck me until the Hon'ble Member mentioned it that any elector would be so irrational as to give part of his votes to his co-religionist as a matter of duty or a matter of sentiment."

The Hon'ble Babu Surendranath Banerjee:—"They do it systematically."

The Hon'ble Mr. Baker:—"The Hon'ble Member is perfectly right in saying that he has greater experience of elections than probably any other member of this Council; and, if he assures us that that will be the actual result, I should greatly hesitate before asking the Council to accept any proposal which will have that result. If he assures us that it will have the effect of keeping out good candidates, I would recommend that the Council should not accept the amendment."

The Hon'ble Babu Surendranath Banerjee:—"It would be so. I would not make such a statement in Council unless I felt that it would be so."

The Hon'ble Mr. Bolton said:—"I entirely agree with the Hon'ble Babu Surendranath Banerjee. I understand that section 34 (*now* 43), as now drafted, is the existing law, which provides that a voter may distribute his votes among the candidates as he thinks fit. The principle of distribution of votes exists in elections under the Regulations for this Council. It has happened that a District Board or Municipality which has several votes commissions its representative to give one vote to one candidate, two to another, and so on. If that prevails in Council elections, I see no reason why it should not also be the rule in the municipal elections. Votes may also be distributed in the Parliamentary elections at home. The Hon'ble Babu Surendranath Banerjee has well illustrated the utility of the present system in Calcutta, and no necessity for a change has been advanced."

The Hon'ble Babu Boikanta Nath Sen said:—"I beg to say that in the mufassal municipalities they have a power of distribution, and I feel that practical difficulties would arise if voters were enjoined to give one cumulative vote and were to be deprived of the right of distribution. The difficulties which would follow any legislation of that description would be very much greater than any which could arise if the section be allowed to remain as it is."

The Hon'ble Mr. Apcar said:—"Mr. President, I support my hon'ble friend, not because of any ground on which he has put his contention, but on

grounds of my own. Supposing there are three candidates, whether they are Hindus, Muhammadans, or whoever they may be, only one can get in. I wish A to be returned, but I may prefer B to C, and I may wish therefore, while giving a majority of my votes to A, to give some to B, in order that he may have a better chance than C. That is the reason why I think it is advisable that there should be this distribution."

The motion was then put and lost.

The Hon'ble THE PRESIDENT ruled the following motion, standing in the name of the Hon'ble Mr. Apcar, to be out of order:—

that to section 34 (*now* 43), sub-section (*3*), the following be added, that is to say:—

"Provided that the electors of Wards 1, 3, 4, 6, 8, 9 and 22 may each elect two Commissioners."

SECTION 46.

The Hon'ble MR. APCAR, by leave of the Council, withdrew the following motion, standing in his name,—

that in sub-section (*2*) of section 37 (*now* 46), for the figures "600, 1,000, 1,500, 2,000, 2,500, 3,000, 3,500, 4,000, 4,500 and 5,000," the figures "1,000, 2,000, 3,000, 4,000, 5,000, 6,000, 7,000, 8,000, 9,000, 10,000," respectively, be substituted.

SECTION 47.

The Hon'ble MR. APCAR also, by leave of the Council, withdrew the following motion, standing in his name,—

that in sub-section (*2*) of section 37 (*now* 47), for the figures "600, 1,000, 1,500, 2,000, 2,500, 3,000, 3,500, 4,000, 4,500 and 5,000," the figures "1,000, 2,000, 3,000, 4,000, 5,000, 6,000, 7,000, 8,000, 9,000, 10,000," respectively, be substituted.

SECTION 52.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 42A (*now* 52), for the word "Government" be substituted "Secretary of State for India in Council, the Government of India, or the Local Government as owner and occupier of any house or land".

He said:—"This amendment was put in for the purpose of enabling me to make an inquiry. I find that section 42A (*now* 52) corresponds to section 26 of the existing law, and I have not been able to make out why the phraseology has been altered. The existing section provides—

'No vote shall be given by the Secretary of State for India in Council, the Government of India or the Local Government as owner or occupier of any house or land.'

"If there is no valid reason for making a change, I would suggest that the existing language may be retained."

The Hon'ble MR. BAKER said:—"The reason for the change is that, since the Act of 1888 was passed, the Bengal General Clauses Act of 1899 has come into force. Under the General Clauses Act, the expression 'Government' includes both the Government of India and the Local Government, so that those two out of the three functionaries mentioned in this amendment are covered already by the word used in the section. The Secretary of State for India in Council is not covered, but it is not conceivable how the Secretary of State for India in Council could give a vote, except through the Local Government or the Government of India. Therefore, I think this amendment is unnecessary."

The amendment was then, by leave of the Council, withdrawn.

SECTION 58.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA's motion for the amendment of section 7, sub-section (*1a*) [*now* section 8, sub-section (*2*)] having been lost, he, by leave of the Council, withdrew the following two motions standing in his name:—

(1) that in section 52A (*now* 58), sub-section (*1*), line 3, the word "and" be omitted; that in line 4, after "Calcutta" the words "and the Senate of the University of Calcutta" be added; and that in lines 6 and 9, after the word "Commissioners" the words "or the Senate" be added;

(2) that in section 52A (*now* 58), sub-section (*2*), line 2, after the word "Commissioners" the words "and the Registrar of the University, respectively," be added.

The Hon'ble BABU JATRA MOHAN SEN's motion for the amendment of section 7, sub-section (*1a*)[*now* section 8, sub-section (*2*)] having been lost, he: by leave of the Council, withdrew the following motions standing in his name,—

(1) that sub-section (*1*) of section 52A (*now* 58) be altered to run thus:—

"Appointments of Commissioners by the Bengal Chamber of Commerce, the Calcutta Trades Association, the Bengal National Chamber of Commerce, the Central National Muhammadan Association, the Muhammadan Literary Society, the University of Calcutta and the Commissioners for the Port of Calcutta shall be made according to rules framed under section 7 [*now* section 8], sub-section (*3*)?";

(2) that sub-section (*2*) of section 52A (*now* 58) be omitted.

SECTION 61.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the following section be added:—

"The Corporation may, if they think fit, but only after due inquiry, in which the Commissioner concerned shall have the right to be heard, remove any Commissioner elected or appointed under this Act, if such Commissioner has been guilty of misconduct in the discharge of his duties or of any disgraceful conduct."

He said:—"With the permission of the Hon'ble Member in charge of the Bill, I would like to make a slight alteration in the amendment. I should like to say insert the words: 'The Corporation with the sanction of the Local Government,' or 'The Local Government at the instance of the Corporation'."

The Hon'ble MR. BAKER said:—"I have no objection to the words 'The Local Government may, if it thinks fit, on the recommendation of the Corporation made after due inquiry' being used."

The Hon'ble BABU SURENDRANATH BANERJEE:—"I will accept those words. The section will then read—

'The Local Government may, if it thinks fit, on the recommendation of the Corporation, made after due inquiry,' &c.

"I find that this was really an omission in the Calcutta Municipal Act, because a section of that kind has been the law in the mufassal municipalities ever since we have had mufassal municipalities. I will read out to the Council section 19 of the Bengal Municipal Act,* upon which this section is practically based. Section 19 is as follows:—

'The Local Government may, if it thinks fit, on the recommendation of the Commissioners at a meeting, remove any Commissioner appointed or elected under this Act if such Commissioner shall have been guilty of misconduct in the discharge of his duties, or of any disgraceful conduct.'

"I do not know that it is necessary for me to say much to recommend this amendment to the acceptance of the Council. We are all interested, apart from the controversies of a recent date, in maintaining the purity of the Corporation, and I am perfectly certain that this Council will sympathise with any desire on the part of any Hon'ble Member of this Council to ensure the purity of the Corporation by any legislative measure which might be found necessary. I do not know that I need say much more than this, except perhaps one word with reference to the phrase 'disgraceful conduct'. It might be said that this is somewhat vague. What is meant by disgraceful conduct? With reference to it, I will quote the observations of the Advocate-General when the Mufassal Municipal Bill was being considered by this Council. The Hon'ble the Advocate-General thought that the term 'disgraceful conduct' was not 'in any way vague or indefinite. It was conduct unbecoming the position of a Commissioner.' I am sure there will be no difficulty whatsoever in determining in practice what is 'disgraceful conduct.' If, Sir, you look up the archives of your office, you will find that there have been one or two cases. There is one case within my own personal knowledge. There have been other cases in which Municipal Commissioners in the mufassal have felt it their duty to remove Commissioners for disgraceful conduct, and it is as well that a law

* Bengal Act III of 1884.

of this kind should form part of the Calcutta Municipal Law. With these remarks I venture to recommend this amendment to the acceptance of the Council."

The Hon'ble MR. BUCKLAND said:—"Is it intended that the Commissioner in this case should have the right of being heard by counsel?"

The Hon'ble MR. BAKER said:—"Throughout the whole course of the Select Committee's proceedings the Select Committee carefully avoided inserting any words in the Bill which would imply that any person had the right to be heard by counsel before the Corporation, the General Committee or the Chairman."

The Hon'ble MR. APCAR said:—"Is not a Commissioner who may be placed in such a grave position entitled to the best help that he can get? I am in no way concerned to uphold the possibility of employment of the profession to which I have the honour to belong, but I look at it entirely from the point of view of one who is placed in a very difficult position. It would not be fair to any one placed in a difficult position if he is going to be deprived of the best assistance that he can afford and that is available. Here there is to be apparently an inquiry. What sort of an inquiry we know not, and then it is to be expressly here stated that the intention is that it shall not be allowed him to have such assistance as he may in his own defence and in his own discretion think best. I think it is placing him in a position of disadvantage, and the idea has not my sympathy."

The Hon'ble BABU SURENDRANATH BANERJEE:—"I do not think he should be entitled as a matter of right to be heard by counsel; but, if the Corporation in its discretion think that a particular case is a case in which the person concerned may be allowed to be heard by counsel, I do not think there is the smallest idea on our part to restrict or fetter in any way the discretion of the Corporation. The other day there was a case in point in the Corporation. The New Market people had a grievance, and they wanted to be heard by counsel. The General Committee discussed the matter, and my hon'ble friend Mr. Oldham and others came to the conclusion that the General Committee were quite competent to come to a decision independent of any advice which might be tendered by counsel. But I also remember another market case in which counsel was employed. There was a fight between two great owners of markets. I think it was in 1881, in the time of Sir Henry Harrison. Anath Nath Dey had started a new market and Rajendro Lall Mullick wanted that the market should not be permitted to be opened. There was a fight, and they wanted to be heard by counsel, and I remember very distinctly that Mr. W. C. Bonerjee appeared as counsel on behalf of one of the parties. I think the whole matter might be left to the discretion of the Corporation as to whether in any particular case the party should have the right to be heard by counsel or not. I think we ought to depend upon the judgment of the Corporation and depend upon that judgment without any hesitation."

The Hon'ble MR. BAKER:—"That is exactly what the Select Committee unanimously decided. The Select Committee felt quite sure that the matter should be left to the discretion of the Corporation or the General Committee, as the case might be, and that it would not do to give a statutory right to anybody under the Bill to be heard by counsel."

The Hon'ble MR. BOLTON said:—"If the section specifically provided that the party concerned shall have the right of being heard by counsel, it is probable that counsel would be invariably engaged, although their advocacy might be absolutely superfluous. It should be left to the Corporation to decide in each case, according to the circumstances, whether the employment of counsel should be allowed or not."

The Hon'ble BABU JATRA MOHAN SEN said:—"In the mufassal, as I am aware, both in cases before the District Board and also in cases before the Municipal Commissioners, the members in their discretion allow counsel and pleaders to be heard in private cases. Of course the discretion rests with the Commissioners, and once, as I am aware, a vote was taken as to whether counsel should be heard or not, and as a matter of fact the consent was given that counsel should be heard. I think, therefore, it is a very wise provision that the discretion should be left to the Commissioners to hear counsel."

The Hon'ble BABU BOIKANTA NATH SEN said:—"I fear that this amendment introduces a certain amount of risk and uncertainty in the position of a Commissioner; especially, I take exception to the expression 'guilty of misconduct,' as understood in legal phraseology. If I mistake not, when a case is referred to arbitration, and the arbitrator's award is sought to be set aside on account of misconduct, that misconduct has been construed to mean, not simply misconduct, looking at it from a moral aspect, but if there are two or more arbitrators, and if they do not attend regularly, that amounts to misconduct. So that this expression 'misconduct' rather seems to me to be vague, and ought to be clearly defined. There ought to be definite charges or grounds on which the Commissioner would be liable."

The Hon'ble MR. APCAR said:—"With reference to what fell from the Hon'ble Mr. Bolton, I say that, when a right is given, it is not compulsory on the person to exercise that right. It is optional. I do not mean to compel any person to use this right, but he ought to have a discretion in the matter. I think some of the mischief that I thought existed is removed by the disclaimer that it is not intended to preclude any one from having counsel to represent them. I think there is a great deal of force in what the Hon'ble Babu Boikanto Nath Sen has said; but I have not dwelt so much upon it, because, if there is any injustice done, I look to another procedure to set matters right, which will be altogether independent of the General Committee or the Corporation."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"I should like to say one word in reply. 'Misconduct' is a word used in the Mufassal Municipal Act; and, whatever vagueness the term may imply, when we come to adminster the law a good deal of that vagueness disappears. The difficulties which are anticipated by cautious administrators are oftentimes difficulties which really do not meet one in the actual work of administration. I am not an administrator, but I have my own little business. I have found that difficulties anticipated as likely to accrue do not as a matter of fact occur in actual practice. No difficulty has arisen in the administration of this section in the Bengal Municipal Act. I do not suppose that my hon'ble friend in charge of the Municipal Department will be able to say that any difficulty has arisen. That being so, I think we may rely upon the experience we have gathered from the administration of a similar section in the Bengal Municipal Act; and I hope, Sir, that this amendment will be accepted."

The motion was then put in the amended form and agreed to.

SECTIONS 63 AND 64.

The Hon'ble BABU SURENDRANATH BANERJEE also moved that in lines 7, 8, 9 and 10 in clause (*a*) of section 57 (*now* 63), for the words "more than one thousand rupees *per mensem*, which the Local Government may authorise the Corporation to fill," the words "five hundred rupees *per mensem* and upwards" be substituted.

He said:—"This is rather an important matter, and I was going to suggest to my hon'ble friend in charge of the Bill whether we might not take up this amendment along with amendments 147, 148, 149 and 150. They all refer to these superior appointments of the Corporation."

The Hon'ble MR. BAKER said:—"That would be very convenient."

The Hon'ble BABU SURENDRANATH BANERJEE then moved—

No. 147: that for the words "General Committee," in line 1 of section 57A (*now* 64), the word "Chairman" be substituted, and that for the word "they," in line 2 of clause (*a*) of the same section, the word "he" be substituted;

No. 148: that the word "two" be substituted for the word "three" in line 4 of clause (*a*) of section 57A (*now* 64), and that the words "and are not mentioned or referred to in section 57 (*now* 63)," in lines 5 and 6 of clause (*a*) of the same section, be omitted;

No. 149: that the following proviso be added at the end of section 57A (*now* 64):—

"Provided that no person shall be appointed to, or removed from, any office the monthly salary of which exceeds two hundred rupees without the sanction of the Corporation. And the Corporation may authorise the Chairman to nominate not more than three of the candidates for any such appointment as is referred to in this proviso, and the Corporation shall, upon such nomination being made, appoint one of the persons so nominated and no other."

No. 150: that clause (*b*) of section 57A (*now* 64) be omitted.

He said:—"Sir, I feel so strongly about the justice of my case that I am sure if I had the pleading of it before a Court of Justice the verdict would be on my side, and I can only express an earnest hope that the Council will approach the consideration of this matter in a spirit perfectly free from bias as regards the points raised in these amendments. The object of these amendments is to restore to the Corporation the power which it now possesses of making superior appointments. I will briefly explain the present law and indicate the changes which have been proposed in the Bill; but before I do so I think it is right and proper that I should express my gratitude to my hon'ble friend in charge of the Bill for the concessions which he made in this respect at an early stage of the discussion when the Bill was before the Select Committee. The Bill as originally introduced—Mr. Risley's Bill—deprived the Corporation completely of the power of making the superior appointments, and it was after my earnest appeals to my hon'ble friend in charge of the Bill that Your Honour's Government was pleased to make certain concessions. These concessions are embodied in the Bill. I am thankful for them, but, Sir, I do not think they go far enough. It seems to me that the Corporation ought not to be deprived in any way of the power which it now possesses of making the superior appointments. Under the existing law all appointments carrying salaries of Rs. 200 a month and under are made by the Chairman. All appointments carrying salaries of above Rs 200 a month are made by the Corporation, subject to this important condition, that, in respect of appointments carrying salaries of above Rs. 200 and under Rs. 500 a month, the Chairman has to submit three names to the Commissioners, and the Commissioners elect one from among the persons thus nominated. Therefore, Sir, you will see that in respect of this class of appointments the initiative has to be taken by the Chairman. The power of veto lies with the Corporation. Subject to this reservation, the power of making the superior appointments carrying salaries of Rs. 200 a month and upwards is vested under the present law in the Corporation. Under the Bill, Sir, you propose to withdraw from the Corporation the power of making the superior appointments with the exception of those referred to in the section to which my amendment relates, and subject to the further provision that the Government may at its discretion invite the Corporation to make appointments carrying salaries of Rs. 1,000 a month and upwards. The power of making these superior appointments is thus withdrawn from the Corporation, and the spoils of war, if I may be permitted to use that expression, are divided between the Chairman and the General Committee. The Chairman is invested with the power of making appointments up to Rs. 300 a month, and the result is that twenty new appointments of very great importance will now be made by the Chairman, which appointments formerly used to be made by the Corporation,

subject to the nomination of the Chairman. Let me state what these appointments are:—

		Rs.
1.	Inspector of Jute Warehouses	200—300
2-3.	Two Assistant Assessors	200—300
4-6.	Three Superintendents of Conservancy	200—300
7.	Superintendent of Stores	250—300
8.	Treasurer	200—300
9.	Inspector of Carts	250
10.	Superintendent of Gowkhanas	250—300
11.	Superintendent, Halliday Street Pumping Station ...	270
12.	Superintendent, Wellington Square Pumping Station ...	250
13.	Superintendent, Bhowanipur Pumping Station ...	250
14.	Superintendent, Watgunge Pumping Station ...	260
15.	Superintendent, Entally Workshop	300
16.	Superintendent, New Drainage	270
17.	Superintendent, New Drainage	200—250
18.	Analyst	150—300
19.	Deputy Superintendent of Vaccination	250
20.	Pipelayer	200—250

"Now, Sir, I do not know what the status of the Chairman would be in official estimation, but I should like to ask whether a Magistrate of the District or a Commissioner of Division or, for the matter of that, even the Chief Secretary to the Government of Bengal, is permitted to make appointments carrying such high salaries without Your Honour's sanction? I do not think so. You therefore practically place the Chairman of the Corporation in respect to the making of these appointments upon a completely independent footing—upon a footing far more independent than what officers of a higher status in the same service occupy. The Chairman under the Bill makes all appointments carrying salaries of Rs. 300 a month and under. All other higher appointments are made by the General Committee. What is the justification for the withdrawal of this power from the Corporation? If the Corporation had used their powers in this respect in an unsatisfactory way, or had misused those powers, I could understand the *raison d'être* for the change; but, Sir, the records of the Government and the records of the Corporation bear testimony which point to an opposite conclusion. From 1876 to 1899 numerous appointments have been made by the Corporation, all subject to the approval of the Government, and these appointments were all confirmed by the Government with one exception, and that was the case of Mr. Wyman, who was nominated to be Secretary to the Corporation. Therefore, Sir, it comes to this, that from 1876 to 1899, in the making of these higher appointments, subject to the approval of Government, the Corporation has so acted as to merit the approbation and the confidence of the higher authorities. Why then, Sir, do you propose to take away this power? The power has not been abused. The power has been satisfactorily used; it has been used in such a way as to meet with the approval of Government. What then, Sir, I venture to ask, is the justification for the withdrawal of these appointments from the Corporation, and especially now when the Corporation is to be constituted upon what I venture to submit is an official basis? In the Statement of Objects and Reasons nothing is said in justification of this change; but Mr. Risley was pleased to quote the authority of Sir Henry Harrison in one of his speeches. Sir Henry Harrison is reported to have said that 'the Municipality failed most conspicuously in personal questions when each Commissioner is subject to private solicitation and unwholesome pressure and gives his vote under the influence of motives, very few of which are consistent with the well-being of the city.' This was what Sir Henry Harrison is reported to have said; but did he take any active steps to withdraw this power from the Corporation? It was in his power to have done so. He was in charge of the Calcutta Municipal Bill at one time. If he felt that this was a weak point of the Corporation; if he felt that the power was abused; if he felt that the Corporation with regard to these appointments did not do what he conceived it to be their duty,—it was open to him in 1888 to have changed the law in this respect. On the other hand, I could quote instance after instance to show the abounding confidence which Sir Henry Harrison felt in the Corporation. He said that questions which had been decided adverse to him by Committees were brought up before the

Corporation, and his own views were often supported by the Corporation. Therefore, Sir, even if it were the case—and undoubtedly it was the case—that Sir Henry Harrison made these remarks, the fact remains that he did nothing to change the present law or to deprive the Corporation of the power of making these appointments. Is it conceivable that 50 persons acting in the full blaze of publicity, acting under a solemn sense of responsibility, are more likely to go wrong than 12 persons acting in secret— acting no doubt under a sense of responsibility? One person, however able or eminent he might be, is more exposed to personal pressure than a number of individuals. We have a saying in our own language which embodies the wisdom of our ancestors in this matter. They say that 'where five persons are gathered together for a public purpose there the Divine presence is felt;' therein lies the secret of our faith in their judgment. Where a number of persons, not a coterie or clique, are gathered together for a public purpose, there is a superior power, the invisible strength of an unknown Majesty, which leads them to do their duty; and I cannot help thinking that it is a disastrous blunder to deprive the Corporation of a responsibility which it has hitherto exercised with credit to itself and with advantage to the public, and to delegate that authority to only one individual, however eminent he might be, or only a dozen individuals acting in secret, deliberating in secret and removed from the enlightened and wholesome influence of public opinion. I think, Sir, these are considerations which must weigh with Your Honour's Government; these are considerations to which this Council cannot turn a deaf ear, and I hope and trust that in view of those considerations the Council will accept my amendments."

The Hon'ble Mr. Baker said:—"I admit, Sir, I should have experienced some difficulty if I had been called upon to defend the proposals put forward in the original Bill. Those proposals practically withdrew from the Corporation all power of making appointments, with two exceptions, and as that power had not, in my judgment, been misused in the past, it would not have been easy to justify its withdrawal.

"But the provisions of the Bill as they now stand are very different; and I think good and convincing reasons can be shown for confirming them.

"The object of the amendments is to restore to the Corporation the power which they possess, under the present Act, of making all appointments on pay exceeding Rs. 200 per mensem.

"The provisions in the Bill were very carefully considered by Government before they were submitted to the Select Committee, and I trust that the decision of the Committee will commend itself to the Council.

"Originally it was proposed to withdraw from the Corporation all appointments except those of the Secretary and the Controller of Accounts. It seemed to me, however, when I came to look into the matter, that it was possible to distinguish—to draw a line of demarcation—between various classes of appointments. According to my experience, the Corporation has endeavoured to do its best according to its lights in filling appointments of the highest class in the past. In selecting men to be Engineer, Health Officer, Secretary and Assessor, I have known of no wilfully perverse appointments, no instances of jobbery or corruption or of race-feeling. Though I will not say that individual Commissioners have not, in some cases, supported undesirable candidates, for questionable reasons, yet the good sense of the Corporation, as a whole, has preserved the city from the disgrace of a misuse of its patronage in respect of these high appointments. It must be remembered that all the appointments of the class I am referring to are heads of departments; they are highly paid, and have very important and responsible duties. The selection for them attracts a good deal of public attention, and any flagrant case of nepotism or jobbery would be sure to be speedily attacked in the Press and by public bodies. Whatever the reason may be, the Corporation has done well in the past according to its lights, and has, so far as I know, always endeavoured to choose the best men. I am willing to believe that it will continue to do so in the future, and I, therefore, ventured to make a representation to Your Honour that it would be equitable to allow the Corporation to continue to exercise its power in respect of these higher posts. This was acceded to and is now embodied in the Bill. But, Sir, the Hon'ble Member wishes to go further. He wishes

to restore the law to what it is under the present Act. He wishes not merely to give to the Corporation the right of appointing their highest officers and their heads of departments, but also to give them the right of filling those intermediate appointments which rank between the highest and the lower class which, all are agreed, ought to be filled by the Chairman.

"These appointments carry rates of pay which are sufficiently large to make them eagerly sought after; but neither their status nor their emoluments are high enough to attract much public attention. In the case of these intermediate appointments the safeguard of an active public opinion is wanting, and I think the Corporation in filling them has not always appeared to good advantage. The nature of the case is such as scarcely admits of positive proof: certainly I do not claim to possess any such proof; and I shall mention no names. But I think that not even the most ardent champion of the Corporation will assert that its selections for these appointments have always been above suspicion. Is it not the case that, at least according to popular repute, some, even many, of these appointments have been secured by canvassing, by personal favour and influence, by other means than merit and desert? We seek in the present Bill to save the Corporation from itself, by withdrawing from it the dangerous duty of filling these appointments, and by transferring that function to the General Committee. The Hon'ble Member has said that it is easier to canvass a small body of 12 than a large one of 50. But this argument leaves out of account the constitution of the two bodies. We hope that the General Committee will attract to itself all the working talent of the Corporation, all the men of greatest ability and experience, and of the highest character. It should contain none of the weak, unthinking or shady class who carry little weight or influence, but whose votes count for as much in an election as those of Commissioners of the highest character and intelligence.

"One word more. The Hon'ble Member has said that not even the Chief Secretary to Government or Commissioners of Divisions could fill appointments from Rs. 200 to Rs. 300 a month. I will go further than that. I will name an office, the holder of which occupies a much lower position than that of the Chief Secretary or the Commissioner of a Division,—I refer to an appointment which I recently held myself,—that of Collector of Customs. The Collector of Customs has the patronage of some forty or fifty appointments, all of which come within this range of pay, and many of which rank very considerably higher.

"Finally, Sir, the Hon'ble Babu Surendranath Banerjee, after referring to the remarks quoted by Mr. Risley from Sir Henry Harrison, said that Sir Henry Harrison was in charge of the Bill in 1888, and yet in spite of that opinion he made no effort to alter the powers of the Corporation. I find, Sir, if Mr. Risley is correctly quoted, that these remarks were made by Sir Henry Harrison, not when the Bill was before the Council, but two years later, in 1890. That accounts possibly for the fact that Sir Henry Harrison did not deal with the matter when the Bill was before the Legislature."

The Hon'ble Mr. Apcar said:—"I confess that when I saw that the power given to the Chairman is to appoint to places where the salary was up to Rs. 300 a month, I felt it was throwing a greater strain upon the Chairman than he himself would care to have. I do not suppose he seeks this power himself, and the result of it seems to me that he will be overwhelmed with petitions from every district in which he has served. He will be troubled to a degree by every Deputy Magistrate and every Deputy Collector of any district where he has served who has got any friends or relatives to advance. He will be worried by them with applications for appointments, and it seems to me in the interest of the Chairman, when he has got so much work thrown upon him, that it would be infinitely better to relieve him of the worry of entertaining these applications and, in many instances, of hearing persons who may come to him, and whom he cannot refuse to see, for the purpose of advocating the claim of some relative or friend. In these circumstances, it would have been better, I think, in the Chairman's own interest, if there had been less power given to him. With reference to these amendments of my hon'ble friend Babu Surendranath Banerjee, I think his prayer might be conceded in this respect, because there ought to be, at all events now that there is to be a Corporation of such a different constitution, some effect given to the change

that the Government have made. With regard to what the Hon'ble Member in charge of the Bill said about canvassing, I would remind him that candidates are forbidden to canvass the members of the Corporation. No canvassing is permitted now; and the fact that a candidate has been canvassing will tell against him most severely in his candidature. We know of course that canvassing does continue sometimes, but, if it becomes known that any one has been canvassing, it always tells against him very strongly; so that the question of canvassing ought not to enter into our consideration in determining this question, and I do not think it is asking too much that the Corporation should be given the opportunity of making appointments of this character. I do not lay very much stress upon the point, but I think that, inasmuch as the Corporation has had the power, it ought not to be taken away from them."

The Hon'ble MR. BOLTON said:—"I think, Sir, that this is part of the general system of the Bill that there should be three distinct authorities in the Municipality—the Corporation, the General Committee and the Chairman. If these three authorities exist, it is natural and logical that the appointments should be divided between them, and they are so divided under this Bill. The Hon'ble Member in charge of the Bill has said that he wished to protect the Corporation from itself, because, in making the minor appointments, it would be freer of the check of public opinion which operates strongly in the case of the higher appointments. I would myself take the ground that it is right, as the Bill is now drawn, that the patronage of the Municipality should be divided among the three different bodies. The Hon'ble Mr. Apcar, in commendable solicitude for the future ease of the Chairman, has urged that he would be overwhelmed by the number of candidates for these appointments; but how much greater would be the evil if these appointments are made over to fifty Commissioners, and each of these gentlemen is subjected to the importunity of the candidates? I think, therefore, that the scheme of the Bill is logical and appropriate."

The Hon'ble MR. BUCKLEY said:—"The Hon'ble Babu Surendranath Banerjee asked whether a Commissioner of a Division or any high officer of Government had any authority to make any appointments of Rs. 300 a month and upwards. In the Public Works Department any Superintending Engineer can appoint a person on not more than Rs. 250 a month, provided that such person is specially entertained for the work in connection with construction, subordinate supervision, and accounting for stores and labour. In other words, he can employ any person on the pay stated provided that he is specially required for a particular work, but not either on the permanent establishment or what is ordinarily called the temporary establishment."

The Hon'ble MR. OLDHAM said:—"I entirely corroborate the Hon'ble Mr. Apcar in the description he has given of the worry and trouble to which the Chairman will be subject in regard to these appointments he is to make, but I would remind my hon'ble friend, from the list of them which the Hon'ble Babu Surendranath Banerjee has read out, that the additional appointments so thrown on the Chairman will only be twenty, so that the additional duty which he will have to discharge in this respect will not be excessively burdensome and, at the same time, as President of the General Committee, he will have just as much trouble in connection with the appointments which have to be made by the General Committee."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"My first words will be words of acknowledgment to the Hon'ble Member in charge of the Bill for his recognition of the work of the Corporation in this respect. He has been good enough to tell us that the Corporation have done their best in securing the best men for these appointments, and he went further and said—and I wish these words to be recorded having regard to recent controversies—that 'there has been no jobbery and no corruption' in the making of these appointments. Sir, in this Council, about eighteen months ago, we heard a statement made by high authority which is entirely in conflict with the statement made by the Hon'ble Member in charge of the Bill; but I regard the authority of the Hon'ble

Member who himself is an experienced Municipal Commissioner, as carrying greater weight than even that of the distinguished authority who made the other statement eighteen months ago. My hon'ble friend has observed that these good appointments were due to the fact that they attracted a considerable measure of public attention, and that it was the interest the public took in these appointments that secured the best men, that the same measure of public attention was not paid to the intermediate appointments, and consequently the best men were not appointed to these intermediate offices. Here I respectfully beg to challenge the statement of facts made by my hon'ble friend. My hon'ble friend will bear in mind that for these intermediate appointments the Chairman is in the first place responsible. What are the intermediate appointments? The appointments carrying salaries of above Rs. 200 and under Rs. 500 a month. These are the intermediate appointments, and, as I have already pointed out, in respect of this class of appointments the nominations are made by the Chairman. The Chairman nominates three persons, and his discretion in this matter is absolutely unfettered. He does not consult the General Committee; he does not consult anybody; he proceeds upon his own independent judgment. The Chairman, in respect of these intermediate appointments, submits three names, and the Commissioners are limited to those three names. They can veto them all, and the Chairman would be under the necessity of submitting new names; but that has never occurred. Therefore, Sir, in respect of these intermediate appointments, which my hon'ble friend in charge of the Bill says have not given satisfaction, if the responsibility lies anywhere, it lies upon the shoulders of the Chairman, because he makes the nominations The discretion of the Commissioners is fettered by these nominations The Commissioners cannot go beyond those nominations. If these appointments have not been satisfactory, it is obvious that the Chairman is to blame, and, therefore, if I am to proceed upon my hon'ble friend's assumption, the authority of the Chairman ought to be curtailed, and all these intermediate appointments should be made by the Corporation, having regard to the satisfactory manner in which it has always made the superior appointments. I think that is the logical conclusion to which my hon'ble friend's argument irresistibly points.

"My hon'ble friend has been good enough to tell us that the twelve members of the General Committee would be the best men, and that, therefore, they ought to be trusted more in the matter of the making of these appointments than the fifty Commissioners. Where is the guarantee that he will get twelve of the best men? If you say that the experience of the past is the guide of the future, to that my reply is: You have no experience of the past to guide you in the unknown venture upon which you are about to embark. It is a new law which you are enacting. If the constitution had not been so thoroughly revolutionised, then you might have appealed to the experience of the past; but you have completely changed the constitution. The Municipality of 1900 will not be the Municipality that existed between 1876 and 1899. If a person were to rise from his grave and look at the Municipality of 1900, and if he had known the Municipality of 1876, he would not be able to recognise any similarity between the two. Therefore, the experience of the past is no guide as to what the future is to be, and you are not at liberty to say that with this constitution you will have the best men elected on the General Committee. There is always a distinct advantage in fifty persons meeting together for purposes of deliberation. Fifty persons meeting together for a public purpose, deliberating in the full blaze of publicity, can hardly go wrong. I can hardly recall to mind any Resolution of the Commissioners to which I could conscientiously take exception from 1876 to 1899, because I say there is something in the atmosphere of a great and solemn public meeting which leads those who are there to do that which is right I know not what that unseen, invisible, but felt, influence is which leads those who are there to do that which is in accordance with their conscientious convictions. I would trust fifty persons a great deal more than twelve, no matter how able and conscientious those twelve persons may be; and I hope, Sir, the Council will not withdraw this power from the Corporation, and vest it in a small body or clique of twelve persons.

"My hon'ble friend Mr. Oldham has referred to canvassing and the evils of canvassing. I am not at all desirous of minimising those evils, but, Sir, those who seek for municipal appointments know perfectly well to what persons

to go to for canvassing, and there are others whom they never canvass. I have never been canvassed; Babu Kally Nath Mitter has never been canvassed; I doubt very much whether Babu Nalin Behary Sircar has been canvassed. When persons come to me to canvass, I tell them that they might just as well speak to the wall. There are many who have formed that definite habit of mind, and they will not allow themselves to be canvassed. The public know that they will not allow themselves to be canvassed. They are above and beyond the reach of the canvasser and the pressure of personal influence."

The Hon'ble MR. BAKER said:—"These are the Commissioners who will be on the General Committee."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"My connection with the Municipality and the General Committee is at an end. Of course, there may be better men than ourselves, who may in the future lead and guide the Corporation. I must again say, Sir, that it is a distinct advantage to leave the superior appointments and even the intermediate appointments to the Corporation, and, because the Corporation has done its best in the past, it may be trusted to do its best in the future. That is the plain lesson of experience, and I invite the Council to retain the present law."

The motions being severally put, the Council divided in each case as follows:—

Ayes 6.	*Noes 12.*
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Mr. Mackenzie.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Mr. Spink.
The Hon'ble Mr. Apcar.	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
The Hon'ble Raja Bahadur Ranajit Sinha, of Nashipur.	The Hon'ble Mr. Slack.
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Handley.
	The Hon'ble Mr. Buckland.
	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Buckley.
	The Hon'ble Mr. Oldham.

So the amendments were lost.

The Hon'ble MR. APCAR moved that section 57 (*now* 63), sub-section (3), do form a separate section, and that the following clauses be added thereto:—

"and shall—

(*a*) perform such duties as he is directed by this Act to perform and such other duties in, and with regard to, the Corporation and the General Committee as may be required of him by those bodies respectively;

(*b*) have the custody of all papers and documents connected with the proceedings of—

(*i*) the Corporation and any Committee appointed by the Corporation; or

(*ii*) the General Committee and Sub-Committees thereof;

(*c*) devote his whole time and attention to the duties of his office;

(*d*) be removeable from office at any time by the Corporation for misconduct or for neglect or incapacity for the duties of the office.

(2) The General Committee, with the approval of the Corporation, may from time to time—

(*i*) appoint such clerks and servants, to be immediately subordinate to the Secretary, as they think fit;

(*ii*) determine the nature and amount of the salaries, fees and allowances to be paid to the said servants and clerks, respectively;

(*iii*) prescribe, or delegate to the Secretary the power of prescribing, the duties of the said clerks and servants.

(3) The Secretary, subject to the orders of the General Committee and of the Corporation, shall exercise supervision and control over the acts and proceedings of the said clerks and servants; and the General Committee, subject to the regulations for the time being in force regarding all other municipal employés, shall, with the approval of the Corporation, dispose of all questions relating to the service of the said clerks and servants, and their pay, privileges and allowances."

He said:—"This is in execution of my design of bringing the Act here into line with the Bombay Act. In the Bombay Act they have all through devised

a system of checks, and that seems to me to be most dangerously disregarded in the Bill before us. They have been devised for Bombay because of their past experience, and it seems to me that in this Bill we are not taking advantage of the experience of the past from which Bombay has suffered and is now profiting. It is no invidiousness with regard to public questions that there should be checks. The Government of Bombay have devised a system of checks with regard to all questions, particularly with relation to finance, and in this way and also all public bodies they are most careful to have a system of checks as being safeguards in the public interest. So here I think it would also be advisable to have a system of checks. Now, if all the officers are placed subordinate to the Chairman they have no voice in any question at all; they cannot take any kind of objection to anything that may be done by the Chairman. If the Vice-Chairman sees any irregularity, he must say nothing. So with the Secretary also; if he is under the authority of the Chairman, if he is required to sign a cheque when he sees that the budget estimates will be exceeded, he has got no kind of position to enable him to assert that the budget estimate is being exceeded. If the Chairman says 'sign it,' he has got to sign it. Then also with regard to papers. If the Chairman is to be the head of the executive and is placed also superior to the Secretary—I mean that the Secretary is made directly subordinate to him—then, if he says certain papers are not to be shown, they cannot show them. If the General Committee desire to see certain papers which the head of the executive may wish should not be brought forward, the Secretary is in a position in which he cannot in any way disregard the orders of the Chairman. The section that I propose to add to this Bill is identical with what exists in the Bombay Act. So that it cannot be taken to be ill-considered, and indeed, whenever the Bombay Act has been referred to—and it has been referred to by high authorities—it has always been referred to as being an excellent system. This is part of the system, and I think it is most important that there should be definite and recognised checks of the character that I venture to submit."

The Hon'ble Mr. Baker said:—"I half expected, Sir, that the Hon'ble Member would have withdrawn his amendment. The section, as he has told us, is taken from the Bombay Act. If the Council had accepted the Hon'ble Member's previous amendments for the introduction of the Bombay system, this section would have been quite appropriate and might have been accepted here; but, as we have rejected the Bombay system, this section becomes useless and inappropriate. The object of it is to establish for the Corporation and the General Committee an office distinct and separate from the office of Chairman. Now in the Bombay system that is quite intelligible, because the head of the executive there is not the President of the General Committee or of the Corporation. He is outside both of those bodies, and his office is necessarily separate, but in Calcutta the Chairman is the President of both the Corporation and of the General Committee. There are not two offices. There is only one office for the whole Corporation. The Chairman is necessarily the head of that office. The Secretary is only the clerical or ministerial head of the office, and all that he has to do is to discharge such duties as the Chairman may make over to him. It would be absolutely meaningless to introduce a provision of this kind into the Calcutta system."

The motion was then put and lost.

The Hon'ble Babu Surendranath Banerjee's motion for the amendment of section 57 (*now* 63) having been lost, the Hon'ble Dr. Asutosh Mukhopadhyaya, by leave of the Council, withdrew the motion standing in his name, that in section 57 (*now* 63), sub-section (*1*), clause (*a*), for "thousand" be substituted "hundred," and that the words "which the Local Government may authorise the Corporation to fill" be omitted.

He said:—"This amendment is of a more radical character than No. 143* moved by the Hon'ble Babu Surendranath Banerjee. I propose to substitute 'one hundred rupees' but he proposed to substitute 'five hundred rupees'; and having regard to the vote on that amendment, I cannot ask the Council to reverse their decision. I am obliged therefore to withdraw it."

* *i.e.*, that moved by the Hon'ble Babu Surendranath Banerjee—*vide* p. 111, *supra*.

The Hon'ble MR. BAKER said:—"Perhaps this also applies to amendments 151 and 152."*

The Hon'ble BABU SURENDRANATH BANERJEE's motions for the amendment of section 57A (*now* 64) having been lost, the Hon'ble DR. ASUTOSH MUKHOPADHYAYA, also by leave of the Council, withdrew the following motions standing in his name:—

No. 151: that in section 57A (*now* 64), line 1, after the word "may" be added "subject to the approval of the Corporation";

No. 152: that in clause (*a*) of the same section, for "three hundred" be substituted "fifty".

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 57 (*now* 63), sub-section (2), for "may" be substituted "shall not".

He said:—"My suggestion is that two or more of these superior offices should not be held by the same individual I have no faith in the doctrine of plurality of offices, and I cannot persuade myself to believe that, if two such responsible offices are held by one individual, the arrangement can be beneficial to any except the fortunate officer."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"As an experienced member of the Corporation I must object to my friend's amendment, because it is found necessary sometimes that the same person should hold two offices. If the Vice-Chairman took leave, the Secretary would perform the duties of the Vice-Chairman in addition to his own duties. Suppose, for instance, the Joint-Collector is on leave; the Collector will perform the duties of Collector and Joint-Collector. I do not think we ought to have a hard-and-fast rule, the effect of which would be to prevent a combination of offices which circumstances might require."

The Hon'ble MR. BAKER said:—"I entirely concur with what the Hon'ble Babu Surendranath Banerjee has said."

The motion was then put and lost.

The Hon'ble THE PRESIDENT said:—"We now come to the second or supplementary list of business which is re-numbered and begins with No. 1."

SECTION 65.

The Hon'ble BABU SURENDRANATH BANERJEE moved that for the words "and provision for the same shall be made in the budget estimate," in lines 4 and 5 of sub-section (2) of section 59 (*now* 65), the following be substituted:—"and the same shall be entered in the budget estimate."

He said:—"This is a very small matter, and I think the Hon'ble Member in charge of the Bill will agree to it. It is a mere matter of verbal drafting. Section 59 (*now* 65) of the Bill says:—

'(*1*) The Chairman shall annually prepare and bring before the General Committee a statement setting forth the designations and grades of the officers and servants (other than those mentioned or referred to in sections 57 and 57A (*now* 63 and 64) and other than employés who are paid by the day or whose pay is charged to temporary work) who should, in his opinion, be maintained, and the amount and nature of the salaries, fees and allowances which he proposes should be paid to each.'

"Sub-section (*2*) says:—

'(*2*) The General Committee shall sanction such statement either as it stands or subject to such modifications as they may deem expedient, and provision for the same shall be made in the budget estimate.'

"Therefore, it is open to the General Committee to exercise their discretion with reference to this particular statement. Then, Sir, we find 'and provision for the same shall be made in the budget estimate.' I suggest that those words should be changed and the following substituted: 'and the same shall be entered in the budget estimate.' It seems to me that these words imply an obligation upon the Corporation to accept the recommendation of the General Committee and as if no discretion whatever was allowed to the Cor-

* *i.e.*, amendment of s. 57A [*now* 64], (*vide* paragraph immediately following).

poration. Obviously that is not the intention of the law. The Corporation having the control of the finances must have absolute discretion in a matter like this, and therefore I want to put it in this form—'and the same shall be entered in the budget estimate,' so that it would be open to the Corporation to exercise what discretion it thought fit in connection with the matter.'

The Hon'ble Mr. Baker said:—"The Hon'ble Mr. Apcar has an amendment of the same nature on this section. I prefer the wording of Mr. Apcar's amendment, and am ready to accept that amendment."

The Hon'ble Babu Surendranath Banerjee said:—"I accept Mr. Apcar's amendment and withdraw mine."

The Hon'ble Mr. Apcar then moved that in section 59 (*now* 65), sub-section (*2*), line 4, for the word "made" the word "entered" be substituted.

The Hon'ble Babu Surendranath Banerjee, by leave of the Council, with drew his amendment.

The Hon'ble Mr. Apcar's motion was then put and agreed to.

Section 66.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that in section 61 (*now* 66), sub-section (*1*), after the word "employer" add the "words or employé."

The Hon'ble Mr. Baker said:—"I accept this amendment."

The motion was put and agreed to.

Section 67.

The Hon'ble Dr. Asutosh Mukhopadhyaya's motions for the amendment of section 28D (*now* 38) having been lost, he, by leave of the Council, withdrew the motions standing in his name, that in section 61A (*now* 67), sub-section (*1*), for "seriously indebted to any person", and in sub-section (*2*), for "so indebted", be substituted "an uncertificated bankrupt or an undischarged insolvent".

He said:—"This amendment must be withdrawn in view of the adverse decision recorded upon a similar amendment."

Section 68.

The Hon'ble Babu Surendranath Banerjee moved that for the words "Local Government" in line 1 of section 61B (*now* 68) the word "Corporation" be substituted.

He said:—"If the Hon'ble Member in charge of the Bill will accept this amendment, I will slightly modify it. I would say 'the Corporation with the approval of the Local Government.'

The Hon'ble Mr. Baker said:—"I was just going to suggest the same thing. If the Hon'ble Member will make a reference to this section in section 597 (*now* 569), the necessary effect will be produced, and I will accept the amendment."

The Hon'ble Babu Surendranath Banerjee:—"I think it comes to the same thing."

The Hon'ble Mr. Baker:—"I accept the amendment on that understanding."

The Hon'ble the President said:—"Then it is understood that the Hon'ble Babu Surendranath Banerjee will accept the motion on the part of the Hon'ble Member in charge of the Bill that the words "61B" (*now* 68) shall be added to section 597 (*now* 569).

The motion was put and agreed to.

The Hon'ble BABU SURENDRANATH BANERJEE also moved that the following clause be added at the end of section 61B (*now* 68):—

"It shall be the duty of the Chairman to see that all such rules are duly enforced."

He said:—"Sir, there is a history behind this amendment. Some time ago, at the instance of my friend Babu Norendro Nath Sen, certain rules were made for determining the qualifications of persons to be employed in the Health Department and, I believe, also in the Engineering Department. These rules were framed, but they were not observed, and it is important that there should be a distinct provision in the Bill which should make it obligatory upon the executive to carry out rules to this effect. It is no use making rules if these rules will not be carried out. Therefore, Sir, having regard to our experince in this matter, I think it necessary to have a substantive provision to the effect suggested in my amendment. The object is to ensure that these rules shall be carried out, and it is necessary to have a provision like this. I think the Hon'ble Mr. Apcar will bear out my experience."

The Hon'ble MR. BAKER said:—"I have no objection in principle, but I think it is rather unusual to impose any statutory obligation of this kind on the Chairman. If it is not the duty of the Chairman to enforce these rules, then I am sure I do not know whose duty it is. It seems to me the amendment is unnecessary, but I will not oppose it."

The motion was then put and agreed to.

SECTION 69.

The Hon'ble BABU SURENDRANATH BANERJEE also moved that section 61C (*now* 69) be omitted.

He said:—"I am afraid the verdict of the Council is bound to be against me, because in connection with a similar matter the Council has already given an adverse verdict. Section 61C (*now* 69) is as follows:—

'When a servant of the Government is appointed to be a municipal officer or servant, the Corporation may pay, in addition to his salary, any contribution which may for the time being be levied by the Government in respect of his pension or leave-allowances.'

"We never paid any contribution in the past, and I do not see why we should pay any in the future. That being so, I have felt it my duty to move this amendment."

The Hon'ble MR. BAKER said:—"I can only repeat what I said with reference to section 28DD (*now* 29). This section merely empowers the Corporation to pay the contribution which is exacted by Government when it lends the services of one of its officers to the Corporation. Government will not lend the services of an officer for more than six months except on the terms which are laid down in the Civil Service Regulations, and if the Corporation choose to borrow the services of a Government officer they have got to pay the price. The reason why they have not paid it hitherto is because they have not employed a Government officer. I explained twice yesterday that there is a special exception in favour of the Chairman. I do not know any other case in which the Corporation has had a Government officer in its service for more than six months. Captain Liddell was in their employ for a short time. If he had remained for more than six months they would have had to pay contribution."

The Hon'ble MR. APCAR said:—"This seems to be a sort of a Chinese puzzle, and I should be so much obliged if I was assisted to understand it. Does a Government servant contribute towards his pension from his own salary, or does he not? I am ignorant of official ways, but it would seem that a Government servant must contribute."

The Hon'ble MR. BAKER:—"No; certainly not. There is a special rule in connection with the Civil Service, but the ordinary rule is that Government servants do not contribute."

The Hon'ble BABU SURENDRANATH BANERJEE:—"The only time I remember we paid the contribution was in connection with Mr. Kimber's appointment. It was a matter of special arrangement, and we used to pay Rs. 200 or Rs. 300 a month as contribution."

The Hon'ble Mr. Baker:—"Government will not lend the services of its officers for more than six months unless these contributions are paid. If you want to get a Government officer, you must pay the contribution."

The motion was then put and lost.

The Hon'ble Babu Surendranath Banerjee also moved that the following proviso be added to section 61C (*now* 69):—

"Provided that no contribution under this section shall be paid, except by a resolution of the Corporation, in favour of which not less than two-thirds of the Commissioners voting have voted."

The motion was put and lost.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that in section 61C (*now* 69), line 3, for "may" be substituted "shall not".

He said:—"This amendment covers the same ground as the two previous ones by the Hon'ble Babu Surendranath Banerjee, but I would ask Your Honour to put it to the Council."

The motion was put and lost.

Section 70.

The Hon'ble Dr. Asutosh Mukhopadhyaya's motion for the amendment of section 26 (*now* 18), proviso (*b*), having been lost, he, by leave of the Council, withdrew the motion standing in his name, that, at the end of the first paragraph of section 62 (*now* 70), the words "subject to the provisions of section 26 (*now* 18), sub-section (*1*), proviso (*b*)," be added.

The Hon'ble Raja Ranajit Sinha, Bahadur, of Nashipur, moved that, after the words "Local Government," at the end of section 62 (*now* 70), the following be added:—

"and that in case of the dismissal of other municipal officers or servants drawing a salary of one hundred rupees or upwards *per mensem* an appeal shall lie to the Corporation."

He said:—"I find that the ministerial officers of Government have a right of appeal in case of dismissal or suspension, and I think it is only fair that the municipal officers and servants should have the same right. I hope my amendment will be accepted by the Hon'ble Member in charge of the Bill."

The Hon'ble Mr. Baker said:—"I am entirely opposed to this amendment. I strongly object to any appeal being given to the Corporation under any circumstances, least of all in a personal matter. When a municipal employé is dismissed, and he files an appeal, we all know what happens. He first goes round to one or two of his friends and he gives them his version of the case, and tries to excite their sympathy. If he succeeds, they go round among their friends, and when the matter eventually comes up before the meeting, it is decided, not upon its merits, but according to the preconceived impressions of his own friends, who set themselves to work upon the feelings of the other Commissioners, most of whom have no personal knowledge of the matter whatever. I am told that in Howrah within a short period motions have been made to reinstate every municipal employé who has been dismissed during the last two years. I should be very sorry to compare the Calcutta Corporation, even in its worst days, with the Howrah Municipality, but that is the state of things which occurs in a Municipality which is not a thousand miles away, and it illustrates a kind of evil which is liable to occur when the decision of a personal question is remitted to a large popular body."

The Hon'ble Babu Surendranath Banerjee said:—"I am in strong sympathy with the amendment of my hon'ble friend Raja Ranajit Sinha. I think, Sir, sometimes superior officers are apt to dismiss somewhat heedlessly those subordinate to their authority, and it is important that in such cases an appellate authority should exist and provision should be made for appeals. My hon'ble friend the Member in charge of the Bill will probably remember a very

telling illustration of the importance of the Corporation exercising this appellate authority in connection with dismissed servants. Mr. Smith is the Superintendent of the Hackney Carriage Department, and he has been Superintendent for a number of years. A Committee was appointed to enquire into the working of the Hackney Carriage Department. The Committee included, amongst others, Mr. Phelps of the Trades Association, Mr. Abdur Rahman, and two or three other gentlemen. The Committee strongly recommended his dismissal, and I believe he was dismissed. He preferred an appeal to the Corporation. The Corporation appointed a Committee to enquire into the matter. I think I was one of those who sat on the Committee, and we all came to the unanimous conclusion—and I think Mr. Phelps also—that Mr. Smith ought not to be dismissed. We recommended that he should be reinstated and that he should have a further trial of six months. Those recommendations were carried into effect, and at the present moment Mr. Smith is a trusted servant of the Corporation. Mr. Smith was dismissed by the Chairman, dismissed by the Committee, and but for the appeal which he preferred to the Corporation and the action of the Corporation in connection with that appeal, he would now be a dismissed servant of the Corporation. It would have been a great injustice done to him, and it would have been a serious loss to the Corporation. I think it is necessary, in a case of this kind, that there should be an appellate authority, and the Corporation should be that appellate authority. My hon'ble friend the Member in charge of the Bill harps upon the old theme of canvassing. There are some people who are absolutely impervious to canvassing, and they have been the leading members of the Corporation. I do not see what possible inconvenience can arise from the Corporation being constituted as an appellate authority under the terms of my friend Raja Ranajit Sinha's amendment. It is not every day that appeals of this kind will be preferred to the Corporation, and when appeals are preferred to the Corporation, it is only such appeals as ought to be entertained that will be entertained. The Hon'ble Member in charge of the Bill has referred to motions having been made to reinstate servants who have been dismissed during the last two years. I think he put it rather high, but I am obliged to trust to my friend when he said that there have been motions made in the Corporation with regard to dismissed servants. There might have been one or two such cases. A motion was made by a Muhammadan Commissioner—I think it was Mr. Moosa—in connection with a dismissed servant of the Corporation in the Health Department. We resolutely set our faces against that appeal. We upheld the authority of the executive, because we thought the dismissal was proper. The Howrah Municipality ought not to be compared with the Calcutta Corporation. I think it is an affront to the Calcutta Corporation that it should be degraded to the level of being compared with the Howrah Municipality. No illustration bearing upon the proceedings of the Calcutta Corporation should have been drawn from the example of the Howrah Municipality."

The Hon'ble Mr. Baker :—"The Hon'ble Member misunderstood me. What I said was I should be sorry to compare the Calcutta Corporation, even in its worst days, with the Howrah Municipality."

The Hon'ble Babu Surendranath Banerjee :—"I am sorry I misunderstood my hon'ble friend, and I withdraw my last remarks. The Calcutta Corporation is a great Corporation, of which any Government might be proud, and it certainly does not deserve the fate which is reserved for it. I am confident, when the history of the elected Municipality comes to be written, there will be a strong condemnation passed upon the Bill now before the Council."

The Hon'ble Mr. Apcar said :—"I should like to supplement what my hon'ble friend Babu Surendranath Banerjee has said by reminding the Hon'ble Member in charge of this Bill—since my hon'ble friend has mentioned names—that Dr. O'Brien, a Government official of high standing, and one of their nominated Commissioners, was the leading spirit in obtaining this revision, which resulted in Mr. Smith being reinstated. And, with regard to what canvassing may do, my recollection is that canvassing has not been successful in the Corporation. I myself cannot recall at the moment any other instance where an officer has

been reinstated. I remember there have been appeals, but, besides this particular one, I cannot recall at the moment any other that was successful. If this right of appeal had been abused by the Corporation, I am sure there would have been innumerable instances forthcoming to prove it. So that, so far, the law does not seem to have operated with any prejudice, and I have sympathy with men whose position cannot be of any high class if they are only getting Rs. 100 a month, and I think that their means of support should not be taken away from them, and their families left impoverished, and their pension lost, on the fiat of the Chairman only. The position is one that requires to be considered with great care. I do hope that this particular amendment, in the interests of the poor subordinates, holding very low positions after all comparatively, may not be thrown out."

The Hon'ble BABU JATRA MOHAN SEN said:—"I entirely support this amendment. The remarks of the Hon'ble Member in charge of the Bill in opposing this amendment do not apply to the Corporation we are going to have, and more so in the face of the salutary provision in section 55A that we have passed to-day. If any Commissioner canvasses any vote as the Hon'ble Member suggested, I dare say such conduct would amount to misconduct or disgraceful conduct within the meaning of section 55A. With that safeguard I think the amendment should be carried. A servant in the employ of Your Honour's Government, drawing a salary of Rs. 20, has a right of appeal to Your Government, and I know instances in which they obtained relief. I know a case of a man who was drawing Rs 20 a month, I believe, who was dismissed, and subsequently restored by Your Honour after two or three stages of appeal. I should strongly recommend that this amendment be accepted."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"I feel that I ought not to record a silent vote upon this amendment. I am bound to confess that, although I am in sympathy with the principle which underlies the amendment, I find it difficult to accept it as it stands. I agree with the Hon'ble Raja Ranajit Sinha that there ought to be an appeal, but I think it would be the most impracticable thing in the world to give an appeal to the Corporation. If there is to be an appeal, I think the appeal ought to be to the General Committee, and I would ask the Hon'ble Member in charge of the Bill to consider whether if this motion were amended by altering the word 'Corporation' to 'the General Committee' it might not be accepted."

The Hon'ble MR. BAKER:—"I shall be ready to consider that proposal. If this amendment is allowed to stand over, I shall be happy to consider it, and it can be taken up on Saturday."

The Hon'ble MR. BOLTON said:—"It is an acknowledged and well-known principle, always acted on, that the authority which appoints also dismisses, but this provision places the Chairman in a position in which hardly a single officer in India finds himself. There is absolutely no appeal from him. The Hon'ble Member in charge of the Bill mentioned the case of the Collector of Customs, who has the patronage of appointments of from Rs. 300 to Rs. 400 a month. From the Collector of Customs, however, appeals against dismissal lie to the Board of Revenue, and from the Board of Revenue to the Local Government. It is certainly necessary that there should be some appellate authority above the Chairman, but I agree with the Hon'ble Dr. Asutosh Mukhopadhyaya that the Corporation is not the proper authority, and I think also that the General Committee should not be constituted the authority. They are both co-ordinate authorities with the Chairman The Chairman, say, has a number of applicants for an appointment, and selects and appoints A, as he is empowered to do. Should he afterwards find that A is not a suitable person, and removes him, is it reasonable that the Corporation or the General Committee should step in and say—'You shall not get rid of this man.' The Government should, strictly speaking, be the appellate authority over the Chairman, as it is in respect of the Engineer and Health Officer; but whether it would be willing to accept the burden of taking up these appeals is questionable. It is for the Hon'ble Member in charge of the Bill to consider the matter together with the

proposal of the Hon'ble Dr. Asutosh Mukhopadhyaya that the General Committee should be the authority to receive appeals."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"If the matter was left to the General Committee, the case would be heard by the Appeal Sub-Committee, that is to say, by a smaller body presumably fully competent to take such action as the justice of the case might require."

The Hon'ble Mr. Baker:—"I absolutely object to any appeal being allowed to the Corporation. They are entirely unfit to deal with appeals in personal matters. But I will consider the suggestion of the Hon'ble Dr. Asutosh Mukhopadhyaya. It was in my mind when he suggested it that the appeal would be heard by the Appeal Sub-Committee, of which I have spoken to him in connection with another matter"

The Hon'ble Raja Ranajit Sinha Bahadur of Nashipur said:—"I have no objection to this motion being postponed."

The Hon'ble Dr. Asutosh Mukhopadhyaya proposed that "General Committee" be substituted for "Corporation" in the amendment brought forward by the Hon'ble Raja Bahadur of Nashipur.

The further consideration of the amendment was then postponed to the next meeting of the Council.

Section 73.

The Hon'ble Dr Asutosh Mukhopadhyaya's motion for the amendment of section 61C (*now* 69) having been lost, he, by leave of the Council, withdrew the motion standing in his name, that in section 65 (*now* 73), clause (*b*), the words within brackets from "other" to "61C" be omitted.

Section 77.

The Hon'ble Babu Surendranath Banerjee moved that for the words "in every two months," in line 2 of sub-section (*1*) of section 70 (*now* 77), the words "a month" be substituted.

He said:—"The original Bill provided that the meetings of the Corporation should be held once in three months, and then after considerable discussion in Select Committee we came to the conclusion that perhaps it would be as well to allow the Corporation to meet once in two months. The present law is that the Corporation should meet at least once a month, and, Sir, the pettiest municipality in the pettiest town in Bengal meets once a month. That is the Bengal Municipal Law. Every mufassal municipality must hold a meeting at least once a month, and, if it does not hold a meeting once a month, the Chairman circulates a notice stating the grounds on which the meeting has not been held. Therefore it comes to this, that in Bengal every municipality, be it the pettiest and most insignificant, must meet once a month, but the greatest municipality in the Province, the municipality of the capital of the Indian Empire, is not to meet except once in two months? I find strangely enough that this is the provision of the Madras Municipal Act. They meet once in two months. Section 68 of the Madras Act says 'there shall be six general meetings of the Commissioners in every year for the transaction of business;' that is to say, we are legislating upon the lines of the most backward Municipality in the Indian Empire. I hope, Sir, that having regard to the fact that the business of the Corporation will be of an important character, that it will have multifarious work and heavy responsibility, and that the financial concerns of the Municipality will be controlled by the Corporation, you will see your way to accede to this amendment, which provides that the meetings of the Corporation shall be held at least once a month."

The Hon'ble Mr. Baker said:—"The Hon'ble Member has made no reference to the second clause of section 70 (*now* 77), which provides that 'the Chairman may, whenever he thinks fit, and shall, upon a requisition made in writing by any seven Commissioners, call a special meeting of the Corporation.' I am certain that, even if this section remained exactly as it is now, not the smallest inconvenience would result, and the only effect would be that if on any occasion there were not sufficient business to require the attendance of the Commissioners, they would not have to meet. However, Your Honour has

considered this matter, and you have authorised me to say that you will accept the amendment of the Hon'ble Member."

The Hon'ble MR. OLDHAM said:—"I should like to say a few words to explain the history of the matter. The Bill as it came to us in Select Committee provided for a quarterly meeting. When we got up to section 70 (*new* 77), the representatives of the Corporation were able very easily to persuade us that those meetings should be increased. Then we let the matter stand. We thought it had been settled, and we went on developing the powers of the Corporation, increasing its business at almost every step and not increasing the number of meetings. I think, if we had come back to this section, we should have arranged for monthly meetings"

The motion was then put and agreed to.

The Hon'ble BABU SURENDRANATH BANERJEE'S amendment of section 70 (*now* 77) having been accepted, the Hon'ble MR. APCAR, by leave of the Council, withdrew the motion, standing in his name, that in section 70 (*now* 77), sub-section (*1*), for the words "two months" the word "month" be substituted.

He said:—"This motion is in exactly the same terms as the previous one."

The Hon'ble BABU JATRA MOHAN SEN moved that in sub-section (*2*) of section 70 (*now* 77), "five" be substituted for "seven".

He said:—"I am aware that the figure in the Bill, before it was submitted to the Select Committee for the second time, was 10, and it was reduced to 7, I believe, in consequence of the reduction of the number of the Commissioners. Although this reduction has been made, I venture to submit that the requirement has not been met. I shall take a concrete instance. Under the section as it originally stood 10 Commissioners from five wards could have demanded a calling of a meeting; but now as the number of Ward Commissioners has been reduced to one each, it will be necessary for seven Ward Commissioners to join. Therefore the privilege is curtailed, although the intention of the reduction seems to be to retain obviously a proportion to the reduction of the number of Commissioners; but this is the effect, and I would strongly recommend that five be substituted for seven. It would do no harm, although every harmless amendment need not be carried, but if it is erring, it is in the right direction. If five Commissioners express a desire to convene a meeting, I think their wishes ought to be acceded to."

The Hon'ble MR. BAKER said:—"It seems to me this is a pure question of arithmetic, and the Ward Commissioners have nothing to do with the matter. When the Corporation consisted of 75 Commissioners, it was the law that any 10 of them could call upon the Chairman to call a special meeting. When that number was reduced from 75 to 50, we made a proportionate reduction in the number of Commissioners who could make that call on the Chairman. Our reduction was unanimously agreed by all the members of the Select Committee, and I really think there is nothing further to be said."

The Hon'ble BABU JATRA MOHAN SEN said:—"I would only add in reply that five members are quite sufficient to ask for the convening of a meeting."

The motion was then put and lost.

SECTION 80.

The Hon'ble BABU SURENDRANATH BANERJEE, by leave of the Council, withdrew the motion, standing in his name, that the last three lines of section 73 (*now* 80) be omitted.

SECTION 81.

The Hon'ble BABU SURENDRANATH BANERJEE moved that—

(*1*) the words "or, in his absence, the Vice-Chairman or the Deputy Chairman, as the Chairman may direct," in lines 1, 2, and 3 of sub-section (*1*) of section 74 (*now* 81), be omitted;

(*2*) the words "Vice-Chairman and the Deputy Chairman" in lines 1 and 2 of sub-section (*2*) of section 74 (*now* 81) be omitted.

He said:—"The Bill provides that in the absence of the Chairman, and under his direction, the Vice-Chairman or the Deputy Chairman may preside, and on every such occasion the Vice-Chairman or the Deputy Chairman, as the case may be, shall vote, and when necessary shall have a casting vote. Now neither the Vice-Chairman nor the Deputy Chairman is a member of the Corporation, and it is an anomaly that gentlemen, who are not members of the Corporation, should be called upon at a minute's notice to act as President of a meeting of the Corporation. The President of a meeting of the Corporation should be a member of that body, and it does seem to me to be a sort of affront to the Corporation that either the Vice-Chairman or the Deputy Chairman should be called upon to preside at a meeting of the Corporation, when there are members of the Corporation who are willing and competent to preside. Am I to understand that, with the exception of the Chairman, there is no member of the Corporation fit to preside over that body; that the Vice-Chairman and the Deputy Chairman, who are strangers to the method of proceeding adopted at meetings of the Corporation, are better qualified to preside than members of the Corporation who are familiar with the procedure at such meetings? It is wholly illogical that the Vice-Chairman and the Deputy Chairman, who would be absolutely strangers to the Corporation, should preside. What I am trying to establish is that the members of the Corporation being familiar with the work of the Corporation, being familiar with the work transacted at meetings of the Corporation and the method in which business is done at such meetings, are better qualified to preside in the absence of the Chairman than the Vice-Chairman or the Deputy Chairman who are not members of the Corporation and are not familiar with the work and proceedings of the Corporation. In curing one anomaly, you are driven to another, and you are obliged to provide by way of explanation that for the purposes of this section the Vice-Chairman and the Deputy Chairman shall be deemed to be Municipal Commissioners. I do not think that in any municipal law in the world you will find such a provision. In the absence of the Chairman, I think a member of the Corporation should preside over the deliberations of that body. I hope that, under the circumstances, the Council will see its way to accept these amendments."

The Hon'ble MR. BAKER said:—"I am authorised to say that we accept these amendments."

The motions were severally put and agreed to.

The Hon'ble BABU SURENDRANATH BANERJEE's amendments in section 74 (*now* 81) having been accepted, the Hon'ble MR. APCAR, by leave of the Council, withdrew the following motions standing in his name:—

(*1*) that in section 74 (*now* 81), sub-section (*1*), the words "or in his absence, the Vice-Chairman or the Deputy Chairman, as the Chairman may direct," be omitted; and

(*2*) that in section 74 (*now* 81), sub-section (*2*), the words "the Vice-Chairman and the Deputy Chairman" be omitted.

SECTION 82.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the *explanation* to section 75 (*now* 82) be omitted.

The motion was put and agreed to.

The Hon'ble BABU SURENDRANATH BANERJEE's motion for the amendment of section 75 (*now* 82) having been accepted, the Hon'ble MR. APCAR, by leave of the Council, withdrew the similar motion standing in his name.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that, at the end of section 75 (*now* 82), paragraph 1, the words "from the beginning to the end of the meeting" be added.

He said:—"I cannot persuade myself to believe that the omission of these words is intentional. I think that in the interests of the Corporation these words, which find a place in section 84 (*now* 91), should be added."

The Hon'ble Mr. Baker said :—"The hon'ble mover of the amendment is quite right. That is the intention."

The motion was put and agreed to.

Section 83.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that in section 76 (*now* 83), line 2, "three" be substituted for "five."

The Hon'ble Babu Jatra Mohan Sen moved that in section 76 (*now* 83), line 2, "three" be substituted for "five".

The Hon'ble Dr. Asutosh Mukhopadhyaya said :—"It has apparently been overlooked that in the original Bill, when there were 75 Commissioners, 18 formed a quorum at meetings of the Corporation, and five members could demand a poll. Under the new constitution introduced under the instructions of the Government of India, the Corporation will consist of 50 members, and 12 members will form a quorum; therefore the number of members entitled to demand a poll should also be reduced in proportion."

The Hon'ble Babu Jatra Mohan Sen said :—"The amendment of which I have given notice is to the same effect. I think that the omission to reduce the number of Commissioners entitled to demand a poll is a pure oversight. In consequence of the reduction in the number of Commissioners, we have reduced the number to form a quorum from 18 to 12, and I think a corresponding reduction should be made in the number entitled to demand a poll."

The Hon'ble Mr. Baker said :—"This is not an oversight, but was done deliberately after consideration whether we should make a proportionate reduction in the number required for demanding a poll. It was considered undesirable to make it too easy to demand a poll, as it takes up time and is thereby an obstruction to business. If three members can be got to demand a poll, it will not be difficult to get five to do so."

The Hon'ble Babu Jatra Mohan Sen, in reply, said :—"In this Council any one member has a right to demand a poll, and I don't see why three members should not be allowed to do so in a quorum of 18. A poll often exercises a healthy influence on the votes of the Commissioners."

The motions were then put and lost.

Section 86.

The Hon'ble Babu Surendranath Banerjee moved that—

(1) the following clause be inserted after clause (*b*) of section 79 (*now* 86):—

"(*c*) every contract made by the Chairman involving an expenditure of one thousand rupees or less shall be reported by him, within fifteen days after the same had been made, to the Corporation."

(2) the following clause be inserted after clause (*b*) of section 79 (*now* 86):—

"(*c*) every contract made by the Chairman involving an expenditure of one thousand rupees or less shall be reported by him, within fifteen days after the same had been made, to the General Committee."

He said :—"Under the existing law and under this Bill also, the Chairman has power to enter into contracts of a value not exceeding Rs. 1,000, and his discretion is not fettered in any way; but when he has so entered into a contract my amendment proposes that he should report the fact to the Corporation; but if the Hon'ble Member in charge of the Bill objects to that, then I propose that he should report it to the General Committee. What I ask is that there shall merely be a report. I follow the precedent of the Bombay Act, but there the report is made not to the Corporation, but to the Standing Committee. I put it in the alternative form, so that if the Council do not accept the first view, then the report should be made to the General Committee. I hope that the last of these amendments at least will be accepted."

The Hon'ble MR. BAKER said:—"I cannot for one moment admit that these amendments are framed on the lines of the Bombay Act. In Bombay, in contracts up to Rs. 500, a report is not made to any one; from Rs. 500 to Rs. 5,000, a report is made to the Standing Committee; but under no circumstances is any reference made to the Corporation in Bombay, neither for sanction nor for report. And I object further. Under the present law, as the Hon'ble Member has told us, the Chairman spends money up to Rs. 1,000, and he reports to no one. Why should you tie his hands more strictly now? The Corporation must have approved the estimates: they must have been entered in the budget: all the Chairman has to do is to enter into a contract. Surely, the Chairman can be trusted to expend sanctioned sums of Rs. 1,000 without interference and without the necessity of making a report. It seems to me to be absolutely absurd to tie the Chairman's hands in the way here proposed, and it has no sort of resemblance to the system in force in Bombay.

The Hon'ble MR. BUCKLEY said:—"I also think this amendment is one which should on no account be accepted. I am prepared to go further than this Bill does in giving authority to the executive officers When this matter came before the Select Committee, I tried to have greater powers vested in the Chairman, but I was defeated. I think the motion now brought forward illustrates the intense desire for centralisation which the Hon'ble Members display who are in favour of it. I desire to point out how very much greater are the powers entrusted by the Government to their officers in the matter of making contracts. An Executive Engineer in any part of India can accept a contract for Rs. 2,000, and, if the Local Government specially selects an individual Executive Engineer in whom they have confidence, he might enter into contracts to the extent of Rs. 5,000. In the Calcutta Municipality every contract of over Rs. 1,000 goes first to the officer in the position of an Executive Engineer; then it goes to the Engineer, then to the Chairman, and then to the General Committee, and the hon'ble mover of the amendment now wants it to go to the Corporation. It seems to me that red tape runs a very long way in the Municipality. In the Government service, a Superintending Engineer who occupies a position by no means so onerous as that of the Engineer of the Corporation can accept contracts up to Rs. 10,000, and, if he is an officer in whom the Local Government has confidence, he can accept contracts up to Rs 20,000. There is a native gentleman in Calcutta who has the power of entering into contracts up to Rs. 2,000, and he carries them out with satisfaction. I cannot understand why the hon'ble mover of the amendment wants the Corporation to exercise control over such comparatively unimportant matters, and why he desires that the officers of the Municipality should have powers so much less than those which Government confers on its own servants in corresponding positions."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"I don't mean that the Corporation shall exercise any control, but the Corporation being in charge of the financial concerns of the Municipality, and this being a matter of finance, a report should be made to the Corporation as regards these contracts. It will only be a report—the submission of a statement to the Corporation. It does not mean control or the exercise of any authority on the part of the Corporation over the action of the Chairman. All that I suggest is that the Chairman having entered into the contract should report the matter to the Corporation."

The motions were then put and lost.

The Hon'ble BABU SURENDRANATH BANERJEE also moved that the whole of line 5 in clause (*d*) of section 79 (*now* 86) be omitted; that the word "Corporation" be substituted for the words "General Committee" in line 8 of the same clause; and that clause (*dd*) of section 79 [*now* clause (*d*) of section 86] be omitted.

He said:—"The object of this amendment is to restore the present provision of the law. Under the existing law all contracts up to Rs. 1,000 in value are entered into by the Chairman, but all contracts above Rs. 1,000 and up to

one lakh are entered into by the Corporation, and all contracts above one lakh are also entered into by the Corporation but with the sanction of the Local Government. That is the existing law. What is proposed to be substituted for that law? The Bill provides that all contracts up to Rs. 1,000 shall be entered into by the Chairman, which is the present law; but that all contracts above Rs 1,000 and up to Rs. 10,000 must be entered into by the General Committee. The power of the Corporation in respect of contracts between Rs. 1,000 and Rs. 10,000 is withdrawn, and the authority of the General Committee is substituted. All contracts above Rs. 10,000 and up to one lakh and all contracts above one lakh are to be entered into by the Corporation, the latter with the sanction of the Local Government. I cannot understand why there should be any change in the law relating to contracts, and I must express my very grave apprehension as to contracts being made by a small body like the General Committee. You don't know what the constitution of the General Committee will be—what the *personnel* will be. We hope it will be a fairly representative body, but our anticipations may not be fulfilled, and I must say, with the experience I have had of the Corporation, that it is not safe to entrust the final decision, in regard to contracts of the value of from Rs. 1,000 to Rs. 10,000, to such a small body as the General Committee. Perhaps it will be more strictly correct to say that it will be safer to entrust it to the larger than to the smaller body. Has the present system worked badly? I have not heard the Hon'ble Member in charge of the Bill say so. Large contracts involving the expenditure of lakhs of rupees have been entered into by the Corporation, and I do not know that they have given rise to any scandals The Corporation has done its duty well, and I hope the Council will see its way to keep the law in its present state."

The Hon'ble MR. BAKER said:—"The hon'ble mover of the amendment asks why we are changing the law. Under the present law the Chairman can enter into contracts up to Rs. 1,000 in value, and contracts in excess of that sum are entered into by the Corporation, and he wishes to know why we are making any change in the law. The reason is the constitution of a system of co-ordinate authorities by which we are interposing the General Committee as a co-ordinate authority between the Chairman and the Corporation, a working body standing midway between the two. Therefore, it is only logical that, up to a certain amount, the sanction of the General Committee should be sufficient, and that it should not be necessary in such cases to obtain the sanction of the Corporation. In Bombay this system is carried much further; the power of entering into contracts extends no further than the Standing Committee. No contract, however large, requires the previous sanction of the Corporation. The Hon'ble Member also said that we are unable to see what the composition of the General Committee will be, and, therefore, it will be dangerous to entrust the power of entering into contracts to that body. We certainly cannot see into futurity, but we may be sure that the General Committee will consist of the pick of the Corporation; and if the composition of the Corporation is good, the composition of the General Committee will be better. If the General Committee is bad, the Corporation will be worse. Therefore, in either case, it will be better to give this power to the General Committee."

The Hon'ble MR. APCAR said:—"I desire to endorse every word of the warning given by the hon'ble the mover of the amendment, and I have, on a former occasion, expressed the apprehension I have of the danger there is in leaving the decision of entering into these contracts in the hands of a small body working with closed doors. I am deeply impressed with the conviction that it is infinitely better that such matters should be decided in the open light of day in a public meeting, and I am of opinion that the smaller the body, the greater the danger. I fear, very seriously, that the result will be of a most mischievous character to the rate-payers."

The Hon'ble MR. BUCKLEY said:—"Both the Hon'ble Members who have addressed the Council in support of this amendment have warned us in solemn language of the danger of giving the power of making contracts to the General Committee. In reply to those warnings, I wish to say that in the

course of an experience of thirty years, more or less, I have had a great deal to do with the making of contracts, and I can only recall two or, possibly, three cases of any possible suspicion against officers concerning the making of contracts. In the Public Works Department tenders are accepted or rejected, and contracts are often entered into by a single officer. If the General Committee is to be doubted and distrusted in the way these gentlemen represent, I am unable to imagine what the cause can be, or in what way the dangers which they apprehend can be avoided."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"We don't distrust the General Committee, but we say it is much safer to entrust the power of making contracts to a larger body than a smaller one. I hope my anticipations may not be fulfilled as regards the *personnel* of the General Committee. But it is all a jump into the unknown, and we ought not to give up a system which has worked well for an untried system which may not work well, and I submit that, as far as financial matters are concerned, the authority of the Corporation ought to be maintained. I hope the anticipations of the framers of the Bill may turn out to be correct. It is possible that our dark vaticinations may prove to be false. I hope they may be false; but as legislators we are not justified in leaving the sure path, guaranteed by experience, and embark upon an unknown venture. In matters of this kind it is better to follow the old lines, when those lines have led to success. It is a warning which I feel it my duty to give. You are abandoning the tried and beaten path, a sure path sanctified by experience, and you are adopting an unknown path which may lead to results that are unknown. I entirely object to any comparison between the Bombay and the Calcutta systems in this respect. [The Hon'ble MR. OLDHAM:—"The system has worked well in the Calcutta Port Trust."] The authority of the Port Trust is supreme. The authority of the Corporation is not supreme. If the making of contracts was confined to a body like the Port Trust, and if the authority of that body was supreme, I would not object. The Corporation would then have the power of supervision and of revision; but here the final decision in regard to contracts is given to the General Committee. The Port Trust has supreme power; therefore I don't think the analogy holds good. I feel very strongly in this matter, and I am anxious for the purity of the Corporation. The weakest point in the Corporation is the making of contracts; we ought to be specially on our guard with regard to this particular matter, and we should make no change which might imperil the purity of the administration for which all of us are so solicitous. If you make a change in the law you take a big jump into the unknown, while you abandon the well-known beaten path, which has hitherto preserved the purity of the Corporation."

The motion being put, the Council divided as follows:—

Ayes 6.

The Hon'ble Raja Ranajit Sinha, Bahadur, of Nashipur.
The Hon'ble Babu Jatra Mohan Sen.
The Hon'ble Babu Boikanta Nath Sen.
The Hon'ble Babu Surendranath Banerjee.
The Hon'ble Mr. Apcar.
The Hon'ble Dr. Asutosh Mukhopadhyaya.

Noes 12.

The Hon'ble Mr. Buckley.
The Hon'ble Mr. Buckland.
The Hon'ble Mr. Handley.
The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Mr. Mackenzie.
The Hon'ble Mr. Spink.
The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
The Hon'ble Mr. Oldham.
The Hon'ble Mr. Baker.
The Hon'ble Mr. Bolton.
The Hon'ble Mr. Slack.

So the amendments were lost.

The Hon'ble BABU JATRA MOHAN SEN moved that in section 79, clause (*d*) [*now* section 86, clause (*c*)], "five hundred" be substituted for "one thousand" and "five thousand" for "ten thousand".

He said:—"My following amendments might be taken with this one, as they all relate to the same thing: namely, that in section 80 (*now* 87), sub-section (*2*), lines 3 and 4, "five hundred" be substituted for "one thousand"; and that in section 81 (*now* 88), sub-section (*1*), line 5, "five hundred" be substituted for "one thousand". The object of the amendments which I have now the honour to propose is to curtail the power of the General Committee, and also to enlarge it in matters of contract. The present section requires the sanction of the General Committee when the contracts refer to sums of from Rs. 1,000 to Rs. 10,000. My proposal is that such sanctions should be required in the case of contracts of from Rs. 500 to Rs. 5,000. This, I think, is a matter of convenience and necessity. I do not know what the state of things is at present with regard to making of contracts, but I find that the Corporation recommend the change I propose, and I believe their recommendation is based on past experience. With these observations, I commend these amendments to the favourable consideration of the Government."

The Hon'ble Mr. Baker said:—"I can add nothing to what I have already said on this subject. This Bill, as the Hon'ble Mr. Buckley pointed out quite correctly just now, restricts the powers of the General Committee unduly, and it was my hope that in the Select Committee the powers of the General Committee would be extended to Rs. 25,000. But the Select Committee did not agree, and the figure was retained at Rs. 10,000. The Hon'ble Member now wishes to reduce it to Rs. 5,000.

"I submit that all these attempts to reduce the amounts up to which contracts may be made by the Chairman and the General Committee, respectively, are steps in the wrong direction."

The motion was put and lost.

Sections 87 and 88.

The Hon'ble Babu Jatra Mohan Sen also moved that in section 80 (*now* 87), sub-section (*2*), lines 3 and 4, "five hundred" be substituted for "one thousand".

The motion was put and lost.

The Hon'ble Babu Jatra Mohan Sen also moved that in section 81 (*now* 88), sub-section (*1*), line 5, "five hundred" be substituted for "one thousand".

The motion was put and lost.

The Hon'ble Babu Surendranath Banerjee moved that the words "(where necessary) instead of the Chairman's seal," in lines 6 and 7 of sub-section (*1*) of section 80 (*now* 87) be omitted.

He said:—"I cannot understand the object of these words in this section, and therefore I move that they be omitted. I do not see that any provision is made anywhere in the Bill for there being a seal called 'the Chairman's seal'."

The Hon'ble Mr. Baker said:—"It means the Chairman's private seal, the exception being that the seal of the Corporation is used instead of the Chairman's own seal. It means the seal which the Chairman would use as a private individual."

The Hon'ble Mr. Apcar said:—"I have an amendment in exactly the same terms. I thought the Corporation is going to become, to use a phrase that the Hon'ble Member has made classic, a 'one man show,' and that the Chairman is to have a seal of his own. There is a definite meaning to the term 'seal of the Corporation,' and, therefore, I think, it is dangerous to use such a term in the Bill as it is proposed to omit."

The Hon'ble Mr. Handley said:—"I see no objection to these words being retained. I do not know what has disturbed the equanimity of my hon'ble friends. There may, perhaps, be some redundancy, but every gentleman has a seal of his own which he can use in any contract on which he likes to use it If the words 'where necessary' are not put here, it may be necessary to put that seal to every contract, otherwise the contract would not be legal."

The Hon'ble MR. BOLTON said:—"The words are superfluous and should clearly be omitted."

The Hon'ble THE PRESIDENT said:—"It would meet the Hon'ble Member's views if the words 'instead of the Chairman's seal' in line 7 are omitted."

The Hon'ble BABU SURENDRANATH BANERJEE proposed that only the words "instead of the Chairman's seal" should be omitted.

The motion to omit the words "instead of the Chairman's seal" was put and carried.

The Hon'ble BABU SURENDRANATH BANERJEE's motion for the amendment of section 80 (*now* 87) having been carried, the Hon'ble MR. APCAR, by leave of the Council, withdrew the motion standing in his name, that in section 80 (*now* 87), sub-section (*1*), the words "(where necessary) instead of the Chairman's seal" be omitted.

The Hon'ble BABU SURENDRANATH BANERJEE, by leave of the Council, withdrew the following motions standing in his name:—

(*1*) that the words "on behalf of the Corporation" be inserted between the word "Committee" and the word "shall" in line 6 of sub-section (*1*) of section 81 (*now* 88);

(*2*) that the word "Corporation" be substituted for the words "General Committee" in line 1 of sub-section (*2*) of section 81 (*now* 88), and that the words "subject to the provisions of clauses (*dd*) and (*e*) of section 79 [*now* clause (*d*) of section 86]" in lines 3 and 4 of sub-section (*2*) of section 81 (*now* 88) be omitted.

The Hon'ble BABU SURENDRANATH BANERJEE moved that after the word "Committee" in line 6 of sub-section (*1*) of section 81 (*now* 88), the following be inserted:—

"in the case of all contracts exceeding one thousand rupees and not exceeding ten thousand rupees, and the Corporation in the case of all contracts exceeding ten thousand rupees."

The Hon'ble MR. APCAR moved that—

(*1*) in section 81 (*now* 88), sub-section (*1*), after the words "General Committee" the words "on behalf of the Corporation" be inserted;

(*2*) in section 81 (*now* 88), sub-section (*2*), the words "subject to the provisions of clauses (*dd*) and (*e*) of section 79 [*now* clause (*d*) of section 86]" be omitted, and at the end of the sub-section the following be added:—

"Provided that, where the contract involves an expenditure exceeding ten thousand rupees, the action of the General Committee under this section shall be subject to the approval of the Corporation."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I think the Hon'ble Member in charge of the Bill will accept this amendment. Under sub-section (*1*) of section 81 (*now* 88), the General Committee gives notice by advertisement in respect of all contracts, whether they are within the jurisdiction of the General Committee or of the Corporation. The Corporation will enter into contracts which lie within their jurisdiction. The Hon'ble Member in charge of the Bill may say that the issue of advertisements is not of great importance, but we have found by experience that they are of the greatest possible importance, and therefore the issue of advertisements ought to be given to the authority that will have the making of the contracts. To the General Committee ought to belong the power of issuing advertisements and of accepting tenders in respect of contracts which by law they are empowered to enter into. To the Corporation ought to belong the power of issuing advertisements and accepting tenders in respect of contracts which fall within the jurisdiction of the

Corporation. This is a proposal which I think is perfectly fair and reasonable and ought to be allowed. It falls in with the principle which my hon'ble friend the Member in charge of the Bill has himself laid down. There ought to be no overlapping of functions, and this will be avoided by giving to the Corporation complete authority and responsibility in respect of contracts with which it has to deal, and similarly by giving to the General Committee complete authority and responsibility in respect of contracts within its jurisdiction."

The Hon'ble MR. BAKER said:—"I regret I cannot agree to this amendment. I cannot see that there will be any overlapping of functions. The interests of the Corporation are safeguarded by this section read with sections 79 and 81 (*now* 86 and 88). When a contract is to be entered into, the General Committee will issue advertisements and call for tenders. If the contract is for a sum less than Rs. 10,000, the acceptance of a tender by the General Committee will be final. If it exceeds Rs. 10,000, then the General Committee will have to send the tender which they propose for acceptance, with possibly other tenders, to the Corporation for approval, and the contract cannot be entered into unless and until the Corporation have accepted a tender. That, I submit, is the only way of safeguarding the interests of the Corporation. What would you think of a private Company which passed a rule that contracts above a certain sum shall only be entered into at a general meeting of the shareholders of the Company? The acceptance of contracts is a matter for the Board of Directors of the Company to deal with."

The Hon'ble MR. APCAR said:—"If the Council will refer to my amendment on the same section 81 (*now* 88), sub-section (*1*), which refers to the same matter as that now under discussion, they will see that I propose a middle course, namely, that, after the words 'General Committee' the words 'on behalf of the Corporation' be inserted. I think it will be better to have the whole discussion at once. It appears to me that whatever is done by the General Committee in such cases should be done on behalf of the Corporation and not in an entirely independent way."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"I regret I am not able to follow the Hon'ble Member in charge of the Bill in the line of argument he has adopted. He has emphasised the fact that there are to be co-ordinate authorities and that their powers and functions are to be kept apart. But I find that every now and then those powers and functions get mixed up. There is the General Committee and there is the Corporation, but my hon'ble friend says there must be a mixing up of their functions in the matter of contracts. My hon'ble friend argued as if the General Committee was a sort of working body of the Corporation. I admit that it is so now, but it will not be so when this Bill is passed. He asked what would it be if the shareholders of a Company were called together to open tenders and enter into contracts? That, I submit, is quite a different thing. The General Committee is now the working body of the Corporation, but under this rule it will be a distinct and separate authority. The Corporation will not be able to act for the General Committee, nor will the General Committee be able to act for the Corporation. I submit that there is a positive danger in the General Committee opening tenders and sending them on to the Corporation. The present practice as to the opening of tenders inspires the fullest confidence, because tenders are now opened by a responsible officer under certain safeguards, but it would be dangerous if tenders were opened by a body which has not the final decision, and which has to transmit them to a superior authority. You do not know what malpractices may take place. Tenders may be opened one day and may be forwarded to the Corporation a week after; other tenders might be put in in the meantime. Malpractices are bound to take place if the suggestions of the Hon'ble Member in charge of the Bill are accepted. I speak with knowledge and experience. It is of the utmost importance that the decision with regard to the tenders should be made then and there. The practice now is for the Vice-Chairman to open tenders and keep them under lock and key and bring them before the General Committee, and then they are discussed and disposed of at once am perfectly certain that the proposed change

will lead to malpractices I am anxious that there shall be no malpractices. I accept the principle of separation of duties. My amendment accepts completely the principle of co-ordinate authorities. The General Committee has to deal with certain contracts; they have to issue advertisements; they have to call for tenders; they have to open the tenders and accept the contracts. The Corporation have also to consider certain tenders and accept contracts. There ought to be a complete separation of functions with the result that you will be able to bring home responsibility to the Corporation or to the General Committee, as the case may be. That seems to me to be the logical sequence of the principle laid down, and I cannot understand my hon'ble friend's hesitation to continue to follow his own principle to its legitimate conclusion. It is my firm conviction that if this amendment is rejected and my hon'ble friend's suggestions are accepted, the result will be disastrous."

The Hon'ble MR. BOLTON said:—"The drafting of this section seems to me defective. The sub-section says:—

'The General Committee shall not be bound to accept any tender which may be made in pursuance of such notice, but may accept, subject to the provisions of clauses (*dd*) and (*e*) of section 79, any of the tenders so made which appears to them, upon a view of all the circumstances, to be the most advantageous, or may reject all the tenders so made.'

"Nothing is here said of any action which the Corporation is to take. Clauses (*dd*) and (*e*) of section 79 [*now* clauses (*d*) and (*e*) of section 86] restrict the action of the General Committee under this section, but they do not empower the Corporation to take up the tenders and deal with them. The Hon'ble Member in charge of the Bill proposes that the Corporation shall dispose of the tenders relating to contracts within their cognisance, but not open them. There is, however, no provision in this section empowering them to deal with any contracts. The omission should be rectified. I also agree that, if the Corporation deals with tenders, it should open them. This is the obvious and ordinary arrangement."

The Hon'ble MR. OLDHAM said:—"I regret that I am unable to follow either the Hon'ble Mr. Bolton or the Hon'ble Babu Surendranath Banerjee. I speak with experience of the manner in which the General Committee deals with these matters. I think my hon'ble friend Mr. Bolton is mistaken in saying that the Corporation has to deal with tenders. The sole power of the Corporation is a sanctioning power. It is only in one way that the Corporation has co-ordinate powers as regards executive duties. It rests entirely in the final control in giving their sanction to the acceptance of tenders. It will be mixing up the powers of the Corporation with those of the General Committee if they are to open tenders, which is an executive duty. I never heard of this misunderstanding until now."

The Hon'ble MR. BOLTON said:—"There is no misunderstanding on my part."

The Hon'ble MR. OLDHAM said:—"I did not understand why my hon'ble friend thinks the Corporation should deal with the tenders. The Corporation has to sanction certain contracts, but it has not to deal with the tenders. Nor do I understand what is the point of danger in the passage of these documents from one body to another. I probably misled my hon'ble friend by saying that the tenders are opened by the General Committee. The Vice-Chairman opens all their tenders, but in the case of another Committee to which I have the honour to belong (the Loans Committee), the tenders, which are for very large sums, are opened by the members of the Committee. But I do not see what danger there can be from the tenders being opened by the General Committee if the acceptance of the tenders receives the sanction of the Corporation. I do not know of any danger."

The Hon'ble MR. BUCKLEY said:—"I have listened with the most utter astonishment to what the hon'ble mover of the amendment said. The procedure, as I understand it, is extremely simple. When the Hon'ble Member first spoke, I thought his objection to the present section was that the Corporation have not the power to order the publication of advertisements in the newspapers; but obviously that is not what the Hon'ble Member means. The

procedure will be this. The advertisement will be issued by the executive authority; then tenders will be received; the tenders will be opened by the General Committee; they will be entered in a general statement or form, as is done in the Public Works Department; then the tenders, together with that statement, will be submitted by the Chairman for the approval of the Corporation if they have to deal with the matter. How they can possibly be tampered with I cannot understand; but, if there is that danger, there must be something very wrong indeed in the proceedings in the office of the municipality. I have never heard of such a thing as any forgery or fabrication connected with the documents in the Public Works Department. I regret I have not been able to follow the Hon'ble Mr. Bolton. I cannot agree with him that this section is defective. It was considered by the Select Committee, and it appears to me to be a most simple matter."

The Hon'ble Mr. Baker said:—"I can add very little to what I have already said. The procedure will be that tenders will be received in the first instance by the General Committee; they will be opened by the General Committee; the tenders will then be entered in a schedule, and the General Committee will select one for acceptance. If the amount is in excess of Rs. 10,000, the whole matter, including the tenders, will be sent to the Corporation for their approval. That is the answer to what the Hon'ble Mr. Bolton said. It seems to me, as has been pointed out by the Hon'ble Mr. Buckley and the Hon'ble Mr. Oldham, that the section is perfectly clear."

The Hon'ble Mr. Bolton said:—"The action of the Corporation is limited by the proviso, but there is no provision empowering the Corporation to take up the tenders. There are members of the legal profession here who will be able to give their opinion."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"The Hon'ble Member in charge of the Bill is reading into the section things that are not to be found there. The difficulty in the section is that it deals only with cases in which the General Committee is empowered to deal with tenders, but it makes no mention of tenders with which the Corporation is entitled to deal. It only provides that the General Committee is competent to deal with tenders which come within the scope of their authority. By putting in the words 'subject to the provisions of clauses (*dd*) and (*e*)' [*now* clauses (*d*) and (*e*)] you exclude certain matters from the control of the General Committee, but that does not authorise the Corporation to deal with such matters; and I think the words proposed in the amendment now under consideration ought to be inserted with a view to authorise the Corporation to deal with them."

The Hon'ble Mr. Bolton said:—"I understand from the Assistant Secretary that he thinks the section wrong if the Corporation is to dispose of tenders relating to contracts within their powers. The Hon'ble Member in charge of the Bill said that the General Committee will select one tender, and then present it to the Corporation with a general statement of the tenders received. It should not rest with the General Committee to select any tender which must go to the Corporation. That would be a work of supererogation, since the Corporation would not be bound by their selection. I would suggest that the consideration of this section be postponed until the next meeting of the Council."

The Hon'ble Mr. Apcar said:—"I fully endorse all that the Hon'ble the Chief Secretary to Government has said. I think the drafting of the section is defective if the intention of the Government is as has been explained by the Hon'ble Member in charge of the Bill, and I would ask my learned friend the Secretary to look also at the proviso that I propose to insert to sub-section (2) of section 81 (*now* 88)."

The Hon'ble Mr. Baker said:—"I have no objection to the consideration of this section being postponed."

The Hon'ble MR. BOLTON said :—"I should like the Hon'ble Member in charge of the Bill to explain why he objects to the modification which has been suggested."

The Hon'ble MR. BAKER said:—"I have explained twice already what I understand to be the intention. The General Committee will issue advertisements, receive tenders, and enter the details of them in a schedule, and will select one tender for acceptance by the Corporation, and, in sending up the tenders, they will send everything connected with the tender. There is no need to put into the Bill all these details. The intention is that the General Committee should open the tenders and consider them."

The Hon'ble MR. APCAR said:—"It is as if it is intended that the Corporation has only to say 'yes' or 'no', to endorse or to reject. That is what I understand is the effect of what is proposed. I propose to omit the reference to clauses (*dd*) and (*e*) [*now* clauses (*d*) and (*e*)], and to introduce a proviso to the effect that, where the contract involves an expenditure exceeding Rs. 10,000, the action of the General Committee under this section shall be subject to the approval of the Corporation. As the section is worded, it will simply give the Corporation power to accept a certain tender or not, without giving them the opportunity of dealing fully with the matter. As the Bill is framed, it means that they will not have any power but to enter into a contract or to refuse to do so. I desire to give the Corporation the power of considering the conditions and the specification and having full responsibility with regard to the whole contract."

The Hon'ble MR. BUCKLEY said:—"Surely that is meant by sub-section (2) of section 81 (*now* 88), when it says that the General Committee may accept any of the tenders which appears to them upon a view of all the circumstances to be advantageous, subject to the provisions of clauses (*dd*) and (*e*) of section 79 [*now* clauses (*d*) and (*e*) of section 86], which means that they are to send the tenders to the Corporation."

The Hon'ble Mr. BOLTON said:—"Section 79 (*now* 86) does not provide for sending tenders to the Corporation."

The Hon'ble Mr. APCAR said:—"I hope it will not be understood that I accept what the Hon'ble Mr. Buckley said in his construction of the section."

The further consideration of these amendments was then postponed till the next meeting of the Council.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that at the end of section 81 (*now* 88), sub-section (2), the words "for reasons which shall be recorded in their proceedings" be added.

The consideration of this amendment was postponed till the next meeting of the Council.

The Council was adjourned to Saturday, the 16th instant.

CALCUTTA;
The 16th January, 1900.

F. G. WIGLEY,
Assistant Secretary to the Govt. of Bengal, Legislative Dept.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

The Council met in the Council Chamber on Monday, the 16th September, 1899.

Present:

The Hon'ble SIR JOHN WOODBURN, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.
The Hon'ble MR. W. B. OLDHAM, C.I.E.
The Hon'ble MR. R. B. BUCKLEY.
The Hon'ble MR. C. W. BOLTON, C.S.I.
The Hon'ble MR. E. N. BAKER.
The Hon'ble RAI DURGA GATI BANERJEA BAHADUR, C.I.E.
The Hon'ble MR. C. E. BUCKLAND, C.I.E.
The Hon'ble MR. F. F. HANDLEY.
The Hon'ble MR. F. A. SLACK.
The Hon'ble KHAN BAHADUR MAULVI DELAWAR HOSAIN AHMED.
The Hon'ble BABU JATRA MOHAN SEN.
The Hon'ble MR. T. W. SPINK.
The Hon'ble RAJA RANAJIT SINHA BAHADUR, OF NASHIPUR.
The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH, C.I.E.
The Hon'ble MR. D. F. MACKENZIE.
The Hon'ble MR. J. G. APCAR.
The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, M.A., D.L., F.R.A.S., F.R.S.E.
The Hon'ble BABU BOIKANTA NATH SEN.
The Hon'ble BABU SURENDRANATH BANERJEE.

CIVIL COURTS' AMINS BILL.

The Hon'ble MR. BOLTON, in moving that the Bill to repeal the Civil Courts' Amins Act, 1856, in Bengal be taken into consideration at the meeting of the Council to be held on Tuesday, the 19th instant, observed that he desired to add nothing on the present occasion to the remarks made by him when asking leave to introduce the Bill.

The motion was put and agreed to.

THE CALCUTTA MUNICIPAL BILL.

SECTION 25.

The Hon'ble MR. BAKER moved that the following sub-section be added to section 28A (*now* 25), namely:—

"(4) The Vice-Chairman shall not be removed from his office, otherwise than at the end of the term for which he was appointed, except in accordance with a resolution which has been passed at a special meeting and in favour of which not less than two-thirds of the Commissioners present at the meeting have voted."

He said:—"I have been in communication with the Hon'ble Babu Surendranath Banerjee with reference to the terms of amendment No. 12 of the Supplementary List of Business, and he informs me that if I make a slight modification in the terms of the amendment which comes first in the seventh list of business to-day, he will accept it. I have accordingly modified the amendment, which will now run in the terms I have just read.

"The Hon'ble Member accepts that wording, and this will make it unnecessary for him to move his amendment No. 12. His amendment was inconvenient, partly because it assumed that the Vice-Chairman was a municipal officer, which is not the case, and partly because under section 28J, sub-section (6) [*now* section 35, sub-section (6)], it is provided that the Vice-Chairman and Deputy Chairman shall be subject to the same liabilities, restrictions and conditions as the Chairman, and therefore both of these officers are liable to removal in the same way as the Chairman under section 10 (*now* 11) of the Bill. The object of the Hon'ble Member's amendment was to ensure that there should be no change in the present law with respect to the Vice-Chairman. Under the present law the Vice-Chairman cannot be removed by the Local Government at its discretion. He can only be removed on the vote of a two-thirds majority of the Commissioners, or at the end of the time for which he was originally appointed. The effect of the amendment I have now read will be to retain that state of things."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"If the effect of the amendment as has been explained is to keep the present law intact, I have much pleasure in accepting it, and I withdraw my amendment."

The motion was put and agreed to.

SECTION 70.

The last motion having been agreed to, the Hon'ble BABU SURENDRANATH BANERJEE, by leave of the Council, withdrew the motion standing in his name that the following proviso be added to section 62 (*now* 70):—

"Provided also that in the case of the Vice-Chairman or the Deputy Chairman he shall not be removed except by a resolution of the Corporation in favour of which not less than two-thirds of the Commissioners voting have voted."

The Hon'ble RAJA RANAJIT SINHA BAHADUR, OF NASHIPUR, moved the following amendment standing in the name of the Hon'ble Dr. Asutosh Mukhopadhyaya, namely:—

that to section 62 (*now* 70) the following proviso be added, namely:—

"Provided also that any other municipal officer or servant in receipt of a salary of more than one hundred rupees *per mensem* who is dismissed may appeal to the General Committee, whose decision shall be final."

The sections of the Bill having, under the direction of the Council, been re-numbered, the present number of each section is inserted in brackets wherever the new numbering differs from the old.

The Hon'ble MR. BAKER said:—"I intimated at the last meeting of the Council when the Hon'ble Dr. Asutosh Mukhopadhyaya suggested that the General Committee should hear these appeals that I would be prepared to consider that suggestion. I have done so, and I think the suggestion is a good one. I consulted Mr. Bright, the Chairman of the Corporation, and he told me not only that he agrees with the amendment, but that he welcomes it. He feels that the responsibility of dealing with the dismissal of servants drawing Rs. 100 per month or upwards is too great to be borne by him singly, and he would greatly prefer that an appeal should lie to some higher authority. Therefore I accept the amendment which has been moved by the Hon'ble Raja Bahadur."

The motion was put and agreed to.

The last amendment having been adopted, the Hon'ble RAJA RANAJIT SINHA, BAHADUR, of Nashipur, by leave of the Council, withdrew the motion standing in his name that after the words "Local Government," at the end of section 62 (*now* 70), the following be added:—

"and that in case of the dismissal of other Municipal officers or servants drawing a salary of one hundred rupees or upwards *per mensem* an appeal shall lie to the Corporation."

SECTION 88.

The Hon'ble MR. BAKER moved that for sub-section (*2*) of section 81 (*now* 88), the following sub-sections be substituted, namely:—

"(*2*) In every case in which the acceptance of a tender would involve an expenditure exceeding ten thousand rupees, the General Committee shall place before the Corporation the specifications, conditions and estimates, and all the tenders received, specifying the particular tender (if any) which they recommend for acceptance.

"(*3*) In every case in which the acceptance of a tender would involve an expenditure exceeding one lakh of rupees, the Corporation shall submit to the Local Government the specifications, conditions and estimates, and all the tenders received, specifying the particular tender (if any) which they recommend for acceptance.

"(*4*) Neither the General Committee, the Corporation nor the Local Government shall be bound to accept any tender which has been made; but any of those authorities may, within the pecuniary limits of their respective powers, as prescribed in section 79, sub-section (*1*) [*now* section 86, sub-section (2)], accept any of such tenders which appears to it, upon a view of all the circumstances, to be the most advantageous, or may reject all the tenders submitted.'

He said:—"This amendment has been framed in communication with the Hon'ble Mr. Apcar. The opinion was expressed on the last occasion the Council met that section 81 (*now* 88) did not make it quite clear that the tenders, including estimates, conditions and specifications, were to be submitted by the General Committee to the Corporation when the amount of the contract exceeded Rs. 10,000. It was thought by some Hon'ble Members that the General Committee would only have to submit the particular tender which they recommended for acceptance. That was not the intention. But, as these doubts have been expressed, it is desirable that the section should be worded so clearly as to prevent any possibility of misunderstanding. With that object, the Secretary has drafted these three clauses to take the place of sub-section (*2*). This morning since I came into the Council I have had an opportunity of speaking to the Hon'ble Babu Surendranath Banerjee on this point, and he tells me that while he agrees to the alteration I have proposed with regard to specifications and estimates, he feels some doubt about clause (4). He doubts whether the Local Government ought to accept any tender. Well, Sir, I think to put it in a homely way, that what is sauce for the goose is sauce for the gander. If the intention of the two sections 79 and 81 (*now* 86 and 88) is that the sanctioning authority is to receive the tenders, we cannot apply that in the case of the Corporation and refuse it to the Local Government. The position is exactly the same, except that the Corporation can only sanction up to one lakh of rupees, while the Local Government sanctions contracts for sums in excess of that figure. Therefore, I think the procedure should be precisely the same in the two cases."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I am very sorry to raise a note of discord after my hon'ble friend has proceeded so far and has made suggestions which meet us half way. My difficulty is this: as I explained to the Hon'ble Member this morning, the Government is not a municipal authority: the Government is a supervising authority. Matters which have been sanctioned by the Corporation come up before the Government for confirmation, and the Government either confirms those matters or vetoes them. But here under clause (4) my hon'ble friend invests the Government with an active share in regard to municipal contracts. The Government becomes a sort of municipal authority under clause (4). Sir, the present law is that contracts above one lakh of rupees are laid before the Government, and the Government may sanction the contracts or veto them as it pleases. The Corporation sanctions the contracts subject to the approval of the Government. The Government is a supervising authority, and I believe that that was the intention of the framers of this Bill. I think it was their intention that no further power should be given to the Government in regard to the determination of contracts than what the Government now possesses under the Act. But you are now taking a step beyond that. Instead of Government merely vetoing or merely supervising, the Government places itself in the position of an active municipal authority in regard to a particular class of contracts. I do not think this is a position which the Government ought to assume in regard to any municipal matter. I think the position of the Government ought to be the position of the supervising authority. But that position is changed if the Government actively interfere with the ordinary work of the Municipality. Such a modification of the law seems to me to ignore the fundamental principles which underlie the Bill. Therefore, I think it would be as well to modify the section upon these lines. That is my difficulty, and I explained it to my friend; but he is unwilling to proceed further."

The Hon'ble MR. BOLTON said:—"On the last occasion I pointed out the necessity for the change now proposed in this section, because, if the Corporation is to enter upon contracts of a certain value, it is necessary that they should examine the tenders, and also, as has now been added by the Hon'ble Mr. Baker, the specifications, conditions and estimates. For the same reason the Government must examine the tenders, specifications, conditions and estimates of any contract which it lies with it to approve or veto. It is perfectly obvious that the Government, even as the section now stands, could not possibly exercise its power of veto, unless it does so blindly, without examining all the papers upon which the proposal to contract for a sum exceeding a lakh of rupees has been made by the Corporation. These papers must come before it, in order that it may exercise in a reasonable and proper way its control over such contracts."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"It is the acceptance of the tender by the Government that I object to."

The Hon'ble MR. APCAR said:—"In the list of business there is a motion, No. 37*, which stands in my name. That was inserted with a view to giving an opportunity to the Corporation of seeing and considering those very points which now the Hon'ble Member in charge has acceded in his own amendment. Therefore, if the amendment is passed in the form which now the Hon'ble Member's amendment assumes, it will not be necessary for me to move the amendment that I now refer to. I thought it would be advisable to have that proviso which is now incorporated in sub-sections (*2*), (*3*) and (*4*) of the amendment, because the Corporation, having the power to consider these tenders, ought to be in a position also to criticise the conditions, specifications and estimates. Otherwise, the Corporation would be compelled, possibly, to reject tender after tender, because they did not conform with their wishes as to what they might think would be required. So that I think the present amendment is a wise alteration, if I may say so, because it will avoid

* i.e., that in section 81, sub-section (*1*) [*now* section 88, sub-section (*1*)], *after* the words "General Committee" the words "on behalf of the Corporation" be inserted.

possible friction in the working of this Bill, and, as I understand my hon'ble friend, it really only expresses that which was his intention in regard to this section from the first.

"Then with respect to what has fallen from the Hon'ble Mr. Bolton, I am quite at one with him in thinking that it is advisable that the Government should have the opportunity of giving their assistance to the Corporation in any criticism relating to the specifications and estimates, but where I join issue with the Hon'ble Member is upon the question of the Local Government having the power of accepting tenders. I do not think the Local Government should have this power of accepting tenders. I do not consider that is what should be allowed by law. I do not know if that is the intention, because, as my hon'ble friend to my left (Babu Surendranath Banerjee) has well said, it would constitute the Government a municipal authority, and it would almost be necessary to place it on the list of the various municipal authorities. I do not know if it is really the intention to give that power to the Local Government, so that, after the Corporation have rejected any tender, the Local Government may accept that tender and force it upon the Corporation. I think that is going perhaps beyond what is the intention of the Bill. I am not prepared to say that it is really intended that the Local Government shall thus have the power of setting aside the action of the Corporation who are charged with the power of the purse: but, if it is so, it is obvious that the powers given to the Corporation under the scheme of the Bill will be in a very serious degree encroached upon. They would not have that discretion left to them which it is, as I understand it, the intention of Government to permit them to have. So, if it is the desire now to press this amendment in any form, with the intention of giving authority to the Local Government to upset the resolutions of the Corporation with regard to tenders, I much regret that I must enter my protest against it."

The Hon'ble Mr. Buckley said:—"I would only make one brief remark about the words the Hon'ble Mr. Baker brought in this morning. He wishes to have the words 'conditions, specifications and estimates' inserted. I have some doubt whether the word 'estimate' ought to go in there, because under clause (3) the Local Government would have had these estimates before. It does not seem necessary that they should be sent to them a second time with the specifications and conditions. The same thing would apply to the Corporation, and all that seems necessary is that the specifications and conditions should be mentioned, but not the estimates."

The Hon'ble Mr. Baker said:—"Would not the estimates be returned to the General Committee or the Corporation, as the case might be?"

The Hon'ble Mr. Buckley said:—"I should have thought that in the case of such large works they would have been kept by the Local Government."

The Hon'ble the President said:—"They ought undoubtedly to be there."

The Hon'ble Mr. Baker said:—"In the first line of clause (4) of the amendment, in order to meet the views expressed by the Hon'ble Mr. Apcar and the Hon'ble Babu Surendranath Banerjee, it is proposed to substitute the words 'No municipal authority' for the words 'Neither the General Committee, the Corporation nor the Local Government.' That would have the effect of leaving the acceptance to the various municipal authorities (the Chairman does not come in at all), *i.e.*, the General Committee and the Corporation. The Local Government would then merely have the power of vetoing any particular tender which was unsatisfactory."

The Hon'ble Babu Surendranath Banerjee said:—"I thankfully accept that."

The motion was then put in the amended form and agreed to.

The Hon'ble MR. BAKER's amendment in section 81 (*now* 88) having been adopted, the Hon'ble BABU SURENDRANATH BANERJEE, by leave of the Council, withdrew the following motions standing in his name:—

(1) that after the words 'General Committee' in line 1 of sub-section (*2*) of section 81 (*now* 88), the following words be inserted:—' or the Corporation, as the case may be,' and

"(2) that the words 'in the case of the General Committee' be inserted after the words 'may accept' in line 3 of sub-section (*2*) of the same section."

For the same reason, the Hon'ble MR. APCAR, by leave of the Council, withdrew the following motion standing in his name:—

"that in section 81 (*now* 88), sub-section (*2*), the words 'subject to the provisions of clauses (*dd*) and (*e*) of section 79 [*now* clauses (*d*) and (*e*) of section 86],' be omitted, and that at the end of the sub-section the following words be added:—

"Provided that, where the contract involves an expenditure exceeding ten thousand rupees, the action of the General Committee under this section shall be subject to the approval of the Corporation."

For the same reason, the Hon'ble DR. ASUTOSH MUKHOPADHYAYA, by leave of the Council, withdrew the following motion standing in his name:—

"that at the end of section 81 (*now* 88), sub-section (*2*), the words 'for reasons which shall be recorded in their proceedings' be added."

He said:—"This amendment needs a word of explanation. As I understood section 81, sub-section (2), I thought the General Committee would have the power of disposing of tenders, not only with respect to contracts within their jurisdiction, but also with respect to contracts within the jurisdiction of the Corporation and the Local Government. I thought it was not fair that the General Committee should be in a position arbitrarily to reject all tenders offered to the Corporation or the Local Government. Now, however, according to the amendment which has just been carried, the General Committee will not have that power; my amendment therefore, becomes unnecessary, and I accordingly withdraw it."

For the same reason, the Hon'ble BABU SURENDRANATH BANERJEE, by leave of the Council, withdrew the following motion standing in his name:—

"that after the word 'Committee' in line 6 of sub-section (*1*) of section 81 (*now* 88) the following be inserted:—

"'in the case of all contracts exceeding one thousand rupees and not exceeding ten thousand rupees, and the Corporation in the case of all contracts exceeding ten thousand rupees.'"

The Hon'ble MR. APCAR moved that in section 81 [*now* 88, sub-section (*1*)]' sub-section (*1*), after the words "General Committee" the words "on behalf of the Corporation" be inserted.

He said:—"With regard to this amendment my aim is that all advertisements that might be published, should be published, in the name of the Corporation which will be the body by whom the contracts will be made. As it now is, whatever the internal arrangement will be, the General Committee will be the body who will decide what form the advertisements shall take. I do not wish, in any way, to take their authority away in a proceeding such as that, but, inasmuch as as, after all, the General Committee is acting on behalf of the Corporation in whatever they do, I think that that ought to be made clear, and that in all publications or advertisements it should be stated that they are issued by the General Committee on behalf of the Corporation. I do not think the General Committee should appear to the outer world as an independent body acting independently. That is the purpose of this amendment. It is not intended in any way to hamper the General Committee, or in any way to obstruct the administration, but, inasmuch as contracts are made on behalf of the Corporation, the advertisements calling for tenders ought to be made in somewhat the same form."

The Hon'ble Mr. Hare said:—"As a matter of substance I think this amendment comes to nothing, Sir; it has no meaning. As a matter of form, I think it is not quite correct, because advertisements are called for, not on behalf of the Corporation, but on behalf of the Municipality, which is quite a different matter. The Municipality includes all the Municipal authorities, includes every thing connected with the Municipal government of the town. If the words 'on behalf of the Corporation' were inserted, it would look as if the General Committee, one of the Municipal authorities, were calling for tenders on behalf of one of the other Municipal authorities. In contracts, such wording would not be technically correct. As far as I can judge, the insertion of the words would have no sort of effect, one way or the other, and, therefore, I think they are superfluous."

The Hon'ble Mr. Apcar, in reply, said:—"May I make this observation with regard to the point? All contracts are made on behalf of the Corporation, but, whatever contracts are made, the Chairman and the General Committee are merged in the Corporation so far as liability, or responsibility, or obligation, is concerned; that is my reason in putting this amendment forward."

The motion was then put and lost.

Section 90.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved, that in section 83, sub-section (2) [*now* section 90, sub-section (2)], for "once a week" be substituted "twice a month".

He said:—"In the first place, Sir, I have to point out that, if it is obligatory on the General Committee to meet once a week, we make it obligatory on the Corporation to spend Rs. 20,000 a year, because every member of the General Committee who attends a weekly meeting will have to be paid a fee at Rs. 32 for each such attendance. In the second place, I desire to point out that, even if we substitute 'twice a month,' there is ample safeguard that business will not suffer, for the reason that the same sub-section provides that the General Committee may meet at such other times as may be found necessary. Sub-section (4) also provides that the Chairman may at any time call a special meeting of the General Committee for the transaction of any business which, in his opinion, cannot be delayed until the next ordinary meeting of the Committee. In the third place Sir, I have to point out that, having reference to the terms of section 88 (*now* 95), which deals with the appointment of Sub-Committees, to whom the powers of the General Committee may be delegated, it may fairly be expected that the labours of the General Committee will be much lightened; and, lastly, Sir, I desire to point out that, having regard to the composition of the reconstituted Corporation and the reconstituted General Committee, it may be expected that, after the disappearance of what has been described as 'the obnoxious element,' there may be less of speech and more of action."

The Hon'ble Babu Surendranath Banerjee said:—"Notwithstanding the disappearance of 'the obnoxious element' to which some of us belong and to which my hon'ble friend has just referred, I think it will be absolutely necessary to hold the meetings of the General Committee once a week. My hon'ble friend Mr. Oldham will bear me out when I say that, having regard to the enormous increase of work which has taken place within recent times, and especially after the amalgamation, we have been obliged to hold meetings of the General Committee sometimes twice a week instead of once, and it seems to me that it would be useless to lay down as part of the law that meetings should be held only twice in a month and as often as may be necessary. I am afraid it will be found necessary to hold these meetings at least once a week. If my hon'ble friend were a member of the Corporation—and if he were, he would probably have been one of the 'obnoxious element'—he would have been of the opinion that the General Committee must meet once a week. The volume of business is so large that it cannot possibly be dealt with unless the Committee meets once a week."

The Hon'ble THE PRESIDENT said:—"Where did the Hon'ble Member find the words 'obnoxious element'? I have no recollection of seeing these words anywhere."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"I have seen them in several of the newspapers."

The Hon'ble MR. OLDHAM said:—"My friend has appealed to me, and under ordinary circumstances I would have been in agreement with him; but recent events have somewhat shaken my views. Last evening we had a meeting of the General Committee of the Corporation which was attended by the Hon'ble Babu Durga Gati Banerjea and some others and also myself. There was a formidable list of business on the agenda paper, some 40 items, including one of those personal matters which always take up so much time, and it is a fact that we cleared off the whole business within one hour. A fortnight ago I should certainly have been in the fullest agreement with my hon'ble friend, but after last evening I do not know what to say. It is also a fact that the Port Commsssioners meet only once a fortnight, and their meetings are very short. But then I must acknowledge that the variety of business which comes before the General Committee of the Corporation is very much greater than that which comes before the Port Commissioners."

The Hon'ble MR. APCAR said:—"Sir, my experience has been that some little time back there were lists of some 30 to 40 items got through in an afternoon sitting. Then I was a more regular attendant than, owing to pressure of other work, I have been able to be recently. I was not present when the General Committee met last evening, but it seems to me, that the Hon'ble Mr. Oldham has himself suggested an exceedingly strong argument in support, though he seems rather doubtful if he would accede to what my hon'ble friend on my left has said He stated that not less than 40 items of business were brought up. Well, are the General Committee not to take into consideration such an accumulation of business? No less than 40 items were brought forward at this one meeting. Now, if these had all come up within one week—"

The Hon'ble MR. OLDHAM said:—"Some of these items had been accumulating for much more than one week."

The Hon'ble MR. APCAR said:—"Of course, we cannot go into an account of what had accumulated or what had not, but we have to take into consideration this, that under the provisions of this Bill, the General Committee have the power to transfer, practically, all their business to the Chairman. That is an element which must be taken into consideration, and it may tend to diminish business very considerably. And there is also the further element which my hon'ble friend, Dr. Asutosh Mukhopadhyaya, has brought up, that is, the payment of fees, which is a very serious item of expenditure. But, in all circumstances, I think it would be inadvisable that the Committee should meet less frequently than once a week. My experience is that their business is such that it will require some attention to be paid to it at least once a week Therefore, I cannot agree with the amendment which has been brought forward. As to the rapidity with which the work is got through, that, of course, depends on the interest or want of interest, and on the knowledge or want of knowledge, of the members of the Committee present. I am quite prepared to find that under the new *régime* business will be got through very rapidly. But whether this will be to the advantage of the rate-payers has yet to be seen. I have been present at meetings when the help of the elected Commissioners has been given to the Chairman and the discussions have been prolonged; but the discussions have always been on the side of, and in the interest of, the rate-payers and of the public, and I do not think that the time which has thus been given should be grudged."

The Hon'ble MR BAKER said:—"I am entirely opposed to this amendment, Sir, and I entirely agree with the Hon'ble Babu Surendranath Banerjee. It seems to me to be out of the question, that the General Committee will ever get

through their business at all unless they meet once a week, and I should be surprised if the Chairman does not find it necessary to call other meetings in addition. The whole of the proceedings of the Sub-Committees, which correspond with the existing standing Committees, have to come before the General Committee for confirmation. That is not the case under the present law, for the proceedings of standing Committees go direct to the Corporation for confirmation, and do not come before the General Committee at all. Although the General Committee may be relieved by delegating its powers to these Sub-Committees, this item of confirming their proceedings is a distinct addition to the work which the General Committee now performs. I think, if the Hon'ble Member, Dr. Asutosh Mukhopadhyaya, had ever attended a meeting of the General Committee and seen the enormous volume of business that comes up, he would never have brought up this question. As regards the question of the cost of these meetings, that is, I admit, a drawback, but we shall deal with it when we come to section 93 (*now* 100)."

The motion was then put and lost.

SECTION 93.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the following proviso be added to section 86 (*now* 93):—

"Provided that all resolutions of the General Committee passed at a meeting at which not more than eight members of the said Committee are present shall be subject to confirmation by the Corporation."

He said:—"Sir, in this view of the law I am supported by the Report of the Corporation. I refer to page 7 of the fourth instalment of the Report of the Bill Committee of the Corporation. They say in paragraph 42:—

"'The Committee are of opinion that all proceedings of the General Committee should come up for confirmation before the Corporation as under the present law. If this is not agreed to, the Committee would urge that the decisions arrived at by a majority of votes at meetings of the General Committee at which not more than, say, 8 members are present, might be made subject to confirmation by the Corporation. Such decisions might, in some instance, be due to the casting-vote of the Chairman, and could not properly be looked upon as decisions of the General Committee, and should not, therefore, be considered final.'

"Sir, this was the view of the Bill Committee consisting of the most experienced Municipal Commissioners. The object is to safeguard the General Committee against what might be considered a snatch vote. Suppose a matter of very considerable importance is brought before the General Committee, and the attendance is only two-thirds of the entire number, and a decision is arrived at, I think it is desirable that, under these circumstances, that that decision should be laid before a higher authority for confirmation. I think it is right and proper that such a decision should be so laid, and the amendment provides for it. It expresses the views of my colleagues who have had the largest experience as Commissioners, and I venture to recommend it for your acceptance."

The Hon'ble MR. BAKER said:—"The Hon'ble Member has said in effect that this amendment is necessary to prevent any matter being settled at a small meeting of the General Committee by the mere casting vote of the Chairman. But I would point out that the Chairman has a casting vote, however many members are present, and the Hon'ble Member's argument would equally apply to every resolution of the General Committee which was decided only by the Chairman's casting vote. It might happen that, if every single member of the General Committee were present, they might be equally divided, and the Chairman would have to give a casting vote. The Hon'ble Member also urged that the amendment is desirable in order to prevent resolutions being carried by a snatch vote, by which I presume he means a vote at a meeting at which very few members were present. But that, Sir, is provided for in section 84 (*now* 91), where a quorum of six is fixed. Unless a quorum is present, no proceedings can be transacted at all. Therefore, I think neither of those arguments has any sort of validity. I would go much further than that. The effect of this amendment is

that, unless nine members of the Committee are present from first to last, the proceedings of the Committee would have no validity unless they are confirmed by the Corporation. Now I could have understood that proposal if the Hon'ble Member's amendment to raise the number of members of the General Committee to eighteen had been carried, although I should have opposed it even in that case. There is something to be said in having at least one-half of the General Committee present before business can be transacted. But the Council has decided against that proposal, and the effect of this amendment is that three-fourths of the whole number of the General Committee must be present before their proceedings have any kind of validity. Now I do not think the Hon'ble Member can quote a single precedent for such a proportion in any similar body in any part of the world. The General Committee is to consist of the best and ablest members of the Corporation; it will be thoroughly representative, and it seems to me to argue a most extraordinary and most uncalled for distrust of the Committee to provide that unless three-fourths of the members are present their proceedings are to have no force."

The Hon'ble Mr. Bolton said:—"It seems to me sufficient to say, in opposing this amendment, that, if it were carried, the General Committee would be shorn of much of the power which it is the express purpose of the Bill to confer upon it, as one of the co-ordinate authorities of the municipality."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"I regret I have to say so, but I am wholly opposed to this amendment. To illustrate what its possible consequence may be, I will venture to put one concrete case before the Council. Let us suppose that eight members of the General Committee are present at a meeting. They are absolutely unanimous in the decision of a particular question, and it should be remembered that they form a majority of the entire body. Their proceedings, according to the amendment, will not be final unless they are confirmed by the Corporation. Well, suppose that at the meeting of the Corporation at which these proceedings come up for confirmation twelve members are present, of whom seven vote against the confirmation of the proceedings and five in favour of it. That is only another way of saying that seven members of the Corporation will be able to upset a decision arrived at by eight members of the General Committee. I venture to think that a very exceptional case ought to be made out before we are called upon to accept so startling a result."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"I do not wish to reply at any length to the observations which have been made, except to say that my hon'ble friend Dr. Ashutosh Mukhopadhyaya has introduced two assumptions, both of which are not likely to happen. In both cases, upon any contentious matter, the eight members of the General Committee are not likely to be absolutely unanimous; and, although I know that twelve members will form a quorum for the Corporation, I cannot suppose that that will be the usual attendance. I think we may take it for granted that the attendance will considerably exceed twelve In practical life we deal not with abstract possibilities but with things which are likely to happen, and such assumptions as absolute unanimity in the General Committee and an attendance of only twelve members in the Corporation are things which I can say from my experience of the General Committee and of the Corporation are assumptions which are not in the least likely to be realised. I will not reply to the arguments which have been urged by my hon'ble friend Mr. Baker, but I think my hon'ble friend said that he is prepared to accept this amendment if the number is reduced."

The Hon'ble Mr. Baker said:—"I said I could understand it, but I should oppose it."

The Hon'ble Babu Surendranath Banerjee said:—"I was prepared to reduce the number to six if my hon'ble friend saw his way to accept the principle of the amendment."

The Hon'ble Mr. Baker said:—"Under no circumstances whatever can Government agree to allow the proceedings of the General Committee to go to the Corporation for confirmation."

The motion was then put and lost.

Section 95.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that in section 88 (*now* 95), sub-section (*1*), the words "delegate any of their powers or duties to Sub-Committees, and may also from time to time by like resolution" and the word "such" in line 5 be omitted.

He said:—"My reason for proposing this amendment is that the words which I have mentioned seem to me to be unnecessary in view of the provision of sub-section (*11*) [*now* (*12*)] of this section. Sub-section (*11*) [*now* (*12*)] says that 'all proceedings of any Sub-Committee shall be subject to confirmation by the General Committee' As I understand it, even if certain powers or duties are, under this Bill, delegated to any Sub-Committee, the decision of the Sub-Committee upon such a matter will have to be placed before the General Committee for confirmation. Therefore, the same object will be attained if we only leave in the words 'refer to Sub-Committees for enquiry and report or for opinion.' If the intention had been to delegate powers and duties absolutely, that is to say, if the Sub-Committees had been authorised to assume certain powers and to perform certain duties not subject to the control of the General Committee, it would have been desirable to have these words, but, when everything really remains in the hands of the General Committee, I think they may be safely omitted."

The Hon'ble Mr. Baker said:—"The Hon'ble Member's argument is that the power of delegation given in the sub-section is superfluous, because the General Committee has the power to submit questions to Sub-Committees for enquiry, report and opinion, and the Sub-Committees' reports have to be confirmed by the General Committee. The Hon'ble Member considered mere confirmation of the proceedings to be sufficient without the power of delegation; but I think, Sir, there is a great practical difference. Under the Bill as it stands, the Sub-Committees will actually exercise the powers of the General Committee in everything except name. They will actually do whatever work is made over to them by the General Committee; they will discharge functions which are imposed by the Bill on the General Committee, and their proceedings will go to the General Commitee merely for confirmation. Now it is well known that, when work is done by a Sub-Committee, about 95 per cent. of the proceedings are confirmed without discussion. The delegation of powers in this way practically relieves the delegating body of a very large mass of work which would otherwise devolve upon it. Moreover, if the Hon'ble Member will refer to an amendment, of which I have given notice, he will see that it is proposed, following the provisions of the existing law, to give to the Executive power to anticipate the sanction of the General Committee. Now, Sir, if matters were only referred to Sub-Committees for enquiry, report or opinion, I do not think the Chairman would be able to exercise these powers; he could not to take action in anticipation of the confirmation of the proceedings."

The Hon'ble Babu Surendranath Banerjee said:—"I most support the amendment and for reasons different from those which have been urged by my hon'ble friend. The reasons of my hon'ble friend are those of a lawyer; my reasons are those of a practical man. I object to the delegation of powers and duties to small bodies. Specific matters should, I think, be referred to them, but powers as powers, and duties as duties, I do not think should be delegated to small bodies, of which the maximum number of members is six and the minimum three. When you delegate a distinct power or a specific duty, you know what you are delegating, and then there is the further safeguard that the matter comes before the General Committee for confirmation. I feel doubtful as to the wisdom and expediency of delegating powers and duties

in the manner contemplated in this sub-section, as I consider that such delegation may be attended with risk, and I do not think it ought to be allowed. I therefore support the amendment."

The Hon'ble MR. BUCKLEY said:—"To my mind to strike out the words which the Hon'ble Dr Asutosh Mukhopadhyaya would exclude from this section would be to take out one of the most advantageous proposals in the Bill. I cannot agree at all with what the Hon'ble Baba Surendranath Banerjee has said, that the delegation to small Sub-Committees is in itself bad. I will give an example in which I think even he will admit it would be advantageous. In dealing with *bustees*, one of the most important and difficult duties of the Corporation, nothing is more desirable than that the Ward Commissioner should help, with his knowledge of the circumstances, in deciding any matter. Now, under the terms of the Bill with reference to *bustees*, there are 22 duties assigned to the General Committee, and I think nearly all of them are essentially duties which can be much better performed by a *Bustee* Committee, and probably by a local *Bustee* Committee. I hope the *Bustee* Committees will deal with the different portions of the town separately. I think it advantageous that the Committees should so deal with them. One of their duties is 'to require an owner to take down a hut and re-erect it in conformity with the standard plan;' another is 'to cause the materials of any hut pulled down under their orders to be given to the rightful owner.' It seems to me clearly advantageous that the Sub-Committees should deal with such matters as these. The difference between the present Act and this Bill is most plainly marked. Under the existing Act the General Committee under section 64 is only a Budget and Finance Committee, and can only deal with business expressly referred to it by the Corporation. This is not so, however, in fact, but it is the existing law. The Sub-Committees under the present Act can only enquire and report and advise. They have no administrative functions delegated to them. Under this Bill, any of the duties and powers of the General Committee can be assigned to Sub-Committees, and they may become most useful bodies, relieving the General Committee of much detailed work."

The Hon'ble MR. BAKER said:—"When I spoke just now, I confined myself entirely to the grounds on which the hon'ble mover of the amendment supported it. But the grounds put forward by the Hon'ble Babu Surendranath Banerjee are different. His proposal would bring the work of the Corporation to a standstill. The volume of work before the General Committee is so enormous as to prevent them ever getting through it unless they have recourse to the principle of division of labour. These Sub-Committees, among other duties, will take the place of the present Standing Committees. All their proceedings will come before the General Committee for confirmation, and will have the same effect as if they had been done by the General Committee in their own persons. The other day the Hon'ble Dr. Asutosh Mukhopadhyaya moved an amendment to prevent the Chairman from delegating his powers to any Municipal officer, except a few specified ones, and after hearing what I had to say about it, at the recommendation of the Hon'ble Babu Surendranath Banerjee, he withdrew that amendment. Well, Sir, the position here is exactly the same. Just as the Chairman could not possibly get through his work if he had to do everything with his own hands, so the General Committee would be unable to get through the work imposed upon them if they had to transact every item of business themselves. Throughout the proceedings of the Select Committee it was taken for granted that not only would these Sub-Committees be appointed, but that the freest possible use would be made of this power. I think, Sir, if the Hon'ble mover of the amendment had served on the Corporation, he would recognise how utterly impossible it is to impose on the General Committee all the duties the General Committee at present have imposed upon them, and also the work of the numerous Standing Committees of the Corporation."

The Hon'ble MR. OLDHAM said:—"I have very little to add to what my Hon'ble friend the member in charge of the Bill has said in reply to the Hon'ble Babu Surendranath Banerjee. I would remind the Hon'ble Babu Surendranath

Banerjee that the Loans Committee, which is entrusted with very large financial questions, and the realising of the capital of the Corporation, consists only of six members, and I do not think I have ever seen more than four members at a meeting. Then again it should be remembered that these Committees, which will take up so much of the work of the present Standing Committees of the Corporation, will be very often peripatetic. They will go about and inspect various parts of the town. It is, I think, quite impossible in practice for the existing large Committees to carry out inspection work of that nature."

The motion was then put and lost.

The Hon'ble MR. APCAR moved that sub-section *(3b)* of section 88 [*now* section 95, sub-section *(6)*] be omitted.

The Hon'ble BABU SURENDRANATH BANERJEE also moved that sub-section *(3b)* of section 88 [*now* section 95, sub-section *(6)*] be omitted.

The Hon'ble MR. APCAR said:—"Sir, I move that section 88, sub-section *(3b)* [*now* section 95, sub-section *(6)*], be omitted. I am entirely in favour of having the best men we can get for any work that has to be done, when all causes of friction are removed. I think that the Corporation, or even the General Committee, will be best able to find persons better fitted for any particular kind of work, without being hampered by any rules which would limit the selections in proportion to the Ward Commissioners, the nominated Commissioners, and those appointed by Government. There has never been a suggestion made that the Municipality packed their Committees. I think they have tried to get the best men they could, and I think it would be difficult for Government to make rules to meet the different cases—hard-and-fast rules—such as are contemplated under the law. I think it will be much better and wiser that there should be no such rules, and that those who have to select should have a free choice of whom they may think the best fitted for any particular purpose in hand."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I have an amendmen very much upon the same lines, Sir. This proviso in the Bill has been drafted in accordance with the recommendation of the Government of India. Paragraph 20 of the letter of the Government of India says:—

'I am also to suggest that it might be desirable to lay down rules for the appointment of the Special Committees and Sub-Committees which would secure their being truly representative, in respect of their constituent elements, of the Corporation or General Committee appointing them. The provisions regarding the making of rules and bye-laws for the conduct of the business of Special Committees and Sub-Committees under sections 89A and 590, in connection with sections 595 and 597, might be extended to include their constitution in general agreement with the principles already laid down. It might not be necessary or feasible for all such Special Committees and Sub-Committees to be homogenous in constitution with the body appointing them; but it is clear that in some cases at least such homogeneity alone would secure efficiency and obviate friction.'

"Well, Sir, it was in accordance with this recommendation that the Select Committee drafted the section. But the Select Committee were unanimously of opinion that it would be most difficult to work a section of this kind. I will read an extract from the report of the Select Committee with reference to this particular section. The Select Committee observed:—

'At the same time we are bound to say that we entertain considerable doubt as to whether it will be possible to make workable rules of this character, or to give practical effect to any rules that might be made on the subject, however well they may be devised. It is even possible that such rules might impair the working efficiency of Committees appointed under them.'

"Therefore, Sir, when these rules were made, it was the deliberate opinion of the Select Committee that the rules might impair the working efficiency of the Committees appointed under them. This is the unanimous view of the Select Committee. With all the respect we can possibly feel for the Government of India, I think we ought to state, in clear and distinct terms,

that the effect of a section like this, if carried out, would be disastrous to the working efficiency of the Corporation, for that is practically what the Select Committee said in much milder language. It seems to me to be positively dangerous to have a section like this in the Bill. We have to provide for future contingencies. The history of this section will be forgotten. The circumstances under which it became the law of the land will not be borne in mind. My hon'ble friend will not always be the Secretary of the Municipal Department—another Lieutenant-Governor will occupy the place Your Honour now adorns—and then rules may be framed which, I have not the slightest hesitation in saying, will be disastrous to the efficiency of the Corporation. Having regard to these considerations, is it right that we should have even a permissive section like this in the Bill? We are bound to look to the efficiency of the Corporation. I think we owe it to ourselves to state, in clear and distinct terms, that we as the Legislature feel that even this permissive power of making rules ought not to be given to the Government in a matter like this. Therefore I appeal to Your Honour and to this Council to omit the sub-section. I know perfectly well that it will be a dead letter under Your Honour's *régime*, but it may not be so under your successor's *regimé*, and, therefore, it is necessary that we should guard against possible contingencies which might lead to mischief. I hope that, as in legislating we are bound to take long views of things, we shall so provide that no mischief may happen in the future by allowing a section like this to be passed into law. I trust the amendment of my hon'ble friend will be accepted."

The Hon'ble Mr. Baker said:—"I wish to say very little about this sub-section, because my views are accurately stated in the passage of the report of the Select Committee which has been read by the Hon'ble Babu Surendranath Banerjee. But I think Sir, he has rather exaggerated the risk of disaster following from this section being allowed in the Bill. So far as I can see, it will be quite impossible ever to make rules of this kind, and I am sure, at all events as far as I can foresee, no such rules will be made. The section is permissive. If the section had been compulsory, I admit the position would be one of great difficulty. But after all, it is merely a permissive section in the Bill, and a section which I think every one is agreed is extremely difficult of application, and every one is also agreed that it is not likely to be put into practice. I do not think we need trouble very much about any dangers that are likely to ensue on its being put into operation. Therefore, although I cannot say I am in favour of the section, I think we might allow it to stand in the Bill."

The Hon'ble Mr. Apcar, in reply, said:—"What I desire to point out is that, if this section is so difficult of application, it would be wiser to take it out altogether, because, although my hon'ble friend says there will be no chance of its being put into operation, he, after all, can only speak for himself, and we do not know what the future has in store for the Corporation. Considering also that he recognises the great difficulty of putting it into operation, I think it is best to remove all temptation and to exclude this sub-section altogether from the Bill."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"My hon'ble friend said it will be quite impossible to frame rules; then why have the section at all? My friend has distinctly said it is quite impossible to frame rules under this section of the Bill."

The Hon'ble Mr. Baker said:—"Did I say 'quite impossible'."

The Hon'ble Babu Surendranath Banerjee said:—"I have got your exact words."

The Hon'ble Mr. Baker said:—"I said my views were expressed in the paragraph of the Select Committee's report."

The motions being put, the Council divided as follows:—

Ayes 9.	*Noes 10.*
The Hon'ble Raja Ranajit Sinha, Bahadur, of Nashipur.	The Hon'ble Mr. Buckley.
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Handley.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Mr. Apcar.	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Mr. Oldham.
The Hon'ble Mr. Mackenzie.	The Hon'ble Mr. Baker.
The Hon'ble Mr. Spink.	The Hon'ble Mr. Bolton.
The Hon'ble Sahibzada Mahomed Bakhtyar Shah.	The Hon'ble Mr. Slack.
	The Hon'ble the President.

So the amendment was lost.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 88, sub-section (*5b*), [*now* section 95, sub-section (*6*)] for lines 3 to 8, the following be substituted:—

(*i*) Commissioners elected under section 7 (*now* 8), sub-section (*1*), or appointed under section 52B (*now* 59), sub-section (*1*), and

(*ii*) Commissioners appointed under section 7, sub-section (*1a*) [*now* section 8, sub-section (*2*)].

He said:—"My reason for this amendment is that, to the best of my judgment, the section as framed does not correctly represent the views of the Government of India, as embodied in paragraphs 17 and 20 of the despatch dated 7th June, 1899. The question arises, what are the constituent elements of the General Committee who have to appoint Sub-Committees? It is assumed that these constituent elements are the Ward Commissioners, the Commissioners appointed under clauses (*a*), (*b*) and (*c*) of sub-section (*1a*) of section 7 [*now* sub-section (*2*) of section 8] and the Commissioners appointed under clause (*d*) of sub-section (*1a*) of section 7 [*now* sub-section (*2*) of section 8]. Now I venture to submit that these are not the constituent elements either of the Corporation or of the General Committee. So far as the Corporation goes, the constituent elements are described in paragraph 17 of the despatch. They are described to be the twenty-five elected Commissioners and the twenty-five appointed Commissioners. So far as the General Committee is concerned, my contention is that the constituent elements are (1) the four representatives of the Ward Commissioners; (2) not the four representatives of the Commissioners appointed under clauses (*a*), (*b*) and (*c*), but the four who represent the Commissioners appointed under clauses (*a*), (*b*), (*c*) and (*d*), that is to say, these four represent not only Trade, Commerce and the Port Trust, but they also represent the Government partially; and (3) the four members appointed by Government. Therefore, it is not correct to say that the rules are to be made declaring what proportion has to come from the Ward Commissioners, the Commissioners appointed under clauses (*a*), (*b*) and (*c*) of sub-section (*1a*) of section 7 [*now* sub-section (*2*) of section 8], and the Commissioners appointed under clause (*d*) of sub-section (*1a*) of section 7 [*now* sub-section (*2*) of section 8]. I submit, therefore, that (2) and (3) ought to be amalgamated.

The Hon'ble MR. BAKER said:—"The Hon'ble Member admits that the proportions of these Sub-Committees ought to be truly representative of the constituent elements of the Corporation. Now, Sir, the constitution of the General Committee is laid down in section 8 (*now* 9) of the Bill, and that says that the 12 members shall be respectively elected and appointed as follows:—

four shall be elected by the Ward Commissioners,
four shall be elected by the Commissioners appointed under clauses (*a*), (*b*), (*c*) and (*d*) of section 7 (*now* 8),
four shall be appointed by the Local Government.

"Now, Sir, we have followed that classification in clause (3*b*)."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"That is precisely my complaint. You have not done so."

The Hon'ble MR. BAKER said:—"I would ask that this matter stand over until Monday. I am not quite sure that there is not some confusion about it."

The further consideration of these amendments was then postponed to the next meeting of the Council.

The consideration of the following motion standing in the name of the Hon'ble DR. ASUTOSH MUKHOPADHYAYA, namely, that at the end of section 88, sub-section (3b) [*now* section 95, sub-section (6)], be added "but from no Sub-Committee shall the representatives of either of the two classes of Commissioners be entirely excluded," was also postponed to the next meeting of the Council.

The Hon'ble MR. APCAR moved that in section 88, sub-section (3a) [*now* section 95, sub-section (5)], line 2, for the words "General Committee," the word "Corporation" be substituted, and that the words from "and none of them need" to the end of the sub-section be omitted.

He said:—"Sir, we have, under this section, power given to the General Committee to decide what Sub-Committees there shall be and what subjects they shall deal with, and what I seek to bring about by my amendment is, that the Corporation should elect the members of such Sub-Committees, and not the General Committee. I think, Sir, that the general body of the Corporation will be better able to judge as to the qualifications of individuals than the General Committee, which is a small body in which there will be many who are not by any means in touch with the Commissioners as a body. There is a further difficulty in the question, which I think is a real difficulty, and that is, that the members of the Sub-Committees will be paid by fees, and they may be influenced by reason of those who may be regarded as being the patrons in giving those fees, and I do not like that there should be any suspicion of that sort. Whether there be reason for this or not, I am not going to enter into the question, but we know this, that although in Bombay the powers of election of these Sub-Committees are given to the Standing Committee, which answers to our General Committee, the Sub-Committees are not paid at all. These are generally the grounds on which I move that the word 'Corporation' be substituted for the term 'General Committee'."

The Hon'ble MR. BAKER said:—"This proposal seeks to transfer to the Corporation the power to appoint Sub-Committees to whom are to be delegated part of the duties of the General Committee. The Hon'ble Member has said that the Corporation is better able to judge of the merits of members to be appointed than is the General Committee. He said the General Committee was a small body and that the Corporation is better acquainted with the merits of the members who may be appointed to Sub-Committees. This sounds, Sir, as if the members of the General Committee were entire strangers to the Corporation, as if they knew nothing about their fellow Commissioners at all. But every member of the General Committee is also a member of the Corporation. I would remind the Hon'ble Member that in the House of Commons they have an institution known as the Committee of Selection, which is a Committee to which is entrusted the duty of selecting members of other Committees to be appointed by the House. Now, Sir, if we were going to have such an institution in the Corporation of Calcutta, I think you would find it very difficult to get a body of men better qualified to act as the Committee of Selection than the General Committee. It will be representative of all sections of the Corporation; it will include, as I have said more than once, the picked men of all classes—men of the highest character and position and of the greatest capacity; and I feel certain that, if the matter is looked at solely from the point of view of making the best possible selection, the General Committee is in the best position to do it.

"But there are still stronger objections to the amendment. These Sub-Committees are to be the delegates of the General Committee. They are to do work assigned by law to the General Committee, and their proceedings come before the parent body for confirmation; and it is quite inconsistent with this scheme of duties to transfer the power of appointing them to some third party. If this were done, Sub-Committees would at once become the agents of the Corporation instead of being, as they are intended to be, the agents of the General Committee. The Corporation would thus obtain the power of interfering with the work of the General Committee in matters with which under the Bill they have no power of interference. It would go a long way towards bringing back that interference by means of Committees which Sir Alexander Mackenzie was so strongly opposed to."

The Hon'ble MR. APCAR, in reply, said:—"With reference to what has fallen from the Hon'ble Member in charge of the Bill as to the Committee of the House of Commons, I would observe that it is not the Cabinet Ministers who form the Selection Committee of the House, but those who are most intimately connected with, and those who have the most intimate knowledge of, the ordinary members of the House of Commons. So I think that in the General Committee, although these may be, as my hon'ble friend hopes, the pick of the Corporation, it is very possible that among them a large proportion will be those who will be wholly ignorant of the general body of the members generally, and will be unacquainted with a very large portion of the general body among whom would probably be found the most useful persons to serve on these Sub-Committees. With regard to the question of the selection being made by the Corporation, as I have said before,—and it has not been challenged in any degree whatever,—there has been no suggestion that the Corporation packed their Committees. I think that, if the Corporation were permitted to have the selection of these Committees, there would be a better selection made than if the choice were left to the General Committee."

The motion was then put and lost.

The Hon'ble BABU BOIKANTA NATH SEN moved that in section 88, sub-section (3a) [*now* section 90, sub-section (5)], the word "shall" be substituted for 'need, unless the General Committee so direct"

He said:—"I expect support for this amendment from the Hon'ble Members who have, in this Council, affirmed more than once that local self-government is not being withdrawn, that concentration is not the object of this Bill, but that it is designed with the object simply of curtailing some of the powers at present enjoyed by the preponderating element. These observations encourage me to expect support from that quarter. This section, Sir, enables the General Committee to appoint members of the Sub-Committees from the general body of Commissioners, but it does not prevent the General Committee from nominating Sub-Committees from its own body. Where is the guarantee that the General Committee will not invariably exercise that discretion in favour of its own members? Where is the safeguard? Now, Sir, Mr. Risley in his Statement of Objects and Reasons, paragraph 3, stated:—

'Power is also taken for the General Committee to appoint Sub-Committees, either from their own body or from the general body of Commissioners, on which all the working talent among the Commissioners will find a place.'

"I beg to draw the special attention of the Council to this observation 'on which all the working talent among the Commissioners will find a place.' I understand it was the intention also of the Select Committee that these Sub-Committees be formed from the general body of the Commissioners. If that is really the intention of the legislature from the time of the inception of this Bill down to this stage, why not give a manifestation of that intention by accepting this amendment? Now I beg to submit that there is undoubtedly a good deal of feeling about this Bill. I need not repeat what the state of excitement is, but if Your Honour is pleased to accept this amendment it would, I believe, be dealing out a considerable concession which would pacify public feelings. I have just

heard that the General Committee will be overwhelmed with work, that they ought to be relieved, and therefore, if the working talent of the general body of the Commissioners is intended to be utilized, why not give them this assurance that the Sub-Committees would be always formed from the rest of the Commissioners? If this be done, the public, at any rate the native portion of it, would be, to a certain extent, relieved by the concession. It would be acceding to a certain extent to public wishes without in the least introducing anything which would weaken the executive. I submit, therefore, that this is an opportunity for this Council, and it is an opportunity afforded by this amendment to Your Honour, to make a concession which will, to a certain extent, pacify the excitement caused by the Bill."

The Hon'ble Mr. Baker said:—"The Hon'ble Member says that this proposal, if agreed to, will be regarded as a concession, and that it would go some way towards satisfying the demands of the public. Would the Hon'ble Member be surprised to hear that not a single one of any of the various associations or public bodies who have reported upon this Bill has put forward any such request? The effect of the amendment would be to exclude every member of the General Committee from sitting on any of the Sub-Committees. As I have explained, these Sub-Committees will take the place of the present Standing Committees for water-supply, drainage, bustees, &c., &c. Does the Hon'ble Member seriously think that no member of the General Committee ought to sit upon any one of these important Committees? I feel that no member of the Corporation would ever put forward such an extraordinary proposition. At present, the members of the General Committee are to be found on every one of the Standing Committees, and, as a rule, they are among the leading members of the Standing Committees."

The Hon'ble Babu Surendranath Banerjee said:—"Some of us do not allow ourselves to be put down as members of the Standing Committees."

The Hon'ble Mr. Baker said:—"I can hardly consider the proposal seriously: it would exclude the picked men of the Corporation from these various Sub-Committees."

The Hon'ble Mr. Buckley said:—"The Hon'ble Babu Boikanta Nath Sen thinks that this proposal would not weaken the action of Sub-Committees. To my mind it would be almost fatal. He wishes to have some assurance that the members of the Corporation will have a chance of being members of the various Sub-Committees. I think he may feel the most perfect assurance that this will be the case. Under the London County Council, there are no less than 25 Committees which correspond to the Sub-Committees here, and I have little doubt there should be at least an equal number in Calcutta. If the 12 members of the General Committee are to form 25 Sub-Committees, I am quite sure that they will have to give up all occupations other than that of the municipality. It will be a physical impossibility for members of the General Committee to form all the Sub-Committees. I am myself personally in favour of as large a number as possible of the members of the Sub-Committees not being members of the General Committee, but I do think it is most desirable and, in the principal Sub-Committees, absolutely essential that there should be one member of the General Committee at least who is a member of the Sub-Committee. If the system which is proposed in section 88 (*now* 95) of the Bill is carried out, the result will be this, that on each Sub-Committee there will be three or four members who are Commissioners and one or possibly two members of the General Committee, and one member of the General Committee will, in almost all cases, be the Chairman of the Sub-Committee. The Sub-Committee will deal with the various matters assigned to it, and, when its proceedings come before the General Committee, the Chairman of the Sub-Committee will be the spokesman of the Sub-Committee before the General Committee. That system is in force in several municipalities, and it is most successful, because in all unimportant matters the views of the Chairman of the Sub-Committee, who is a member of the General Committee, are accepted as a matter of etiquette by the General Committee; but of course when important matters come up

for consideration, then the members of the General Committee will discuss the question. It is certain that by having one member of the General Committee as Chairman of the Sub-Committee, and by letting him bring matters before the General Committee, business is greatly facilitated. I am in sympathy with the Hon'ble Member in hoping that as large a number of members of the Corporation as possible may be on the Sub-Committee, and I am sure that, if their powers are somewhat weakened as members of the Corporation generally, they will be considerably increased with reference to those details of which they have the most knowledge and the most local acquaintance."

The Hon'ble MR. BOLTON said:—"The Hon'ble Member has quoted, in support of his amendment, a remark of Mr. Risley's that it was desirable that all the talent of the Commissioners should be utilised on the Sub-Committees; but in proposing that the members of these Sub-Committees shall consist only of members of the Corporation, and not of the General Committee, he excludes from the Sub-Committees all the working talent that will exist in the General Committee, which, as we have been assured, will be comprised of the most practical and business-like members of the municipality. The Hon'ble Member also apprehends that no members of the Corporation who are not also members of the General Committee would be appointed to the Sub-Committees. The General Committee, being a small body, consisting of 12, must, however, obviously have recourse to the other members of the Corporation in order to form most of their Sub-Committees. If, on the other hand, the Sub-Committees consist only of members of the Corporation who are not on the General Committee, while their proceedings are made subject to the confirmation of the General Committee, it is probable that friction would sometimes arise between the General Committee and its Sub-Committees. The section as drafted unquestionably provides the best means of using all the talent of the Corporation in the work of the municipality, and the Corporation will have, through its members, some share in dealing with the matters which are reserved for the General Committee."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"The point which has been raised by my hon'ble friend Babu Boikanto Nath Sen is one of considerable importance, and I must say it is a point attended with considerable difficulty. The Council cannot possibly withhold its sympathy from a motion such as that brought forward by my hon'ble friend, having regard to the object which he has in view, namely, to guard against the possibility of the General Committee abusing its powers of nomination in respect of Sub-Committees. I take it, Sir, that that is an object which will command in an unstinted measure the sympathy of this Council, but the Hon'ble Member in charge of the Bill has pointed out there are serious practical difficulties in the way, and I think it is as well that we should address ourselves to those difficulties. It is possible that a Sub-Committee, left without the experienced and matured guidance of members of the General Committee, may not be able satisfactorily to discharge the important and responsible duties with which it may be entrusted. I know how valuable the guidance—the guidance of the more seasoned, more experienced and more matured minds in the Corporation—is. Therefore, I should be unwilling to lay down a hard-and-fast rule to the effect that no member of the General Committee shall be a member of the Sub-Committee. Having gone so far I would stop there, and I would say this—that a limitation ought to be imposed upon the percentage of members of the General Committee being members of the Sub-Committees. Supposing you have one or two members of the General Committee, that ought to be enough. The minimum is three, the maximum is six. Supposing you have two members of the General Committee—if you provide two members of the General Committee upon any Sub-Committee—it may be less—but supposing you have two members of the General Committee upon every Sub-Committee, I think that ought to be quite enough for the satisfactory transaction of business. You will have the experienced guidance of the members of the General Committee, and it seems to me that such a limitation will afford an opportunity to others who are not members of the General Committee to be

members of the Sub-Committees. Then, Sir, there is another alternative suggestion which also occurs to me, because it was a suggestion which was made by experienced members of the Corporation, and if I remember right it was a suggestion which was given effect to at one time. I think, Sir, we had a rule to this effect that no member of the Corporation shall be a member of the General Committee and of more than one or two Sub-Committees. The effect of that rule would be to divide the work of the Corporation amongst all the members of the Corporation and give an opportunity to others who are not members of the General Committee to take part in the work of the Sub-Committees. These are the two alternative proposals which occur to my mind; and, as it is a matter of some little difficulty, I was going to make a suggestion to the Hon'ble Member in charge of the Bill whether he would consent to consider them, because they are matters of practical expediency and administrative convenience, and whether it would not be as well to have the question postponed and we might take it up after tiffin and settle it, that is to say, if the Hon'ble Member in charge of the Bill accepts the principle. If, however, he does not, then there is an end of the matter."

The Hon'ble Mr. Baker said:—"I certainly do not accept the principle that there should be any limitation whatever as to proportion on the Sub-Committees."

The Hon'ble Babu Surendranath Banerjee said:—"Then I have no hesitation in saying, and I say it with regret, that my hon'ble friend takes an extreme view, and I think he takes a view which is opposed to what is right and proper in a case of this kind. What possible objection can my friend have to legislate to the effect that not more than one-third of the Sub-Committee shall be members of the General Committee? I do not see any possible objection to a section of that kind, because we should thus secure the experience and judgment of members of the General Committee to guide the Sub-Committees. What possible objection can there be to the suggestion which I venture to put forward, namely, that no member of the Corporation shall be a member of the General Committee and of more than one Sub-Committee? I think these are limitations which would not in the smallest degree interfere with the satisfactory transaction of business in the Corporation, and at the same time guard against the possibility of any abuse which my hon'ble friend Babu Boikanta Nath Sen is so anxious to provide against and with which I am sure the Council will sympathise. I must say that the Hon'ble Member in charge of the Bill takes an extreme view, and I hope he will modify the opinion he has formed."

The Hon'ble Babu Boikanta Nath Sen, in reply, said:—"I can see the difficulty that in some cases may arise owing to the exclusion of members of the General Committee from the Sub-Committees. At the same time I still venture to think that there is a possibility of the abuse of the discretion left to the General Committee. My hon'ble friend Babu Surendranath Banerjee's suggestion was that a maximum number might be provided. If it had been accepted by the Hon'ble Member in charge of the Bill, perhaps it would have satisfied me also, but his opposition to that accentuates the necessity of a safeguard. Having regard to the tendency of the present legislation and the propensities of the administration, I believe I am justified in asking for a safeguard. It is, Sir, a safeguard that I ask for and nothing else. Where is the guarantee that the General Committe will not hereafter exclude all the other members and will not appropriate all the privileges? I seek for a safeguard in order that there may not be a monopoly of privileges derived from the work in the Municipality. Let there be a diffusion and a distribution with proper safeguards. As has been observed by the Hon'ble Mr. Buckley, one member from the General Committee might preside over the deliberations of the Sub-Committee. Perhaps that would be a good thing. I repeat that what I seek is that there should be a safeguard."

The motion was then put and lost.

The Hon'ble MR. APCAR, by leave of the Council, withdrew the motions standing in his name, that—

(1) in section 88, sub-sections (*4*) and (*5*) [*now* section 85, sub-sections (*7*) and (*8*)], for the words "General Committee" the word "Corporation" be substituted;

(2) in section 88, sub-section (*5*) [*now* section 95, sub-section (*8*)], the words "and of any rules made under sub-section (*3b*)" [*now* sub-section (*6*)] be omitted.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the proviso to sub-section (*5a*) of section 88 [*now* sub-section (*9*) of section 95] be omitted.

He said:—"Sub-section (*5a*) of section 88 [*now* sub-section (*9*) of section 95] is as follows:—

'Every Sub-Committee shall chose one of their number to preside at their meetings:

'Provided that the Chairman shall be President of any Sub-Committee of which he is a member.'

"I wish to remind Hon'ble Members of the history of this particular proviso. At one of the meetings of the Select Committee we came to the conclusion that the Sub-Committees should have the power of electing their own President, no matter whether the Chairman was present or not. I think, Sir, we arrived at this conclusion, and subsequently we modified it, and the modification finds a place in the Bill. I am in favour of the original amendment of the Select Committee, namely, that Sub-Committees ought to be permitted to elect their own President, and the Chairman ought not *ex officio* to be the President of a Sub-Committee if he happens to be present or be a member of the Sub-Committee. There is no reason why he should necessarily be the President. If he is present, he is able to give all the information which the Sub-Committee might stand in need of; and, although he might not occupy the Presidential chair, he would be in a position to guide, lead and direct the proceedings of the Sub-Committee. I think, Sir, the Sub-Committees might, without the slightest detriment to the prestige of the authority of the Chairman, be permitted to elect their own President. I do not see why any modification of the original decision of the Select Committee should be made. I hope, therefore, that this amendment might be accepted."

The Hon'ble MR. BAKER said:—"This is a case in which second thoughts are best. I would only say that it seems to me absolutely inconsistent with the position of the Chairman that he should be a member of a Sub-Committee with somebody else in the chair. And I would add that there is hardly any part in this Bill about which Mr. Bright takes a stronger view."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"Am I to understand that we are to be determined in the course of legislation that we follow here by the strong opinions of Mr. Bright or the Municipal executive? No doubt those strong opinions are factors for consideration, but I venture to submit that they are not determining factors in the course of legislation that we should adopt here. We are not to be guided in the discharge of our duties except by our own consciences and what we arrive at after mature consideration. It is perfectly legitimate for Mr. Bright to object to a thing of this kind. Being Chairman, he certainly would like to be Chairman of the General Committee and of Sub-Committees. He would not of course consent to any change the effect of which would be to place him in an inferior position than that of Chairman even of meetings of Sub-Committees."

The Hon'ble THE PRESIDENT said:—"The Hon'ble Member in charge of the Bill mentioned Mr. Bright's name in support of his own particular view, but the Council will give due weight to the remarks of the Hon'ble Mover of the amendment."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"Mr. Bright's opinion no doubt is a factor to be taken into account, but it is not to be the determining factor, as apparently it is with my hon'ble friend in charge of the Bill. I may mention just one Committee, and I think the facts connected with that Committee will convince the Council how Committees and Sub-Committees do admirable work when they are left to themselves and not in any way controlled by the Municipal executive. I would refer to the Bill Committee."

The Hon'ble MR. BAKER said:—"The Chairman was not a member of that Committee. It is only in cases of those Committees of which he is a member that he is to be Chairman."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I wanted to show that members of the Corporation and members of Committees are able to get on without the guidance of the Chairman, and I wanted to show this by reference to the Bill Committee. Here was the Bill Committee charged with most important work, namely, the consideration of the Calcutta Municipal Bill. All the meetings of the Bill Committee, with one exception, were presided over by Babu Kally Nath Mitter. I attended every meeting, and I venture to assert that I do not remember any Committee of the Corporation which has done such admirable work in connection with a difficult question as this Bill Committee has done, unfettered, uncontrolled and without the guidance of the executive. Therefore, it seems to me that the members of the Corporation are able to take care of themselves, and do the work of Committees and Sub-Committees. Therefore, when a Sub-Committee is appointed, there is no reason why the Sub-Committee should not elect its own Chairman. My friend the Hon'ble Mr. Apcar reminds me of another Committee, namely, the Suburban Road Committee."

The Hon'ble MR. BAKER said:—"I rise to order. The Hon'ble Member is now replying to what I said just now, and he seems to me to be travelling outside the recognized limits of a reply."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I am illustrating a point, in regard to which Your Honour has permitted me to bring forward one illustration. If I was in order in bringing forward one illustration, surely I am in order in bringing forward another."

The Hon'ble THE PRESIDENT said:—"The Hon'ble Member in charge of the Bill will have a right of reply."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"Here was another Committee, also a non-official Committee, charged with most difficult work connected with the Suburban roads, and I understand the work done by that Committee, without the guidance of the Chairman, was most satisfactory, and its recommendations are now being carried out. Therefore, my contention is this: that the members of the Corporation, of the General Committees and of Sub-Committees are able to look after themselves. If the Chairman is there, let him appear as an ordinary member. If the Sub-Committee propose to elect him as President, by all means let them do so. I do not want to interfere with their discretion, but do not make it obligatory upon them to elect him as President."

The Hon'ble MR. BAKER said:—"The Hon'ble Babu Surendranath Banerjee has quoted one or two instances quite correctly to show that a Committee of the Corporation is capable of doing good work even though they are not under the guidance of the Chairman. But I think he will not find a single instance in which the Chairman has been a member of a Committee and has not been in the chair. In all the instances which he has cited the Chairman has not been a member of the Committee at all. That is exactly what the Bill provides for. Section 88, sub-section (3) [*now* section 95, sub-section (4)], provides that—

'Every Sub-Committee shall consist of not less than three or more than six Commissioners, and the General Committee may at any time direct that the Chairman shall also be a member of any Sub-Committee.'

"The Chairman need not be a member of any Sub-Committee. There is nothing to make him a member of any Sub-Committee unless the General Committee so directs. So that it will still be possible under this Bill, just as it has been in the past, to appoint Committees of which the Chairman is not a member. All that the section we are now discussing provides for is that, if the Chairman is a member of any Sub-Committee, he is to be in his proper place, that is, in the chair."

The motion being put, the Council divided as follows:—

Ayes 6.

The Hon'ble Raja Ranajit Sinha, Bahadur, of Nashipur.
The Hon'ble Babu Jatra Mohan Sen.
The Hon'ble Babu Boikanta Nath Sen.
The Hon'ble Babu Surendranath Banerjee.
The Hon'ble Mr. Apcar.
The Hon'ble Dr. Asutosh Mukhopadhyaya.

Noes 12.

The Hon'ble Mr. Buckley.
The Hon'ble Mr. Buckland.
The Hon'ble Mr. Handley.
The Hon'ble Rai Durga Gati Banerjee, Bahadur
The Hon'ble Mr. Mackenzie.
The Hon'ble Mr. Spink.
The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
The Hon'ble Khan Bahadur Maulvi Delawar Hossain Ahmed.
The Hon'ble Mr. Oldham.
The Hon'ble Mr. Baker.
The Hon'ble Mr. Bolton.
The Hon'ble Mr. Slack.

So the amendment was lost.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that the following amendments be made in section 88 (*now* 95), namely:—

(1) that the following sub-section be inserted after sub-section (*1*):—

"(*1a*) In every case in which an appeal lies to the General Committee from any proceedings of the Chairman, such appeal shall be heard and decided by a Sub-Committee constituted under sub-section (*1*)."

(2) that the following words be added at the end of sub-section (*3*) [*now* (*4*)]:—

"other than a Sub-Committee referred to in sub-section (*1a*)."

He said:—"Sub-section (*3*) [*now* (*4*)] as amended will read:—

"(*3*) Every Sub Committee shall consist of not less than three or more than six Commissioners, and the General Committee may at any time direct that the Chairman shall also be a member of any Sub-Committee other than a Sub-Committee referred to in sub-section (*1a*)."

"It is not necessary for me to explain this amendment at any very great length. It will be in the recollection of the Council that when we were discussing section 8 (*now* 9), the Hon'ble Babu Surendranath Banerjee moved that the Chairman should not be *ex officio* President of the General Committee, and two reasons were assigned in support of this amendment: first, that the Chairman as the head of the executive ought not to be the head of the General Committee; and, secondly, that, as appeals from his decision lie to the General Committee, he ought not to be President of that Committee. I suggested that, so far as this second ground went, it could be met by providing that appeals should be heard by the General Committee, such power of hearing appeals being delegated to a Sub-Committee of which the Chairman should not be a member. The Hon'ble Member in charge of the Bill assured me that that was the intention of the Government. I wish it to be distinctly understood that these amendments are not put before the Council from any want of confidence in the assurance given by the Hon'ble Member in charge of the Bill; but it may well happen that years after when the Hon'ble Member is no longer in charge of the Municipal Department of the Government, and the proceedings of this Council have been consigned to oblivion, some enthusiastic admirer of the Chairman may suggest that he should be a member of the

Appeals Committee, and the General Committee may accept the proposition in entire ignorance of the history of the reason why his name was excluded. To guard against any such contingency, I have thought it proper to move this amendment, and I trust it will be accepted."

The Hon'ble Mr. Baker said:—" I accept this amendment."

The motion was put and ageed to.

The Hon'ble Mr. Baker moved that the following proviso be added to section 88, sub-section *(11)* [*now* section 95, sub-section *(12)*], namely:—

"Provided that, if the Chairman concurs in any action recommended by a majority of the members of any Sub-Committee, whether or not he is a member of such Sub-Committee, and considers that inconvenience would result from delay in taking such action, he may take such action without waiting for confirmation by the General Committee of the proceedings of the Sub-Committee; but, if the General Committee do not confirm the proceedings of the Sub-Committee, such steps shall be taken to carry out any orders passed by the General Committee as may still be practicable."

He said:—" The provisions of this amendment correspond with those of sections 64 and 66 of the present Act. They empower the Chairman, when he is in accord with the majority of any Sub-Committee and when he thinks that inconvenience would be occasioned by delay, to take action at once in accordance with the opinion of the majority, without waiting for confirmation by the General Committee. As I say, these powers have been exercised by the Chairman under the existing law for the last ten years, and they have worked well, and I have never heard of their being objected to. It was only by an oversight that similar powers were not inserted in the Bill in the first instance, and we propose now to supply that omission"

The Hon'ble Mr. Apcar said:—" We are now gradually coming back to the present Act. The object of this Bill was that the powers of the several municipal authorities should be defined. We are now getting gradually to undefine them. These amendments really are precisely those objections in the present Act which we have heard of before, in consequence of which we were told that the duties of the Chairman were in a fluid state. As I have read the Bill, and the grounds upon which the Bill has been brought in, and the objects of it, this power was deliberately excluded from it. Now we have it, suddenly, that this power is to be given to the Chairman, whether he is present at the discussion or not, whether he has been able to consider the questions in the light of the discussions that have taken place or not, if he happens to agree with one or two members of one of these Sub-Committees, he may at once take action. When there is this power given under the present Act, at all events we had the assurance that the questions would come before a comparatively large number of Commissioners. Now we may possibly have three members attending; we then should have by a majority of two a question of great moment decided, action taken, and then when action has begun to be taken or has been completed, we know what the result will be when it is placed before the General Committee. The General Committee will consider that they are precluded from opening the question again, and they will endorse everything that may have been done. But, under the present law, we have 12 and 18 members who are members of the Committee. They meet together and consider the questions together. The Chairman is always present, and he hears the discussions and is able to consider the questions in the light of the discussions that have taken place; but under the proposed law, this omnipotent and omniscient individual is able simply to do as he thinks fit. We do not know even that there will be a report of the proceedings placed before him; but because he thinks one side is right he immediately can take action. We are told it is for the purpose of preventing any delay in the administration, but we know that matters of any important character can be taken up without delay if the Chairman chooses. We have to provide for all contingencies, and it may be that, when he thinks that there is some question in which the General Committee will not accede to his desire, he will take action, and then the whole question would be practically decided. I think, Sir, that this is a provision which ought

not to find a place in the law. The General Committee meet once a week. These powers have been given in the present Act because the meetings of the Corporation take place onc e a month under the law. Latterly there have been more meetings than just the monthly meeting, but a very short time back there was just that one meeting in a month, and in such circumstances it was very desirable that the Chairman should have authority to take action promptly; but now these circumstances are altered, and the confirming authority will meet at least once a week; and in these circumstances, I think, to give power to the Chairman to act in such wide terms is really taking away the substance of self-government altogether."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I must also oppose the amendment. My hon'ble friend in charge of the Bill has proceeded upon the analogy of the present law. I do not think he is entitled to fall back upon the present law. The present law and the law that is to be are two different things altogether. The great drawback in the present law was alleged to be that the Executive was not sufficiently strong; that the Corporation had the power of interference to a very considerable extent which stood in the way of prompt and vigorous action on the part of the Executive. All that is now proposed to be changed; the Executive will be rendered strong, far stronger than they are at present, and I strongly object to the further strengthening of the Executive by these side issues. It is somewhat remarkable that the Hon'ble Member in charge of the Bill did not submit this and a similar section to the Select Committee. Am I to understand that these sections did not occur to my hon'ble friend? If these matters had been brought up in Select Committee, we should have had an opportunity of considering them, and, what is more, I think, when deliberate attempts of this kind are made to stengthen the Executive still further, the opinion of the Corporation and the local bodies ought to have been solicited. This is not a small matter. The section involves a constitutional principle of some moment. The Executive is already strong; you want to strengthen it still further by falling back upon a provision which exists in the present law; but, Sir, my hon'ble friend the Member in charge of the Bill is not to have even the consolation of deriving any support from the present law. The circumstances under which the Chairman can now act in anticipation of confirmation by the Corporation will not be the circumstances under which he will act under the present Bill. Sir, as has been pointed out, the General Committee consists of the *elite* of the Corporation. Will the Sub-Committees be similarly constituted? The Standing Committees consist of a considerable number of members. But the Sub-Committees will comprise very few members. Here the Chairman is to act in anticipation of confirmation by the General Committee if he is in agreement about any matter with the majority of the Sub-Committee. The Sub-Committee will consist of not less than three members and not more than six members. Suppose, Sir, we have a Sub-Committee of five members, and the Chairman is one of the five: three are in favour of a particular course of action, including the Chairman, two are opposed to that particular course of action; the Sub-Committee are thus equally divided; it is the casting vote of the Chairman that decides the matter. Suppose in a case of this kind the Chairman acts in anticipation of sanction by the General Committee. What does it come to? If you analyse the matter it comes to this: that the Chairman acts upon his own independent responsibility in which he has been supported by only two members of the Committee, and he is able to pledge the General Committee to any particular course of action. I think, Sir, that is dangerous and may lead to complications At the present moment a thing of this kind is impossible because of the numerical strength of the Committees. It seems to me, Sir, if you look at the matter from the point of view which I have ventured to suggest, it is not a safe thing to arm the Executive with powers of this nature. Having regard to the small numerical strength of your Sub-Committee it may sometimes happen that the Chairman may anticipate the decision of the General Committee in a matter in which practically there have been only two or three votes recorded on his side. I do not think that ought to be allowed, and looking at the question from this point of view, I hope and trust that the

Hon'ble Member in charge of the Bill will see his way not to press this amendment."

The Hon'ble Babu Boikanta Nath Sen said :—"I would only beg to add one remark in opposing this motion. The necessity for this provision consists in the anticipated inconvenience which would result from delay As the General Committee meet weekly, and oftener if necessary, they would be able to take action on a Resolution being passed."

The Hon'ble Babu Jatra Mohan Sen said:—"I wish to make one observation in connection with this matter in opposing this motion. If we refer to section 83 (*now* 90), sub-section (*4*), we find it provided that—

'The Chairman may at any time call a special meeting of the General Committee for the transaction of any business which, in his opinion, cannot be delayed until the next ordinary meeting of the Committee.'

"If the Chairman thinks that the matter is so urgent, it lies in his power to at once call a meeting of the General Committee. In the face of this section I do not think we ought to lend ourselves to anomalies which may arise in cases where the Chairman takes action in anticipation of the sanction of the General Committee which may not be given afterwards. When we have such a remedy in the hands of the Chairman himself, may not we as well omit this proviso?"

The Hon'ble Dr Asutosh Mukhopadhyaya said :—"I feel that I ought not to give a silent vote on this question. The proviso, although it looks very similar to the provisions of the old law, upon close examination seems to be completely different in essence. In the first place, under the old law the Committee was the Committee of the Corporation, which was a Committee not invested with vague general powers but a Committee appointed for the purpose of enquiring into, and reporting upon, specific questions. The Sub-Committee we have to deal with in the present instance is a Sub-Committee of the General Committee as distinguished from the Committee appointed by the Corporation. In the second place, this Sub-Committee may have delegated to it vague general powers, and the recommendation which the majority may make may relate to any question whatsoever. Then, again, my hon'ble friend Babu Surendranath Banerjee placed before the Council the case of a Sub-Committee of five, of which the Chairman was President. I would venture to take an even stronger case. There may be a Sub-Committee of three, the Chairman President, one member voting with the Chairman and the other dissentient, and it would be open to the Chairman to take action under the new section 88, sub-section (11) [*now* section 95, sub-section (12)]. Therefore, I venture to affirm, that no case has been made out for the insertion of this section; at any rate, I would venture to suggest that, if this section is to be inserted, for the words 'by a majority of the members of any Sub-Committee' ought to be substituted 'unanimously by a Sub-Committee;' that is to say, if the Chairman concurred in any action recommended unanimously by a Sub-Committee, and if there was urgency, we might take it that the decision of such Sub-Committee would be little liable to be set aside by the General Committee; but to make it possible for the Chairman to take action, in anticipation, upon a recommendation made by a bare majority of a Sub-Committee is, I think, really objectionable."

The Hon'ble Mr. Baker, in reply, said:—"I think, Sir, the objections that have been raised to this exceedingly necessary and harmless proposal—for I can assure the Hon'ble Members that it is so—are based on some misapprehension. They entirely overlook the fact that the Chairman is only to take action in anticipation of the confirmation by the General Committee when he thinks that inconvenience would result from delay. Now, Sir, as the Hon'ble Babu Boikanta Nath Sen pointed out, the General Committee meets once a week; therefore, it can only be in cases where the urgency is so great that it would be impossible to wait for a week that any action will be taken under this section at all. That being so, the only occasion on which it will be necessary to exercise these powers is when the ugency is so great that he cannot wait for a week. All

these prognostications of evil, and all that has been said about the Chairman acting on the opinion and with the concurrence of one single member, appear to be fanciful. I do not regard the smallness of the numbers of the Sub-Committees as in any way a mark of weakness. We know very well that it has been constantly said that the excessive numbers of the present Standing Committees are a source of weakness rather than of strength. The whole object of this provision is to prevent inconvenience to the public. These very provisions have been in force for ten years, and I have never heard one word of complaint made about them. They will be used in the future with the same discretion and the same good sense on the part of the Chairman as in the past, and I hope the Council will accept them."

The motion was then put and agreed to.

SECTION 96.

The Hon'ble BABU SURENDRANATH BANERJEE moved that all the words of sub-section (*1*) of section 89A (*now* 96) beginning with the words "(to be specified in such resolution)" in line 4 to the end of the sub-section, be omitted, and that in their place the following be substituted:—

"relating to the purposes of this Act, as the Corporation may think fit."

He said:—"I will best consult the convenience of the Council if I read the section as amended by me. The section will run thus:—

'The Corporation may from time to time, by specific resolution, appoint a Special Committee to enquire into and report upon any matter relating to the purposes of the Act as the Corporation may think fit.'

"The provision in the Bill is to this effect:—

'The Corporation may from time to time, by specific resolution, appoint a Special Committee to inquire into, and report upon, any matter (to be specified in such resolution) which is reserved by this Act for the decision of the Corporation, and which is not at the time being under consideration by a Sub-Committee constituted under section 88 (*now* 95).'

"In this matter I follow section 38 of the Bombay Act, which gives the Corporation the right of appointing Committees to enquire into and report upon, any matter connected with the municipal administration of Bombay. Section 38 of the Bombay Act is as follows:—

'The Corporation may, from time to time, appoint out of their own body such and so many Committees, consisting of such number of persons, and may refer to such Committees, for enquiry and report or for opinion, such special subjects relating to the purposes of this Act, as they shall think fit.'

"The object is merely enquiry and report, and I do think the Corporation ought to have the power of enquiry and report in regard to all matters connected with the municipal administration of Calcutta. There might have been some danger of friction formerly when two-thirds of the representatives were elected by the people and one-third consisted of nominated members; but those elements of friction have apparently been removed in the present Bill under the orders of the Government of India. Therefore, there is not the smallest possibility of anything like friction occurring between the Corporation, the General Committee and the various Committees. The ends of harmonious and smooth administration having been ensured by the orders of the Government of India, it seems to me that there ought to be no objection to the enactment of the provision which I have the honour to suggest for your acceptance. We follow the lines of the Bombay Act in this matter. The section of the Bombay Act has not been attended with any inconvenience. If it were attended with any inconvenience, I have not the slightest doubt it would have been amended; and, therefore, having regard to the fact that the Corporation is differently constituted now, from what it was when the Select Committee reported in April, and that we have such a provision in the Bombay Act, it seems to me that the Corporation should have the power which I propose to confer on it."

The Hon'ble MR. BAKER said:—"The Hon'ble Mr. Apcar has a motion to the same effect—No. 54. It would be convenient to take them together."

The Hon'ble Mr Apcar moved (amendment No. 54) that in section 89A (*now* 96), sub-section (1), for the words from "which is reserved by this Act" to the end of the sub-section, the words "relating to the purposes of this Act" be substituted.

He said:—"My amendment is practically to the same effect, but it does not go so far as that of my hon'ble friend Babu Surendranath Banerjee. I merely ask that the words 'which is reserved by this Act' to the end of the sub-section be eliminated, and the words 'relating to the purposes of this Act' be substituted. My hon'ble friend goes a little further, and requires that the Corporation may, from time to time, by specific resolution, appoint a Special Committee to enquire into, and report upon, any matter relating to the purposes of this Act as the Corporation may think fit. My hon'ble friend has said that, if in Bombay this had been found to work disadvantageously, it would have been modified; but, as a matter of fact, this has been introduced in the last Act of Bombay. The previous Act, which was amended by the Act of 1888, did not include this provision, and it was because they felt the want of it that they introduced it in the Act that is now in force. And it has been found to be a very useful power. I ask this to be considered: that it cannot be suggested that there can be any harm done in the administration at all, no obstruction whatsoever, because there cannot be any action taken as the result of any Committee of this character; and we know that in Bombay nearly all the great works have been introduced in consequence of the consideration by such Special Committees as are here referred to. As the Bill at present stands, it permits only of Committees being formed with relation to those few questions which are reserved for the consideration of the Corporation. All that I seek is that an opportunity be at least given to them, if they think necessary, of a discussion with regard to other works, and, as a matter of fact, we know from practice it has resulted in good in Bombay. There is no such restriction in the Bombay Act as is contained in the Bill; and, so far as this particular section is concerned, the concession that has been made is of little practical value. So that, in all circumstances, I would ask that there should be a greater power given for discussion by Committees by the Corporation. It would not be in General Meetings where long discussions take place, and where, it might be suggested perhaps, there would be time wasted. Whatever work would be required to be done would be done in Committees to which any specific questions could be referred. I will give one instance of an important work being brought about by reason of a Committee, such as is contemplated here, if the power that I seek now to introduce in this section is given. The Tansa Water-works were, I am informed, due to action taken of this character, and when we find it is a matter which, if introduced, will not in any way interfere with the administration, and will be entirely for the good of the public, I cannot conceive why there should be any objection raised."

The Hon'ble Mr. Baker said:—"In order that the real bearings of this amendment may be made clear, I will ask the Council to go back a little and to consider what the structure of the new constitution of Calcutta is, and the bearing of the amendment upon it. The central idea of the scheme is to appoint three co-ordinate municipal authorities—the Chairman, the General Committee and the Corporation; and to divide up between them the manifold powers, functions and duties which are enumerated in the Bill. Each of these three authorities is to be independent within its own sphere, and neither of them is to interfere with the others except where it is so expressly provided.

"The functions of these respective authorities are as follows. To the Chairman is assigned the executive duty of carrying the law into effect; to the General Committee is assigned the management of those details which involve the exercise of discretionary power, and which are too important to be left to the Chairman alone; lastly, to the Corporation are assigned the power of the purse, the power of legislation, and the power to settle and shape broad questions of policy and large schemes of improvement. That, Sir, is the ruling idea of the Bill.

"Now, let us consider how it bears on the subject-matter of these two amendments. As regards the General Committee, we know that the duties which devolve upon them are exceedingly numerous and exceedingly intricate, and for that reason we have given them power to appoint Sub-Committees from their own number and otherwise, and to delegate to them a large part of their duties. That power is absolutely essential, and, as I have said, it is necessary that it should be freely exercised. Without this power, the General Committee will be absolutely swamped with work. But when we come to look at the Corporation, the position is different. The duties of the Corporation which I have just described are such as can be performed by a large deliberative body. They are not executive; they are not appellate or judicial; and they contain little or nothing in the way of administrative detail. Therefore, it seems to me, Sir, that there is little or no necessity for the Corporation to appoint subsidiary Committees or to depute or delegate to Committees any part of its own duties. and I think it would be almost inconsistent with the scheme of the Bill that they should do so. But there are one or two functions of the Corporation to which that description does not fully apply. In the course of the Select Committee we provided, among other things, that the control of markets should be withdrawn from the General Committee and made over to the Corporation. That was done rather against my will, but, any way, it was carried. Then the Corporation has to consider the budget, and it is possible that they might find it convenient to consider the budget in the first instance, not in their whole body, but by means of a Special Committee. Similarly, they may also find it convenient to exercise their control over markets in the same way. I think the case of loans also is another instance of the same kind.

"To provide for cases of this kind we, in the Select Committee, inserted this section, 89A (*now* 96), which gives the Corporation power to appoint Special Committees to consider and report on any matter which is reserved by law for the decision of the Corporation, and, if necessary, to delegate their own powers to such Special Committees.

"I submit that this gives ample power to the Corporation to deal with all those functions of theirs which are not such as can be most conveniently and appropriately dealt with by the Corporation as a whole. The hon'ble movers of the amendments wish to go much further than this. They wish to empower the Corporation to appoint Committees on any and every subject, whether the subjects are in any way under the control of the Corporation or not. The obvious effect of that would be to give the Corporation power to interfere in every branch and detail of the municipal administration. The section already gives the Corporation full power to deal, by means of subsidiary Committees, with all matters which are subject to their control. It is neither necessary, nor right, nor wise to extend that power to matters which are not subject to their control.

"It is true, as the Hon'ble Mr. Apcar said, that they did not claim the power to pass any orders on the reports of their Special Committees; but we all know what that means. You appoint your Committee; it makes its enquiry and submits its report. The report comes before the Corporation, and is discussed at great length, and strong opinions are expressed and probably a vote taken. In everything except name, that is tantamount to a direct order to the executive or to some other co-ordinate authority to take certain action; and at all events, even if you do not regard it as an order, it implies criticism, and criticism of matters which, *ex hypothesi*, are outside the province of the Corporation. I think, Sir, if we allow this amendment to be carried, we shall destroy at a stroke the whole separation and division of functions which it is the main object of the Bill to establish."

The Hon'ble Raja Ranajit Sinha, Bahadur, of Nashipur, said:—"I cannot understand what was the intention of the framer of the Bill in inserting this clause 'which is not at the time being under consideration by a Sub-Committee constituted under section 88' when the matter is reserved for decision under the Act by the Corporation. Cannot it be considered by a Sub-Committee appointed by the General Committee?"

The Hon'ble Mr. Baker said:—"Yes, it can. Many matters are first dealt with by the General Committee and go finally to the Corporation for decision."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"The gist of my hon'ble friend's reply is summed up in the concluding sentence of his observations. That sentence I will quote:—

'If we accept the amendment we shall destroy at a stroke the whole organization of the Bill and the system of co-ordinate authorities.'

"I venture to join issue with my hon'ble friend as regards this view of the matter. I think, Sir, we are indebted for the system of co-ordinate authorities to the Bombay Municipal Act. Ours is a derived system. We have borrowed what light we possess on the subject from Bombay. They have got the system of co-ordinate authorities there, and, despite such a system in Bombay, they have got the section which I have just read out—a section which empowers the Corporation to appoint Committees to enquire into and report on all matters relating to the municipal administration of the city. A section such as this does not in the smallest degree jeopardize or impair the system of co-ordinate authorities in Bombay. We have got, then, in Bombay the law which I invite this Council to apply to Calcutta. We have got this law in Bombay, we have got the system of co-ordinate authorities standing side by side with this law and flourishing side by side. This law does not militate against the principle of co-ordinate authorities in Bombay. Why should it militate against the principle of co-ordinate authorities in Calcutta? Nay, more, I go a step further, and I will say this—that it is this principle which has been the saving principle of the Bombay municipal system. It is this principle which has given to the Bombay Corporation the power of criticism, the power of enquiry extending over the entire domain of municipal administration, with the result that the Executive is subject partly at least to that responsibility to which it is essential the Executive should be subject, in order that it might be successful in its work. If the Bombay system has been successful, it is because the Executive is made partly responsible to the Corporation by the section which I invite the Council to accept. If you do not embody the provision which I recommend in the law, you relieve the Executive altogether of that sense of responsibility to which under the operation of this section the Executive would be subject, in relation to the Corporation. Therefore, I think it is most important for the very success of the experiment which you are about to try that we should have a section like this which would enable the Corporation not to interfere, because, as far as active interference is concerned, my amendment does not in any way contemplate it, but will confer on it the right to criticise, the right to enquire into and report. It will enable the Corporation to educate public opinion and bring to bear the wholesome moral pressure of a healthy public opinion upon the action of the Executive. What can the public know as to the business of the Municipal Executive? What can the newspapers possibly know about the doings of the Executive? If a Committee were appointed, that Committee would report; if that report was considered by the Corporation, and if the Corporation recorded a resolution with regard to it, the public would be furnished with information, upon the basis of which they could form their opinions upon the action of the Executive. Therefore, Sir, this section enables the Bombay Government and the Bombay public to exercise the salutary influence of that healthy public opinion without which no Executive, be it the highest in the land, can satisfactorily discharge its responsible duties. I speak with some feeling about this matter, because I am anxious for the success of the experiment which you are about to try. I do not want that the Corporation should in any way impair the efficiency or vigour of executive action; but I do want that the Corporation should exercise a healthy moral influence over the Executive. I do want that the public should be able to exercise the influence of a healthy opinion upon the Executive; and, unless you arm the Corporation with the power of enquiry, the power of investigation and report, you deprive the public of those resources which would enable them to form a healthy and sound opinion. I think these are considerations which ought to weigh with the Council. Not the smallest desire have we to interfere with the Executive. We do not want that the Corporation should ask them to do this or that or interfere with them in any way. The everyday work of the Executive will go on as usual, but the Corporation will be able, by the enquiries which they will set on foot, to elicit important facts in regard to which they

may record resolutions, and this will help the public and the Government to form a sound opinion with regard to the proceedings of the Executive. I cannot understand why the Hon'ble Member in charge of the Bill should stand in the way of a useful provision like this. It does not weaken the Executive; it does not weaken the Committees; it does not weaken the Corporation. The work of the Corporation will go on as usual, but the Executive will be brought under that sense of responsibility, that deference to public opinion, which in these civilised times and in civilised countries constitutes the greatest safeguard of sound, efficient and righteous administration."

The Hon'ble MR. APCAR, in reply, said:—"It has been suggested that I disavow any intention of interference with the Executive. I go much further than that. I distinctly desire to show that there is absolutely no interference with the Executive, and it is not with the idea in any way of interfering with the administration at all that I seek for the powers which would be given under the amendment that I propose. It seems to me that the Hon'ble Member in charge of the Bill does not want any help or advice from the Corporation, and he goes so far as to resent any criticism by the Corporation. Well, if this is the scheme of administration, I am afraid it is doomed to failure. Are the Corporation not to be allowed, in any way or shape, to criticise what has been done? Everything is to be done in the dark without any opportunity whatsover of expressing their views with regard to any matter at all, whether they have the power to interfere or not. Here we have got a proposal that I now am seeking to introduce into this Bill, which has been introduced into the law in Bombay after experience had taught them that it was required, and we know from the working of the Corporation in Bombay that it has been of the greatest use and practical benefit, by reason of the many suggestions that have been the outcome of the enquiries: nevertheless, there is the most uncompromising opposition offered by the Hon'ble Member in charge. I have given an illustration of the great Tansa Water-works in Bombay which were the result of the deliberations of a Committee appointed under similar powers as those which I seek to give to the Corporation."

The Hon'ble MR. BAKER said:—"A large scheme of water-works is one of the matters reserved by law for decision by the Corporation."

The Hon'ble MR. APCAR said:—"That would be with reference to expenditure that has to be incurred: but whether it would be advisable in any way to introduce these water-works (and there may be many other kinds of work), would be, I take it, for the consideration of a Committee such as I refer to. We are told the General Committee will be swamped with work; they want to have an opportunity of calmly considering the questions which the Corporation desires to dispose of, and here we have an utterly harmless, inoffensive power, the proposal of which is resented, although it may be, as I have shown by illustration, of benefit to the public. I am sorry to find that the Bill is to be pushed forward on such lines as these."

The Hon'ble BABU SURENDRANATH BANERJEE'S motion being put, the the Council divided as follows:—

Ayes 6.	*Noes 12.*
The Hon'ble Raja Ranajit Sinha, Bahadur, of Nashipur.	The Hon'ble Mr. Buckley.
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Handley.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Mr. Apcar.	The Hon'ble Mr. Mackenzie.
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Mr. Spink.
	The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
	The Hon'ble Mr. Oldham.
	The Hon'ble Mr Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

So the amendment was lost.

The Hon'ble Babu Surendranath Banerjee's last amendment having been lost, the Hon'ble MR. APCAR, by leave of the Council, withdrew his motion for the amendment of section 89A (*now* 96).

He said:—"I will abide by the result of the Hon'ble Babu Surendranath Banerjee's motion, and I will not trouble the Hon'ble the President to put my amendment to the Council."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 89A (*now* 96), sub-section (1), line 3, after the word "Committee" be added the words "consisting of not less than five and not more than nine Commissioners."

He said:—"I think this amendment has the merit of being harmless and at the same time very useful. In the first place, I desire to remind the Council what has been said in other places by people who are better acquainted with the working of the Calcutta Municipality than I am, that the chief source of weakness of the Committees appointed by the Corporation lies in what might be supposed to be their source of strength, namely, their unwieldy size. In the next place, I desire to point out that in section 88, sub-section (*3*) [*now* section 95, sub-section (*4*)], we have provided that every Sub-Committee appointed by the General Committee shall consist of not less than three and not more than six Commissioners, and, unless a similar provision is introduced into this section, it might so happen that when the Corporation would proceed to appoint a Special Committee to enquire into and report upon any particular matter, a gentleman might get up, as it often happens at meetings, and propose X, and X would propose Y, and so on, till in the course of five minutes it would be found that the Committee was so large that it was practically useless. This, at any rate, is my experience of what happens in a place other than the Corporation. Then I desire to point out further that a Special Committee appointed by the Corporation cannot be of a miscellaneous character. If you will read paragraph 20 of the despatch of the Government of India, you will find the following statement:—

"I am also to suggest that it might be desirable to lay down rules for the appointment of the Special Committees and Sub-Committees which would secure their being truly representative, in respect of their constituent elements, of the Corporation or General Committee appointing them. The provisions regarding the making of rules and bye-laws for the conduct of the business of Special Committees and Sub-Committees under sections 89A and 590 (*now* 96 and 559), in connection with sections 595 and 597 (*now* 566 and 569), might be extended to include their constitution in general agreement with the principles already laid down. It might not be necessary or feasible for all such Special Committees and Sub-Committees to be homogenous in constitution with the body appointing them; but it is clear that in some cases at least such homogeneity alone would secure efficiency and obviate friction."

"This makes it manifest that these Special Committees cannot consist of anybody and everybody. There must be a representation of the different elements of the Corporation, and I think it is very desirable that there should be some limit, and the limit which I propose is that the minimum should be 5 and the maximum 9. If the opinion of the gentlemen who are better acquainted with the ways of the Calcutta Corporation is in favour of altering these numbers, I am quite ready to fall in with their view; but my point is that some minimum and some maximum should be fixed."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I may say on behalf of the Select Committee—and I think the Hon'ble Member in charge of the Bill will support me—that we deliberately left the number open to be decided by the Corporation. Of course too large a number would not be desirable, but at the same time, having regard to one of the objects of the Bill, which is to enable a large number of Commissioners to take part in the working of the Corporation, it would not be desirable to fix any maximum, and that I believe was the reason why we left the number open. A statement was made by the hon'ble mover of the amendment as to his experience with regard to what occurs at meetings of the body with which he is connected, namely, that some one would propose X, and X would propose Y, and so on, until the number is inconveniently raised. That is not the practice of the Corporation at all. The practice of the Corporation is first to fix the number of the Committee and

having done so to submit the names. There was a reason why the number of the General Committee and the number of the Sub-Committees have been fixed: there is a payment of fees made to members of the General Committee and of Sub-Committees of the General Committee; but no member of a Committee of the Corporation attending a meeting of the Committee gets a fee. Therefore, there was no object in fixing the number. I have not a very strong feeling about the matter; but it strikes me that having regard to the object which we have in view, viz., that a large number of Commissioners should take part in the work of the Corporation—it would be as well to leave the matter of number to be determined by the Corporation in each individual case. I know there have been cases where there have been Committees of the whole Corporation, but I think the Corporation has found out its mistake, and the steady trend of opinion now is to make the Committees workable—not too large nor too small. It would be a pity to interfere with the discretion which the Corporation has in recent years exercised with satisfaction. That is my personal feeling about the matter. If the number is to be fixed, I think the maximum ought to be more than 9. You have fixed 12 as the maximum of the General Committee. I would fix 16 as the maximum of the other Committees; but I do not know what my friend the Hon'ble Mr. Apcar may have to say about this proposal."

The Hon'ble Mr. Apcar said:—"I had no idea of taking part in the discussion, but I am being dragged in by my hon'ble friend Babu Surendranath Banerjee. I have got no very strong views about this amendment. I think on the whole, however, it is a matter which might well be left to the Corporation. I agree with my friend that, although there was a mistake made for a little while, the Corporation came to their senses very quickly; and they have not abused the power that was given to them to appoint the number of any Committee, and it is perfectly true that we first fix the number and then we elect the members. So that there is not the same tendency of the Committee outgrowing limits as the Hon'ble Dr. Asutosh Mukhopadhyaya is apparently used to in the body that he ornaments; and, so far as this particular question is concerned, I think, if the Hon'ble Dr. Asutosh Mukhopadhyaya had been better acquainted with the actual practical working of the Corporation, he would have hesitated to bring forward this motion."

The Hon'ble Mr. Baker said:—"I purposely deferred speaking until after the two Hon'ble Members who represent the Corporation had expressed their views, because, Sir, it seems to me that, as these Committees are to be Committees of the Corporation, we should do well to pay attention to the views which their representatives express. At first I was disposed to think that the amendment was one which should be accepted, but after hearing the views expressed by the Hon'ble Babu Surendranath Banerjee and the Hon'ble Mr. Apcar, I propose to vote against it"

The motion was then put and lost.

Section 97.

The Hon'ble Mr. Apcar moved that in section 90 (*now* 97), sub-section (*1*), for the words "signed by the President after each meeting" the words "laid before the next ensuing meeting and signed at and by the President of such meeting" be substituted.

He said:—"I desire to make a very small change in this section which will in no way affect the working of the administration. It is intended simply to give power to see that the resolutions and proceedings have been properly recorded. Sub-section (*1*) of section 90 (*now* 97) runs thus:—

'Minutes of the proceedings of each meeting of the Corporation shall be drawn up and fairly entered in a book to be kept for that purpose, and shall be signed by the President after each meeting'

"I ask that the proceedings of each meeting be laid before the next ensuing meeting and signed at and by the President of each meeting."

The Hon'ble Mr. Baker said:—"This is a very small matter, and no doubt it is a perfectly reasonable and legitimate arrangement. But it may happen that the President of the ensuing meeting was not the President of the meeting the proceedings of which are to be confirmed; it is better therefore that the President of the original meeting should sign the minutes of that meeting at once. That is the existing practice. I have never heard it objected to, and I see no reason to alter it."

The Hon'ble Mr. Apcar, in reply, said:—"I have followed intentionally the wording of sub-section (*2*), as I thought that would be the most acceptable form. As for the possibility of the subsequent meeting being presided over by another President, that would not matter, and there would be no bar to his signing the proceedings of the previous meeting. The object of my motion is only to give an opportunity to see that the proceedings have been correctly recorded. The Hon'ble Member in charge of the Bill has not stated that there would be any inconvenience, and I think it is the more orderly course to pursue. The proceedings of the previous meeting are put to the members of the ensuing meeting, and the President asks whether they should be confirmed. That is the ordinary course at all business meetings."

The Hon'ble Mr. Mackenzie said:—"The Hon'ble Mr. Apcar is materially correct as to the procedure at business meetings; the minutes of proceedings are generally circulated, and, if found correct, the President of the next meeting, whoever he may be, signs them at that meeting."

The motion was then put and agreed to.

The Hon'ble Mr. Apcar also moved that in section 90 (*now* 97), sub-section (*2*), for the words "signed at and by the President of the next ensuing meeting" the words "laid before the next ensuing meeting and signed at and by the President of such meeting" be substituted.

He said:—"This amendment is of the same nature as the last. I only ask to bring sub-section (*2*) into conformity with sub-section (*1*), and all that is material to be changed is the inclusion of the words 'laid before.' But this change requires some further alteration in the wording, and therefore I ask that the words in my amendment be substituted."

The motion was put and agreed to.

The Hon'ble Babu Surendranath Banerjee moved that, after the word "minutes" in line 1 of sub-section (*1*) of section 90 (*now* 97), the following words be inserted:—

"of the names of the members present and."

He said:—"This is a small matter. In the case of meetings of the General Committee the names of the members present are to be entered, but in the proceedings of the Corporation the names of the members present are not to be given. I want to assimilate the two."

The motion was put and agreed to.

Section 99.

The Hon'ble Babu Surendranath Banerjee moved that, after the words "Local Government" in line 2 of section 92 (*now* 99), the following words be inserted:—"and to every member of the Corporation;" and that the same words be inserted after the words "Local Government" in lines 12 and 13 of the same section.

He said:—"It is the present practice for every member of the Corporation to get a full report of the proceedings of every meeting of the Corporation as well as of the General Committee and of all Special and Sub-Committees."

The Hon'ble Mr. Baker said:—"I object to this being made a statutory obligation. It is done at present, but it is not provided for by law anywhere. Under the second clause of section 92 (*now* 97), it is necessary to send not only a copy of the minutes of proceedings, but also a copy of all papers. What is now proposed must give rise to a great deal of expense in printing, stationery and postage. The minutes of proceedings are not in all cases read by the Commissioners who receive them. I object to making it a statutory obligation to send them to every member of the Corporation. I think it ought to be left to the Corporation and the General Committee to decide whether in any case the proceedings and other papers should be sent to members of the Corporation."

The Hon'ble Mr. Apcar said:—"With regard to the minutes of proceedings, I may say that the General Committee have adopted a system of delegation; they have delegated to one of their members the duty of seeing that they have been correctly recorded, and he reports to the meeting. I hope this amendment will be conceded, so that every member of the Corporation may be kept informed of what is being done by the General Committee. The Commissioners in general have hardly anything practical left for them to do, and it is not much of a privilege to enable them to see what the General Committee is doing. I do not desire that all the papers which might be considered by the General Committee should be sent to every member of the Corporation, but they should have some information given to them, and, with regard to the question of statutory obligation, this section requires copies of all papers to be sent to the Local Government, which, after all, is really a theatrical display, for the Local Government can require the submission of all papers without there being any statutory obligation. But I am quite willing to meet my hon'ble friend if his opposition to the amendment is for the purpose of excluding all the details regarding matters which are mentioned in the proceedings of the General Committee. At all events copies of such proceedings as may be sent to the Local Government should also be supplied to the members of the Corporation."

The Hon'ble Babu Surendranath Banerjee said:—"It is the business of the Legislature to give a permanent form to existing practice; what is custom should be stereotyped and transformed into law. The custom is to send copies of all these proceedings to every member of the Corporation; every scrap of paper is sent to every member; and, if it is and has been the practice for every member to receive these papers, there is no reason why that practice should not be stereotyped into law. I hope the Hon'ble Member in charge of the Bill will accept this amendment."

The Hon'ble Mr. Baker said:—"There is no objection to every member having a copy of all proceedings and papers being sent to him, but I object to making it a statutory obligation. Let it remain as it is."

The Hon'ble Babu Surendranath Banerjee said:—"I consider it very desirable having regard to the fact that the members of the Corporation will under the Bill know very little of what is done. If what I ask is done, the members will be kept fully informed of what is going on."

The Hon'ble Mr. Baker said:—"If it is desirable they can have them. All I say is, do not make it compulsory that they should have them."

The motion was then put and lost.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that in section 92 (*now* 99), line 7, for the words "together with" be substituted "and, if the Local Government so directs in any case, shall also forward."

He said:—"It seems to me to be absolutely unnecessary to send to the Local Government every single bit of paper which might be laid before the

General Committee, a Sub-Committee, a Special Committee or the Corporation. I think that the procedure laid down in section 526 of the Bombay Act will be found sufficient for all practical purposes. I propose to make it obligatory on the Chairman to forward copies of minutes of proceedings to the Local Government: if it appears to the Government that further enquiry is necessary in any particular case, they may apply for the papers, which would then be duly forwarded."

The motion was put and agreed to.

The Hon'ble BABU JATRA MOHAN SEN moved that in section 92 (*now* 99) the words "the minutes of the proceedings of such meeting were signed as prescribed in section 90 (*now* 97)" be substituted for "such meeting took place."

He said:—"Section 90 (*now* 97) prescribes the rules under which the proceedings of meetings of the General Committee, of Sub-Committees and of Special Committees are to be signed. In the case of Special Committees, the General Committee and Sub-Committees, they are to be signed at the subsequent meetings by the Chairmen of those meetings, and in the case of meetings of the Corporation they are to be signed by the President after such meeting, but it is not stated how long after such meeting. In section 92 (*now* 99) provision is made to send copies of minutes of all proceedings to the Local Government within ten days from the date on which the meeting took place, but it is not known whether such proceedings will be signed within ten days. It is not desirable that any minutes of proceedings should be sent to the Local Government until they are prepared in full and signed. I therefore propose that the proceedings should be sent within ten days after they are signed as prescribed by section 90 (*now* 97)."

The Hon'ble MR. BAKER said:—"This amendment follows necessarily on the acceptance of the amendment moved by the Hon'ble Mr. Apcar in section 90 (*now* 97), sub-section (*2*); therefore I accept it."

The motion was put and agreed to.

SECTION 100.

The Hon'ble BABU SURENDRANATH BANERJEE moved that section 93 (*now* 100) be omitted.

The Hon'ble BABU SURENDRANATH BANERJEE also moved that, if the last amendment be lost, for section 93 (*now* 100) the following clause be substituted for section 93 (*now* 100):—

"Every member of the General Committee shall be entitled to receive a fee of thirty rupees for each meeting of the said Committee at which a quorum is present and business is transacted and which he attends from the beginning to the end thereof:

"Provided that no more than one fee shall be paid to any member for his attendance at all such meetings in any week."

The Hon'ble BABU SURENDRANATH BANERJEE also moved that the following proviso be added to the above clause; or, if that clause be not carried, then to section 93 (*now* 100):—

"Provided that no fee shall be paid to a Hindu or a Muhammadan or an official member."

The Hon'ble MR. APCAR moved that section 93 (*now* 100) be omitted.

The Hon'ble MR. APCAR also moved that, if the last amendment be lost, the following amendments should be made in section 93 (*now* 100), namely:—

(1) the words "and every member of a sub-committee a fee of sixteen rupees," and the words "or sub-committee" be omitted;

(2) after the words "is transacted," the words "and which he attends from the beginning to the end thereof" be inserted;

(3) for proviso (*a*) substitute the words "no more than one fee shall be paid to any member for his attendance at all such meetings in any one week;"

(4) after clause (*b*) add the following:—

"(*c*) The fee shall be payable to a Commissioner appointed under section 7, sub-section (*1a*), clauses (*a*), (*b*) or (*c*) [*now* section 8, sub-section (2), clauses (*a*), (*b*) and (*c*)], and to no other.

(*d*) No fee shall be payable to any Commissioner who is in receipt of a salary from the Government."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that section 93 (*now* 100) be omitted.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA also moved that, if the last amendment be lost, the following amendments should be made in section 93 (*now* 100), namely:—

(1) at the end of the first paragraph, after the word "transacted" add the words "and which he attends from the beginning to the end thereof," and

(2) add the following as proviso (*c*):—

"Not more than four fees shall be paid to any member for his attendance at all meetings in any one month."

The Hon'ble BABU JATRA MOHAN SEN moved that section 93 (*now* 100) be omitted.

The Hon'ble RAJA RANAJIT SINHA, BAHADUR, OF NASHIPUR, moved that the words "and every member of a Sub-Committee a fee of sixteen rupees" and the words "or Sub-Committee" in section 93 (*now* 100) be omitted.

The Hon'ble BABU BOIKANTA NATH SEN moved that section 93 (*now* 100) be omitted.

The Hon'ble BABU BOIKANTA NATH SEN also moved that if the last amendment be lost, the following should be added to section 93 (now 100):—

"(*c*) not more than thirty fees shall be paid to any member for his attendance at all meetings in any one year."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"This is a very important part of the Bill, and it represents a striking departure from the provisions of the existing law. It is an innovation on our municipal system, and I may say it is a departure from the principles upon which the municipal system of the United Kingdom is based. The other day the Hon'ble Member in charge of the Bill remarked, with reference to certain observations that I had made, that he relied on the provisions of the English Public Health Act. I should like to ask him if, with regard to this matter, he will allow himself to be guided by the teachings of English experience? But possibly his answer will be that the situation is very different. I accept that statement. The situation is totally different along the entire line, but that does not prevent the Hon'ble Member from importing the provisions of the English law when it suits him. But, however that may be, the municipal system of the United Kingdom recognises no other incentive to the performance of municipal duties than public spirit and the desire to promote the public well-being. This Bill, however, proclaims to the world that Englishmen in India recognise other motives than those which prompt their countrymen in England—motives different from those prompted by public spirit and regard for the public welfare. I should like to ask the Hon'ble Member in charge of this Bill whether he is prepared

to stamp with the seal of legislative sanction a reflection of this kind upon the European community in this country. I am distinctly of opinion that the reflection is wholly unmerited. I will go further, and say that Europeans in this country require no other incentive than the stimulus of public spirit in the discharge of their public duties. In the past history of Calcutta, distinguished Englishmen have done admirable service for the good of the Corporation and the town. The names of such men as John Blessington Roberts, of James Wilson, of Mr. Brookes, of Mr. Wyman and others are cherished recollections in the minds of the people of this country. They did their duty without any remuneration save the approbation of their own consciences and the applause of their fellow-citizens. Are there no such men among Englishmen now in this country prepared to emulate their example? Why, Sir, there are facts within our knowledge which point to the presence of such men even in this Council. We have had forty meetings of the Select Committee on this Bill, and my hon'ble friend who so worthily represents the interests of the Trades Association (Mr. Spink) attended every one of those meetings. Mr. Turner, who represented the Chamber of Commerce, attended every meeting, with the exception of two, and those who are sitting here from day to day know with what devotion and zeal my hon'ble friends Mr. Mackenzie and Mr. Spink are assisting us in our work at considerable sacrifice of their own personal interests. Therefore, I am entitled to hold that there is enough of public spirit among the members of the European community in Calcutta to justify the hope that they will do their duty in the Corporation without the stimulus of fees. But after all, if it is deemed that the members of the European community do need the incentive of fees, I am prepared to say, on behalf of the Hindu and, I may add, of the Muhammadan community, that they require no such stimulus. For the last 23 years, Hindus and Muhammadans have worked in the Corporation and the General Committee with a zeal and earnestness for which they are entitled to the highest credit, and they never saught any fees at all. The Hon'ble Member in charge of the Bill will say—'It is impossible to introduce invidious distinctions in this Bill; if you pay fees to European non-official members, you must pay fees also to Hindus and Muhammadans.' To that my reply is that the whole Bill is a monument of invidious distinctions, and I will only refer to one matter. Members of the Corporation attending meetings of the General Committee and of Sub-Committees of the General Committee are entitled to the payment of fees, but members of the Corporation attending meetings of the Corporation and of Special Committees appointed by the Corporation are not entitled to any fees. You give fees to members attending meetings of one class; you refuse to give fees to members attending meetings of a different class. You make a distinction between Committees of the Corporation and Committees appointed by the General Committee. That is an anomaly, and, as I have more than once remarked, we are not concerned as legislators with the removal of anomalies; we are, however, far more interested in safeguarding the interests of the public purse. If Hindus and Muhammadans are willing and able to attend meetings of the General Committee and of Sub-Committees of the General Committee without the stimulus of fees, it seems to me that it is an absolute waste of money to pay fees to them. It is an expenditure of the public funds for which there is no justification, and I venture to say that the same remarks apply to the official members of the Corporation. They are paid for doing the general work of the country; municipal work is a part of the general work of the country, and therefore they need not be paid over again for municipal work. As a matter of fact, I can say that the official members of the Corporation have been most assiduous in their attendance at meetings of the General Committee and of the Corporation. The Hon'ble Mr. Oldham is a member of the General Committee, and so is the Hon'ble Rai Durga Gati Banerjee. I do not know of any member of the Corporation who has been more assiduous in his attendance than these two hon'ble gentlemen. Therefore, I submit that official members of the Corporation also do not require the stimulus of fees to ensure their attendance at meetings of the General Committee. It has been reported to me on authority that I consider sufficient that some time ago a discussion took place at a meeting of the Port Trust in which a strong protest was elicited from the official members against the payment of fees. Having regard to all

these considerations I am of opinion that fees ought not to be paid to the European members of the Corporation, for they have worked in the past with great zeal and devotion without the stimulus of fees. Both Hindus and Muhammadans and European official members have honourably worked in the past without the stimulus of fees; and fees therefore need not be paid to them. I desire in this connection to point out the positive danger which is likely to arise from the payment of fees. At the present moment the ablest members of the Corporation are elected as members of the General Committee; they do not canvass; they decline to canvass. My connection with the Corporation has lasted for 23 years, and I have been a member of the General Committee during the whole of those 23 years. When I was in England in 1897, I was during my absence elected a member of the General Committee, and during the 23 years in which I have been a member of the Corporation, I do not remember speaking to a single colleague of mine for his vote; and I believe that men like Babu Kally Nath Mitter, Mr. Apcar, Babu Nalin Bihari Sircar, Babu Narendra Nath Sen and others have never canvassed for their seats in the General Committee. Canvassing is a thing which is unknown to the more experienced Commissioners. But the moment you introduce the stimulus of fees, inferior men will appear in the arena and will canvass for votes, and you will open a door to practices which cannot fail to be demoralizing. We decline to support any measure which is likely to result in the admission of inferior men to the General Committee. The monopoly of power is a thing which is tolerable; the monopoly of pelf is a thing which is intolerable to our instincts. I am perfectly certain that, if the system of the payment of fees is introduced, you will not get the best men to appear year after year as candidates for election to the General Committee. They will feel a delicacy in the matter, and they will decline to stand as candidates for election; they will not like it to appear that they want to have a monopoly of the fees. Therefore, you will lose the services of the best men on the General Committee. This is not only my view of the matter; it is also the view of my colleagues on the General Committee. I will, with Your Honour's permission, read to the Council extracts from some of the remarks made in respect of this question:—

'Babu Bhupendro Nath Basu was convinced that the payment of fees would be fatal to the continuance of the best men on Committees: they would be deterred from serving.

'The Hon'ble Babu Narendra Nath Sen considered the payment of fees to elected Commissioners most objectionable.

'Babu Bhupendro Nath Basu was of the same opinion. He believed it would operate to prevent good men from standing for election.

'Mr. Simmons remarked that the feeling against fees was that those elected on Committees in one year would feel disposed to make way for others on the next occasion; but in Joint-Stock Companies the same men would be found sitting on the Board year after year, and they were elected from time to time, because the shareholders felt confidence in their management of the affairs of the Company.

'Babu Kally Nath Mitter pointed out that in this Corporation the feeling of the members of the General Committee who had been re-elected year after year was strongly opposed to the payment of fees.

'The Hon'ble Babu Narendra Nath Sen thought that on this side of India people were likely to attribute mercenary motives to those who accepted fees, although the fees could in no case exceed Rs. 128 a month to any individual. There was no comparison between fees paid to the Directors of Joint-Stock Companies, which were Associations for profit, and the members of the Corporation.

'Babu Nalin Bihari Sircar observed that past experience showed that good men had been got to serve on Committees without fees.

'The Hon'ble Babu Surendranath Banerjee was certain that in England Members of Parliament and of County Councils were not paid fees.

'Babu Kally Nath Mitter said that the majority of the Amalgamation Committee, on whose report the present Act was in a great measure based, were in favour of the payment of fees, but the Legislature unanimously rejected their proposal.'

"There is thus a strong apprehension on the part of those entitled to speak with authority on the matter that the payment of fees would be fatal to the election of the best men on the General Committee, and that is the view which I desire the Council to accept.

"It is said that this is the Bombay system, but I submit that the circumstances of Bombay and Calcutta are very different. Bombay is a commercial city in a far greater sense than Calcutta is. The commercial instinct is predominant there. The town is studded with mills, of which many of the Commissioners are Directors, and they are accustomed to the payment of fees. Under the Bombay Act only one fee can be paid to a member in a week; under this Bill as many fees may be paid in the course of a week as there are meetings during that time. Under the Bombay Act a member must attend from the commencement of a meeting to the end of it; here he need not do so. In Bombay there is no payment of fees for attendance at Sub-Committees; under this Bill fees are to be given to members of Sub-Committees appointed by the General Committee. Therefore, in this Bill you go much beyond what is provided in the Bombay Act; and yet you are introducing the system of the payment of fees for the first time into our municipal system. I do not think there is the smallest justification for going beyond the Bombay Act.

"This question of the payment of fees was first considered by this Legislature in 1888. It was incorporated in the Bill, but was thrown out by the Select Committee after careful consideration. Sir Henry Harrison alone was in favour of it. The other members of the Select Committee were opposed to it, and I believe Sir Henry Harrison himself subsequently changed his opinion.

"These then are the grounds on which I venture to rest my amendment. I say, first, to the representatives of the European community that gentlemen of their community have worked admirably in the Municipality of Calcutta without the stimulus of fees; they did not need in the past the stimulus of fees to work with devotion and zeal for the good of the city. But admitting that times have changed, that circumstances have altered, admitting that they should be paid fees now, then I say pay fees to the European members of the Corporation and to no one else. Hindu and Muhammadan members do not want fees; they have done good work without receiving fees. The official members of the Corporation have done likewise. They are paid for the general work of the country, and they need not be paid fees over again. If all these arguments make no impression upon you, then I beg you to follow more closely the provisions of the Bombay Act. I ask you to make the assimilation as close as possible. The Bombay Act does not authorise the payment of fees to members of Sub-Committees; why should we? The Bombay Act does not authorise the payment of more than one fee in the week; why should we? The Bombay Act makes attendance from the commencement to the end of a meeting compulsory; why should we not do the same? If you insist on the payment of fees, let us have the Bombay system in its entirety. Some deference is due to the expression of opinion of the representatives of the Indian community. As a member of that community, I say we do not want fees, and, if you do pay us fees, it will be a waste of the rate-payers' money. Therefore, having regard to the strong feeling which exists in connection with this matter and to the provisions of the Bombay Act on the subject, I appeal to you to assimilate the Calcutta municipal law as far as possible to the Bombay Act, and above all I ask you not to make any payment to the members of the Hindu and Muhammadan communities who do not require the stimulus of fees to induce them to give their time and trouble to the service of the Corporation."

The Hon'ble THE PRESIDENT said:—"It will be convenient if the four Hon'ble Members who have given notice of amendments of a similar kind will now address the Council, so that the discussion may be taken up on all those amendments together."

The Hon'ble MR. APCAR said:—"I think that it would be an advantage if at this stage I move my amendments in connection with this matter. My amendment follows very much on the lines on which the Hon'ble Member who has just spoken has proceeded. My first amendment is that section 93 (*now* 100) of the Bill be omitted; my second motion is to exclude the payment of fees to the members of Sub-Committees; my third motion makes payment of fees possible

only to members of Committees who attend meetings from the beginning to the end; my fourth motion is on the lines of the Bombay Municipal Act, that no more than one fee shall be paid to any member for his attendance at all meetings in one week; my fifth motion is that after clause (*b*) the following be added:—

'(*c*) The fee shall be payable to a Commissioner appointed under section 7, sub-section (*1a*), clauses (*a*), (*b*) and (*c*) [*now* section 8, sub-section (*2*), clauses (*a*), (*b*) and (*c*)], and to no other.

'(*d*) No fee shall be payable to a Commissioner who is in receipt of a salary from the Government.'

"I do not intend to address the Council at any length after the very able speech which the Council has just heard from the Hon'ble Babu Surendranath Banerjee, but I should like to point out that some change has been made in the Bill since its introduction. Before we were told, in regard to the members of the European community, that they have refused to join the Corporation because of the loss of time in excessive talking, and the preponderance of the Hindu vote. Those two objectionable features have now almost entirely been removed. There should be little or no talking for the purpose of speaking in a Committee of twelve members, and there has also been made a reduction in the number of members in the Corporation, which will tell almost entirely on the Hindu vote, under the direction of the Supreme Government; and therefore all the reasons, which we are told have hitherto tended to keep away the European mercantile element from taking part in the proceedings of the Corporation, have been removed. If that is so, why introduce the question of fees? If the European element would have taken part in the proceedings if the objectionable features had not existed, they will be able to do so, now that the way has been cleared for them, without any fees. In justification, we are told that fees are paid for attendance at meetings of the Port Trust. But it does not follow that if they were not paid the mercantile community would not serve on that body. But I submit that there is considerable difference in the circumstances of the two bodies. In the Corporation it will be an entirely new departure: there has been no payment of fees hitherto; then why introduce it there now for the first time? I am under the impression that the members of the Port Trust are chosen on a wider basis from among the members of the mercantile community. In the Corporation, we have to choose and elect members of the General Committee from among a certain circumscribed body, and I believe a mistake will be committed in introducing the system of payment of fees in the Corporation. There will, I feel sure, be a strong dislike on the part of those who are elected to be members of the General Committee from offering themselves again and again, because of the idea that they desire to monopolise among themselves the fees which are to be paid; so that there is a real danger of inferior men becoming candidates and succeeding in their endeavours by reason of the desire of their fellow Commissioners to help to get them some remuneration. I think there will be this feeling in the *personnel* of the General Committee. If, however, fees are to be paid, let the rate-payers get a fair share of work for what they pay, and to ensure this I have moved that, in order to earn their fees, the members must attend meetings from the commencement to the end of the meeting; otherwise some member might attend a meeting for five or ten minutes and yet receive his fee by reason of having attended the meeting. I do not think that is right. As my hon'ble friend Babu Surendranath Banerjee has said, if we are going to introduce the system of payment of fees, we ought to conform to the Bombay law, which has been quoted as an example, by which attendance is required from the beginning to the end of a meeting, and under which also no fee is paid to a member of any Sub-Committee. We are told that the system of the payment of fees is necessary to induce members of the mercantile community to take part in the work of the Corporation. If that is so, let fees be paid to them; but why thrust fees on those who have no desire to receive them? If the argument is relied on that there would be an invidious distinction if any class were not paid fees, it should rather be made on behalf of those who want such payments; but why should fees be thrust upon those who disclaim any desire to get them? If the members of the mercantile community have not sufficient local patriotism to

induce them to give their services for the good of the city, let them be paid; but why should fees be paid to those who have hitherto been working, with the utmost devotion and zeal, without the payment of fees?"

The Hon'ble BABU JATRA MOHAN SEN asked permission to move his motion to omit clause (*b*) of section 106 (*now* 114) with his motion that section 93 (*now* 100) be omitted. He proposed to eliminate clause (*b*) of section 106 (*now* 114), which provided for the application of municipal funds. If the motion to omit section 93 (*now* 100) were carried, then clause (*b*) of section 106 (*now* 114) must necessarily be omitted; and, on the other hand, if that motion were lost, this must fall to the ground. After what had fallen from Hon'ble Members who had preceded him, he did not think it necessary to take up the time of the Council by repeating their arguments.

The Hon'ble BABU BOIKANTA NATH SEN said:—"I beg only to supplement a few remarks to what has been so ably said by the Hon'ble Babu Surendranath Banerjee and the Hon'ble Mr. Apcar. It appears to me from a study of the literature of this Bill that this question of the payment of fees arose from two considerations, namely, that the members of the European mercantile community do not stand for election as Municipal Commissioners, and, when nominated to the Municipal Board, they do not like to attend at meetings, and for this state of things the reasons given are that there is too much talking and waste of time, and there is besides the preponderating standing majority of the Hindu element, and that they cannot afford to lose their time for nothing. This remuneration in the shape of fees is therefore provided as a return for the time they will give to the service of the municipality. But I submit that the interests which those gentlemen will come to serve in the municipality ought to be considered as sufficient remuneration."

The Hon'ble MR. BAKER said:—"I wish to say as little as possible upon this subject. I recognize that it is one in which there is room for considerable difference of opinion. I may confess that my personal feeling is against the payment of fees, and I should be glad if it had been possible to dispense with them. But I submit that it is a necessary corollary to the system we are introducing into the municipal constitution of Calcutta. It is our object to place the municipal administration of the affairs of the town on a business footing; to carry on the business of the town in a businesslike manner with the active assistance of business men, and, if we are to do this with success, we must adapt our methods to those with which business men are familiar. The members of the General Committee under the new system will approximate more or less to a body of Directors of a limited liability Company, and it may be fairly argued that they are entitled to reasonable remuneration for the time and trouble they will devote to the affairs of the municipality. And, when the Hon'ble Babu Surendranath Banerjee denounces the payment of fees and suggests that such payment would tend to keep the best men away from the municipal body, I reply that he is in danger of spoiling his case by overstating it. We know that for many years fees have been paid to the members of the Standing Committee in Bombay, that that system has worked well, and that it has secured the co-operation of some of the most capable members of both the European and Native communities in Bombay. The Hon'ble Member said that the circumstances of Bombay are different from those in Calcutta. He said—and I could hardly believe my ears when I heard it—that Bombay is more a commercial town than Calcutta is. I can hardly imagine what he meant. The foreign trade of Bombay is as nearly as possible the same as that of Calcutta. It is the port of shipment of a large part of the produce of Northern India. Precisely the same may be said of Calcutta. There is not a pin to choose between the two. The only difference is that in Bombay the commercial community have hitherto taken an active part in the work of the Corporation, whereas in Calcutta for one reason or another they have hitherto kept aloof. It is now the object of this Bill to attract the mercantile community to take a part in the work of the municipality, and therefore the reason which the Hon'ble Babu Surendranath Banerjee assigned for making a distinction

between Calcutta and Bombay no longer applies. Not only are the members of the Standing Committee paid in Bombay, but the members of the Port Trust are also paid both here and in Bombay. The Corporation sends a representative of their body to the Port Trust, and the payment of fees made there has not deterred Native members of the Corporation of the highest position and character from accepting the office of a member of the Port Commission. We know also that a substantial honorarium is or used to be paid to every non-official Member of the Imperial Legislative Council for his attendance during the session of the Council. If the Hon'ble Member will refer to the Civil Service Regulations he will find that formerly a fee amounting to Rs. 10,000 a year used to be paid to the Additional Members of Council for their services."

The Hon'ble Babu Surendranath Banerjee:—"That refers to Members who come from outside the Province in which the Council is sitting."

The Hon'ble Mr. Baker said:—"The payment of that fee has not deterred gentlemen (European and Native) from seeking the honour of a seat in the Council. The only objection to the provision before the Council is the expense it will involve. I admit that this is to some extent a drawback, but it is only part of the price we have to pay for improved municipal administration; and, if the improvement is as great and far-reaching as we hope, the money will have been laid out to the best possible advantage.

"The Hon'ble Member said that if we are to have payment of fees let us follow the Bombay system, namely, let us pay no fees to members of Sub-Committees, nor to those who do not attend a meeting from the beginning to the end of each meeting. I am able to state that the Government is willing to accept the amendment which stands in the name of the Hon'ble Mr. Apcar, namely, that fees should only be paid to members of the General Committee who attend a meeting from beginning to end. So far we are prepared to go; but as to the payment of fees to members of Sub-Committees, it is true that in Bombay they are not paid, but I regard that as an anomaly in the Bombay system. The Sub-Committees are agents and delegates of the General Committee and are employed to do a part of the work which the law assigns to the General Committee; and their claims to receive fees are just as great as that of members of the General Committee itself. Lastly, in reference to the proposal to grant fees only to the European non-official members of the General Committee, I may ask whether the Hon'ble Member can produce any possible precedent for such an anomalous and invidious and inequitable proposal in any civilised part of the world."

The Hon'ble Mr. Oldham said:—"Both my hon'ble friends who represent the Corporation have referred to the delicacy which some of the elected members of the Corporation may feel with regard to the acceptance of these fees. I can place at their disposal one solution of that difficulty, though doing so involves my troubling the Council with a personal statement. I cherish the ambition, if the Government will permit me, of being returned as an elected member of the Corporation of Calcutta as my distinguished predecessor in office, Mr. Hebert Reynolds, was before me. If I am elected or become a nominated member of the General Committee, I wish to say that I do not intend to accept payment of fees for my attendance at meetings of the General Committee or of Sub-Committees of the General Committee, and it is perfectly open to any one to follow the same course. I only make this profession in order that I may have a free voice and a free hand in speaking and voting on this matter. Nothing has been more striking than the abstract way in which this matter has been discussed—first, as if there were no precedent, and then at last the example of the Bombay Municipality has been cited as if it were the only precedent; and the Hon'ble Babu Surendranath Banerjee asked if the Hon'ble Member in charge of the Bill is following English teachings in regard to this matter. My answer to that is that we are strictly following the teachings of Englishmen, for wherever they have found themselves in this position in any part of the world—in America, in Australia and other places—they have adopted this system of fees in return for their services. Throughout America and in every Colony

in Australia this system is in force. Calcutta is not an old Indian city like Delhi or Agra. It started as an English colony as much as any other colony which England possesses. After all our researches we cannot trace a single descendant of the former inhabitants except the representatives of two houses whose ancestors had, in 1689, recently come from Hooghly, and were then obscure people. Here, as in Bombay, we talk of Europeans and natives as if the Indians are the natives of those places, while the true natives are probably people with European blood. When Bombay was taken possession of, the sole inhabitants who were found were seven fishermen. Therefore, how can we speak of Europeans and natives as if there was any native population still represented when the English formed these two settlements? Indians have come into Calcutta just as much colonists as the Europeans, and Englishmen have only followed in their colony of Bombay the example which they or their descendants have followed wherever they have gone."

The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH said:—"I do not wish to give a silent vote in this matter. I do not think the payment of fees for attending municipal meetings is a right policy. I am sure that no Muhammadan or Hindu of rank and position would like to take fees for his attendance and for devoting a portion of his time to municipal matters I therefore do not think it right to give them the idea that they are entitled to remuneration. I hope that the Council will agree with me and omit section 93 (*now* 100)."

The Hon'ble MAULVI DELAWAR HOSAIN AHMED said:—"It does not seem clear to me that the principle of payment of members is a right principle. Members of Parliament are not paid in England, and no real attempt has ever been made to give a pecuniary character to the services rendered by them.

"We have got municipal institutions from England, and we should try to follow England, where the principle has, as I understand, not yet been applied.

"The General Committee will now consist of a smaller number of members, and there will be a more equitable representation of classes. The risk of loss of time from excessive talk will be less, and no class will be in a hopeless minority. I believe, therefore that no inducement will be necessary, and I think the provisions of this section are of doubtful value."

The Hon'ble MR. MACKENZIE said—"The payment of fees is well known and recognised both in England and in India; it exists in the Bombay Municipality and also in the Calcutta Port Trust. As the Hon'ble Member in charge has said, if you wish to induce business men to give their time and labour to the work of the Municipality, you must follow the methods to which business men are accustomed. If the suggestion that fees should only be paid to Commissioners who attend from beginning to end of a meeting is intended to bar any one arriving a few minutes late for a meeting receiving his fee, then I am opposed to it, for it is the custom in business meetings to allow a reasonable grace. Any one having arrived at a meeting would naturally remain till the business before the meeting had been disposed of."

The Hon'ble RAJA RANAJIT SINHA, BAHADUR, OF NASHIPUR said:—"I also support this amendment, and I shall at the same time move the amendment which stands in my name, namely, that the words 'and every member of a Sub-Committee a fee of sixteen rupees' and the words 'or Sub-Committee' in section 93 (*now* 100) be omitted. My amendment is the same as the one which is standing in the name of the Hon'ble Mr. Apcar. I do not see any necessity for the payment of fees to the members of the General Committee and also to members of Sub-Committees of the General Committee as well. Every one knows that jurors who come from a long distance to serve in Courts of Justice to the detriment of their own work are not entitled to any fees. Moreover, the payment of the paltry sum proposed in this Bill to members of the mercantile community will not afford a sufficient incentive to gentlemen of position and standing to leave their business and attend at meetings of the General Committee; therefore, in my opinion, it will be superfluous to pay any fees. As to

a

the payment of fees to members of Sub-Committees of the General Committee, if members of Special Committees are not to be paid any fees, I do not think it is reasonable to pay any fees to the members of the Sub-Committees appointed by the General Committee, which is the second co-ordinate authority in the Municipality."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"My amendments upon section 93 (*now* 100) are practically identical with those already moved by the Hon'ble Mr. Apcar and the Hon'ble Babu Surendranath Banerjee, and it will be convenient to the Council if I deal with them at this stage. I do not wish to conceal the fact that, when I first came across this provision in the Bill, I simply felt shocked at the suggestion that members of the Corporation were to receive fees for attendance at meetings of the General Committee and of the various Sub-Committees. I am not in the habit, Sir, of using strong language, but the word 'shocked' precisely expresses my feelings. When I first read the section in the Bill, the question which was uppermost in my mind was this—have public feeling and public spirit fallen to such a low ebb in the metropolis of the Indian Empire that people of all classes and creeds cannot be found in sufficient numbers to take a genuine interest in the municipal affairs of this city without the introduction of the mercenary system of payment of fees? I cannot claim to have a personal knowledge of the Calcutta Corporation, but the intimate knowledge I can claim to possess of the working of the body I have the honour to represent justifies the assertion that there is still considerable public spirit in this city, and it will not come as a surprise upon Hon'ble Members when I tell them that week after week, month after month, very arduous and useful work is carried on in the University by members, European and Indian, official and non-official, who would consider it a grievous insult if they were offered any remuneration for their services. I am proud to think that, in the past, at any rate, similar feelings have dominated the Calcutta Corporation. I still decline to believe that the incentive of fees is necessary to induce any member of the educated Hindu community to interest himself in matters municipal; and I was reluctant to believe that a provision of this kind had been introduced in the interests of the members of the European community, until the Hon'ble Member in charge said that it was needed to secure their active co-operation."

The Hon'ble MR. BAKER:—"I said business men."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA continued:—"That only strengthens my position. If the Hon'ble Member intended to include not only European men of business, but also Hindu and Muhammadan men of business, then I affirm that absolutely no case has been made out for the imputation that the public spirit of the latter has to be whetted by the sight of gold. The Hon'ble Member further contends that it is a necessary corollary to the principle which underlies the Bill, namely, if you want business men to take an active interest in matters municipal, you must pay them fees. I am half tempted, Sir, to quote the caustic observation of the Emperor of the French, but I will content myself with saying this much, that, even if this argument is conceded, the position is not established. Let us consider the question closely for a moment. Ten out of fifty members of the Corporation are to be, if I am allowed the use of the expression, commercial members, and four out of twelve on the General Committee are to belong to the same class. Now, assume that it is desirable, or even necessary, to secure the services of this minority by the payment of adequate remuneration. What possible excuse is there for the offer of fees to the majority, who have never demanded them, and in respect of whom no one has even ventured to suggest that their services have to be bought? Why offer this gratuitous insult to Hindus, Muhammadans and non-commercial Europeans, whose zeal and public spirit none can question? Why squander our funds in this wasteful fashion—funds, remember, the substantial portion of which has been wrung from the poor? These are unpleasant and inconvenient questions, and I am afraid they must go without an answer.

"There is, Sir, one other matter in connection with this subject to which it is my painful duty to allude. In the Bill as originally framed there was a very sensible and salutary provision that no member would be entitled to a fee unless he attended a meeting from the beginning to the end thereof. The Select Committee have withdrawn this clause. and, I must say, for a very extraordinary reason; they say that the provision in question is not in accord with the rules of ordinary commercial practice. I confess, Sir, I read this statement with mingled feelings of surprise and regret. We are all aware that a similar provision finds a place in the Bombay Act, and no one has suggested that it has not worked well in Bombay, which, to put it mildly, is quite as much a commercial city as Calcutta. But, Sir, apart from all precedents, is the change defensible at all upon principle? Is commercial ethics something different from ordinary ethics? Do commercial men ever pay full wages for half a day's work? If they ever did that, would they not speedily find themselves on the surest road to bankruptcy? Or, Sir, is this novel principle to apply only when commercial men have to receive and not when they have to pay? I am forced to say, though with the deepest regret, that this desire to be paid and to be paid in full, when one is not prepared to do the whole work, appears, in my humble judgment, to be not very elevating."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"I have had the honour of being a Member of this Council for the last six years, and I have never witnessed a more striking demonstration of feeling on the part of the Hindu and Muhammadan Members of the Council than when I listened to-day to two distinguished members of the Muhammadan community, one of whom is in the service of the Government and the other uniformly votes with the Government, urging that they would be no parties to any measure which proposed payment of fees to Municipal Commissioners. The Hon'ble Sahibzada Mahomed Bakhtyar Shah has been among the strongest supporters of this Bill, and I have never yet found him say 'No' to any provision contained in this Bill either here or in Select Committee. But he feels this to be a reproach—I was going to say that he looks upon with horror—that the representatives of his community should be called upon to receive fees for work to be performed for the benefit of the public, and he has been compelled to say 'No' to this proposal in the Bill. Thus we have here representatives of the Hindu and Muhammadan communities all uniting in a common protest against this part of the Bill, against which therefore it must be assumed that there is arrayed a strong body of public feeling. And I venture to submit that it is the duty of the Council to take note of this feeling. When we have representatives of both these communities urging that they do not want these fees, that they would have none of these fees, that it is the duty of the representatives of the people to do the work of the Municipality without the payment of fees, I submit that the Council ought not to enact into law these provisions of the Bill. My hon'ble friend in charge of the Bill has referred to the invidious distinction which the law would create if fees were only to be paid to some class of members and not to others. No doubt that would be an invidious distinction. I am free to make that admission. But there are already distinctions in the Bill—distinctions between the members of the General Committee and members of Sub-Committees appointed by the General Committee on the one hand, and members of Special Committees appointed by the Corporation on the other."

The Hon'ble MR. BAKER said:—"There are no differences of race."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I am sorry the Hon'ble Member has raised the question of race. He has told the Council more than once that the intention of the Bill is to cut down the Hindu majority. Is not that a racial consideration of a very glaring character? If you talk of distinctions and distinctions based on racial considerations, I say that such distinctions bristle in this Bill from the beginning to the end. The whole Bill is based on these considerations, and therefore that is not an argument which ought to stand in the way of the acceptance of my amendment. My hon'ble friend says that in the Bombay system there is an anomaly. He has not, therefore,

adopted the law as it prevails in Bombay. I think the people of Bombay know their own business best, and we should be wise in following them. I do not see why any fee should be paid to members of Sub-Committees appointed by the General Committee, and I think no justification has been made out for making such payments. I earnestly beg Your Honour to take note of the unanimity of feeling which exists among the representatives of the Hindu and Muhammadan communities in this Council. We object to the payment of fees altogether. We do not wish such a principle to be incorporated in the law. At any rate, we do not wish that the members of the Hindu and Muhammadan communities should have the opportunity of accepting fees, and we hope that such an opportunity will not be afforded to them. Pay fees to those who need them; don't pay fees to members of the Hindu and Muhammadan representatives on the General Committee. As to the argument based on invidious distinctions, we need not trouble ourselves about it. Distinction there are in abundance and superabundance in this Bill, and one more distinction will only be in conformity with the entire tenor of the Bill. I earnestly hope the Council will take these points into their serious consideration and accept my amendment."

The Hon'ble Mr. Apcar, in reply, said:—"I don't think any more extraordinary spectacle has been seen in this Council than the Hon'ble Member in charge of the Bill attempting to force people to take fees for work done in the municipality who do not want to take them. They cry out against it, they say they object to the payment of any fees, but he is determined that they shall take fees, whether they want them or not."

The Hon'ble the President said:—"That is not the statement of the Bill. The Bill only provides that fees shall be payable: no man is forced to take a fee."

The Hon'ble Mr. Apcar said:—There has been no more effective reply given to this provision of the Bill than that which has been made by the Hon'ble Mr. Oldham; still it is insisted that this provision shall be engrafted into the law. The section says that all shall be entitled to the payment of fees, and the meaning will be eventually that all shall be paid. Under the law there is to be a payment of fees when both Muhammadans and Hindus cry out against it. If it is so, and only the representatives of one class of the community ask to be paid fees, I say the opinion of the majority of those concerned in the matter being of such a kind, this provision should not be enacted in the law; and, if it is to be enacted, let it be made only in favour of the class who ask to be paid. I have not had the advantage of hearing what the Hon'ble Member who represents the Trades Association (Mr. Spink) has to say in the matter. I know that members of the Calcutta Trades Association have served on the Corporation faithfully, and have given their time and attention to the affairs of the Municipality without expecting the payment of fees. I know that in the Port Trust fees are paid for attendance of members; they are offered to them and they are taken, but it does not follow that, if fees were not paid, they would not serve on the Port Trust. Calcutta is no doubt equal to Bombay as a commercial city, but the native element is far more largely represented in Bombay in mercantile matters than it is in Calcutta. Here the native element is not represented in the same way; and, as far as the payment of fees to members of Sub-Committees is concerned, that provision is not in operation in Bombay. The Bombay Municipal Act has been in operation since 1872. There was an amendment in 1888, and yet members of Sub-Committees have not been paid any fees. I think that, with the strong expression of opinion which has been elicited, the payment of fees should be disallowed."

The Hon'ble Mr. Spink said:—"Sir, I have not spoken before, as my mind was open with regard to this subject; but, as the Hon'ble Member who has just sat down has appealed to me for an expression of opinion, I beg leave to say that personally I would be willing to work without the payment of fees, but I know there is a general feeling that fees should be paid. A fee is looked upon rather

in the light of reasonable remuneration for time and services given to the affairs of the Corporation than as an attraction to be a Commissioner. I am perfectly certain that there are many members of the European community who would be willing to be members of the General Committee without being attracted merely by the prospect of receiving fees. I think it is reasonable to pay fees; there is no novelty in such a practice, as it is a recognised principle in business circles throughout the world, though personally, as I have said, I should be willing to work myself without the payment of fees. I regret I cannot support the amendment."

The motion that section 93 (*now* 100) be omitted being then put, the Council divided as follows:—

Ayes 7.

The Hon'ble Raja Ranajit Sinha, Bahadur, of Nashipur.
The Hon'ble Babu Jatra Mohan Sen.
The Hon'ble Babu Boikanta Nath Sen.
The Hon'ble Babu Surendranath Banerjee.
The Hon'ble Mr. Apcar.
The Hon'ble Dr. Asutosh Mukhopadhyaya.
The Hon'ble Sahibzada Mahomed Bakhtyar Shah.

Noes 11.

The Hon'ble Mr. Buckley.
The Hon'ble Mr. Buckland.
The Hon'ble Mr. Handley.
The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Mr. Mackenzie.
The Hon'ble Mr. Spink.
The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
The Hon'ble Mr. Oldham.
The Hon'ble Mr. Baker.
The Hon'ble Mr. Bolton.
The Hon'ble Mr. Slack.

So the amendment was lost.

The Hon'ble BABU SURENDRANATH BANERJEE's moved that for section 93 (*now* 100) the following clause be substituted, namely:—

"Every member of the General Committee shall be entitled to receive a fee of thirty rupees for each meeting of the said Committee at which a quorum is present and business is transacted and which he attends from the beginning to the end thereof:

"Provided that no more than one fee shall be paid to any member for his attendance at such meetings in any week."

He said:—"The provision in the Bombay Act is exactly the same as this amendment. I have no objection to make the fee amount to thirty-two rupees instead of thirty rupees, but I have put the amount as I find it in the Bombay Act. I have also to point out that this is the provision in the original Bill with a slight modification. The Hon'ble Mr. Spink has been good enough to remark that members of the European community do not want the fee to be such as would represent an adequate remuneration for their time and trouble, but they expect some slight remuneration; therefore we need not have more than one fee a week as in Bombay. I think we ought to proceed on the lines of the Bombay Act, both in this respect and in respect of attendance from the beginning to the end of the meeting. I hope this amendment will be accepted."

The Hon'ble MR. BAKER said:—"I have very little to add to what I have said already. I cannot accept this amendment, because it makes no provision for the payment of fees to members of Sub-Committees of the General Committee. I do not also agree to the proviso If the cost to the public purse is the objection to the payment of more than one fee in the week, then no fees at all should be paid. The Bill follows the practice of the Port Commissioners, and I am sure it is the practice in all limited liability companies, and I can see no reason why, when two meetings happen to be held in one week, only one fee should be paid."

The Hon'ble THE PRESIDENT said:—"I think the Hon'ble Member in charge of the Bill accepted the Hon'ble Mr. Apcar's amendment in this section, that

after the words "is transacted" the words and "which he attends from the beginning to the end thereof" be inserted."

The motion being put, the Council divided as follows:—

Ayes 6.	*Noes 12.*
The Hon'ble Raja Ranajit Sinha, Bahadur, of Nashipur.	The Hon'ble Mr. Buckley.
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Handley.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Mr. Apcar.	The Hon'ble Mr. Mackenzie.
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Mr. Spink.
	The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
	The Hon'ble Mr. Oldham.
	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

So the amendment was lost.

The Hon'ble BABU SURENDRANATH BANERJEE'S motion that the following proviso, namely:—

"Provided that no fee shall be paid to a Hindu or a Muhammadan or an official member" be added to the clause proposed in the last amendment, or, if that clause be not carried, then to section 93 (*now* 100), being put, the Council divided as follows:—

Ayes 6.	*Noes 11.*
The Hon'ble Raja Ranajit Sinha, Bahadur, of Nashipur.	The Hon'ble Mr. Buckley.
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Handley.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Mr. Apcar.	The Hon'ble Mr. Mackenzie.
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Mr. Spink.
	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
	The Hon'ble Mr. Oldham.
	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH did not vote.

So the amendment was lost.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the word "twenty" be substituted for the word "thirty-two" in line 2 of section 93 (*now* 100), and that the word "ten" be substituted for the word "sixteen" in line 4 of the same section.

He said:—"I understand that a fee of twenty rupees is paid by the Port Trust for attendance at each meeting. I moved this amendment in the Select Committee, and I think I nearly carried it There was a strong feeling in favour of the reduction of the amount of the fee following the precedent followed by the Port Trust."

The motion was put and agreed to.

The Hon'ble Mr. APCAR'S motion that in section 93 (*now* 100) the words "and every member of a Sub-Committee a fee of sixteen rupees" and the words "or Sub-Committee" be omitted, was then put and lost.

The Hon'ble MR. APCAR'S motion that in section 93 (*now* 100), after the words "is transacted" the words "and which he attends from the beginning to the end thereof" be inserted, was then put and agreed to.

The Hon'ble MR. APCAR's motion that for proviso (a) to section 93 (*now* 100) be substituted the words "no more than one fee shall be paid to any member for his attendance at all such meetings in any one week" was then put and lost.

The Hon'ble MR. APCAR's motion that in section 93 (*now* 100), after clause (b), the following be added—

> "(c) the fee shall be payable to a Commissioner appointed under section 7, sub-section (1a) [*now* section 8, sub-section (2)], clauses (a), (b) or (c), and to no other;
>
> (d) no fee shall be payable to any Commissioner who is in receipt of a salary from the Government,"

was then put and lost.

The Hon'ble MR. APCAR's amendment that in section 93 (*now* 100), after the words "is transacted" the words "and which he attends from the beginning to the end thereof" be inserted, having been adopted, the Hon'ble DR. ASUTOSH MUKHOPADHYAYA, by leave of the Council, withdrew a similar motion standing in his name.

The Hon'ble DR. ASUTOSH MUKHOPADHAYAYA's motion that to section 93 (*now* 100) the following be added as proviso (c), namely :—

> "not more than four fees shall be paid to any member for his attendance at all meetings in any one month;"

was put and lost.

The Hon'ble MR. APCAR's motion that in section 93 (*now* 100) the words "and every member of a Sub-Committee a fee of sixteen rupees" and the words "or Sub-Committee" be omitted having been lost, the Hon'ble RAJA RANAJIT SINHA, BAHADUR, OF NASHIPUR, by leave of the Council, withdrew the similar motion standing in his name.

The Hon'ble BABU BOIKANTA NATH SEN, by leave of the Council, withdrew his motion that the following be added to section 93 (*now* 100):—

> "(c) not more than thirty fees shall be paid to any member for his attendance at all meetings in any one year."

The Council was then adjourned to Monday, the 18th September, 1899.

CALCUTTA; F. G. WIGLEY,

The 16th January, 1900. *Assistant Secretary to the Govt. of Bengal,*
Legislative Dept.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

The Council met in the Council Chamber on Monday, the 18th September, 1899.

Present:

The Hon'ble Sir John Woodburn, K.C.S.I., Lieutenant-Governor of Bengal, *presiding.*
The Hon'ble Mr. W. B. Oldham, C.I.E.
The Hon'ble Mr. R. B. Buckley.
The Hon'ble Mr. C. W. Bolton, C.S.I.
The Hon'ble Mr. E. N. Baker.
The Hon'ble Rai Durga Gati Banerjea, Bahadur, C.I.E.
The Hon'ble Mr. C. E. Buckland, C.I.E.
The Hon'ble Mr. F. F. Handley.
The Hon'ble Mr. F. A. Slack.
The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
The Hon'ble Babu Jatra Mohan Sen.
The Hon'ble Mr. T. W. Spink.
The Hon'ble Raja Ranjit Sinha, Bahadur, of Nashipur.
The Hon'ble Sahibzada Mahomed Bakhtyar Shah, C.I.E.
The Hon'ble Mr. D. F. Mackenzie.
The Hon'ble Mr. J. G. Apcar.
The Hon'ble Dr. Asutosh Mukhopadhyaya, M.A., D.L., F.R.A.S., F.R.S.E.
The Hon'ble Babu Boikanta Nath Sen.
The Hon'ble Babu Surendranath Banerjee.

CALCUTTA MUNICIPAL BILL.

The Hon'ble Mr. BAKER said:—"I have been in communication with the Hon'ble Dr. Asutosh Mukhopadhyaya, and we have come to an agreement upon his amendments relating to sections 88 and 89A (*now* 95 and 96)."

SECTION 95.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA withdrew the following motions of which he had given notice, namely:—

(*1*) that in section 88, sub-section (*3b*) [*now* section 95, sub-section (*6*)], for lines 3 to 8, the following be substituted, namely:—

"(*i*) Commissioners elected under section 7 (*now* 8), sub-section (*1*), or appointed under section 52B (*now* 59), sub-section (*1*), and

"(*ii*) Commissioners appointed under section 7, sub-section (*1a*) [*now* section 8, sub-section (*2*)]."

(*2*) that at the end of section 88, sub-section 3(*b*) [*now* section 95, sub-section (*6*)], be added "but from no Sub-Committee shall the representatives of either of the two classes of Commissioners be entirely excluded";

and substituted for them the following motion:—

SECTION 96.

That the following amendments be made in section 89A (*now* 96), namely:—

(*1*) omit "3(*b*)" in line 1 of sub-section (*3*);

(*2*) insert the following sub-section after sub-section (*3*):—

"(*3a*) [*now* (*4*)] The Local Government may make rules declaring what proportion of—

(*i*) Ward Commissioners, and

(*ii*) Commissioners appointed under section 7, sub-section (*1a*) [*now* section 7, sub-section (*2*)], respectively,

shall be nominated to be members of every or any special Committee:

Provided that every special Committee shall be so constituted as to contain not less than one representative of each of the two classes of Commissioners referred to in this sub section."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"I shall briefly explain to the members of this Council what this amendment in substance is. My amendment originally was with reference to section 88, sub-section (3*b*) [*now* section 95, sub-section (*6*)], and my contention was that the division there into three classes was not quite logical. After discussing the matter with the Hon'ble Member in charge of the Bill, we came to the conclusion that it was not perhaps strictly logical, but that a better arrangement could not be devised. We also found that that arrangement was by implication included in section 89A, sub-section (3) [*now* section 95, sub-section (*5*)], under which sub-section 3 (*b*) of section 88 [*now* section 95, sub-section (*6*)], applies to every Special Committee. Now these Special Committees are to be appointed by the Corporation, and the three classes referred to as the constituent elements of the General Committee are by implication adopted as the constituent elements of the Corporation. But it so happens that the constituent elements of the General Committee are not identical with the constituent elements of the Corporation. But the Government of India in paragraph 20 of their despatch say that these Committees must be truly representative of the elements of which the General Committee and the Corporation are, respectively, composed. Therefore it becomes necessary not to incorporate by implication section 88, sub-section (3*b*) [*now* section 95, sub-section (*6*)], but to include a distinct provision in section 89A, sub-section (3) [*now* section 95, sub-section (*5*)]. That distinct provision is practically my amendment as I have now moved it. The Hon'ble Member in charge of the Bill has pointed out to me that the classification I proposed would hold good in the case of the Corporation, but not in the case of the General Committee, and that therefore it was desirable to leave section 88 (*now* 95) alone, and to insert a new provision in section 89A (*now* 96). The terms of the amendment are practically identical with the amendments numbered 44 and 45 on the List of Business."

The sections of the Bill having, under the direction of the Council, been re-numbered, the present number of each section is inserted in brackets, wherever the new numbering differs from the old.

The Hon'ble Mr. Baker said:—"The Hon'ble Member has explained it quite clearly and quite correctly. In the General Committee there are three groups of constituents and in the Corporation there are only two. That is the reason why it is necessary to have a distinction between the rules determining the composition of the Sub-Committees which have to correspond to the composition of the General Committee, and the composition of the Special Committees which are to correspond with the Corporation. The amendment moved by the Hon'ble Member gives effect to that, and I think it may be accepted."

The Hon'ble Mr. Apcar said:—"Sir, as I understand it, this relates to sub-section 3 (*b*) of section 88 [*now* section 95, sub-section (*6*)], a sub-section which was carried by the casting vote of His Honour the President, and, as I understand my hon'ble friend the Member in charge of the Bill, it is a sub-section which will not be put into operation. Under these circumstances I have nothing to say."

The motion was then put and agreed to.

Section 101.

The Hon'ble Babu Surendranath Banerjee moved that the words "unless in any case they consider that inconvenience or unreasonable delay would result," in sub-section (*2*) of section 95 (*now* 101) be omitted, and that in their place the following words be substituted:—

"without unnecessary delay."

The Hon'ble Mr. Apcar moved that in section 95 (*now* 101), sub-section (*2*), for the words "unless in any case they consider that inconvenience or unreasonable delay would result" the words "without unreasonable delay" be substituted.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that in section 95 (*now* 101), sub-section (*2*), all the words after "requisitions" be omitted and the words "without unreasonable delay" be added

The Hon'ble Babu Jatra Mohan Sen moved that in section 95 (*now* 101), sub-section (*2*), the words "unless in any case they consider that inconvenience or unreasonable delay would result" be omitted.

The Hon'ble Babu Surendranath Banerjee said:—"Sir, yesterday we adopted a section in the Bill making it a statutory obligation on the part of the Chairman to send to the Local Government extracts from the proceedings and minutes of the Corporation, the General Committee and the Sub-Committees. That is a statutory obligation, and surely, Sir, when a requisition is made by the Corporation to the General Committee to submit to the Corporation extracts from its proceedings, such a requisition should be complied with, and it should not be open to the General Committee to raise objections. Sir, I may just point out that this amendment stands on a very different footing from the amendment which I moved the other day and upon which I elicited an adverse vote from this Council. That was an amendment which sought to appoint Committees of the Corporation for the purpose of instituting enquiries and submitting reports with regard to all matters pertaining to the general administration of the Municipality. This amendment stands upon a totally different footing. Its object is that, when a requisition of the kind referred to by me is addressed by the Corporation to the General Committee and Sub-Committees of the General Committee, it should be complied with without any kind of delay and without excuses being raised. I may point out that my amendment follows section 65 of the Bombay Act, which says—

'The Corporation may at any time call for any extract from any proceedings of the Standing Committee or of any Committee or Sub-Committee constituted under this Act and for any return, &c., and every such requisition shall be complied with without unreasonable delay.'

"I hope, Sir, having regard to the facts I have just submitted, the Council will see its way to accept this amendment."

The Hon'ble MR. BAKER said:—"I strongly oppose this amendment, Sir, and I shall oppose every amendment which seeks to place either the General Committee or the Chairman in a position of general subordination to the Corporation. In the original Bill the power to call for extracts from the proceedings of the General Committee was confined to those matters which are reserved by the Act for decision by the Corporation, and it was also provided that the General Committee should comply with such requisitions without unreasonable delay. In the Select Committee this was changed at the instance, if I remember right, of the Hon'ble Members who represent the Corporation. They said that the power to call for extracts from the proceedings of the General Committee should be made general, and should apply to all the proceedings of the General Committee on all subjects, whether they were reserved by law for the decision of the Corporation or not. As a consequence of that decision we gave to the General Committee the discretion to refuse to forward extracts in cases in which they thought that inconvenience or unreasonable delay would be occasioned thereby. The Hon'ble Member now both wants the power to call for extracts relating to all matters whatsoever, and also to withdraw from the General Committee the discretion which we allowed to them in consequence of that alteration. This amendment assumes that the General Committee is subordinate to the Corporation. Now, Sir, that is not the case. The General Committee is only subordinate to the Corporation in matters which are reserved by law for decision by the Corporation. I admit that the General Committee would ordinarily do well to comply with these requisitions. They ought, as a rule, to furnish the Corporation with information upon all matters regarding which they may desire to have information. But, as the General Committee is within its own sphere independent of the Corporation, it is inconsistent with that position that the Corporation should have the power to compel them to furnish any extracts from any of their proceedings whatsoever without limitation. I object strongly to take away the discretion of the General Committee by imposing upon them a statutory obligation to compel them to comply with these requisitions. The Hon'ble Member said that this is the rule in Bombay. That is not an argument which impresses me in the least. We are not introducing here the whole of the Bombay system. We have made many alterations and additions, and we are only introducing those provisions from the Bombay Act which we believe are likely to be beneficial in Calcutta. I would remind the Council that the Hon'ble Member only quotes the Bombay Act when it happens to suit his case. Last week we were discussing the financial powers of the General Committee in respect of contracts. In this Bill we have provided that the General Committee should only have power to sanction contracts up to Rs. 10,000, and that anything above that sum shall require the sanction of the Corporation, and that the Corporation alone shall have the power to accept tenders in excess of that figure. In Bombay what is the corresponding provision of the law? In Bombay, Sir, nothing goes to the Corporation at all. The General Committee sanction everything in excess of Rs. 5,000. No matter how high the amount of the expenditure may be, the power to sanction, the power to accept tenders, rests exclusively with the General Committee. I need hardly say that, when we were dealing with those sections, the Hon'ble Member made no reference to the Bombay Act."

The Hon'ble MR. APCAR said:—"I have an amendment standing in my name which is identical with my hon'ble friend's. I think it will be convenient if I take that amendment now. My hon'ble friend's amendment is to substitute the words 'without unnecessary delay'. My amendment is to substitute the words 'without unreasonable delay,' so that the amendments are practically the same, only I am following the terms of the Bombay Act. I have been much entertained by the Hon'ble Member in charge of the Bill, when he had the boldness to say that my hon'ble friend to my left quotes the Bombay Act when it suits his purpose. Well, if that Act were given in its entirety for us here, in Calcutta, it would be accepted by my hon'ble friend and myself. But I do not think my hon'ble friend is singular in quoting the Bombay Act when it serves his purpose, because I have heard that Act quoted by my hon'ble friend in charge of the Bill when it suits his purpose, and set it aside when it suits his

purpose; and, so far as those who are opposing this Bill are concerned, when we have sought any divergence from the Bombay Act, it has been based on the experience that we have gained in the working of the Calcutta Municipality, and it must not be lost sight of that we are changing the law from one very widely different, with very much wider powers vested in the Corporation than have ever existed in Bombay, so that it is not unnatural that we, having had experience of the working of the present Act, seek, where we find that it is advantageous, to fall back upon it. In connection with this amendment I beg the Council to remember that although there is no statutory obligation on the Chairman to supply copies of the proceedings of the General Committee to the members of the Corporation, now they have a right to those copies. They have a right to copies of these proceedings because every matter which comes up before them is one which is under their control, and it is required that they should have full information with regard to such matters, so that the position now is very widely different from what is now desired by the Hon'ble Member in charge. The fall is so great, that I think it might be broken by, at all events, allowing the Corporation to see what is being done on any question upon which they may desire to have information. Here, too, all that is wanted is that information should be given. We have the General Committee who are going to work with closed doors, and I do not think it is advisable by any means, and the contrast is so marked that I am surprised it has been put so strongly that information should not be permitted to come out in the ordinary and regular way. My hon'ble friend, the Member in charge of the Bill, says he will not allow any suggestion that the General Committee are to be put in subordination to the Corporation."

The Hon'ble Mr. Baker said:—"In general subordination to the Corporation was what I said."

The Hon'ble Mr. Apcar said:—"In general subordination to the Corporation. But, Sir, this is not in any way placing them in subordination, either general or otherwise. The Corporation cannot direct the General Committee to do anything different from what they have done. What we seek is that they should supply the Corporation with information with regard to matters which may have excited great general interest, and I can see no reason why such a power should be regarded with any kind of jealousy. The General Committee would be doing, as I am sure they will, everything according to that which is right in their own eyes. Why should they be afraid of publicity? But, so far as this particular section is concerned, the main objection is based upon the ground of inconvenience. Well, Sir, why will it be inconvenient to them to allow any matter in which they have taken a certain line to be made public? It cannot be inconvenient in the ordinary sense. There can be no difficulty in supplying these extracts, because all that we seek is that they may be available for the use and for the information of the Corporation who represent the public. So that inconvenience in the sense that it would be difficult to supply these extracts does not enter into the question at all. They must supply all the information to Government; then why should they not supply copies of the extracts from their proceedings, which they are compelled to supply to Government, also to the Corporation? It is under these circumstance that I hope this amendment will be accepted."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"The position taken up by the Hon'ble Member in charge of the Bill, I am sorry to confess, is not very intelligible to me. I have taken down the words which he used. He said that this amendment is based upon the assumption that the General Committee is subordinate to the Corporation, and that he would strongly object to anything which would place the General Committee in a position of general subordination to the Corporation. I regret to say that I cannot make out that any such subordination necessarily follows, if my amendment is accepted. Let us look, for instance, at section 91A (*now* 98), which deals with the inspection of the minutes and reports of proceedings of the Corporation. It says:

'The minutes referred to in section 90 (*now* 97), and the full reports (if any) of the proceedings of meetings of the Corporation, shall, at all reasonable times, be kept open at the

municipal office to the inspection of any Commissioner without charge, and to any other person on payment of a fee of eight annas;'

so that it seems that any stranger, any member of the public, may get copies of the proceedings of the Corporation upon the payment of a nominal fee. Can it be seriously argued, because this is allowable, that therefore the Corporation is in a position of general subordination to the public? Take, again, section 92 (*now* 99). Section 92 (*now* 99) makes it compulsory on the Chairman to forward to the Local Government a copy of the minutes of the proceedings at each meeting of the Corporation, the General Committee and every Sub-Committee and Special Committee within ten days from the date on which such meeting took place. Is it contended that the General Committee is hereby placed in a position of general subordination to the Local Government, and that the Local Government may, whenever it so chooses, nullify the proceedings of the General Committee? Then, Sir, I submit that the position taken up by the Hon'ble Member in charge of the Bill is inconsistent. If his contention is that the General Committee will be placed in a position of general subordination, in case it is allowable for the Corporation to call for copies of their proceedings, then the better course to follow would be to omit section 95 (*now* 101) altogether. In the first place, you say that the Corporation may at any time require the General Committee to furnish them with any extracts from any of the proceedings of any Committee or Sub-Committee, and also with any returns, statements, accounts or reports concerning or connected with any matter dealt with by the General Committee or by any Sub-Committee; and in the same breath, you add, most inconsistently, that the General Committee shall comply with all such requisitions, unless in any case they consider that inconvenience or unreasonable delay would result. I confess I do not see the force of the words 'inconvenience and unreasonable delay'. Inconvenience to whom? Certainly not inconvenience to the Corporation, because the Corporation would be the best judge in that matter. Inconvenience to the General Committee? I cannot conceive of any case in which the mere fact of furnishing copies of the proceedings to the Corporation will place the General Committee in an inconvenient situation, and I shall be very much obliged to the Hon'ble Member in charge of the Bill if he would give a concrete instance."

The Hon'ble Mr. Baker said:—"I mean of course inconvenience to the public."

The Hon'ble Dr. Asutosh Mukhopadhyaya continued:—"I am surprised at the answer. I cannot persuade myself to believe that any inconvenience to the public can possibly result from such a procedure. I cannot, by any stretch of the imagination, think of such a concrete case. But I can very well imagine that publicity would be somewhat inconvenient to the General Committee if their actions are of a character which will not bear the light of day. As to unreasonable delay in getting copies of the proceedings, surely the Corporation would not complain of that. They will welcome them on the principle—better late than never. I venture to think, therefore, that the whole thing is absolutely indefensible, unless, indeed, the Hon'ble Member in charge of the Bill is prepared to take up the position that a veil of secrecy should be jealously drawn over the possible misdeeds of the executive."

The Hon'ble Babu Jatra Mohan Sen said:—"I have a similar amendment to propose to section 95 (*now* 101), *viz.*, that in sub-section (2), the words 'unless in any case they consider that inconvenience or unreasonable delay would result' be omitted. The Hon'ble Member in charge of the Bill has referred us to what passed during the meetings of the Select Committee. We are not concerned with what passed there; but all that we need say is whether this provision is or is not a salutary provision, whether power should be given to withold any information which is required by the Corporation, and whether it will not create friction between two authorities which is the anxious desire of Government to avoid. The General Committee will have the power of keeping the Corporation in ignorance of their proceedings, which certainly ought not to be allowed. In order to see that the authorities work harmoniously, it is desirable that a provision of this kind should be made, giving every facility

to the Corporation to receive any information they may desire to obtain in matters of this kind. I may add that a provision of this kind would be very satisfactory, and I think the Corporation should have an opportunity of discussing what took place in the General Committee. I have not proposed to add the words 'unreasonable delay,' lest it may be inferred that the General Committee may take offence; that is why I have not added those words. I have merely asked them to submit information, taking it for granted that that information would be forthcoming within a reasonable time."

The Hon'ble Mr. OLDHAM said:—"Sir, notwithstanding what Hon'ble Members have said on the subject, the general belief both in business and in official circles is that the visible sign and badge of subordination is that of its being compulsory on one authority to report to another authority, whether the superior authority has power to act on that report or otherwise. Considering, therefore, that our aim is to establish three co-ordinate authorities, if one of those authorities were always under compulsion to report to one of the others (and notwithstanding the provision which has been made that there should be, as far as possible, a moral obligation to report), it is absolutely necessary to retain in the law the definition which marks the independence of the General Committee and the fact that it is a co-ordinate authority. The Hon'ble Member for the University quoted, as an instance of a similar position, the position of the General Committee to Government. He said:—'I think surely the General Committee is not subordinate to Government.' My idea of the constitution under the Bill and the control under the sections which we passed the other day is quite contrary to that. It may not appear to be subordinate to Government, but the fact is that the General Committee will be thoroughly subordinate to Government in effect, and I think that has been most effectively secured. Then, Sir, the Hon'ble Member asked if we could give a concrete instance of the inconvenience which would result from this compulsory power of reporting being exercised. I think there are two recent instances. I take first the instance of the Town Hall. I think, if, while the enquiries into that very delicate matter had been going on, any superior authority had insisted upon a report being furnished to them for their information, there would have been the greatest possible amount of inconvenience to the public and to the General Committee, and, if the Corporation had insisted upon reading the lengthy papers of that enquiry, the effect would have been that of protracting and impeding the enquiry. Another instance which comes to my mind is the question of the settlement of the Salt Lakes country. I think, Sir, that, if a report had to be submitted to Government while that enquiry is in the state that it is now in, there would be considerable trouble and inconvenience to all concerned."

The Hon'ble MR. MACKENZIE said:—"I desire to confirm what the Hon'ble Mr. Oldham has said of the custom in business circles. It is unknown for shareholders to have the power of calling for the proceedings of Boards of Directors. It would be highly inconvenient that such should be the case. The Directors submit their report from time to time, and with that the shareholders are satisfied. I have no doubt that the General Committee will submit these proceedings when desirable, but I think in practice it should not be made a statutory obligation for them to do so."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"I must be permitted to express the regret that I feel at the very decided attitude which the Hon'ble Member in charge of the Bill has taken up with regard to this amendment, and indeed every amendment which may be said to hang upon it. The position so unfortunately taken up by the Hon'ble Member shuts out that spirit of compromise which, I submit, Sir, ought to be the dominating spirit of all our debates. My hon'ble friend was very emphatic, and said in his own very emphatic way—I took down his words—'I shall oppose every amendment which places the General Committee and the Chairman in a position of general subordination to the Corporation.' Sir, I venture to say that in very many matters both the Chairman and the General Committee are subordinate to the Corporation. For instance, in respect of all matters connected with financial considerations,

the Chairman and the General Committee are subordinate to the Corporation. Sir, I am perfectly well aware that in other matters the General Committee and the Chairman are independent of the Corporation, and this independence is maintained, not only in the municipal system as provided by this Bill, but is also to be found in the Bombay system. And, Sir, we have precisely the same section in the Bombay Act which I ask you to incorporate in the Bill. It does not, and cannot, interfere with the independence of the General Committee in any way. We have in Bombay the system of co-ordinate authorities as we have here. In Bombay the General Committee is independent of the Corporation as the General Committee will be independent of the Corporation under this law. Yet in Bombay they have this section,—the section which I want the Council to adopt,—and it does not interfere in any way with the independence of the General Committee. Sir, my friend has referred to my quoting the Bombay Act at my convenience, and not quoting it when it does not suit me. I think, Sir, we have both been following the same procedure. He, too, has been quoting the Bombay Act when it suits his convenience, and he has been discarding it when it does not suit his convenience. My friend has referred to the sections relating to contracts. I freely admit that those sections are in advance of the Bombay Act. But I am willing, Sir, to give up these sections and every other section in this Bill which may be in advance of the Bombay Act, if my hon'ble friend will adopt the Bombay Act in its entirety. I say this in the full consciousness that I am voicing the sentiments of the community to which I have the honour to belong. We are fully prepared to accept the Bombay Act with all its advantages and disadvantages. Is my hon'ble friend willing to give us the Bombay Act? He shakes his head: he is not prepared to accept my offer. It is, Sir, therefore useless to make a complaint against us that we quote the Bombay Act when it suits our purpose. He does precisely the same thing. I have been following his example—his great example—in this matter, and I am sure he will not find fault with me for so doing. I should very much regret it if the effect of my amendment would be to place the General Committee in a position of general subordination to the Corporation. You have already put it in a position of general subordination, because in the first part of section 95 *(1)* [now 101 *(1)*] you say 'the Corporation may at any time require the General Committee to furnish them with any extract from any proceedings of such Committee,' &c. It is only a superior body which can address an inferior body in that way with respect to any information which the latter may have at its disposal. Therefore, you have already placed the General Committee by this section in a position of subordination. I only want that in placing the General Committee in this position there should not occur those difficulties, those elements of friction, which might arise if any discretion were left to the General Committee. My hon'ble friend (Mr. Oldham) has referred to the case of the Town Hall, and to the case of the Salt Water Lakes which at the present moment is being investigated by a Committee. He says it would be highly inconvenient if, while that Committee was making its enquiries, the Corporation were to ask for any papers. I quite agree with that; but, Sir, I think we may trust to the good sense of the Corporation in this matter. I am confident that in the records of the Corporation you will not find one single instance where the Corporation has exercised its powers of supervision in such a way."

The Hon'ble Mr. Oldham said:—"I was replying to the Hon'ble Member for the University on that point."

The Hon'ble Babu Surendranath Banerjee said:—"Yes, I understand that, but what I say is that, as far as matters of this kind are concerned, you can trust to the good sense of the Corporation. As I said the other day and now repeat it, when a large number of persons meet together for the transaction of public business, there is a solemn sense of public duty pervading the assembly. That sense of public duty will prevent the Corporation from abusing the power we propose to bestow upon it. I am perfectly certain that, if this power be given to the Corporation with the safeguards with which it is proposed to fence it round, it will be rightly used."

The Hon'ble MR. APCAR, in reply, said:—"Sir, with regard to the concrete instances which have been suggested by my hon'ble friend Mr. Oldham, so far as I follow his illustrations, he contends that there would be inconvenience with regard to the point of time when the demand may be made by the Corporation, that is to say, when the General Committee might be required to submit any information. But, Sir, it is not intended that in the middle of an enquiry there should be information with regard to it supplied, or that these extracts of proceedings would then be called for. All that is required is that, when certain proceedings have terminated, information or extracts from proceedings should be furnished. The only question that would arise would be on the ground of delay, and the question would be whether it would be unreasonable delay, and it would not be unreasonable delay if the General Committee desired that there should be delay in submitting the proceedings until after the Sub-Committee, or whatever body of persons may be making this enquiry, had brought the enquiry to a termination. So that, in regard to the instances given, I am not very much impressed by them, for the reason that it is not contended that the proceedings or the extracts shall ever be submitted while enquiries are in progress, or while negotiations are pending. There would be no inconvenience when the final result had been arrived at, but it only could arise when the Committee may be in the middle of their enquiry. Well, as I have said, the question depends on delay, and it would not be unreasonable delay if information of this sort was not given till the enquiry was closed. We have had the Bombay Act in operation for a long time. If there were any serious risk in removing the disqualification we now seek to take away by our amendments, surely there might be some illustrations given us, so as to bring it home to us, that our demand is not one which should be complied with. I have heard no suggestion of this kind, but, on the contrary, I find that it would be for the public benefit that all information desired should be available. There is no reason that I have heard that has induced me in any way to think that the proposals we urge are such as should not be granted.

"With regard to Companies, why that is a matter between the shareholders themselves. They are hardly identical with Corporations, and I do not know that the analogy is applicable to the present question. But, if any shareholder desires information, in the result it is given to him; and I am not asking for information at any moment of time, but only after all negotiations and enquiries have terminated. The information is asked for on behalf of the public, and I hope our amendments on this occasion will not be refused."

The Hon'ble BABU SURENDRANATH BANERJEE's motion being put, the Council divided as follows:—

Ayes 6.

The Hon'ble Raja Bahadur Ranajit Sinha, of Nashipur.
The Hon'ble Babu Jatra Mohan Sen
The Hon'ble Babu Boikanta Nath Sen.
The Hon'ble Babu Surendranath Banerjee.
The Hon'ble Mr. Apcar.
The Hon'ble Dr. Asutosh Mukhopadhyaya

Noes 12.

The Hon'ble Mr. Buckley.
The Hon'ble Mr. Buckland.
The Hon'ble Mr. Handley.
The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Mr. Mackenzie.
The Hon'ble Mr. Spink.
The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
The Hon'ble Mr. Oldham.
The Hon'ble Mr. Baker.
The Hon'ble Mr. Bolton.
The Hon'ble Mr. Slack.

So the amendment was lost.

The motions by the Hon'ble MR. APCAR, the Hon'ble DR. ASUTOSH MUKHOPADHYAYA and the Hon'ble BABU JATRA MOHAN SEN being then severally put, the Council divided in the same way.

So the amendments were lost.

NEW SECTION.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the following section be inserted after section 95 (*now* 101):—

"95A. (*1*) The Corporation may at any time require the Chairman—

(*a*) to produce any record, correspondence, plan or other document which is in his possession or under his control as Chairman, or which is recorded or filed in his office or in the office of any municipal officer or servant subordinate to him;

(*b*) to furnish any return, plan, estimate, statement, account or statistics concerning or connected with any matter appertaining to the administration of this Act or the municipal government of Calcutta; or

(*c*) to furnish a report by himself, or to obtain from any head of a department subordinate to him and furnish, with his own remarks thereon, a report upon any subject concerning or connected with the administration of this Act or the municipal government of Calcutta.

(*2*) Every such requisition shall be complied with by the Chairman without unreasonable delay; and it shall be incumbent on every municipal officer and servant to obey any order made by the Chairman in pursuance of any such requisition:

Provided as follows:—

(*i*) if, on such a requisition as aforesaid being made, the Chairman declares that immediate compliance therewith would be prejudicial to the interests of the Corporation or of the public, it shall be lawful for him to defer such compliance until a time not later than the second ordinary meeting of the Corporation after he has declared as aforesaid;

(*ii*) if at such meeting, or any meeting subsequent thereto, the Corporation repeat the requisition, and it then still appears to the Chairman inexpedient to comply therewith, he shall make a declaration to that effect, and thereupon it shall be lawful for the Corporation to elect three Commissioners who shall form a Committee who shall engage to keep secret, save as hereinafter provided, the existence and purport of such documents and matters as may be disclosed to them; and to the said Committee the Chairman shall be bound to make known and to disclose all writings and matters within his knowledge, under his control, or available to him, and embraced within the requisition; and the said Committee, having taken cognisance of the information, writings and matters so laid before them, shall determine, by a majority in case of difference, whether or not the whole or any part, and which part, if any, of such matters ought to be disclosed to the Corporation or kept secret for a defined time, which decision shall be conclusive and shall be reported to the Corporation at their next ordinary meeting, at which meeting the Chairman shall be prepared to produce documents and to make any report or statement requisite to give effect to the decision of the Committee when called on to do so by the Corporation."

The Hon'ble MR. APCAR moved that the following section be inserted after section 95 (*now* 101):—

"95A. (*1*) The Corporation may at any time require the Commissioner—

(*a*) to produce any record, correspondence, plan or other document which is in his possession or under his control as Commissioner, or which is recorded or filed in his office or in the office of any municipal officer or servant subordinate to him;

(*b*) to furnish any return, plan, estimate, statement, account or statistics concerning or connected with any matter appertaining to the administration of this Act or the municipal government of Calcutta; or

(*c*) to furnish a report by himself, or to obtain from any head of a department subordinate to him and furnish, with his own remarks thereon, a report upon any subject concerning or connected with the administration of this Act or the municipal government of Calcutta.

(*2*) Every such requisition shall be complied with by the Commissioner without unreasonable delay; and it shall be incumbent on every municipal officer and servant to obey any order made by the Commissioner in pursuance of any such requisition:

Provided as follows:—

(*i*) if, on such a requisition as aforesaid being made, the Commissioner declares that immediate compliance therewith would be prejudicial to the interests of the Corporation or of the public, it shall be lawful for him to defer such compliance until a time not later than the second ordinary meeting of the Corporation after he has declared as aforesaid;

(ii) if at such meeting, or any meeting subsequent thereto, the Corporation repeat the requisition and it then still appears to the Commissioner inexpedient to comply therewith, he shall make a declaration to that effect, and thereupon it shall be lawful for the Corporation to elect one Councillor [who with the President of the Corporation and the Chairman of the General Committee (or, if the President of the Corporation is also Chairman of the General Committee, with the said President and one member of their own body elected by the General Committee)] shall form a Committee who shall engage to keep secret, save as hereinafter provided, the existence and purport of such documents and matters as may be disclosed to them; and to the said Committee the Commissioner shall be bound to make known and to disclose all writings and matters with his knowledge, under his control, or available to him, and embraced within the requisition; and the said Committee, having taken cognisance of the information, writings and matters so laid before them, shall determine, by a majority in case of difference, whether or not the whole or any part, and which part, if any, of such matters ought to be disclosed to the Corporation or kept secret for a defined time, which decision shall be conclusive and shall be reported to the Corporation at their next ordinary meeting, at which meeting the Commissioner shall be prepared to produce documents and to make any report or statement requisite to give effect to the decision of the Committee when called on to do so by the Corporation:

Or and for the General Committee to elect one of their body and for the two Councillors so elected to select a member of the Corporation, who together

Provided always that in the event of the two Councillors elected as aforesaid not agreeing in the selection of a third person to act with themselves as aforesaid, then it shall be lawful for the Corporation at their next meeting, whether ordinary or special, and with due notice in respect of such matter, to elect a Councillor who, on such election, together with the two Councillors previously elected, shall form a Committee for the purpose above mentioned"

The Hon'ble Babu Surendranath Banerjee said:—"This section proposes that the Corporation should have the right of requesting the Chairman to furnish it with any papers which may be in the possession of the Chairman, and it will be obligatory upon him to submit such papers to the Corporation. If the Chairman is of opinion that in the interest of the public such papers should not be laid before the Corporation, then he may decline to do so; and if the Corporation again repeats its request, then a certain procedure is suggested, *viz.*, three Commissioners are to be appointed, they are to confer with the Chairman upon the matter, the Chairman is to disclose the facts of the case to them, and the Corporation will be bound by the decision of the three Commissioners. Sir, I do not see any reason why this amendment should not be accepted. It is perfectly consistent with the other provisions of the Bill. It is not derogatory to the authority of the Chairman; it does not interfere with his every-day work. The Chairman remains an independent municipal authority; the Corporation also remains an independent municipal authority. All that is proposed is that the Corporation should have power to require the Chairman to submit papers which the Corporation may wish him to submit. That is the Bombay section. There the system of co-ordinate authorities exists, and yet a provision like this has not been found in any way to interfere with the smooth working of the municipal system in Bombay. I trust that my hon'ble friend will not in connection with this amendment take up that decisive attitude to which I previously referred with some regret. I appeal to my friend to look at the matter from the standpoint of public interest rather than from the standpoint of official subordination. The question which we have to decide is whether, if a section like this finds a place in the municipal law, it would be placing the Corporation in a better position than the Corporation now is, to discharge the various duties which will be entrusted to it under the Bill. The object of the amendment is not the subordination of the Chairman. The object is to place the Corporation in possession of information which the Corporation may wish to have in order that the Corporation might be in a position to discharge the grave and responsible duties which will be imposed upon it denur the law. I do not seek to exalt the Corporation. I want to place the Corporation in a position to discharge satisfactorily the important duties entrusted to it. If the Corporation has the information, it will be able to discharge these duties satisfactorily. If it has not the information, it will not be able to do justice to them. My hon'ble friend Mr. Oldham said that reporting is a

visible badge of subordination. This is not a question of reporting at all; it is a question of giving information. Sir, I hope my hon'ble friend will see his way to accept this amendment."

The Hon'ble MR. APCAR said:—"My amendment, Sir, is slightly different from my hon'ble friend's. In the middle of proviso No. 2 my hon'ble friend suggests a committee of three in the case of the Chairman declaring that compliance with the requisition would be inconvenient. My hon'ble friend thinks this Committee should be composed of three members of the Corporation. My suggestion is that one of the three should be elected by the General Committee, another of the three by the Corporation, and that these two should select a third person to complete the Committee; and there is a proviso to meet the contingency of the two who have been elected, one by the Corporation and the other by the General Committee, not agreeing as to the third. Then in such a contingency I propose that it shall be lawful for the Corporation at their next meeting—whether ordinary or special—to elect a third person to form the complement of the Committee. I hope that with regard to this section the Hon'ble Member in charge of the Bill will not adopt the uncompromising attitude that he assumed in regard to the last amendment. Under the Bill, as it is framed, no information is available at all with regard to those duties which are set apart for the Chairman to perform. Under section 95 (*now* 101), to which we have just now moved amendments, the Corporation may demand information, and then it is left to the discretion of the General Committee to give such information or not. But with regard to the Chairman's duties, it is a closed book. The public cannot in any way obtain any information with regard to what he may have been doing. Sir, it is not a question, I assure my hon'ble friend, of in any way seeking to override the Chairman, nor does the question arise here with regard to the subordination of the Chairman. It is in the public interest that this amendment is sought to be introduced, and even if in such circumstances a man is placed in subordination, having in view that the whole of this Act is for the public interest and not for the purpose of exalting any individual, that the Chairman ought to yield, and that all matters with which he may deal should be subject to information being supplied with regard to them. In the present Bill the whole attitude of Government is to keep the Corporation in the dark, if either of the so-called co-ordinate authorities desire to withhold information. I do not seek in any way to place any orders on the Chairman or to place him in subordination, but all I want is that, whatever he may be doing, it should be possible for information to be obtained with regard to it. I do not seek for any power under which any individual could move to gratify a personal whim. It is when the Corporation move as a body, when by a vote the Corporation require certain information, then that information should not be withheld."

The Hon'ble MR. BAKER said:—At first, Sir, I was disposed to think that it might have been possible to grant this power provided that my hon'ble friends had seen their way to limit the exercise of it, if they had agreed to confine themselves to matters reserved by law for the decision of the Corporation, and if they gave the Chairman power to withhold any paper or information in his discretion in the same way as is permitted to the General Committee. I said something to that effect to the Hon'ble Mr. Apcar when he made a reference to me on the subject. Mr. Apcar was unwilling to agree to that modification, and the matter dropped. Since then, the matter has been further considered by Government, and Government are now of opinion that this amendment cannot be accepted in any way, not even in the modified form which I at first thought would have been permissible. The right which my hon'ble friends seek to obtain is perfectly unnecessary. The Hon'ble Mr. Apcar has said that there are no means by which the Corporation or the public can get any information as to the Chairman's acts. He said the Chairman's proceedings were a closed book. Well, Sir, that is entirely incorrect. The Chairman is President of the Corporation. He presides over the General Meetings. Every individual Commissioner has the right of interpellation, and it is open to any one of them or any number of them to ask the Chairman for any information upon any subject connected with the discharge of his duties, or connected with any branch of the municipal administration. The Chairman can answer these questions, he can

give all the information that he thinks fit, and I am certain that he will always give the utmost information in his power, which, in his opinion, may be given without detriment to the public interests. I was disposed to think, Sir, that in practice not very much evil would have resulted from granting this power in the limited way in which I first suggested it, because the party or section of the Commissioners which is likely to indulge in excessive interference will, I hope, not be strong enough to bear down the party of order unless they have a very strong case. But, as a matter of principle, I object to giving the Corporation the power to call for reports and explanations from the Chairman in matters which are outside their province, and which are within the discretion of the Chairman himself. It is true that the amendments do not expressly ask for power to pass orders on these reports or explanations. But what is the object of calling for information unless it is in contemplation to interfere or seek the right to interfere? If the Corporation is in need of information on any legitimate subject for any legitimate purpose, the Chairman will always be ready to furnish it to the utmost of his ability. I would remind the Council that what the hon'ble movers of the amendments really would like is to place both the Chairman and the General Committee in complete subordination to the Commissioners as they are under the existing Act."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"Certainly not in connection with this amendment."

The Hon'ble MR. BAKER said:—"That is what the Hon'ble Members would really like. The Council has decided against them on that point, and I regard this amendment as an attempt to make some advance in that direction."

The Hon'ble MR. OLDHAM said:—"I have considerable sympathy with the objects of this amendment, though I must vote against it as it is formulated. My hon'ble friends have referred to the uncompromising attitude of the Hon'ble Member in charge of the Bill. I really think that was a little unjust. I must remind my hon'ble friend, Babu Surendranath Banerjee, that, as the Bill originally came down to us in Select Committee, there was no provision whatever for what section 95 (*now* 101) provides for, and that the Select Committee, headed by my hon'ble friend the Member in charge of the Bill, accepted the suggestion that such a provision should be made, and that was the compromise in this matter."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"I freely acknowledge that in the Select Committee my hon'ble friend in charge of the Bill showed much more of the spirit of compromise than I am sorry to say he has exhibited in this Council. Sir, I am free to make the admission that many important points were conceded at the request of my hon'ble friend Babu Norendra Nath Sen and myself. I desire most frankly and freely to make that acknowledgment, subject to the reservation to which I have just referred. My hon'ble friend has observed that our object is to place the Chairman and the General Committee in a position of subordination to the Corporation. He has rightly interpreted our views, and, I think, Sir, the matter is so important that we ought to take advantage of every opportunity which presents itself to obtain some instalment of that principle which we conceive to be the basal principle on which the Calcutta Corporation ought to rest. That has been the principle upon which the Corporation of Calcutta has always been based. Since the institution of the Corporation in 1863 the authority of the Commissioners has always been paramount; and I have not the slightest hesitation in saying that it is because of this paramountcy of the Corporation that you see such improvement in the working of the Municipality of Calcutta. I think, Sir, you are embarking on an experiment which is full of peril. That being the view we have taken, *viz.*, that it is important the Corporation should be the paramount authority, and that view having been vetoed by this Council, I think it is only our duty that we should obtain a modification of the principle so far as we can. I think, Sir, the Council will sympathise with us in the efforts we make in a lawful and constitutional way to obtain a modification, however slight it may be, of a principle which we consider to be the most essential principle in a body like the

Corporation of Calcutta. My friend has observed that it will always be open to the members of the Corporation to obtain information from the Chairman by asking questions. Well, Sir, I am in the habit of asking questions addressed to my hon'ble friend over there, and I desire to make a confession. I hope my hon'ble friends will not be offended if I say that sometimes the replies which I obtain in this Council represent the minimum of information with the maximum of words. I ask for information, but the information is whittled down, amidst a whirlwind of words. At other times I am better treated; but where is the guarantee, Sir, that the Chairman will not give the minimum of information with the maximum of verbiage? What guarantee is there that he will give full and satisfactory answers to the questions asked? There is no guarantee to that effect. Then, Sir, my hon'ble friend observes that the object of calling for information is to interfere. How are the Commissioners to interfere? You give them no opportunity to interfere. They cannot pass any resolution upon the information they call for; such a resolution would be out of order. And the Chairman is there; he will simply say as a point of order: 'I rule you out of order, because you are trespassing upon my constitutional privileges with which you have nothing whatever to do'; and he will bow and sit down, and there will be an end of the matter. Interference is absolutely out of the question. All that may be done is to exercise a little of that moral pressure which, supported by an enlightened and educated public opinion, ought to be the bulwark of a body like the Corporation of Calcutta. I am sorry my hon'ble friend is not prepared to accept this amendment, which, I understand, he was at one time willing to accept."

The Hon'ble MR. APCAR, in reply, said:—"Reference has been made by the Hon'ble Member to something he was willing to accept when I spoke to him on the subject. With regard to the concession he refers to, I do not see that there is any benefit to be derived from a provision of the kind. If we are entitled to discuss any matter, we are entitled to have such information as can be available for us in such matter, so that the concession my hon'ble friend was willing to make was really no concession at all, if our right of asking for information was limited to only such matters as those which we may have the right to discuss in the Corporation. I confess, however, I did not quite understand even so much in the brief conversation that I had with my hon'ble friend."

The Hon'ble MR. BAKER said:—"It was not a conversation; it was in writing."

The Hon'ble MR. APCAR said:—"Was it? Well, I had forgotten then. I thought it was a conversation. I know letters passed between us which led up to an interview when I spoke to the Hon'ble Member on the subject of this amendment. I went over to see my hon'ble friend on the subject, but I do not remember that anything was formulated in the manner in which my hon'ble friend states; but I accept what he says as correct. I ask to be permitted to say that I am not seeking a personal benefit in this question. I am asking for a concession for the benefit of the public. Whether I personally agreed, or did not agree, at a particular moment, to a proposal of the Hon'ble Member in charge of the Bill ought not to make any difference in the attitude of the Government in such an important question. I wish to speak for myself with regard to the object of this amendment which I propose. I seek publicity. I do not seek to put any one in a position of subordination to another authority at all. But I think that, if there is a matter which has excited interest, the Corporation should be able to act on behalf of the public in order to elicit information. I do not want anything more than that. I do not seek in any way to place the Chairman in subordination to any one. His place is to be defined in the Municipal law, and I must have regard for the law as it is enacted, and it is not my idea to get round the law in any sort or kind of way. My purpose is this: that there should be information available for the public in any matter in which there is public interest, and in this there is no desire or idea of placing any one in subordination. My hon'ble friend says that the Chairman will always be ready to give information. Well, my own experience has been different. On some points I have found the Chairman has not been ready to give information,

and he has resented an endeavour made to seek information. I remember with regard to a certain verandah question, with reference to which there was a standing order obtained after four years' struggle, through the assistance of Dr. Macleod, who had been Health Officer, that there should be no verandahs at all in thoroughfares which were less than a certain width; over footpaths in thoroughfares of a certain greater width there should be nothing more than simple uncovered verandahs. Whenever such questions were brought up for sanction, they were submitted with the remarks of the heads of the departments. In the particular instance to which I refer, the Engineer gave his opinion in a note. It was against the concession then asked for, but he was eventually induced to withdraw that opinion, and to write another of a very colourless character, but still not opposing. The Health Officer was so strongly against it that he refused, under any circumstances, to support the proposal of the Chairman; and when we sought to obtain access to this information, there was very strong resentment shown with regard to it by the Chairman.

"I may mention another question, also, the question of the Watgunge Depôt, in connection with which certain temporary arrangements were made in anticipation of the permanent Suburban Drainage scheme. The Engineer had obtained leave to Europe, and had been given one month's extra leave in order that he might consult with Mr. Baldwin Latham, the eminent Sanitary Engineer, with regard to this particular question. We had been advised by our Engineer so far back as 1890 that the pumping power at Palmer's Bridge Station was insufficient for Calcutta alone. Mr. Baldwin Latham had subsequently reported to the same effect. In the absence of the permanent Engineer, his *locum tenens* proposed a scheme under which the sewage of no less than 160,000 more inhabitants from the suburbs were to be thrown into the Calcutta drains to be lifted by the pumping engines which were thought insufficient for Calcutta alone. Then, when this matter was brought up before the Corporation, some of the Commissioners, who had been taking an interest in the question of the drains in Calcutta, were alarmed by the idea of having so much extra stuff being thrown into the Calcutta drains for the pumping engines to deal with. Information was sought, and it was given to this effect: that the pumping engines were able to dispose of this extra quantity, and in support of this there was, with regard to certain dates, information given as to the work that had been done by the engines. Two European Commissioners,—one an elected and the other a nominated Commissioner,—in the course of their study of the very difficult question of the drainage, went down to the pumping station, and found there the book with the reports that had been made with regard to these particular dates, and they accidentally found that there had been a mistake made in the returns that had been relied upon. That was very important information that was elicited, and had a great influence on the Commissioners when the voting on the subject came up for decision. This information will not be available under the law as framed by the Bill, but will be available if the amendment is accepted.

"Again, this Watgunge Depôt, the scheme of which had been rejected by the permanent Engineer as being one which for many engineering difficulties was inadvisable, was advocated by his *locum tenens* and strongly supported by the Chairman for adoption. Now, the permanent Engineer had been known to be opposed to the scheme, and an elected Commissioner, remembering this, sought for and was able to obtain information which shwoed that the Engineer had stated that the sewers between Kidderpore Bridge and Russa Road were insufficient to carry away the extra amount it was desired to put into them. When the permanent Engineer returned, he refused altogether to entertain the idea of this Watgunge scheme. It was a most important matter that we should have the information, in order that we might judge whether we should adopt this scheme which was pressed for by the Chairman.

"Under the law as proposed by the Bill, the Chairman may reply to an interpellation or he may not. There is no kind of statutory authority given to the Corporation to enable them to obtain any information. So in matters such as these, it is because of my experience in regard to the actual working of the administration that I ask for such powers as I now seek to

obtain for the Corporation. The interest of the public is of paramount importance, and it, surely, is their right to obtain important information affecting their welfare. It is not for the purpose of endeavouring to make the Chairman subordinate to the Corporation, unless indeed the Chairman must be allowed to do whatever he has once decided upon, whether he is right or wrong, even though he is about to act upon erroneous information and to the serious peril of the public, and any attempt to get bare information about what is being done is to be regarded as placing the Chairman in subordination, and the amendment is to be rejected on such a ground. In Bombay the information is granted, and there is no kind of jealousy with regard to such a subject as this. There is no idea entertained there that it is offensive to require the Chairman to give information about what he is doing. It is in the public interest alone that I seek the acceptance of this amendment. I do not want, by this amendment, in any way to make the Chairman's position different to that which has been deliberately conceived by Government to be his position under this Bill when enacted."

The motions being severally put, the Coucil divided in each case as follows:—

Ayes 5.

The Hon'ble Babu Jatra Mohan Sen.
The Hon'ble Babu Boikanta Nath Sen.
The Hon'ble Babu Surendranath Banerjee.
The Hon'ble Mr. Apcar,
The Hon'ble Dr. Asutosh Mukhopadhyaya.

Noes 13.

The Hon'ble Mr. Buckley.
The Hon'ble Mr. Buckland.
The Hon'ble Mr. Handley.
The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Raja Bahadur Ranjit Sinha, of Nashipur.
The Hon'ble Mr. Mackenzie.
The Hon'ble Mr. Spink.
The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
The Hon'ble Mr. Oldham.
The Hon'ble Mr. Baker.
The Hon'ble Mr. Bolton.
The Hon'ble Mr. Slack.

So the amendments were lost.

SECTION 102.

The Hon'ble MR. APCAR moved that clause (*b*) of section 95C (*now* 102) be omitted.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA also moved that clause (*b*) of section 95C (*now* 102) be omitted.

The Hon'ble MR. APCAR said:—"Section 95C (*now* 102) deals with the validation of acts and proceedings, and enacts that—

'No act done or proceeding taken under this Act shall be questioned on the ground merely of—

* * * * * * * *

(*b*) any Commissioner having voted or taken part in any proceeding in contravention of the proviso to section 31 (*now* 39).'

"Now, suppose a Commissioner, although he is forbidden to speak or vote on such a subject, does actually do so; under this clause, it will not affect the validity of the proceeding. I say, have some provision which shall operate to enforce a penalty, with practical effect, on a breach of this particular law. The Commissioner will have acted in a manner forbidden by the law; then place him in exactly the same position as any person who directly by himself, or by his partner or employer, has a share in any contract or employment connected with the Corporation. Otherwise, it seems to me the proviso may become a dead letter."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"The first observation which occurs to me with reference to this matter is that the provisions of the proviso to section 31 (*now* 39) which are extremely salutary should not be frittered away in this fashion. I confess it seems to me to be absolutely meaningless to say with solemnity in one section that you shall not do this or that, and in another section to say that, if you do that in contravention of the direct provisions of the law, there shall be no penalty whatsoever. I submit that this is making the provisions of section 31 (*now* 39) absolutely nugatory, and practically inviting people to trifle with the law. Let us examine for a moment the corresponding provisions of similar Acts; and in order that I may not be charged with quoting such authorities only as are in my favour, the first authority I refer to is section 33 of the present law. I am bound to confess that in this matter the present Bill is a faithful copy of the old law. It has changed and destroyed many things, but has spared this from its ravage. But the analogy of all the other Acts will show that in this respect our Act is singular. If you will look for a moment at the Bombay Act, sections 51 and 52, you will find the provisions regarding the validity of acts and proceedings, which I need not read out at length. They correspond in substance to our section 95C (*now* 102), clause (*a*), but I cannot find in the Bombay Act any provision corresponding to clause (*b*)."

The Hon'ble Mr. Baker said:—"The word 'disqualification' covers it. That appears in the Bombay Act."

The Hon'ble Dr. Asutosh Mukhopadhyaya continued:—"The interpretation which the Hon'ble Member seeks to force upon the Bombay Act is absolutely inadmissible, as will be manifest if you read all the provisions together. Then let us look to the English Act from which all these provisions have been only too faithfully reproduced (45 & 46 Vict. Chapter 50, section 22). First of all section 12 specifies the disqualifications for being a councillor. Then section 22, sub-section (*3*), provides that a councillor shall not vote or take part in the discussion of any matter in which he has a pecuniary interest; this is followed by sub-section (*4*), which lays down that no proceeding of the Council shall be questioned on account of any vacancy in their body. But let us not forget that it stops with the word 'vacancy,' and does not go on to add that the proceedings will be valid even if there be an infraction of the provisions of the preceding clause. I venture to affirm, therefore, that both reason and precedent are against the course we are asked to adopt."

The Hon'ble Mr. Baker said:—"The Hon'ble Member has omitted to refer to section 42 of the English Municipal Corporations Act. It is as follows:

'42. (1) The acts and proceedings of a person in possession of a corporate office, and acting therein, shall, notwithstanding his disqualification or want of qualification, be as valid and effectual as if he had been qualified.

'(2) An election of a person to a corporate office shall not be liable to be questioned by reason of a defect in the title, or want of title, of the person before whom the election was had, if that person was then in actual possession of, or acting in, the office giving the right to preside at the election.

'(3) A burgess roll shall not be liable to be questioned by reason of a defect in the title, or want of title, of the mayor or any revising authority by whom it is revised, if he was then in actual possession and exercise of the office of mayor or revising authority.' "

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"That only refers to the validity of election, and has not the remotest bearing upon the question now at issue."

The Hon'ble Mr. Baker said:—"The word 'councillor' includes every member of an English Corporation. It includes the mayor, the aldermen and the councillors. The section, as it stands in the Bill, is the law in Calcutta now, and I understand it is also the law in the Punjab. I was also under the impression that it was the law in Bombay, but the Hon'ble Member may be right in his interpretation of the Bombay Act."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"I think it is not the law in the Punjab."

The Hon'ble MR. BAKER said:—"I understand so. But, quite apart from that, there is no ground for making the change. I may point out how exceedingly inconvenient it would be to introduce this disqualification. Supposing at a meeting at which some contract was sanctioned some Commissioner had taken part who had no right to take part. Suppose that works were sanctioned and taken up by the contractors and partly done, and then some months afterwards suppose somebody discovered that this gentleman was disqualified to the extent mentioned in this clause (*b*). Would that be a justification for invalidating or calling in question the proceedings of the meeting? It would be impossible. It might run the Corporation in for I do not know how much in the matter of damages."

The Hon'ble MR. APCAR, in reply, said:—"Sir, the same effect would be consequent upon any one taking part in the proceedings who comes under sub-section (*1*) of section 31 (*now* 39), if by some oversight or other a Commissioner were to take part in these discussions or vote with regard to contracts where he has no right to do so. With regard to what my hon'ble friend has said about the inconvenience which would result, I do not think that that is a sufficient reason for allowing this particular clause to remain. It may be that the interested Commissioner has himself given practically the casting vote which decided the matter. It may lead to applications in the Courts by those who are affected by such a vote, on the part of any one being dismissed from employment, or in some question of that kind; and it would lead to the Corporation being bound by a decision once arrived at without having the power of revising what has been done."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, in reply, said:—"With regard to the law in the Punjab I find there is nothing in the Punjab Act similar to this."

The Hon'ble MR. BAKER said:—"Then I withdraw that statement."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA continued:—"With regard to section 42 of the English Act, I repeat that it has nothing to do with this matter. That applies only to the case of persons disqualified from holding an office. If the terms of section 12 and section 42 are compared, it is quite clear that they are to be taken together. I do not see that there is any protection when a member of the council votes in contravention of the clear provisions of section 22, sub-section (*3*).

The motions were then put and lost.

SECTION 112.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the word "Chairman" be inserted after the words "by the" in line 1 of clause (*a*) of section 104 (*now* 112).

He said:—"This is a very small matter, Sir. It refers to the signing of cheques for payment. The Bombay Act (section 113) requires that these cheques should be signed by the Chairman. Our present law is different. Cheques are signed by the Vice-Chairman and the Secretary. I think, in a matter like this, the responsibility being a financial responsibility, the Chairman ought to be associated with the other signatories. I have no very strong feeling about the matter, but I think, this being a financial question, it would be an additional safeguard if the Chairman's signature were associated with the signatures of the Vice-Chairman and the Secretary."

The Hon'ble MR. BAKER said:—"I cannot think the Hon'ble Member is serious in asking that the Chairman should sign all cheques in addition to the Vice-Chairman and the Secretary. There is no precedent for such a thing; it is not the law now, nor is it necessary. In Bombay it is not the case. There the cheques are signed by the Municipal Commissioner, as there is no Vice-Chairman; but there are not three signatures to each cheque."

The motion was put and lost.

The Hon'ble Babu Surendranath Banerjee also moved that for the words "by a member of the General Committee" in lines 5 and 6 of clause (*b*) of section 104 (*now* 112), the following be substituted :—

"by some other person appointed in that behalf by the Chairman with the consent of the General Committee."

He said :—"This is a recommendation of the Corporation. They say there will be considerable difficulty in getting a member of the General Committee to do this work. I think my hon'ble friend must agree that it will lead to great inconvenience in practice."

The Hon'ble Mr. Baker said :—"This is a small matter, and I accept it. I would point out that it is only in the event of the illness or absence of the Vice-Chairman and the Secretary that a member of the General Committee would have to sign."

The motion was put and agreed to.

Section 113.

The Hon'ble Babu Surendranath Banerjee moved that section 105 (*now* 113) be omitted.

He said:—"Section 105 (*now* 113) refers to the opening of an account outside the limits of Calcutta. Well, Sir, we have not got such an account now, and have never felt the inconvenience of not having such a section. They have it in Bombay, but that is no reason why we should have it here. The Corporation has now been in existence since 1863, and we have never had an account with any Bank outside the limits of Calcutta, and we do not need one now. I do not see why we should have a section like this which might offer a temptation to somebody to try to open such an account."

The Hon'ble Mr. Baker said :—"I think it is better, Sir, that the Corporation should have this power, and I may mention that the Port Commissioners here have a similar power. Among other accounts, they have an account in England. They use that account to draw upon for payment of stores and other articles which have to be imported for their works from England. I do not know that it is likely to be equally necessary in the case of the Corporation. The Corporation do not use the same amount of stores and machinery and articles of that kind as the Port Trust, but they do use a good deal of machinery and other imported articles, such as pipes, &c., for their waterworks and drainage works, and it is perfectly possible that they might find it useful to have an account in England."

The Hon'ble Babu Surendranath Banerjee, in reply, said :—"If ever there was an occasion for opening an account in London it is now, when the Corporation has embarked upon some of the largest contracts they have ever entered into. They have not yet felt the need for such an account, and are not likely to feel it in the future. I do not know that the matter is one of importance or that I should press it if my hon'ble friend has a strong opinion in regard to it."

The Hon'ble Mr. Baker said:—"I have no strong opinion, but I think it is a useful power to have."

The motion was then put and lost.

The Hon'ble Babu Jatra Mohan Sen moved that in section 105 (*now* 113), line 3, the words "and subject to the control of the Corporation" be inserted after "General Committee."

He said:—"The statutory provision contained in section 103 (*now* 111) is that the Corporation should have an account only with the Bank of Bengal. If any other account is to be opened with any other Bank outside Calcutta,

I think the Corporation should also have a voice in the matter. All that I propose is that the Corporation should have a general power of control in a matter like this which is to open an account with a separate Bank outside Calcutta."

The Hon'ble MR. BAKER said:—"This is a matter of very small importance, Sir. I do not wish to oppose it, and, if this amendment had been moved by one of the Hon'ble Members connected with the Corporation, I should have been ready to accept it. But I am not sure if the Hon'ble Babu Jatra Mohan Sen really understands the matter. If the Hon'ble Members who represent the Corporation support it, I am not prepared to object. But I would add, with regard to the abstract question of opening an account, that the power would be left in the hands of a Board of Directors of a Limited Liability Company. It would not be given over to the shareholders. Therefore, I think the matter should be left to the General Committee; but, if the Hon'ble Members who represent the Corporation support the matter, I am not prepared to oppose."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I am certainly in favour of the amendment. I think it is as well that a matter of this sort should be under the control of the Corporation."

The motion being put, the Council divided as follows:—

Ayes 10.	*Noes 9.*
The Hon'ble Mr. Handley.	The Hon'ble Mr Buckley.
The Hon'ble Raja Bahadur Ranajit Sinha, of Nashipur.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Dr. Asutosh Mukhopadhyaya.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Mr. Mackenzie.
The Hon'ble Mr. Apcar.	The Hon'ble Mr. Oldham.
The Hon'ble Mr. Spink.	The Hon'ble Mr. Baker.
The Hon'ble Sahibzada Mahomed Bakhtyar Shah.	The Hon'ble Mr. Bolton.
The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.	The Hon'ble Mr. Slack.
The Hon'ble the President.	

So the amendment was carried.

SECTION 114.

The several motions for the omission of section 93 (*now* 100) having been lost on a previous occasion, the Hon'ble BABU JATRA MOHAN SEN, by leave of the Council, withdrew the motion standing in his name, that clause (*b*) of section 106 (*now* 114) be omitted.

SECTION 116.

The Hon'ble MR. BAKER moved that in section 108 (*now* 116) the words "sanctioned by a municipal authority" be substituted for the words "sanctioned by the General Committee."

He said:—"This was a clerical error in the Bill. The section as it stands would require the Vice-Chairman or whoever signs cheques to satisfy himself that the cheque is drawn for a purpose, or for a work specifically sanctioned by the General Committee. But the General Committee is not the only municipal authority which has the power to sanction works. The Chairman has power to sanction small works, and the Corporation has to sanction large ones. Therefore, it is necessary to make the wording more general."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I beg to support the amendment."

The motion was put and agreed.

SECTION 119.

The Hon'ble BABU SURENDRANATH BANERJEE moved that for the words "General Committee" in lines 3 and 4 of sub-section (3) of section 112 (*now* 119), the word "Corporation" be substituted.

He said:—"It is a mere matter of deposit of investments, and the Corporation fixes the Banks. Therefore, it seems to me that in this case the Corporation also should fix the deposits. Section 112 (*now* 119) is as follows:—

'112. (*1*) Surplus moneys at the credit of any of the Municipal Funds which cannot immediately or at an early date be applied to the purposes of this Act, or of any loan raised under this or any former Act, may from time to time be deposited at interest in the Bank of Bengal, or invested in any of the securities or debentures mentioned in section 130 (*now* 135), sub-section (*1*).

'(*2*) All such surplus moneys which it is necessary to keep readily available for application to the said purposes, and all such surplus moneys which cannot, in the opinion of the Chairman, concurred in by the General Committee, be favourably deposited or invested as aforesaid, may be deposited at interest at any bank or banks in Calcutta which the General Committee may, subject to the control of the Corporation, from time to time select for the purpose.

'(*3*) All such deposits and investments shall be made by the Chairman on behalf of the Corporation, with the sanction of the General Committee; and, with the like sanction, the Chairman may at any time withdraw any deposit so made, or dispose of any securities, and re-deposit or re-invest the money so withdrawn, or the proceeds of the disposal of such securities; but no order for making any deposit, investment, withdrawal or disposal under this section shall have any validity unless the same be in writing, signed by the Chairman and the Secretary.

'(*4*) The loss, if any, arising from any such deposit or investment shall be debited to the Municipal Funds.'

"The banks are selected subject to the approval of the Corporation. Therefore, I say that all deposits and investments shall be made by the Chairman on behalf of the Corporation and with the sanction of the Corporation instead of the sanction of the General Committee."

The Hon'ble MR. BAKER said:—"I think there is some misapprehension. The manner in which investments are to be made of surplus funds and the precise securities in which money may be invested are laid down in the Bill itself, in section 130 (*now* 135). That is absolutely fixed, and no one has any discretion. If any money is not to be deposited in the Bank of Bengal, it is for the Corporation to select the Banks in which the deposit may be made. All that remains is the mechanical routine work of making the deposit or investment. There is nothing further to be done. That is work which would be quite impossible for a large deliberative body to carry out. It really ought to be done by the Chairman, and the work in fact will be done by the Chairman; but, as it involves a certain amount of discretion, he is to require the sanction of the General Committee. It is quite unnecessary and superfluous to require the sanction of the Corporation in addition."

The Hon'ble BABU SURENDRANATH BANERJEE, then, by leave of the Council, withdrew the amendment.

SECTION 114.

The Hon'ble BABU SURENDRANATH BANERJEE moved that clause (*c*) of section 114 (*now* 121) be omitted.

The Hon'ble BABU SURENDRANATH BANERJEE also moved that, if the last motion be lost, for the words "two lakhs" in clause (*c*) of section 114 (*now* 121), the words "one lakh" should be substituted.

He said:—"This is a matter of considerable importance, and I think the two amendments may be taken together. Clause (*c*) of section 114 (*now* 121) provides that the General Committee shall allow—

'(*c*) for a cash balance at the end of the said year of not less than two lakhs of rupees.'

"Under the existing law no statutory obligation is imposed upon the Corporation to provide a fixed sum as an annual cash balance. The Corporation is at liberty to provide for any cash balance it may think fit, and I think it will be admitted by those best acquainted with the working of the Corporation that the Corporation has always made ample provision in this respect. No difficulty has ever arisen within my knowledge owing to absence of a provision such as is now proposed. Now, Sir, you take away the discretion from the Corporation and you say that the Corporation must at least provide a cash balance of two lakhs of rupees. Sir, I desire to point out in the first instance that in the original Bill, instead of a cash balance of two lakhs, we had a cash balance of one lakh of rupees; and then it seems that my hon'ble friend, the Member in charge of the Bill, after some conference with the Municipal Executive, came to the conclusion that instead of one lakh of rupees the cash balance ought to be two lakhs. Sir, I desire that in a matter of this kind the Corporation should be left absolutely free. The Corporation has not abused its discretion in this respect in the past, and it may be trusted not to abuse it in the future. Nay more, there is positive risk in a hard-and-fast rule on the subject; and, Sir, I desire to refer to the circumstances of the Government over which you preside. Under the orders of the Secretary of State the Bengal Government is obliged to have a cash balance of 20 lakhs of rupees. It is not a statutory obligation, and I think it is fortunate that it is not, because one year—and I think the fact will be in the recollection of most Members—our cash balance dwindled down to the sum of five lakhs of rupees. I should like to know what the position of Government would have been if there was a statutory obligation making it a duty by law that the cash balance should be fixed at the minimum sum of 20 lakhs of rupees. I think Government would have been placed in a position of considerable difficulty. You will place the Corporation in a position of considerable difficulty by laying down a hard-and-fast rule of this kind. Such a rule has not been found necessary; the financial work of the Corporation has gone on satisfactorily enough without it; and, that being so, it seems to me that it would be desirable to leave to the Corporation the discretion which it at present enjoys. Why should we lay down a rule to the effect that the cash balance must not be less than two lakhs of rupees? The Corporation may be trusted to leave a cash balance which would be amply sufficient for all purposes. That is the experience of the past, and the experience of the past ought to guide us in the future. There may be occasions—we cannot absolutely anticipate the future—when it might be difficult to have a cash balance of two lakhs; but if you have a hard-and-fast rule you will place the Corporation in a position of serious difficulty, perhaps at a time when its finances are not in a satisfactory condition."

The Hon'ble Mr. Baker said:—"This is a practical question. I admit that in the present Act there is no provision for any fixed closing balance. In Bombay, however, there is such a provision. In Bombay the Corporation is required to provide a closing balance of one lakh of rupees. Is it not inconsistent with sound finance that the Corporation should be at liberty to frame its budget in such a way that it should not have a suitable working balance? The Hon'ble Babu Surendranath Banerjee has told us that the Local Government is required under the orders of the Government of India to have a closing balance of 20 lakhs. That is so, and we always endeavour to work up to it. But how could there possibly be any statutory obligation on the Local Government? The thing is inconceivable. But here, in settling the constitution of the new Municipality, we are laying down rules for its guidance in all respects, including the provision of funds and its financial arrangements; and it seems an essential part and a most important part of those financial arrangements that we should prescribe some closing balance to which they should be required to work up. The Hon'ble Member has said that the Corporation has not abused its discretion in the past. That is so. I freely admit that; but I am informed that they have not always provided for a genuine working balance. I am informed that, although they have frequently shown an apparently larger balance than we now propose, that was only done by transferring a part of their capital account to the revenue account. That is what I understand is the case. I speak subject

to correction; but I am informed that it is so. If that is the case, if it has often been the case, it is distinctly indicative of unsound finance, and, therefore, it is all the more incumbent upon us to make suitable provision for a real closing balance in this legislation.

"Then, Sir, with regard to the amount which should be fixed. The Hon'ble Member has rightly told us that in the original Bill it was proposed to take one lakh as the closing balance. But the Vice-Chairman, who is generally speaking in chargê of the municipal accounts, represented to us that a balance of one lakh was not sufficient; for this reason: that the monthly amount which has to be disbursed on account of salaries and small contingent charges comes to very nearly one lakh of rupees. At the beginning of every month, within the first two or three days, a sum of very nearly one lakh has to be paid out on that account. Now, the result in the first week of April is this: that the balance on the 1st April is one lakh; by the 7th April almost the whole of that lakh has been paid out in the form of salaries, &c., on account of the month of March; and, if there are any bills on account of works coming in about that time, the account of the Corporation has to be overdrawn. Therefore, in the Vice-Chairman's opinion, a balance of two lakhs was essential. I am bound to say that it seemed to me the Vice-Chairman was right, and that was the view which commended itself to the Select Committee. It seems perfectly reasonable that we should provide a closing balance of a substantial amount, and not a purely nominal amount which is liable to be swept away in the ordinary course of current expenditure within the first week of the opening month of the year."

The Hon'ble Mr. Oldham said:—"I have only to add in corroboration of what the Hon'ble Mr. Baker has said that this is a point on which the greatest stress is laid by our trusted Vice-Chairman of the Corporation, Babu Nilambar Mookerjee; and though I know my friend the Hon'ble Babu Surendranath Banerjee can reply to that, as he replied when the name of Mr. Bright was brought in, I would remind him that this matter was discussed by practical men, and no one has such practical connection with this matter as our respected Vice-Chairman, Babu Nilambar Mookerjee."

The Hon'ble Mr. Apcar:—"I desire to support what the Hon'ble Member in charge of the Bill has said. I think there is a great deal of substance in what he said, and I am in favour of the inclusion of this clause."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"I am not prepared to give up my opinion. I entirely endorse the remarks which have fallen from the Hon'ble Mr. Oldham in regard to the Vice-Chairman. He fully deserves the encomium which has been bestowed upon him.

"The Hon'ble Member in charge of the Bill has said that it is inconsistent with sound finance that there should not be a closing balance of one or two lakhs of rupees. I do not know what is good and what is bad finance, but I conceive that to be good finance in which the assets greatly preponderate over the liabilities; and I think that has been the financial condition of the Corporation all along. The Corporation has paid its way; it has had its cash balance, and it has a large credit, though I am sorry to say that that credit is now somewhat on the wane. Notwithstanding the absence of a provision like this to which the Hon'ble Member in charge of the Bill attaches such great importance, our financial position has been exceedingly sound, when judged not by reference to abstract theories, but to actual facts."

The Hon'ble Mr. Baker said:—"Is it not the fact that the nominal cash balance has been steadily dwindling for years?"

The Hon'ble Babu Surendranath Banerjee said:—"I cannot say that it has been dwindling. Sometimes our cash balance was satisfactory, and sometimes not; but I do not think there has been a steady downward movement. After the plague it was bad, I admit, but I suppose the finances of everybody, not excepting that of the Government of Bengal, have been bad after the plague. Therefore, that was a general condition to which the Corporation had to submit along with with other institutions of higher status and position.

"Then, with regard to another remark which the Hon'ble Member in charge of the Bill made, namely, that it is inconceivable that the Government of Bengal can have a statutory obligation imposed on them. Supposing there was an Act of Parliament? I presume an Act of Parliament would make it obligatory even on the Government of Bengal to provide for a cash balance of 20 lakhs, and that would be a statutory obligation. But, Sir, that is neither here nor there. I am sorry to find that all my friends, even the member for the Corporation, is opposed to this amendment; but still I am not prepared to give it up. I have had an opportunity of talking this matter over with friends, whose opinions are entitled to the highest respect as experienced members of the Corporation, and they are distinctly of opinion—and I echo their opinion in their matter, which is in entire accord with my own—that in this matter the Corporation should be permitted a free hand."

The motions were then severally put and lost.

SECTION 125.

The Hon'ble BABU JATRA MOHAN SEN moved that in section 118 (*now* 125), line 5, the words "and re-submission within a specified time" be inserted after "further consideration."

He said:—"Section 118 (*now* 125) provides that—

"Subject to the provisions or sub-section (*1*) of section 117 (*now* 124), and to the other requirements of this Act, the Corporation may refer the Budget Estimate back to the General Committee for further consideration, or may adopt the Budget Estimate or any revised Budget Estimate submitted to them, either as it stands, or subject to such alteration as they may deem expedient:'

and clause (*b*) provides that—

'if by the twenty third day of March the Corporation have not adopted any Budget Estimate, the Budget Estimate prepared by, or the last revised Budget Estimate submitted by, the General Committee shall, subject to any alterations that may be agreed upon by the Corporation and the General Committee, be deemed to be the Budget Estimate finally adopted, and the municipal rates and taxes shall be levied at the rates provided for therein.'

"Now, Sir, the provision is made that, if the Corporation do not decide one way or the other as to the adoption of the Budget Estimate on the 23rd day of March, the Budget Estimate submitted by the General Committee shall be taken as adopted. Now, provision has been made for submission of the Budget Estimate to the General Committee for re-consideration. The General Committee ought to re-submit it within some time to be specified within the 27th of March for the consideration of the General Committee of those revised estimates. Unless a time is limited, and if the General Committee fail to submit the revised estimate as asked for by the Corporation, the Corporation would be thoroughly helpless, and the Budget Estimate, as submitted originally, will have to be taken as the one adopted. Therefore, when it is provided that the Budget Estimate may be referred back to the General Committee, that Budget Estimate after revision ought to be submitted to the Corporation within a time to enable them to adopt it or to modify it, and that is the reason why I have suggested that a certain time should be fixed within which to re-submit the report."

The Hon'ble MR. BAKER said:—"I accept this amendment."

The motion was put and agreed to.

The Hon'ble BABU JATRA MOHAN SEN also moved that in section 118 (*now* 125), clause (*b*), line 1, the words "twenty-ninth" be substituted for "twenty-third:"

He said:—"I may as well take this amendment along with my amendments 91* and 93† which point to the same object."

* That at the end of section 122 (*now* 127), sub-section (*2*), the words "or adopt both of these methods" be added.

† That in section 124A (*now* 130), line 2, the words "twenty-eighth" be substituted for "twenty-second."

The Hon'ble Mr. Baker said:—"Amendment No. 91 relates to an entirely different matter. Amendment No. [illegible] is also quite different."

[illegible] said:—"The [illegible] meeting of the Corporation [illegible] provided [illegible] section 116 (*now* 12[illegible]) and section 115 (*now* 122) provides that the Chairman shall, not later than the 1st March, forward a copy to each Commissioner, and the earliest meeting that can be held is the 7th March of every year. Provision is made to refer it back to the General Committee. The time allowed is from the 7th March, and that is the earliest opportunity on which the Corporation can come to a decision as to whether the Budget Estimate should be referred back to the General Committee. The General Committee will have to consider the Budget Estimate after it is sent back to them, and some time must elapse before they meet, and then the revised estimate will have to be circulated, and the time allowed is only between the 7th March to the 22nd March. It is only two weeks. It is a very short interval, and I only ask that the time be enlarged by one week more, that is, the 28th March. The object of the amendment is to give only another week to consider the whole matter. The Budget Estimate is a very important matter, and therefore it is desirable that the Corporation should be allowed to consider this matter at least for a period of three weeks, from the 7th to the 28th March. I think it is only reasonable that it should be so. The financial year closes at the end of March, and we take this matter up on the 28th March. It is very reasonable that three weeks should be given to the Corporation to fully consider the matter."

The Hon'ble Mr. Apcar said:—"If the Hon'ble Member in charge of the Bill will allow me to speak first, I would submit a suggestion for him to consider. I think that, if the matter is to be resubmitted to the General Committee, there ought to be an opportunity given to the Corporation by the General Committee, for the Corporation to express their views about it. Whatever period it may be thought advisable to give for a final decision in the matter, I think a proviso somewhat to the effect that the General Committee do re-submit not later than seven days before the 16th March would be advisable."

The Hon'ble Mr. Baker said:—"That has already been carried on the motion of the Hon'ble Babu Jatra Mohan Sen which I accepted just now. The Corporation would fix the time with reference to the nature of the work to be done."

The Hon'ble Mr. Baker continued:—"I cannot accept this amendment. In the first place, the date, the 23rd of March, is really fixed by Section 117 (*now* 124), which provides that—

'The Corporation shall, on or before the twenty-second day of March, after considering the General Committee's proposals in this behalf, determine, subject to the limitations and conditions prescribed in Part VI, the rates at which municipal rates and other taxes shall be levied in the next ensuing financial year.'

"Section 118 (*now* 125) merely lays down what the consequences are if the Corporation fail to settle the budget by that date. I would remind the Council that in the original Bill all these dates in connection with the Budget were entirely different from what they are now. They were put much earlier in the year—nearly three months earlier. This was strongly objected to by the Corporation, it was strongly objected to by the Hon'ble Members who represented the Corporation on the Select Committee, and I may say I also took serious exception to them. We went into these dates with very considerable care, and we re-arranged the whole scheme of them, and the dates that are now in the Bill represent the conclusion at which we unanimously arrived. I think the Hon'ble Babu Surendranath Banerjee will bear me out. I think we ought not to change these dates without very strong reasons, and it would be very inconvenient to change them at the last moment. Moreover, there is a practical difficulty in accepting the amendment, and that is that the Easter holidays fall just about the end of March. It might happen that the period from the 29th March to the 3rd or 4th April was all close holidays, and the result of that would be that no Budget at all could have been settled until three and four days after

the year had begun. I think it would be unsafe to take any date later than the 23rd March in this connection."

The Hon'ble Babu Surendranath Banerjee said:—"I am in sympathy with the proposal of the Hon'ble Babu Jatra Mohan Sen, but I cannot overlook the practical difficulties in the way. There is one practical difficulty to which I desire to call special attention, and that is this: suppose the meeting of the Corporation is held on the 28th or 29th March, and the rates are altered. The bills would have to be issued on the 1st April. I do not think there would be sufficient time between the 29th March and the 1st April to permit of the issue of the bills on the 1st April. That is a serious difficulty, and it may interfere with the collections. This is a point which has been overlooked. The Hon'ble Mr. Baker was quite right when he said that these dates were suggested by the Corporation after most careful consideration in consultation with heads of departments, and I hope that they may be permitted to remain."

The Hon'ble Babu Jatra Mohan Sen said:—"I am a stranger to Calcutta and not acquainted with the internal affairs of the Corporation. After hearing what has fallen from the Hon'ble Member in charge of the Bill and the Hon'ble Babu Surendranath Banerjee, I am prepared to withdraw this motion."

The Hon'ble Babu Surenranath Banerjee said:—"The Corporation ought at least to have a week's time from the time the Budget is laid before them by the General Committee, that is to say, the 16th March ought to be the latest date, I think, when the Budget should be laid before the Corporation by the General Committee after re-consideration."

The Hon'ble Mr. Baker said:—"I am disposed to agree to that, but it seems to me that the motion of the Hon'ble Babu Jatra Mohan Sen, which has been accepted,* will enable the Corporation to secure that. That was what I intended to say to Mr. Apcar. The Corporation, when they return the Budget to the General Committee, are empowered, under the Hon'ble Babu Jatra Mohan Sen's amendment, to fix a specified time within which the Budget is to be resubmitted to them. They can fix the time for themselves."

The Hon'ble Mr. Apcar said:—"I would ask that the date be fixed. I do not wish to disturb the dates as they have been fixed in the Bill. All that I seek is that there should be a statutory period within which these matters be resubmitted to the Corporation, say within a specified time not later than the 16th March, and, if that is accepted, I think it would be an advantage."

The Hon'ble Mr. Baker said:—"How is it possible to do so? Suppose the Corporation only came to a conclusion themselves on the 16th March."

The Hon'ble Mr. Bolton said:—"There may be more than one meeting of the General Committee, and the Corporation might send back the Budget Estimate for further information from the General Committee. The provision which will be made in accordance with Hon'ble Babu Jatra Mohan Sen's amendment will fully meet the case. The Corporation can fix any date suitable for the final consideration of the estimate."

The Hon'ble Mr. Baker said:—"Surely it is better to leave it elastic. The Corporation can fix any date they like."

The Hon'ble the President said:—"I have no objection to the Hon'ble Mr. Apcar's framing a motion if he so wishes."

The Hon'ble Mr. Apcar said:—"I should like to place it on record that I do—'not later than the 16th March.' It should be provided that the General Committee do re-submit the estimates 'not later than the 16th March'."

---

* Printed on p. 212, *ante*.

The Hon'ble THE PRESIDENT said:—"Suppose the Corporation had its meeting on the 16th March?"

The Hon'ble MR. APCAR said:—"Then, Sir, they would not have an opportunity of reconsidering the question. But I wish to secure a consideration before that day."

The Hon'ble THE PRESIDENT said:—"Under the section as it now stands, suppose the Corporation had its meeting on the 16th March? I should like to know whether, after hearing the explanations offered, the Hon'ble Member wishes to frame a regular motion to put before the Council."

The Hon'ble MR. APCAR said:—"I should say that if there was this law I think the estimate would be submitted before the 16th March."

The Hon'ble THE PRESIDENT said:—"The law says that it should be submitted not later than the 7th day of March."

The Hon'ble MR. BAKER said:—"The words, 'specified time' mean a time to be specified by an order of the Corporation. That is exactly the wording of the motion."

The Hon'ble THE PRESIDENT said:—"The section as it will now read will be:—'The Corporation may refer the Budget Estimate back to the General Committee for further consideration and resubmission within a specified time."

The Hon'ble MR. APCAR said:—"After this discussion I will not trouble the Council with a further amendment."

The motion was then, by leave of the Council, withdrawn.

SECTION 127.

The Hon'ble BABU JATRA MOHAN SEN moved that at the end of section 122 (*now* 127), sub-section (*2*), the words "or adopt both of those methods" be added.

He said:—"I think it is reasonable that power should be given to adopt either one or other or *both* the methods referred to in this section. I do not think it requires any argument to support this."

The Hon'ble MR. BAKER said:—"I accept this amendment."

The motion was put and agreed to.

SECTION 129.

The Hon'ble MR. BAKER moved that the following words be added at the end of section 124 (*now* 129), namely:—

"or to pay off any debt due to the Government."

He said:—"Under section 406 of the present Act the Corporation have power to convert their loans, that is to say, they have power to borrow money for the purpose of paying off any existing loan. The circumstances under which that is done are usually when there has been a fall in the current rate of interest, and they have power to borrow money at the lower rate of interest then current in order to discharge a former loan on which a higher rate of interest was payable. The same provision is included in section 124 (*now* 129) of the Bill, but I have noticed that neither under the Act nor under the Bill is there any corresponding power given to borrow money to pay off a loan due to Government. The power under the Act and under the Bill is confined to borrowing money for the purpose of paying off debenture loans raised in the open market, and there is no such power in the case of loans which have been taken from Government. It seems to me, Sir, that it might be advantageous to the Corporation to have the same power in respect of their loans due to Government.

There is only one such loan at present, a comparatively small one, in which the outstanding balance is 36 lakhs of rupees, but we cannot tell what loans there may be in the future; and it is possible that it might pay the Corporation to borrow money in the open market and pay off a Government loan. The history of the recent loans does not look as if it would be so, but, at all events, it is conceivable that it might be to the advantage of the Corporation to take that course. Therefore, I purpose to give the Corporation similar power in respect of Government loans to that which they have in respect of debenture loans."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I have not the smallest objection to this amendment, which would enable the Corporation to pay off any loan due to Government. The marginal note, however, to the section will have to be altered."

The motion was put and agreed to.

SECTION 130.

The Hon'ble BABU JATRA MOHAN SEN moved that in section 124A (*now* 130), line 2, the words "twenty-eighth" be substituted for "twenty-second."

He said:—"I do not think the same objection will be raised by the Hon'ble Babu Surendranath Banerjee to this amendment as to the difficulty of issuing bills with regard to assessments if there is any alteration made; but I think the Corporation ought to have an extended time to consider the reports of the General Committee with regard to the raising of loans They would be busy no doubt with the Budget Estimate, revising assessments or making any other alteration that may be necessary which may interfere with the internal management of the Corporation; but still I think a larger period ought to be given to them to consider as to how and in what manner loans should be raised. I think an extension of a week's time is only reasonable."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"As my friend the Hon'ble Babu Jatra Mohan Sen has referred to me and to my personal opinion about this amendment, I can only say that, if he had been acquainted with the practical working of the Corporation, I do not think he would have brought forward this amendment. The fixing of the rates is to take place on the 27th March, and the fixing of the rates and the determination of the loans take place at one and the same time. They form part and parcel of the same Budget statement. The two Budgets are considered together, and they are bound to be considered together, because the loans determine the rates; that is to say, if you provide for loans, you must provide for interest and sinking fund. You cannot therefore consider the rates irrespective of the loans. It seems to me to be an almost absurd proposal—but that is perhaps too strong an expression to use—to ask the Corporation to fix the loans after it has fixed the rates. The rates will have to be determined with reference to the loans. I think after this explanation the Hon'ble Member will perhaps withdraw his motion."

The Hon'ble MR. BAKER said:—"The Hon'ble Babu Surendranath Banerjee has exactly anticipated what I was going to say. The loan budget and the revenue budget must be taken together."

The Hon'ble BABU JATRA MOHAN SEN said:—"After these explanations I will not press the amendment."

The motion was then, by leave of the council, withdrawn.

SECTION 138.

The Hon'ble MR. BAKER moved that in sub-section (*3*) of section 133 (*now* 138), the words "The stock to be so paid off shall be purchased in the open market and" be omitted, and that the words "and the stock to be paid off shall be purchased in the open market" be inserted after the word "prescribed."

He said:—"The object of this amendment is to correct a clerical error in the Bill. Under section 411 of the present Act the Corporation have power to consolidate their loans. It was intended to reproduce this section without change in the Bill, but the opportunity was taken, I understand, to slightly improve the wording of it, with the result that these two lines at the top of clause (3) were inserted in the wrong place, and they make nonsense of the section. The section as it stands is absolutely meaningless. As it now runs it is as follows:—

'(3) The stock to be so paid off shall be purchased in the open market, and the Corporation shall repay such loan by annual payments at a rate of not less than one-sixtieth of the unpaid balance in each year, instead of making payments into a Sinking Fund as hereinbefore prescribed; and such payments shall be made in priority to all other payments (other than payments prescribed by section 127 (*now* 133), sub-section (2), and section 133A) (*now* 140) due from the Corporation:'

"There is no reference anywhere to the stock to be paid off. The section as amended will read:—

'The Corporation shall repay such loan by annual payments at a rate of not less than one-sixtieth of the unpaid balance in each year, instead of making payments into a Sinking Fund as hereinbefore prescribed, and the stock to be paid off shall be purchased in the open market; and such payments shall be made in priority to all other payments (other than payments prescribed by section 127 (*now* 133), sub-section (2), and section 133A) (*now* 140) due from the Corporation:'

"That makes sense, but as the section stands it is nonsense."

The motion was put and agreed to.

NEW SECTION.

The Hon'ble MR. BAKER moved that the following section be inserted after section 133, namely:—

"133AA (*now* 139). The time for the repayment of any money borrowed under section 124 (*now* 129) or section 133 (*now* 138) for the purpose of discharging any previous loan shall not, except with the express sanction of the Government of India, extend beyond the unexpired portion of the period for which such previous loan was sanctioned.

Time for repayment of money borrowed to discharge previous loan.

He said:—"I may explain that this section has been introduced under the directions of the Government of India. They consider that, when any new loan is raised for the purpose of paying off any existing loan, the currency of the new loan must not extend beyond the currency of the original loan. There is a similar provision in the Bombay Act, and the Government of India have stated that they consider it necessary to have similar provision here. There is just one loophole allowed, which is, the words, 'except with the express sanction of the Government of India.' They give us that amount of loophole for extending the currency of the loans beyond the original period, but without their sanction they refuse to allow it to be done."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"Have you consulted the Municipal Executive about this matter?"

The Hon'ble MR. BAKER said:—"Not about this. But I may mention that we made two representations to the Government of India, and their orders are positive."

The Hon'ble Mr. APCAR said:—"I do not see any harm in this amendment."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I should feel greater confidence in a thing of this kind if it had the support of the Municipal Executive, because they understand these things much better than those who are not connected with the actual administration of municipal affairs. It would have been an advantage—apart from the mandate of the Government of India—if we had an opportunity of ascertaining what the Chairman and Vice-Chairman thought about it."

The Hon'ble Mr. Baker said:—"We only received these instructions two or three days before the discussions began, so there really has been no time. As a matter of fact, we have made an unofficial reference to the Corporation. I have informed the Chairman and talked the matter over with him. I do not profess to be personally in favour of this section."

The Hon'ble the President said:—"We will allow this motion to be postponed till to-morrow."

The further consideration of the amendment was then postponed to the next meeting of the Council.

Section 141.

The Hon'ble Babu Jatra Mohan Sen moved that section 133B (*now* 141) be omitted.

The Hon'ble Babu Surendranath Banerjee moved that for section 133B (*now* 141) the following sections be substituted:—

"133B. *(1)* If any money borrowed by the Corporation from the Government, whether before or after the commencement of this Act, or any interest or costs due in respect thereof, is or are not repaid according to the conditions of the loan, the Local Government may direct any Government officer, not being a municipal authority or officer, to detain, to the extent of any payments then in arrear, any moneys due, or that may become due, to the Corporation, which he may then or thereafter have in his custody or control.

(2) Such officer shall detain the moneys which he is so directed to detain, and pay the same, as they become due to the Corporation, to the officer for the time being appointed to receive Government dues, or into the Bank of Bengal.

"133C. *(1)* If the amount in arrear cannot be recovered in the manner provided in section 133B, the Local Government may attach the Municipal Funds, or any tax leviable by the Corporation.

(2) After such attachment, no person, except an officer appointed by the Local Government in this behalf, shall in any way deal with the attached Funds or tax; but such officer may do all acts in respect thereof which the Corporation or any municipal authority might have done if such attachment had not taken place, and may apply the proceeds in satisfaction of the amount in arrear and of all expenses involved by the attachment and subsequent proceedings.

(3) Provided that no such attachment shall defeat or prejudice any debt for which the Funds or tax attached was previously pledged in accordance with law; but all such prior charges shall be paid out of the proceeds of the Funds or tax attached before any part of the proceeds is applied to the satisfaction of the debt due to the Government."

The Hon'ble Babu Jatra Mohan Sen said:—"My proposal is to omit section 133B (*now* 141) altogether. That section provides:—

'If any money borrowed by the Corporation from the Government, whether before or after the commencement of this Act, or any interest or costs due in respect thereof, is or are not repaid according to the conditions of the loan, the Local Government may attach the Municipal Funds or any of them.'

"My suggestion is that the control sections give ample power to the Locas Government to interfere in all matters of this kind. This section, I should think, is redundant and unnecessary. If you refer to section 26 (*now* 18), it would appear that it makes provision as to how this knowledge is to be gathered by Government. In the face of this enactment I submit that this section is unnecessary."

The Hon'ble Babu Surendranath Banerjee said:—"May I be permitted to make a few observations upon the motion of my hon'ble friend Babu Jatra Mohan Sen? I entirely accept the view which he has put forward that this section is absolutely unnecessary, and I venture to submit that the framers of the Bill were also of opinion that it was unnecessary because you do not find it in the original Bill. The original Bill contained more than 600 sections. It traversed every conceivable and inconceivable ground within the domain of municipal administration, and yet this section found no place in it. Therefore, I am right in holding that the framers of the original Bill did not think that a section of this kind was necessary. And, Sir, in

regard to the section, I beg to point out that for the first time it was laid before the Select Committee in February, 1899. I have in my possession the paper that was circulated to the Select Committee and, therefore, I am able to give the date. Therefore, Sir, we are in this position that we are about to legislate upon a matter of this magnitude and importance, without the guidance of those public bodies whose opinions have been invited about the various provisions of the Bill. The Chamber of Commerce has not a word to say about this particular section. The Trades Association has not been consulted. The opinion of the Corporation has not been invited. Therefore, it is our duty to proceed with the utmost care and circumspection in this matter. I maintain that the section is unnecessary. It does not exist in the present law; it is not to be found in the law of 1876; it is not to be found in the law of 1863. Ever since we have had a Municipality in Calcutta, a provision like this has not been found necessary to safeguard the interests of the Government, and the Government has always freely lent money to the Corporation. Where then is the necessity for this section, especially when under the new law we are to have a Corporation which is practically to be controlled by officials? The only occasion when a default was made by the Corporation in respect of the payment of interest upon a loan due to Government occurred about a year ago owing to some bungling in the office. The matter is now being enquired into by the Corporation. The interest due upon a loan to Government was not paid, and in the first instance the Government directed that the penalty attaching to that default should be realised. On an explanation being submitted the penalty was remitted. That is the only case that I can recall in respect of a default made by the Corporation in the payment of interest on a loan due to Government. I do not think, Sir, that a case of this kind is likely to occur again after the precautions which the Corporation will no doubt take.

"But supposing for argument's sake it were admitted that what has taken place in the past might occur in the future, then there are the provisions of the Bombay section, which are embodied in my amendment. And these provisions are much less drastic than those which find a place in the Bill. The Bombay section provides, and my section is an exact reproduction of the Bombay section, that in the event of default being made by the Corporation in respect of the payment of interest on loans due to Government, the Chief Secretary to Government may direct any officer of the Government, not being a municipal authority, to attach any money which may be in or which may come into his possession belonging to the Municipality; and if the arrears due to Government cannot be recovered in that way, then the municipal funds and the rates and taxes may be attached. There is thus an intermediate stage. You do not attach under the Bombay Act the municipal funds and the rates and taxes at once, but an order is issued in the first instance by the Chief Secretary to a Government servant to attach any municipal moneys that may come into his possession; and if the arrears due are not thus recovered, then the extreme step of attaching the municipal funds in payment of the debt due is resorted to. Why should we avoid this intermediate stage? Why should we have a more drastic law for Calcutta than what has been found sufficient for Bombay? Let me point out that the section in the Bill is an exact reproduction of section 6 of Act II of 1879; that is a Government of India Act. The section in the Bombay Act occurs in Act III of 1888 of the City of Bombay, and thus we have this fact that the section in the Bombay Act was enacted subsequently to the section in the Government of India Act. In other words, I am entitled to the conclusion that the Bombay Legislature, having section 6 of Act II of 1879 before them, deliberately enacted a section less stringent and less drastic. They thought that a milder section would answer their purpose, and they have not been mistaken, because the section has not been modified in a subsequent amendment of the Bombay Act.

"We cannot be too careful in dealing with matters which affect the public credit. I am sorry to have to say that the credit of the Corporation is not what it ought to be. The other day the Municipal Commissioners invited tenders for a loan of 25 lakhs of rupees, and how much did they get? The offer came to about 3½ lakhs, and they were obliged to go down so far as to accept offers

of Rs. 95. I know not what may be the secret influences at work, but there is this fact that the credit of the Corporation at the present moment is not what it should be. I am perfectly aware of the fact that there is a proviso in the Bill which gives preference to the claims of the public creditor; but I venture to assert that public credit is such a delicate plant that we have to exercise the utmost care in dealing with it, and that nothing should be done which would prejudicially affect it. When it is open to you to have recourse to a mild measure which may and will ordinarily be sufficient for your purposes, why have recourse in the first instance to the severe measure when the adoption of the mild measure does not preclude its subsequent adoption? It seems to me that it is only proper and wise that the milder alternative should first be adopted in preference to the severer one; and when we have failed by the adoption of the milder alternative, then adopt the extreme remedy. You are not deprived of it by my amendment. You are called upon to postpone it till you have tried the milder remedy. That is what I venture to suggest. If it is necessary to safeguard the interests of the Government, adopt the Bombay provision, which provides that, in the event of default being made, a Government officer is to attach any money which belongs to the Municipality which may come to his possession, and if that money is not available to him, or if that money is not sufficient to cover the default, then go and attach the municipal funds and the rates and taxes. I have had an opportunity of talking this matter over again with former members of the Corporation, and they think that it is a dangerous provision, and may interfere with the credit of the Corporation; and therefore I ask that the Bombay section be adopted."

The Hon'ble MR. BAKER said:—"With reference to the last words that fell from the Hon'ble Babu Surendranath Banerjee that there is some risk that this provision might affect the credit of the Corporation, I would remind the Hon'ble Member that Mr. Turner and Mr. Spink were both members of the Select Committee, and this question was very fully discussed in their presence, and it was pointed out that the section in the Bill contains a proviso which absolutely safeguards all existing loans from being prejudiced by such attachment. That proviso says:—

'Provided that no such attachment shall defeat or prejudice any debt for which the funds attached were previously pledged in accordance with law; but all such prior charges shall be paid out of the proceeds of the Funds before any part of the proceeds is applied to the satisfaction of the debt due to the Government.'

"How, in the face of a provision like that, any prejudice could be caused to existing debts or to the credit of the Corporation I really cannot understand.

"I will briefly explain to the Council the origin of this section. In July last year the Corporation, as the Hon'ble Member has pointed out, made default in paying the instalment of interest and principal on its loan due to Government, and the matter had to be referred to the Government of India. On looking into the matter the Government of India noticed that in the present Act there was no provision by which Government could recover a debt due to itself. Neither in the present Act, nor in the old Act of 1876 nor in the Bill was there any such provision, and the result was that, in the event of default, Government would have been obliged to bring a suit agains the Corporation in order to recover its instalments of interest and principal. It seemed to the Government of India that a civil suit by the Government against the Corporation was not a suitable remedy, and they, therefore, instructed the Local Government to introduce a section in the Bill corresponding to section 6 of the Local Authorities Loans Act of 1879, to enable Government in case of default to attach the funds of the Corporation, and apply them to the repayment of the debt, but not so as to prejudice any previous debt for which the funds were applied; and they pointed out that in Bombay there was a similar provision in sections 99 and 107. The Select Committee gave effect to these proposals of the Government of India, and this section is the result. The Hon'ble Babu Surendranath Banerjee has not argued that the section ought not to be there. He has not argued that Government ought not to have any power of recovering a debt. But he has laid great stress on the fact that we have not incorporated a particular provision in the Bombay Act, which is to th. effect that when there is a default the first step is to issue an order

to some Government officer to attach any money due to the Municipality from Government which may be in his possession, and that, until that first step has been taken and found to be infructuous, the second stage of actual attachment of the municipal funds does not come into operation. I do not know exactly how that particular provision may work in Bombay. In Bombay there is only the Local Government. There are not two Governments, the Local Government and the Supreme Government; but here in Calcutta it would be extremely inconvenient, and, I may say, nugatory. The principal sums which are payable by Government to the Corporation are the rates and taxes payable on the various Government buildings which it occupies either as owner or occupier. There are hundreds of these buildings scattered all over the town. Some of them are in charge of various departments of the Government of India; some of them are in charge of various departments of the Local Government, and the rule is that each officer who is in charge or in occupation of a particular building has to pay, out of his official funds, the municipal taxes on that building. The result would be that if we adopted this Bombay system, in the event of there being default, we should have to issue orders to hundreds of officers all over Calcutta, including officers not subordinate to the Local Government at all, to detain the payment of municipal rates and taxes which might at that time be in their hands; and it would not be until we had got replies from all of these and added up all the various small sums that were due, and found them not sufficient to cover the amount due, that we could resort to the second stage. It is absolutely unpractical and inconvenient. We have simply carried out the perfectly equitable and reasonable instructions of the Government of India and supplied what is undoubtedly a defect in the present Act."

The Hon'ble Mr. Oldham said:—"I am quite unable to understand the fervour which my hon'ble friend Babu Surendranath Banerjee has shown in this matter. If this provision was to be retrospective in effect, I could do so; but it is for future loans. Looking at the matter in the very narrowest way, it will be acknowledged that the present loan from Government is very small, and therefore that there are likely to be very few loans from Government. It must also, I think, be taken that there is no compulsion on Government to make these loans, and that it may make them on what terms it pleases. So the effect of having these provisions laid down in the law will be that there will be a small bond or receipt when a loan is taken from Government instead of one of those long indentures with which it is the practice now for the Solicitors to the Corporation to favour us and for which we have to pay. The Hon'ble Babu Surendranath Banerjee has referred to the waning credit of the Corporation as evidenced by the falling through of the last loan. The loan did fall through in a very unexpected way; but it happens that in 1897, when I was not a member of the Corporation, the Corporation tried to float a loan for 25 lakhs and 10 lakhs fell through. The agitation referred to as possibly having been the cause of the present loan falling through, and of what is called the 'waning credit of the Corporation,' had not arisen. Last year, when that agitation was at its height, the Corporation floated a loan of 25 lakhs on the most favourable terms, and even on more favourable terms than Government had secured, and on far better terms than the Bombay Corporation was able to secure. Again, in March last the Corporation was able to float a small loan, I think it was 5 or 10 lakhs, and the terms obtained were most unexpectedly high. We attribute these fluctuations not in any way to the waning credit of the Corporation, but to the present state of the currency problem, by which we see that Government securities are falling and exchange is rising in a way which is entirely unexpected."

The Hon'ble Mr. Apcar said:—"I think my friend the Hon'ble Mr. Oldham has not exercised a very keen sight if he thought the suggestion of my friend the Hon'ble Babu Surendranath Banerjee related to this agitation as having had any influence on the financial situation of the Corporation. I do not see how it could affect this question at all. With regard to the proceedings of the Loan Committee, of course we are not here to discuss them, although I think it was unfortunate that they accepted the rates they did accept. However, I do not like to give a silent vote with regard to this amendment, but I have no intention of going

into the matter because my hon'ble friend Babu Surendranath Banerjee has dealt with it. I do not wish to expand upon what he has said already to the Council, but I do not wish to be misunderstood. I say that I support the Bombay system in this connection.

"Sir, inasmuch as no other amendments appear in my name after section 100 (*now* 107), I may be permitted to make a personal explanation. I have come to the consideration of this Bill only very lately, and the task has been an exceedingly heavy one. Although it was intimated from the Chair that I succeeded to the labours of my predecessor as member for the Corporation, yet his head has not been placed on my shoulders, and I have had to do everything afresh for myself. So that, although I have given a great deal of time to the subject, I have not been able to keep up with the work that has been proceeding, and I have had other matters to attend to besides. Partly on this account, and partly in view of the current of decisions on the amendments that have been proposed, I have not sent in any amendments with relation to the further sections of the Bill. I hope it will not be understood that I acquiesce in everything subsequent to section 100 (*now* 107). I shall give my support, where I find that I can do so, to such of my hon'ble friends who have sent in amendments.

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"The Hon'ble Mr. Oldham, in replying to some part of my observations, remarked that it was incomprehensible to him how I could show so much fervour in connection with this matter. I will proceed to give him the explanation. I may remark that I show considerable fervour in connection with all matters appertaining to the Calcutta Municipal Bill, and, if I have displayed some little extra fervour in connection with this matter, it is because the provisions appear to me to be unnecessarily stringent and drastic. I consider the provisions of the Bombay section as being amply sufficient for all purposes, and the Government is needlessly making the Bill unpopular by making this section more stringent than it ought to be. My hon'ble friend in charge of the Bill has referred to the practical difficulties in the way of giving effect to the Bombay section. There are the offices of the Government of Bengal; there are the offices of Government of India; each office pays its own municipal rates, and it would be difficult to get together all these rates, and therefore it would be impossible to direct any particular Government officer to collect all these rates in satisfaction of any arrears that may be due to the Government. Sir, to this I have a simple reply to give. If the Hon'ble the Chief Secretary were to write a letter to the Accountant-General requesting him to ascertain the various Government offices which pay rates and ask those offices not to pay them, but to send them on to the Accountant-General, will there be any serious practical difficulty?"

The Hon'ble Mr. Baker said:—"I am afraid there would. The Hon'ble Member is not acquainted with the official system, and I can assure him that the Accountant-General would decline to do that. He would say it was not his duty."

The Hon'ble Babu Surendranath Banerjee said:—"If an order was issued by the Government of Bengal, the Accountant-General would decline to do it! I cannot understand it. If the Lieutenant-Governor were to direct the Chief Secretary to issue an order to the Accountant-General, it would be in the nature of a mandate which the Accountant-General would be bound to give effect to. I cannot conceive how it is possible for the Accountant-General not to carry out such an order."

The Hon'ble Mr. Baker said:—"The Accountant-General is an officer of the Government of India. He is not under the orders of the Local Government."

The Hon'ble Babu Surendranath Banerjee said:—"I am thankful to my hon'ble friend for this information, and I will change my position somewhat. If my hon'ble friend the Municipal Secretary were to direct the various offices which paid rates to the Corporation to withhold payment of those rates and to

send them on to him to be held in deposit by him in satisfaction of a debt due to Government, would there be any difficulty ?"

The Hon'ble Mr. BAKER said:—"I am afraid there would."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"In that case, if I may say so, I am prepared to cut the Gordion knot. I can suggest a simple remedy which I think would be a solution of the whole difficulty. My hon'ble friend in charge of the Bill is probably aware that the Port Trust pay about 1½ lakhs or more every year to the Corporation in the shape of rates. Could not that be attached at once? I think that would cover whatever dues the Corporation has to pay to the Government in respect of loans. If my hon'ble friend will accept this suggestion, I am prepared to modify my amendment upon these lines."

The Hon'ble MR. BAKER said:—"That would not be money due by Government to the Corporation."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"They could be attached by Government. Here is the Port Trust which pays to the Corporation 1½ lakhs of rupees every year. If the Corporation make default to the Government in respect of the payment of any interest upon any loan, is it impossible for the Municipal Secretary to write to the Port Trust to hold this money in deposit and not to pay it to the Corporation in order that it might subsequently be paid in satisfaction of the interest due to Government. I do not really think, Sir, the difficulties are insuperable, and, if the difficulties are not insuperable, then I say it is most unwise to have a drastic provision like this. I do not think I need further occupy the time of the Council."

The Hon'ble BABU SURENDRANATH BANERJEE proposed the addition of the words "of the Port Trust" after the words "officer, municipal authority or office" in sub-section (*1*) of the proposed section 133B.

The Hon'ble BABU JATRA MOHAN SEN said:—"Having regard to sections 114 and 118 (*now* 121 and 125), as to how the Budget is to be framed and how provisions are to be made as to the payment of those loans and interest, I do not see how any occasion can arise as to attaching the funds in the hands of the Corporation. The section is obnoxious and ought to be avoided as much as possible, if it can be avoided without any difficulty arising in the way of realising the interest due to Government on account of loans. The Chairman has been authorised to spend these moneys, and on one occasion, I understand, on account of an oversight of a clerk or some officer in charge, payment of the interest was not made."

The Hon'ble MR. BAKER said:—"The Hon'ble Babu Surendranath Banerjee must have been misinformed. A default in payment of a large sum like this was certainly not due to any misconduct of a petty clerk. It was much more than that."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I used the words 'bungling in the office' and as a matter of fact it was owing to the change in the office of Chairman that the matter was lost sight of. Mr. Bright went away and Mr. Greer came in."

The Hon'ble BABU JATRA MOHAN SEN said:—"The Chairman being in charge of the funds, and being authorised to make these payments, and he being an officer of Government, I think no occasion will arise to make any such default. It has occurred once in 23 years. I think the provisions contained in other sections are sufficient to cover a case of this kind, and I should not desire that another obnoxious section should be inserted in order to meet the same object. The Chairman being in charge of the funds, and as it lies in him to pay this interest on loans, no occasion will arise to enforce this section 133B, and therefore it ought not to be enacted."

The Hon'ble BABU JATRA MOHAN SEN's motion was then put and lost.

The Hon'ble BABU SURENDRANATH BANERJEE's motion in the amended form being put, the Council divided as follows:—

Ayes 6.	*Noes 12.*
The Hon'ble Raja Bahadur Ranajit Sinha, of Nashipur.	The Hon'ble Mr. Buckley.
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Handley.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Mr. Apcar.	The Hon'ble Mr. Mackenzie.
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Mr. Spink.
	The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
	The Hon'ble Mr. Oldham.
	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

So the amendment was lost.

SECTION 142.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the following words be inserted after the word "may" in line 4 of section 140 (*now* 142):—

"with the approval of the Corporation."

He said:—"Section 140 (*now* 142) refers to the keeping of accounts and it provides as follows:—

'Accounts of the receipts and expenditure of the Corporation shall be kept in such manner and in such forms as the General Committee may from time to time prescribe.'

"I suggest that the accounts should be kept in such a manner and in such form as the General Committee with 'the approval of the Corporation' may from time to time prescribe. It is a matter of finance and the keeping of accounts, and I think, Sir, the forms which the General Committee may prescribe should be subject to the approval of the Corporation. It is a very small matter."

The Hon'ble MR. BAKER said:—"I am quite opposed to this amendment and have only one word to say about it. I take it there is not one single function for which the Corporation, a body of 50, can be less fitted than that of prescribing forms for keeping accounts. That can only be done by a single person. It cannot really be done in practice by the General Committee. It must in practice be done by the Vice-Chairman or Chairman."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I would point out that there may be in the Corporation experts in accounts, who may not have a place on the General Committee, and it is an advantage that such members should have an opportunity of giving the General Committee the benefit of their special knowledge. I thought it was a very small matter and the Hon'ble Member in charge of the Bill would see his way to accept it, but I find he thinks differently about it."

The Hon'ble BABU JATRA MOHAN SEN said:—"My amendment No. 99 is to the same effect, 'that in section 140 (*now* 142), last line, after the word 'may' the words 'subject to the control of the Corporation' be added; and, for the reasons put forward by the Hon'ble Babu Surendranath Banerjee, I beg leave to move this amendment. It is the same as my hon'ble friend's proposal, so I do not propose to speak separately on this."

The Hon'ble THE PRESIDENT said:—"I have no doubt if there was an expert in the Corporation who was not on the General Committee, the General Committee would gladly accept his advice in any matter of this kind."

The motion was then put and lost.

hTe last motion having been lost, the Hon'ble BABU JATRA MOHAN SEN, by leave of the Council, withdrew the motion, standing in his name, that in section 140 (*now* 142), last line, after the word "may" the words "subject to the control of the Corporation" be added.

SECTION 143.

The Hon'ble BABU SURENDRANATH BANERJEE moved that for sub-section (3) of section 141 (*now* 143) the following be substituted:—

"(3) The auditors so appointed shall receive such reasonable remuneration, not exceeding in the whole ten thousand rupees *per annum*, as the Corporation may from time to time determine."

He said:—"Sir, the present law is contained in section 75 of the Municipal Act. It runs as follows:—

'All auditors acting under this Act shall in respect of each audit be paid such reasonable remuneration as the Commissioners in meeting shall from time to time determine.'

"Therefore, the payment of the fees is a matter which has now to be determined by the Commissioners in meeting. In Bombay the fees are fixed by the Corporation subject to a maximum of Rs. 10,000, which is not to be exceeded on any account. Here no maximum is fixed, and I propose to introduce a maximum on the lines of the Bombay Act. The present section has worked well. I only know of one case where there was a difference of opinion between the Corporation and Government in regard to the payment of the auditors. I think Government claimed Rs. 8,000 for the payment of the auditors; the Corporation wanted to pay only Rs. 7,000. After some little controversy the Corporation paid the sum demanded by the Government. I propose to modify the present Act upon the lines of the Bombay Act, so that, if necessary, the Corporation may pay the auditors a sum not exceeding Rs. 10,000. The Bill proposes that the amount to be paid to the auditors shall be fixed by the Government not exceeding the cost price. The General Committee is to be, so to speak, the conduit pipe for the payment of the amount. The General Committee is to receive the order from the Government. It is to have no discretion whatsoever. Government is to determine the amount to be paid by the General Committee, and the General Committee having received the order from Government is to carry it out. I hardly think that is a satisfactory state of things. The payment of the auditors is a matter which ought to be determined by the Corporation subject to such limitations as may safeguard the interests of the Government. For this reason it seems to me that we could do nothing better than adopt the provisions of the Bombay Act, leaving the matter to the discretion of the Corporation subject to a maximum which is not to be exceeded, namely, Rs. 10,000. The cost of the audit cannot, in any case, come up to more than Rs. 10,000, and, subject to this maximum, I maintain that the matter should be left to the Corporation, and they will decide what amount has to be paid."

The Hon'ble MR. BAKER said:—"The appointment of auditors must be made by some authority entirely outside the Corporation. That is provided for by the Bill. That being so, it seems necessarily to follow that the remuneration of the auditors should also be fixed by the same outside authority. That is the primary ground of objection I take to the amendment. As regards the amendment which the Hon'ble Member proposes, I at once admit that Rs. 10,000 is likely to be more than enough. I have no objection so far as that goes, but as a matter of principle I should object to Rs. 10,000 or any other limit being fixed. What has to be provided for is an efficient audit; since the auditors must be appointed by Government, their remuneration should be fixed by Government, and Government should charge the cost price whatever it may be. Why should we fix an arbitrary limit of Rs. 10,000 or any other arbitrary sum, whether that sum is likely to be sufficient or not?"

The Hon'ble BABU SURENDRANATH BANERJEE said:—"My reply to the observations of the Hon'ble Member in charge of the Bill is very simple. The chief point taken up by the Hon'ble Member is this: the auditors being appointed by the Government, the payment should be determined by the Government.

My reply is that the auditors are now appointed by the Government, but the payment is made by the Corporation. Therefore it comes to this: that for the last forty years the principle which has been laid down by the Hon'ble Member in charge of the Bill with all the weight of his authority has been violated by the Government which has enacted our municipal laws, and no serious harm has been done; the world has gone on well enough in spite of these breaches of his principle; and it seems to me that, if the principle were to be further violated by the acceptance of my amendment, I do not think any serious harm would be done to any interest. I think in a matter of this kind we ought to move on the line of least resistance. What has been the law in the past in Calcutta has been the practice in Bombay. Let us follow the models that are before us. Let us not do something which is neither the one nor the other. I do not suppose the fees will exceed Rs. 10,000, and to be on the safe side I thought it right to fix a maximum which can under no circumstances be exceeded."

The Hon'ble THE PRESIDENT said:—"I do not know what the Hon'ble Member's experience about maxima is, but my own experience is that they are always worked up to; and, if you can get your work done for Rs. 7,000 but put a maximum of Rs. 10,000, you will surely find the bill go up to the Rs. 10,000. That is my experience. I only give it for what it is worth."

The motion was then put and lost.

The Hon'ble BABU SURENDRANATH BANERJEE moved that for the words "General Committee," in line 1 of sub-section (3) of section 141 (*now* 143), the word "Corporation" be substituted.

He said:—"Since my previous motion was lost, I beg to move this one. The payment is to be made subject to the order of the Government, but I propose that the payment should be made by the Corporation, because it is the funds of the Corporation that are to be audited. The funds do not belong to the General Committee. I think that is the correct principle, if my Hon'ble friend will take his stand upon principles."

The Hon'ble MR. BAKER said:—"The funds are the funds of the Municipality; they are not the funds of the Corporation. The Corporation is only one out of three governing bodies. I cannot admit that principle."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"The finances of the Municipality are vested in the Corporation. The power of the purse belongs to the Corporation."

The Hon'ble MR. BAKER said:—"Subject to certain limits, and one of those limits is that payments under Rs. 10,000 are made by the General Committee. Of course this amendment has no real effect. The payment is a compulsory one which has to be made on the order of Government to the auditors who are appointed from outside. It makes no earthly difference in practice whether nominally the payment is made by the Corporation or the General Committee. It is purely a matter of sentiment. In order to be consistent, as the payment ordinarily will not exceed Rs. 10,000, why not leave it to the General Committee?"

The Hon'ble MR. APCAR said:—"The Hon'ble Member in charge of the Bill makes a distinction between the Corporation and the Municipality. I confess I cannot see any distinction. The Chairman is a member of the Corporation, the General Committee merges in the Corporation, and whatever sum is paid under the seal of the Corporation is from funds vested in the Corporation; and I cannot accept any distinction between the Municipality and the Corporation. Inasmuch as the funds are vested in the Corporation, I think they ought to have a right to deal with them."

The motion was then put and lost.

SECTION 145.

The Hon'ble BABU BOIKANTA NATH SEN moved that the following words be added to section 143 (*now* 145):—

"and shall bring such report before the Corporation for consideration at their next meeting."

He said:—"I venture to think that there will be no serious objection to this amendment, at least on the ground that it attempts at securing general subordination of the General Committee and of the Chairman to the Corporation. There can be no doubt about this, that the Corporation, as distinguished from the General Committee, has to find funds, and to impose the rates and taxes. No doubt the power of spending the money vests with the General Committee and the Chairman. The Municipality is thus placed—taking the Municipality as composed of these three different authorities—that the Corporation has to find the funds and the General Committee and the Chairman are to spend them. Then as to the accounts, section 140 (*now* 142) provides that the accounts of the receipts and expenditure of the Corporation shall be kept in such manner and in such forms as the General Committee may from time to time prescribe. The accounts have to be kept in that way. The accounts are to be the accounts of the Corporation. These accounts have to be examined under section 141 (*now* 143), and, when they are examined by the auditor, he is to submit his report, and that report goes to the General Committee and then to the Chairman as soon as may be after the completion of their audit. Section 142 (*now* 144), clause (*c*), says—

'as soon as may be after the completion of their audit, deliver to the General Committee a report upon the municipal accounts.'

"Then section 144 (*now* 146) provides that—

'It shall be the duty of the General Committee forthwith to remedy any defects or irregularities that may be pointed out by the auditors.'

"If there are any mistakes or irregularities pointed out, it would be the duty or the privilege of the General Committee to remedy those defects. The Council no doubt do not lose sight of this fact that the Corporation has something to do with it, and therefore naturally it has shown the courtesy to provide in section 143 (*now* 145) that the Chairman shall cause the report mentioned in section 142 (*now* 144), clause (*c*), to be printed, and shall forward a printed copy thereof to each Commissioner along with the papers mentioned. Individual Commissioners are to be furnished with this report; they are to get this information for their knowledge; but not the Corporation. Why should this information be given to these individual Commissioners only? Why should the Corporation be slighted and overlooked, and what is the object of this? I propose that the Chairman shall bring such report before the Corporation for consideration at their next meeting. If this information is to be given to individual Commissioners and if the Corporation itself should acquire this knowledge through these individual Commissioners, why should this body, which has the responsibility to find the funds and have their accounts kept in their name, be deprived of its inherent power of discussing these matters? Under the law, as provided in this Bill, they can have no control over the General Committee or the Chairman. There is no apprehension of their being brought under general subordination; they would simply have a right to discuss. The effect is simply to have a moral influence. Nothing further than that is intended. Is it not desirable, just, proper and expedient that this body, which is responsible for the funds, who would be financing, properly speaking, should have this right of deliberating over the report of the auditor and have a discussion, and have their deliberations recorded? They will not have any right to say to the General Committee or the Chairman—Such and such defects and irregularities have been pointed out and will you please correct them. They will simply have this right, as it were, of discussing the matter, and my amendment seeks only to restore to them, as it were, the power which they are being deprived of discussing the report. I think, therefore, Sir, that this amendment is a simple one which ought to be accepted."

The Hon'ble MR. BAKER said:—"I am ready to accept the amendment."

The motion was put and agreed to.

SECTION 146.

The Hon'ble BABU SURENDRANATH BANERJEE moved that at the end of section 144 (*now* 146) the following words be added:—

"and to report the same to the Corporation."

The Hon'ble MR. BAKER said:—"The Hon'ble Babu Boikanto Nath Sen's motion is that the report is to be laid before the Corporation for its consideration. This amendment is that the General Committee, having carried out any defects pointed out by the auditors, are to report having done so to the Corporation. They are not the same thing, but I am quite ready to accept this amendment also."

The motion was put and agreed to.

The Hon'ble BABU JATRA MOHAN SEN moved that the following proviso be added to section 144 (*now* 146), namely:—

"Provided that, if the General Committee or the Corporation are of opinion that the report of the auditors is not correct as to any matters, they may, without unreasonable delay, represent their views to the Local Government, and suspend remedying the defects or irregularities as to those matters until the decision of the Local Government is received."

He said:—"Section 144 (*now* 146) as amended by the last amendment runs as follows:—

'It shall be the duty of the General Committee forthwith to remedy any defects or irregularities that may be pointed out by the auditors and report the same to the Corporation.'

"To this I wish to add the proviso I have just moved. My experience has been in mufassal municipalities that in cases in which the auditor found and reported on many matters which occurred to him were irregularities or defects, they turned out afterwards to be not really so. The Government and the Commissioner of the Division agreed with the municipality that as a matter of fact the defects or irregularities pointed out by the auditors on more than one occasion were not really defects or irregularities at all. Now that we have accepted the amendment of the Hon'ble Boikanta Nath Sen to section 143 (*now* 145), I understand that the Corporation has a right to pass some opinion as to those reports, and, that being so, I think it is fair that if a general body like the Corporation find that as a matter of fact defects and irregularities pointed out by Government auditors are not really so, and if they entertain any sort of strong opinion on the matter, they ought to be empowered to represent their views to the Local Government, and to suspend the remedy of such defects and irregularities till the Government order is received. I think this will commend itself to the Council."

The Hon'ble MR. BAKER said:—"This is an absolutely unpractical amendment. The audit of the accounts and the keeping of the accounts are purely technical matters, and it seems to me that the suggestion that the General Committee and the Corporation should be invited to dispute the advice and recommendations of their professional advisers in a matter like this, is not one that can be seriously discussed."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"Sir, I am prepared to support the amendment of my hon'ble friend Babu Jatra Mohan Sen. In regard to the recommendations which are from time to time made by the auditors appointed to audit the accounts of mufassal municipalities, we find that mistakes are sometimes committed. Sir, I happen to be acquainted with a mufassal municipality, and I distinctly remember some years ago certain recommendations being made by the auditors which we did not consider to be useful. We ventured to call in question those recommendations, and we did not give effect to them. Things of that kind take place—I will not say constantly—but they do take place. Therefore, Sir, with all the respect that I feel for experts in regard to all matters, it is conceivable that the recommendations made by the auditors may not commend themselves to the General Committee.

I think, Sir, that is a state of things which is conceivable, and it is not to be brushed aside in a summary fashion as has been done by the Hon'ble Member in charge of the Bill. I may say—and I think my hon'ble friend, Mr. Apcar, will be able to corroborate my experience—that we have not always been satisfied as members of the Corporation with the audit that has been made. I will call my friend's attention to one matter—the Entally Workshop. Year after year the accounts of the Entally Workshop are audited by the Government auditors. They were passed by them, and we were naturally led to think that everything was right and proper; but then, Sir, the whole thing was overhauled at the instance of an independent member, and we discovered discrepancies and things worse in the accounts which led to a complete examination of that institution. Therefore, I do not think we ought to regard auditors as being absolutely infallible, and, if we do not regard them as such, the General Committee ought to be permitted to suspend action being taken upon the statement of the auditors. Under these circumstances, it seems to me that the recommendation of the Hon'ble Babu Jatra Mohan Sen after all is not so unreasonable as the Hon'ble Member in charge of the Bill assumes it to be."

The Hon'ble MR. APCAR said:—"I entirely endorse what my friend has said, and I think it would be advisable to have this proviso. It does not mean that the Corporation will have power to disregard the auditors' recommendations of their own responsibility or of their own knowledge, but it may be that they are able to bring to the consideration of the subject independent opinion which would be convenient to Government to consider. Under these circumstances, I support the amendment."

The Hon'ble MR MACKENZIE said:—"I am entirely opposed to this amendment on the ground stated by the Hon'ble Member in charge of the Bill. We are not legislating here for the mufassal. We have expert auditors, and my experience, which is by no means limited, is that their audit is generally satisfactory. The Hon'ble Babu Surendranath Banerjee referred to a discrepancy, but he gave us no details, and it is quite possible that it may have arisen in stock-taking which is not the auditor's duty. The stock is taken for him, and he accepts the stock in the books, and it is quite possible the discrepancy may have arisen in respect of the actual stock."

The Hon'ble MR. OLDHAM said:—"I, too, think that my friend the Hon'ble Babu Surendranath Banerjee is not speaking exactly to the point which was referred to by the Hon'ble Member in charge of the Bill, when he opposed the motion. I, too, have had personal experience of the auditors in the case of mufassal municipalities and wards' estates, but the recommendations which these gentlemen are in the habit of making are quite different from the absolute defects which would be pointed out by such auditors as we should employ in Calcutta, and it is the case that in regard to the Entally Workshop the discrepancies and frauds entirely referred to stock-taking, and not to the keeping of accounts."

The Hon'ble BABU JATRA MOHAN SEN, in reply, said:—"With regard to the remarks that have fallen from the Hon'ble Member who represents the Chamber of Commerce, I submit that the mufassal auditors are as much experts as the auditors employed to examine the accounts of the Calcutta Corporation. There is no difference whatever. My amendment will not raise any difficulty whatever in remedying defects or irregularities complained of. All that I propose is a very moderate proposition, namely, that the remedying of defects and irregularities be suspended till the decision of the Government be obtained. After Government is placed in full possession of facts and figures supplied by the Corporation and the General Committee, I do not know how any practical difficulty will arise as to the carrying out and remedying the defects and irregularities pointed out by the auditors, if they really turn out to be so when the Government has fully considered the whole matter on full information received. There will be no practical difficulty, and I venture to think that this amendment ought to be carried."

The Hon'ble the PRESIDENT said:—"I would only point out before taking the vote that this duty of the General Committee is performed under the control of the Corporation and the Local Government, and the only authorities to enforce this duty upon the General Committee are, first, the Corporation, and, secondly, the Local Government. If the Local Government or the Corporation were of opinion that there was a sufficient reason for not carrying out the suggestions of the auditor, they would not enforce the duty, and therefore it seems to me that the section is quite sufficient, because the duty will only be enforced in those cases in which the superior authorities are of opinion that the suggestions of the auditors should be given effect to."

The motion was then put and lost.

SECTION 150.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 148 (*now* 150), line 2, after the word "worship" the words "or for charitable purposes" be added, and that sub-section (*2*)* be omitted.

He said:—"The object of this amendment is to place buildings and land used for the purposes of public charity precisely on the same footing as lands or buildings used for the purposes of public worship. It will be observed that, under the section as it stands in the Bill, it is obligatory upon the Corporation to exclude from assessment all buildings used for purposes of public worship and public burial or burning grounds duly registered under Chapter XXXV (*now* XXXIX), but it is in the discretion of the Corporation to make a similar exemption in the case of buildings or land used for purposes of public charity. I find from the Bombay Act, section 143, that the two classes of buildings, namely, those used for public worship and those used for the purposes of public charity, are placed on the same footing; and, as it seemed to me to be desirable that the Corporation should promote public charitable objects, I have thought it right to put this amendment before the Council. I am bound to say that the words 'public charity' in the Bombay Act have led to considerable difference of opinion; indeed, a question was raised there some time ago whether or not the University of Bombay was a Corporation which existed for purposes of public charity within the meaning of that section; and two eminent Judges of the Bombay High Court held that the University came under the section and was entitled to exemption (I. L. R. 16 Bom. 217). If my amendment is carried, there will be, at least, two institutions which will be benefited, namely, the University of Calcutta and the Indian Association for the Cultivation of Science; and I venture to think that, as the Municipality has done nothing directly in the way of encouraging education, it may do so indirectly."

The Hon'ble MR BAKER said:—"The Hon'ble Member the mover of this amendment is quite right in saying that in Bombay buildings used for charitable purposes are exempted from the payment of rates, but I think it is wisest to follow the precedent of the English law on the subject. The leading case is that of St. Thomas's Hospital in London. It was fought out before four Judges, and it was fought out at great length, and I think we ought to stand upon a principle which has become settled and recognised law. Moreover, I submit that to accept this amendment would give rise to great practical confusion and doubt in determining which portions of a building are used for charitable purposes and which are not. That is what I am informed by the Vice-Chairman of the Corporation."

The Hon'ble MR. HANDLEY said:—"I observe that the Hon'ble Member has not even qualified his amendment by using the term 'public charity.' In clause (*2*) of section 148 (*now* 150) a discretion is given to the Corporation to exempt buildings or lands used for purposes of public charity, but here merely the words 'charitable purposes' are used. Such a provision may open a door to abuses of all kinds. There are mosques and musjids so-called and religious *muths* in which the families of the resident-priest or mullahs remain."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"I am prepared to qualify my amendment by the insertion of the word 'public' before 'charitable purposes'."

* The sub-section (*2*) here referred to forms part of sub-section (*1*) of section 150 of the Bill as passed.

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I must oppose this amendment, as, I feel certain that it will lead to serious complications. The present law is that places of public worship and burial and burning grounds are exempted from the rates; and even such a simple phrase as 'places of public worship' has given rise to considerable inconvenience, and at this moment a case is pending in this connection. The case is one to which I called attention the other day. It is the case of Babu Jadoolall Mullick's temple. It is urged that this temple is a place of public worship; the Corporation holds that it is a place of private worship, and a controversy is going on. It is right I should add for the good name of the Corporation that it has been most generous in dealing with the taxation of public charities. Under the present law we cannot exempt public charities from the payment of rates; but applications are constantly coming up asking for such exemption. The Loretto Orphanage, the Mayo Hospital, and many other cases I could mention, have made such applications and have made them with success. Well, under the law, we cannot make an exemption, but we make a contribution corresponding to the whole or half the amount of the consolidated rate payable by such charities, and we thus give them relief. We go about in a circuitous fashion, and in that way we do what the requirements of justice demand. I find that the municipal law as it prevails in the mufassal is in accordance with the law in Calcutta. Section 87 of the Bengal Municipal Act says that the tax shall not be assessed in respect of the occupation of any building used exclusively as a place of public worship or as a burial or burning ground. Not so in the case of public charities. If a municipality wants to exempt any place of public charity from taxation, it becomes necessary to take the sanction of the Local Government before it can do so. It records a resolution in favour of exemption, and then takes the sanction of the Local Government. This Bill is in advance of the existing law. Under the existing law we cannot exempt any place of public charity; under the Bill a discretion is given, and my hon'ble friend the mover of the amendment should be satisfied with it; because, if all places of public charity were to be exempted, all sorts of complications would arise. Charities would be started with the simple object of obtaining exemption from the payment of the rates, and then, as soon as the object was attained, they would disappear altogether as charities. Therefore, it seems to me that to enact a provision of this kind, to make it the law of the land, will open a wide door to fraud. I am perfectly certain that my hon'ble friend does not want such a result, and I hope therefore that, having regard to the present practice of the Corporation which I have explained, he will withdraw this amendment. I am in perfect sympathy with the next two amendments* of which my hon'ble friend has given notice."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, in reply, said:—"The point of difference between myself and my hon'ble friend is a very small one. He says that a discretion should be given to the Corporation in this matter. My view is that places of public charity should be placed on the same footing as places of public worship and that both should enjoy statutory exemption."

The motion being put, the Council divided as follows:—

Ayes 4.

The Hon'ble Raja Bahadur Ranajit Sinha, of Nashipur.
The Hon'ble Babu Jatra Mohan Sen.
The Hon'ble Babu Boikanta Nath Sen.
The Hon'ble Dr. Asutosh Mukhopadhyaya.

Noes 14.

The Hon'ble Mr. Buckley.
The Hon'ble Mr. Buckland.
The Hon'ble Mr. Handley.
The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Babu Surendranath Banerjee.
The Hon'ble Mr. Apcar.
The Hon'ble Mr. Mackenzie.
The Hon'ble Mr. Spink.
The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
The Hon'ble Mr. Oldham.
The Hon'ble Mr. Baker.
The Hon'ble Mr. Bolton.
The Hon'ble Mr. Slack.

So the amendments were lost.

* Printed *infra*.

The Hon'ble Dr. Asutosh Mukhopadhyaya also moved that the following proviso be inserted in section 148 (*now* 150), namely:—

"Provided that the following buildings and land shall not be deemed to be used exclusively for public worship or for purposes of public charity within the meaning of this section, namely:—

(*a*) buildings or land in or on which any trade or business is carried on; and

(*b*) buildings or land in respect of which rent is derived, whether such rent is or is not applied exclusively to religious purposes or purposes of public charity."

He said:—"This provision is taken from section 143 of the Bombay Act, and its object is to restrict the operation of section 148 (*now* 150) of the Bill to lands and buildings *exclusively* used for religious or public charitable purposes. Such a restriction is obviously needed to protect the Corporation from unfounded and fraudulent claims for exemption."

The Hon'ble Mr. Baker said:—"I think this amendment is a distinct improvement, and I hope it will be accepted."

The Hon'ble Babu Surendranath Banerjee said:—"I support the amendment."

The motion was put and agreed to.

Section 151.

The Hon'ble Babu Surendranath Banerjee moved that for clauses (*a*) and (*b*) of section 148A (*now* 151) the following be substituted:—

"the estimated gross annual rent at which any building (including a hut or shed) or land liable to the consolidated rate under this Act might reasonably be expected to let from year to year shall be deemed to be the annual value of such building or land:"

and that the words "under clause (*a*)" in proviso (*ii*) to section 148A (*now* 151), and the whole of provisos (*i*), (*iii*) and (*iv*) to the same section, be omitted.

The Hon'ble Babu Surendranath Banerjee also moved that, if the last amendment be lost, the words "three and-a-half" be substituted for the word "five" in line 4 of clause (*b*) of section 148A (*now* 151), and that the words "and less ten *per cent.* for the cost of repairs" be inserted after the word "any" in line 8 of clause (*b*) of section 148A (*now* 151).

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that in section 148A (*now* 151), clause (*a*), the words "erected for letting purposes or ordinarily let" be omitted.

The Hon'ble Dr. Asutosh Mukhopadhyaya also moved that clause (*b*) of section 148A (*now* 151) be omitted.

The Hon'ble Dr. Asutosh Mukhopadhyaya also moved that, if the last amendment be lost, in section 148A (*now* 151), clause (*b*), for the words "deemed to be five *per cent.*," the words "the amount derivable as interest, calculated according to the highest rate of interest payable on Government securities," be substituted.

The Hon'ble Dr. Asutosh Mukhopadhyaya also moved that in section 148A (*now* 151), proviso (*iii*), for "of five *per cent.*" be substituted "according to the rate stated in clause (*b*)."

The Hon'ble Babu Surendranath Banerjee said:—"I regard this as a very important part of the Bill. Section 148A (*now* 151) of the Bill is section 122 of the present Act, and I may add that an animated debate took place in this Council on the occasion of the introduction of this section of the law in 1888.

"The object of my amendment is to restore the law to what it was in 1888. The law of assessment in 1876 provided that the annual value of a house or building shall be the lettable value of that house or building, the rent which that house or building is expected to fetch from year to year. That was the law of assessment in 1876, and it was the law of assessment in the Act of 1863. Thus this principle of assessment has been in force from 1863 to 1888, and then the law was changed. The principle of assessment as regards rented houses is kept intact under the law of 1888, but the principle has been changed as regards residential houses. The principle which then for the first time was enacted as the law of the land is this: the annual value is to be 5 per cent. on the present estimated cost of the building *plus* the value of the land *minus* a certain sum to be allowed for purposes of deterioration. This is the present law of assessment as regards residential houses. It is this principle of assessment as regards residential houses that I venture to assail in this Council. It was indeed introduced by no less an authority than Sir Henry Harrison. It was said by him, in justification of this new law of assessment, that it is difficult to ascertain the annual valuation of residential houses in accordance with the principle laid down in the law of 1876, and the result was that houses in the northern portion of the town were considerably under-assessed. Even if that were admitted for the sake of argument—I am not prepared to accept it as a correct statement of the facts—is it a justification for the gross over-assessment of residential houses all over the town under the present law? I venture to challenge the statement that there has been any difficulty felt in assessing residential houses in accordance with the principle of assessment contained in the law of 1876, and I shall be able to quote in support of this statement no less an authority than that of Sir Richard Garth, late Chief Justice of Bengal. He said in one of his judgments:—

'The principle of rating which the Commissioners follow at present (the principle of the law of 1876) is the same as that which is adopted in England, and similar difficulties arise there in the case of great buildings and mansions erected for residental purposes and not for sale, but these premises are constantly being rated at their letting value.'

"He goes on to say that the principle is a good and workable principle. I go further than that. I contend that the principle of assessing residential houses under the law of 1888 is a principle which in its practical operation is beset with serious difficulties, and I am prepared to quote in support of that statement the authority of the municipal Executive itself. I will quote an extract from the Annual Administration Report of 1889-90, page 53:—

'A totally new system of assessment has been introduced in respect of houses occupied by the owners, that is, fixing a percentage on the estimated present cost of rebuilding a house. For the proper working of this section it is necessary to find out how the estimated present cost of rebuilding a house is to be calculated. Is it the sum which a European or a native contractor would charge or the owner himself would spend? How are the materials to be valued? Many old houses are built with materials which are now not procurable in the market. Are other and more costly materials to be substituted in their place? Then, again, what is a reasonable amount to be deducted for depreciation? Upon what principle is this depreciation to be calculated? It is difficult to find a standard by which depreciation can be ascertained. There is nothing in the law to indicate it. ....
The executive officer has to work the law as he finds it, and he is in no way responsible for its shortcomings.'

"That is the deliberate statement of the responsible executive head of the Corporation, as it appears in the Administration Report for 1889-90. Therefore, I am entitled to hold that, in the practical working of the principle contained in the law of 1876, there has been no difficulty, and that whatever difficulties have been felt have all been felt in consequence of the change of the principle of the law of 1876, and the adoption of a different principle which finds a place in the law of 1888. In this connection I will, with the permission of the Council, quote an extract from a report which was laid before the Select Committee on the Bill of 1888—a report which was made by a Committee of the House of Commons over which Mr. Goschen presided. Mr. Goschen is one of the greatest financiers of the age; he is now the first Lord of the Admiralty

and a Cabinet Minister, and an undoubted authority on all financial questions. This is what he said with regard to this principle:—

'When it appears to the assessing authority that for special reasons a building cannot be fairly valued according to the annual rent which a tenant might reasonably be expected to pay for it, it shall be valued in the following manner:—

the gross value of any such building shall be a sum equal to 4 per cent. on the capital sum which a purchaser might justly be expected to give for such a building in its actual state and existing mode of occupation.'

"Therefore, it comes to this,—and I attach very great importance to the report of Mr. Goschen's Committee, and I am quite sure the Council will attach the greatest importance to the report of a Committee presided over by so distinguished an authority as Mr. Goschen,—that ordinarily the annual value should be the lettable value of the building or house; but if, for special reasons, it is difficult to ascertain the lettable value, then the annual value should be taken to be the market value of the house or building. This question of the market value was raised by Dr. Guru Das Banerjee in 1888. He pressed Sir Henry Harrison to accept a percentage upon the market value of the house or building in substitution of the present system of taking a percentage upon the estimated present cost of erecting the house or building, less a reasonable amount for depreciation; and at one stage of the discussion—I find from the Council Reports—Sir Henry Harrison held out hopes that he would accept that view, and he asked for an adjournment in order to consider the principle advocated by Dr. Guru Das Banerjee. Sir Henry Harrison, however, subsequently changed his mind and opposed Dr. Guru Das Banerjee's amendment, and urged that the acceptance of the principle of taking the market value would be beset with far greater embarrassment than the principle contained in the Bill. I hope this Council will take a different view. I hope they will insist on the market value being taken as the basis of valuation, for in my opinion it is the only equitable way of proceeding to ascertain the annual value of a house or building. I base my case on the broad considerations of justice and equity; and if I am able to convince the Council that I have relied on such considerations, then I should be entitled to claim the verdict of the Council in support of my amendment. Take the case of a person who has purchased a residential house for Rs. 10,000, which is the market value of that house; he finds, however, that the assessment on that house is made upon a valuation of Rs. 15,000, in accordance with the principle which finds a place in the law of 1888. Is it equitable that he should purchase a house for Rs. 10,000, and have to pay rates on Rs. 15,000? And most houses have been purchased by those who reside in them; not many are built by persons for their own residence. Therefore, you practically call upon a very large number of the owners of residential houses to pay a sum which is fictitious, an exaggerated sum over and above what would be the assessment upon the market value of the houses in which they reside. This is a matter which deserves serious consideration. My hon'ble friend Dr. Asutosh Mukhopadhyaya has given notice of an amendment in this connection, and I hope the Council will accept that amendment—I hope the Council will give redress by accepting the market value of the house or building as the basis of assessment in substitution of the principle embodied in the law.

"It was said in the course of the debate in Council in 1888 that the principle accepted by Sir Henry Harrison, and embodied in the Act of 1888, followed the lines of certain principles laid down by John Stuart Mill in his Treatise on Political Economy. I desire to read an extract from Mill. Mill says:—

'A valuation should be made of the house, not at what it would sell for, but what would be the cost of rebuilding it, and this valuation might be periodically corrected by an allowance for what it had lost in value by time or gained by repairs and improvements. The amount of the amended valuation would form a principal sum, the interest of which at the current price of the public funds would form the annual value at which the building should be assessed to the tax.'

"My contention is that the law of 1888—and it is a law against which I desire to record my protest—is not in conformity with the principles laid down by Mill. It was alleged by Sir Henry Harrison that in following those principles he adopted them in only a qualified form. If those principles had

been accepted, then the annual value would not be 5 per cent., but 3½ per cent., of the estimated present cost of building, *plus* the value of the land. And furthermore there should have been a section exempting houses below a certain sum from payment of the consolidated rate. I have given notice of an amendment to that effect, and I understand the Hon'ble Member in charge of the Bill is prepared to accept that amendment. My contention, therefore, is that the present law goes beyond the principles laid down by Mill, and that, when critically examined, it will be found not even to be based on those principles. I go further and say that those principles are not applicable to the circumstances and conditions of life in this country. Mill regards a house-tax as a sort of income-tax, and so it is in London and the great towns of the United Kingdom. But I venture to assert that a house-tax in India is not in the nature of an income-tax. And I will tell you my reasons for holding this opinion. A Hindu builds a house in conformity with a deep-seated instinct of his nature; it is a wish nearest to his heart to build a house and leave it to his children and his children's children as a memorial of his love and affection for them. Sometimes he has not the money to build a house, but he incurs a debt in order to do so; the house, therefore, in many cases is not evidence of his prosperity. It often is an index of his indebtedness; for, as it happens sometimes, as soon as the house is built, he goes to the money-lender to mortgage it. The state of things in England is totally different. An Englishman does not ordinarily build a house; when he becomes wealthy, he builds a house and becomes the lord of a manor; his house, therefore, gives some idea of his income, and he ought to be taxed accordingly. The house of an Indian is, on the other hand, often an index of his indebtedness, and not of his income upon which he should be taxed. A house-tax may be in the nature of an income-tax in England; it is not so in this country. In Bombay the principle against which I am contending is not the principle of assessment; there the annual value is the lettable value. In the mufassal here it is the same. I do not know what the law in Madras is, but probably it follows the same lines. You have in Calcutta a law based professedly on the principles of political economy, but representing a great departure from those principles. It is based on considerations applicable to a house-tax, and not on those applicable to an income-tax. I hope I have made it abundantly clear that a house-tax in Calcutta is not, and cannot be, in the nature of an income-tax. I don't wish to remind the Council of the discussions which took place in this Council in 1888; they are more or less a matter of ancient history. I do hold that I am entitled to claim a reversal of the legislation of 1888 if I can show that a grievous burden, hard to be borne, has been thrown on the middle-class people in Calcutta. Soon after this section of the law of 1888 came into operation it was applied to Ward No. 6; and I have obtained a statement of the increase of assessment which took place at that time in consequence of the application of this section to that ward. I find that in the case of 139 houses the rate of assessment was increased in the proportion of from 1 to 10 per cent.; in the case of 264 houses it rose from 10 to 20 per cent; in the case of 175 houses from 20 to 30 per cent.; in 162 houses from 40 to 50 per cent.; in 80 cases from 50 to 60 per cent.; in 35 cases from 70 to 80 per cent.; in 37 cases from 80 to 90 per cent.; in 27 cases from 90 to 100 per cent. There are increases even to the tune of 200 per cent. and more. In 13 cases the increase was from 110 to 120 per cent.; in 9 cases from 120 to 130 per cent.; in 5 cases from 140 to 150 per cent. Altogether there was an increase in the case of 1,177 houses. In 12 cases the increase was 250 per cent.; in 2 cases from 240 to 250 per cent.; and in several cases from 230 to 240 per cent. And the sum total of the assessment is thus summarised: Out of 2,018 houses there were 853 in which the assessment was raised from 1 to 50 per cent.; in 249 houses from 50 to 100 per cent.; in 80 cases from 100 to 200 per cent. The total increase was from Rs. 5,54,866 to Rs. 6,81,319; and then there were several cases pending. This, I submit, is the most convincing illustration that it is possible to adduce on the operation of this section of the law to which one can refer. A petition was presented in 1890 to the Local Government against the assessment sections of the law; that petition was made over to Sir Henry Harrison for an expression of his opinion. Sir Henry Harrison observed in a note on that petition that 'when the whole town had been re-valued under the

Act of 1888, the equity of the valuations might be tested by a Committee of Engineers and Surveyors; and if they found that residential houses occupied by their owners were exceptionally more highly valued than other classes of buildings, let redress be promptly given.' And that assurance was repeated by the Government of Bengal. The then Lieutenant-Governor, in a Resolution, observed that in his 'opinion this suggestion is one which may very properly be attended to if the owners of houses built for their own occupation should, when the present revaluation of the town is finished, still find that they have been unfairly treated.' The middle-class owners of residential houses have, I submit, been undoubtedly very unfairly treated. They repeat the complaint now which they made in 1890—they have suffered greatly; they are not rich men; the Government promised them redress—prompt redress; that redress has not yet been given."

The Hon'ble Mr. Baker said:—"An enquiry was promised."

The Hon'ble Babu Surendranath Banerjee said:—"I shall be satisfied with an enquiry. I shall rely with confidence on the judgment of a Commission of Enquiry. If the Hon'ble Member in charge of the Bill is able to give an assurance that an enquiry will be made by competent persons, I shall for the present be satisfied; for I know that, as the result of such an enquiry, it will be found that a grievous burden has been thrown on the owners of middle class houses built for residential purposes. I appeal to Your Honour for justice to these classes; they suffer from a serious and substantial grievance which ought to appeal to our strongest sympathies. I know that there is a difficulty in the way if this section of the law is remodelled on the lines I suggest. The municipal revenues will suffer; but I submit that no considerations of revenue should prevent justice being done to the suffering owners of residential houses, if they can legitimately claim it at Your Honour's hands, and to that justice I venture to think they are entitled."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"The object of the amendments which stand against my name is practically identical with the object of those just moved by my hon'ble friend. That object is to abolish the distinction which was for the first time introduced in the Act of 1888 between the modes of assessing the rateable value of buildings erected for letting purposes or ordinarily let and buildings erected for residential or other purposes. The present Bill reproduces faithfully the provisions of the Act of 1888, and it may, perhaps, be said that the system which has been acquiesced in for ten years may well be allowed to stand. But, Sir, as the present Bill has destroyed the vital characteristics of a system which has been cherished by the people for at least a quarter of a century, I feel that it would not be right and proper to accept, without question or contest, a system of assessment which, in my humble judgment, is absolutely unsupportable on principle.

"But, before I deal with the question of principle, I shall ask the Council to consider for a moment what is the precise distinction between the mode of valuing houses or buildings erected for letting purposes or ordinarily let and those erected for residential and other purposes. In section 148A (*now* 151), clause (*b*), it is provided that the annual value of any building not built for letting purposes and not ordinarily let shall be deemed to be 5 per cent. on the sum obtained by adding the estimated present cost of erecting the building, less a reasonable amount to be deducted on account of depreciation, if any, to the estimated value of the land valued with the building as part of the same premises. Clause (*a*), which deals with the mode of assessment of the other class of buildings, provides that the annual value shall be deemed to be the gross annual rent at which the land or building might reasonably be expected to let from year to year. Consider this for a moment. The case we are dealing with is the case of a house erected for letting purposes or which is ordinarily let; but, although at the time of the assessment the house may have been actually let, the actual amount of rent paid by the tenant is not to be accepted as the measure of the rateable value of the building, but it is the rent at which the building may be reasonably expected to let from year to year; it is not the

actual rent which is paid, but the rent which a hypothetical tenant may be expected to give for that house or building. With a clear conception of the distinction between clauses (*a*) and (*b*) of section 148A (*now* 151), let us now examine the grounds upon which this system of assessment is based and defended.

"It is urged, in the first place, that it is not fair to apply to a mansion, built for residential purposes, which the owner never intends to let, and which, as a matter of fact, is never let, a principle of annual value which in its terms applies only to buildings erected for letting purposes. It is said that to apply the principle in this way is nothing short of an attempt to include within the operation of the rule cases which by the very terms of the rule are excluded from its scope. Now consider for a moment that, even in the case of a building which is erected for letting purposes or ordinarily let, you do not proceed upon the basis of the actual rental, but only upon the basis of the rental which might reasonably be expected to be derived if the building was let from year to year. In other words, even in the case in which a building is actually let, you proceed upon the basis of the rental which might be derived from a hypothetical tenant. Is there, then, any good reason for the contention that as a mansion, built for residential purposes, is never let, you cannot take as the basis of your valuation the rental which might be paid by a hypothetical tenant? If you introduce the hypothetical tenant in the one case, what is there to prevent you from introducing the hypothetical tenant in the other case? Indeed, it seems to me that the two positions are absolutely inconsistent and irreconcilable.

"In the second place, it is urged by the defenders of the system that if we introduce the fiction of a hypothetical tenant, as we do in the case of a building erected for letting purposes, we are sure to land ourselves in a difficulty, as there are no data upon which we can proceed. It is said that there are buildings, whether built for residential or other special purposes, of which it would be impossible to find an occupier other than the owner himself. But the answer is, that the difficulty is not greater here than in the other case where you also introduce the hypothetical tenant. A concrete illustration which you will find reported in the Reports (I. L. R. 10 Mad. 38) will make it manifest that there is no special or particular difficulty here. In 1886, the Municipality of Madras assessed the Lying in Hospital, which was the property of the Government, at Rs. 12,000 a year. It was contended on behalf of the Government that the valuation was unreasonable beyond all bounds, because, if the premises were to be let, there was no private person who would pay Rs. 1,000 per month for these buildings, which were only suitable for the purposes of a hospital. It was even suggested on behalf of the Government that, if the lease of the hospital were put up to auction, it would not probably fetch more than a merely nominal sum. This contention was overruled and a decision given in favour of the Municipality on the ground that the true test of rateable value must be taken to be the rent for which the premises could reasonably be expected to be let to a hypothetical tenant who required the building for the purposes of a hospital, and that the Government must not be excluded from the number of hypothetical tenants who might be supposed to be willing and anxious to rent the premises. This view of the Madras High Court is in perfect accord with the current of English decisions, the last and the most authoritative of which was pronounced by the House of Lords so late as September, 1893 (App. Cas. 1893, page 562). It would not be fair for me, Sir, to pass over without mention a passage from the writings of the great economist Mill, which is relied upon by the supporters of the theory I am assailing, and a portion of which has just been read by my hon'ble friend Babu Surendranath Banerjee. The passage in question is to this effect:—

'The public were justly scandalised on learning that residences like Chatsworth or Belvoire were only rated at the imaginary rate of perhaps two hundred a year under the pretext that, owing to the great expense of keeping them up, they could not be let for more, and probably even they could not be let for that, and, if the argument were a fair one, they ought not to have been taxed at all.'

"Now, Sir, these words were written about half a century ago, and the subsequent course of events has amply showed that the difficulty to which

Mill alludes does not really exist if in assessing the rental you assess it upon the basis of what would be paid not by an actual but by a hypothetical tenant; and that is the principle which since the days of Mill has been adopted in England, has received the approval of the House of Lords in the case I have just referred to, and has been partially adopted by this Council itself in the case to which the provisions of section 148A (*now* 151), clause (*a*), are applicable.

"In the third place, Sir, I shall presently show that the system which was introduced in the Act of 1888, and which is faithfully reproduced in the present Bill, is based upon a fiction for which there is no justification either in fact or in principle. It is urged that when a person builds a mansion for residential or other special purposes the proper test is, not what the house might be let for, because it was never intended to be let, but what is the interest derivable from the capital sunk, as it must be assumed that, when the owner spent his capital, he must have intended to recoup himself fully by the benefits derivable from his occupation; in other words, the assumption is, that when a person has spent a certain sum upon the creation of the property, he would have been equally willing to have paid a reasonable percentage on the outlay as rent to a contractor willing to erect the property and let it out to him? I need hardly say that this is entirely mythical. A man often builds a house which suits his convenience more than the convenience of any other man, and, in building it, he may and often does spend more money in lavish ornamentation than he would do if he had intended it for tenants. Take one illustration more, viz., that of the hospital built by the Madras Government or the one now in course of construction in this city. Did the Government ever calculate that the amount of benefit to be derived was at least equivalent to the amount derivable as interest upon the capital sunk? But, if you introduce one fiction which is not founded on fact, you have necessarily to support it by another fiction equally baseless. Once assume that the person who builds a mansion sinks capital in the expectation of a profitable return, there is no room for retreat; you have further to imagine the rate of interest which he expects as profit. You readily assume this to be 5 per cent. I ask, if there is any basis for this arbitrary figure? Why not make it 4 per cent. or 6 per cent.? It would certainly be more rational to assume the highest rate of interest payable on Government securities. I have it on the high authority of Lord Chancellor Herschell that there is no foundation for the arbitrary assumption you make. In the case to which I have already referred he deals with this matter, and I shall venture to quote one passage from his speech:—

'It was said that a practice prevails of taking 5 per cent. on the cost, in the case of buildings, as a basis for arriving at the rental. Such a rule of thumb may be all very well where the premises would be likely to find competing tenants, but is not by any means necessarily applicable where it is thought that the owner would be likely to give a higher rental than any one else. It would often be obvious that he would never be willing to pay the rent arrived at in such a fashion, inasmuch as it would be more advantageous for him to become the owner. There are many other circumstances, too, which may affect the answer to the question what the owner of premises would have been willing to give, if, instead of becoming the owner, he had become the tenant of them. In all cases of the description of which I am speaking, the whole of the circumstances and the conditions under which the owner had become the occupier must be taken into consideration, and no higher rent must be fixed as the basis of assessment than that which it is believed the owner would really be willing to pay for the occupation of the premises.' (App. Cas., 1893, p. 59[illegible].)

"Language more clear and emphatic it is difficult to conceive, and I will not add any feeble argument of my own; for, if the authority of Lord Herschell does not carry conviction home to the Members of this Council, nothing else will.

"To summarise, it seems abundantly clear to me, Sir, that the whole system is based upon an assumption which has no foundation in fact and which has no justification in principle. If it was permissible to analyse the reason which lies at the root of the matter, but which is never publicly avowed, it seems to be this: when a wealthy man has built a mansion, he has given manifest proof of his wealth; he has the means to pay and let us tax him. I wish, Sir, this were the principle, uniformly applied to all—to the poor and to the rich alike. If the taxes were regulated according to the means of the

individual rate-payer, I am sure we should touch the pockets of many who now manage to escape with the payment of comparatively insignificant amounts."

The Hon'ble Mr. Baker said:—"The amendments which have been moved by the two Hon'ble Members relate to two separate matters. The first of them relates to the adoption of the principle of valuing residential houses according to some percentage on the cost of construction. The other matter relates to the particular percentage at which the assessment should be made. I will deal with these two matters separately.

"In the first place, I wish to observe that this matter has been fully discussed on three separate occasions. It was discussed at great length in Council in 1888 when this principle was first introduced by Sir Henry Harrison, and the Council then decided to accept it. It was again considered in 1890, when a petition was submitted by a number of influential house-owners protesting against the principle of the Act of 1888. That petition was sent to Sir Henry Harrison for report, and he recorded a very lengthy and most able minute dealing with the whole question—a minute which was characterised by the Government as an able, elaborate and conclusive vindication of the provisions of the existing law. The conclusions of the Local Government on the matter were formulated in a Resolution, dated the 7th June, 1890, in which the whole question was again reviewed; and the decision arrived at was that although residential houses were still somewhat under-assessed, yet the result of the recent legislation was nevertheless a decisive approach to fairness and equal taxation. That is not all. Later on in the same year, a further memorial was submitted to the Viceroy, and was forwarded to the Local Government for report. The views of this Government on the further memorial were expressed in a letter to the Government of India, dated the 15th October, 1890, in which it was maintained that the mode of valuation prescribed in 1888 was undoubtedly much better and fairer in its results than the habitual under-valuations under the old law of the class of houses concerned. The Government of India endorsed the opinion expressed in Sir Henry Harrison's minute and in the Resolution and letter of the Government of Bengal, and considered that they disposed of the arguments of the memorialists on all points, and they declined to interfere.

"It is rather to be regretted, under these circumstances, that this question should be brought up again. I have read the various representations made by the Corporation and by the British Indian and other Associations, and I have listened to the arguments which the two Hon'ble Members who have moved amendments have adduced, and I must say that I find nothing new in them; nothing but the old arguments put forward in 1888, which were then proved to be fallacious and unsound. I do not propose to take up the time of the Council by reading the proceedings of this Council in 1888 when this principle of valuation was first adopted; but if, after hearing what I have to say on the subject, any Member still feels any doubt, I would ask him to read the Resolution and letter of the Government of Bengal which deals with the subject in a manner which is quite convincing.

"First, I should explain, for the information of the Council, a matter which all Hon'ble Members may, perhaps, not quite understand—what meanings are put on the terms 'residential' and 'tenanted' houses. What is meant by a tenanted house is a house built for letting purposes and ordinarily let. By residential house is meant a house built by any one, not for the purpose of letting or selling it, but for the purpose of living in it himself with his family. The number of residential houses in Calcutta used in that sense is 11,945 as compared with 20,562 rented houses. The proportion of residential houses is about 40 per cent. of the whole number of houses in Calcutta, and that is a proportion which is not approached in any town in England. The annual valuation of these 11,900 residential houses at the present rate is Rs. 45 lakhs and the annual valuation of the 20,562 rented houses is, I think, 104 lakhs.

"The English law of rating on which the Indian law is based is to be found in the Statute 6 & 7 Wm. IV, cap. 96, an Act passed in 1836. It lays down

the principle that the annual value of a hereditament shall be the rent at which the same may be reasonably expected to let from year to year free of all tithe, commutation charges, insurance, repairs, and the like. Under the Calcutta law of 1876 and also the law of 1888, the annual value of houses is based on that principle. The law of 1876 laid down that the estimated gross annual rent at which any house or land may be expected to let from year to year, less in the case of a building an allowance of ten per cent. for the cost of repairs and for all other expenses necessary to maintain the building in a state to command such gross rent, shall be the annual value. In the Act of 1888 the same words were used in respect of the annual value of houses erected for letting purposes or ordinarily let. In respect of residential houses, however, a different rule was laid down. The reason for introducing a different rule in that case was this. In the case of rented or tenanted houses the rent, which is based on open competition, is a very fair criterion of the relative annual value as between one house and another. But in the case of residential houses it is not so. In the case of residential houses which are not let, there is no actual rent, and the annual value must be determined in some other way. I will explain what was the method adopted in ascertaining the valuation of such houses before the passing of the law of 1888 The matter was in the hands of Assessment Benches selected from among the Commissioners themselves by lot, and I may mention that there were good reasons for selecting them by lot. As these houses were not actually let, there was no actual rent, and the Assessment Benches had to ascertain the annual value in some other way. What they did was this. It occasionally happened that a residential house passed out of the hands of the owner and was let. They used to take a house of this kind; they used to ascertain what rent was actually paid for a house of that description, and they used to take that rent as a standard of the annual value of similar residential houses, having due regard to locality and accommodation. Now, a valuation obtained in that way is entirely unsuitable and inadequate. There exists in Calcutta amongst Hindus the strongest possible prejudice against living with one's family in a hired house. It was stated by Dr. Gurudas Banerjee in the discussions of 1888 that there is a general feeling that a man ought to possess a place of his own to live in with his family. It was stated by Babu Nilmoney Mitter that so strong is this prejudice that a person would rather live in tiled huts on two or three cottahs of land of his own, than in a comfortable hired pucca house It was stated today by the Hon'ble Babu Surendranath Banerjee that a Hindu builds a house in accordance with an instinct instilled into his nature; he builds it in order to leave it to his family as a monument of his affection for his children. Now, Sir, it is a consequence of this feeling and prejudice in Calcutta that there is no demand for residential houses for the purpose of letting; no one wishes to hire one; no one wishes to let one; there is no effective demand for that class of houses. Ordinarily such houses never come into the market at all either for sale or for hire, and it is only by accident that they are let for hire at all; and, when a man is compelled by untoward circumstances to let his house, he has great difficulty in finding a tenant, and, if he finds one, he is compelled to accept what the tenant chooses to give. The case is entirely different from the case of houses which are let in the ordinary way. Now the Assessment Benches took this depreciated rental as the standard for fixing the annual value of residential houses which are never let. In this way, they set up an entirely false standard of valuation, and the consequence was that residential houses in the occupation of owners were habitually and systematically under-assessed. Sir Henry Harrison estimated the under-assessment to be from 30 to 50 per cent. Mr. Allen, the then Legal Remembrancer, estimated the percentage on the actual cost of constructing such houses to be frequently as low as 2 per cent. In the case of Nundo Lal Bose, which is probably the case to which the Hon'ble Babu Surendranath Banerjee referred just now, it was admitted that the valuation on the cost of construction of the house, a new and costly house, situated in a good part of the town, amounted to only $2\frac{3}{4}$ per cent. upon the actual cost, and even that insignificant percentage of the cost was appealed against by the owner. Babu Nilmony Mitter, an experienced engineer, stated that the prejudice against living in a hired residential house, and even against hiring one which had not

been built for one's occupation, was so strong, that even if a new house was sold immediately after it was completed, it would possibly not fetch what it cost the owner to build it. This, as Sir Henry Harrison characterised it, was a grave scandal. It was a scandal that a class of houses owned by many of the wealthiest members of Calcutta society and by a very large number of middle-class people, and by hardly any of the poorer classes, should be habitually under-assessed. To remove this scandal Sir Henry Harrison took the following course. He proposed to follow the principles of the English law as laid down by the Courts in England. It is true that in England there is not the same distinction between rented and residential houses. There is no prejudice there against living in a hired house, and houses occupied by the owners are hardly to be distinguished from those occupied by ordinary tenants. But there is a class of buildings in England with regard to which the same difficulty has occurred as has been experienced here—I mean manufactories, warehouses, hospitals, lighthouses, and the like. These are buildings which are not built for the purpose of letting, and which are usually occupied by their owners and are not let. The principles which the English Courts have applied to ascertain the annual value of such buildings are these. They are laid down in a well-known case, and this is what the Judge said in that case:—

'A hypothetical tenant must be assumed[1].'

"That is to say, the principle simply is this: In order to ascertain the rent which a hypothetical tenant might be reasonably expected to pay, you must first take the annual value of the land; then you must ascertain what would be paid to a contractor for labour and materials for constructing the building, and the contractor's profit; then you must allow a certain percentage for deterioration, so as to get the value of the building in its present state; and on that sum you must take a reasonable percentage, and that will be the annual value. That is exactly what has been done in this Bill. Section 148A (*now* 151), clause (*b*), lays down the principle that the annual value of any building not erected for letting purposes and not ordinarily let shall be deemed to be 5 per cent. on the sum obtained by adding the estimated present cost of erecting the building, less a reasonable sum to be deducted on account of depreciation, if any, to the estimated value of the land valued with the building as part of the same premises. That is exactly the principle laid down in this very class of cases by the decisions of the highest Courts in England, and all that Sir Henry Harrison did was to give effect to that principle in the valuation of residential houses in Calcutta. The Hon'ble Dr. Asutosh Mukhopadhyaya said that it would be perfectly possible in the case of residential houses to apply the principle laid down for rented houses. He is perfectly correct, and I have all along felt that it was so; but under the law, as it stood in Calcutta prior to 1888, that was not done. Had it been done, the law would possibly not have been altered at all. But the Assessment Benches misinterpreted and misapplied the law; and it was for this reason that a remedy had to be found. The Hon'ble Babu Surendranath Banerjee has quoted from a report of the Calcutta Corporation to show that the system of valuation of residential houses adopted in 1888 had given rise to difficulties. That report was the report on the administration of the Municipality in 1888-89, the first report which was written after the change in the law was made. Since that year no comment has been made, as far as I know, in any other report.

"Now I will turn to the question of percentage, and on this point both the Hon'ble Members have relied on Mill, and one of them proposed that the percentage should be 3½ per cent., whereas the other proposed that it should be fixed at the highest rate of interest on Government securities at the time. Practically both come to the same thing. The only reason I can see for making such a proposal is the opinion expressed by Mill; but in the particular passage from Mill which has been quoted it will be seen that the particular percentage to be taken has nothing to do with his argument. It is absolutely in the nature of an *obiter dictum*. The principle for which he was contending was that buildings of the class in question should be valued with reference to the cost of construction, and that principle he justifies by entirely independent arguments. The particular rate of percentage has nothing to do with his argument, and he gives no reason for adopting that particular rate. It is not adopted in England, and

[1] See Lumley's *Law of Parochial Assessments*, 7th Ed., p. 19.

was not recommended by Mr. Goschen's Committee. The truth is that the rate of interest on Government securities has nothing to do with the matter. The true principle is that capital invested in house property always in the long run expects to receive the same return, whether it be invested in rented houses or in residential houses; and if, for any reason, it does not get that return, it will not be invested at all. If you get a certain return by investing capital in houses built for letting purposes, we may safely assume that the capitalist who invests his money in the construction of a residential house expects the same return for his money. In other words, if we can ascertain the return on capital invested in rented houses, that return represents the percentage on cost of construction which should be taken for the purpose of determining the annual value of residential houses.

"In 1888 it was at first proposed to take a percentage of 6 per cent. It was found then that capital sunk in house property in Calcutta fetched from 6 to 7 per cent. The Council finally adopted a lower rate, partly to be on the safe side, and partly in order to mitigate the effect of the enhancement which it was known and intended would follow on the introduction of the new system. I have endeavoured to ascertain what is the present return upon house property in Calcutta, and I will read to the Council letters which I have received from Messrs. Mackintosh, Burn and Company and Messrs. Mackenzie, Lyall and Company, whom I have consulted.

"Messrs. Mackintosh, Burn and Company write as follows:—

'A considerable amount of house property in the European quarters of the town has within the last few years, changed hands at prices based on a return of from 5 to 5½ per cent. interest, but we consider that purchasers at these rates have always in view the gradual increase in value of town property, and are satisfied with a return of 5 to 5½ per cent. for a few years if they see a fair prospect of increasing rents in the near future. We should say the present return expected from—

Tenanted or bustee land was	... 4½ to 5 per cent.
Residential property ...	... 5½ to 6 per cent.
Commercial or business premises ...	... 6 to 7 per cent.'

"And Messrs. Mackenzie, Lyall and Company say:—

'The usual return on house property in Calcutta at the present time is 5 per cent., as an average all round, though we believe in some parts of the native quarter 6 per cent. is obtainable.

'The rate in 1888 was 6 per cent., and no one looked for less, but 5 per cent. may now be counted upon as the correct return.'

"We may, therefore, take it that in the opinion of two European firms of the highest standing, who have great experience in this class of work, a percentage of 5 per cent. is not excessive now. I will only add that, if the percentage were reduced from 5 per cent. to 3½ per cent, assuming that the municipal taxes are levied at 20 per cent. on the annual valuation, the resulting loss to the municipal revenues would be no less than Rs. 2,70,000 per annum. If anything had been said as to 5 per cent. being an exorbitant rate, I should have drawn attention to the saving clause in the proviso (*iv*) in the same section; and I have a list of cases showing the manner in which that saving clause has been worked in the past to prevent any injustice or hardship. But neither of the Hon'ble Members who have moved amendments on this section have referred to that point, and, therefore, I shall not trouble the Council with any remarks on it.

"The Hon'ble Babu Surendranath Banerjee quoted a passage from a note by Sir Henry Harrison, in which it was said that if, after the valuation of the whole town was completed, it should be found that there were still complaints that this valuation was excessive, then it would be right to appoint a Committee of Engineers and Surveyors to test the valuations. That proposal was endorsed by the Government of Sir Steuart Bayley; and, although I have not had an opportunity of taking Your Honour's orders on the subject, I will take the responsibility of saying that even now, if complaints are received that the assessment of residential houses is too high as compared with that of rented houses, Your Honour's Government will be prepared to institute

such an enquiry. But I must clearly explain that, if it should turn out that the measures adopted in 1888 are insufficient, and that there is still under-valuation and under-assessment in respect of residential houses, it will be the duty of the Government to give effect to the recommendations of the Committee, even if those recommendations are in the opposite direction to what the Hon'ble Babu Surendranath Banerjee anticipates.

"There is one other matter included in the amendments of the Hon'ble Babu Surendranath Banerjee, although he did not say a word about it in his speech, namely, that the words 'and less ten per cent. for the cost of repairs' be inserted after the word 'any' in line 8 of clause (*b*) of section 148A (*now* 151). Possibly the Hon'ble Member has ascertained that this amendment is based on a misapprehension. I assure the Hon'ble Member that it is so, for he is comparing gross rental with net rent. In the case of rented houses, you deduct 10 per cent. from the gross rental in order to arrive at the net rent. This deduction corresponds to the deduction which is made in England of tithe, commutation charges, insurance, repairs, &c. But in the case of residential houses, when we take a certain percentage on the cost of construction we arrive not at the gross rental, but at the net rent, and there is, therefore, no necessity for making any deduction. To make a reduction of 10 per cent. as proposed by the Hon'ble Member would cost the Corporation not less than Rs. 45,000. Moreover, if the percentage were reduced from 5 to $3\frac{1}{2}$ per cent., the annual valuation would be reduced by 30 per cent.; and, if we take it that the consolidated rate is payable at 20 per cent., the loss would be no less than Rs. 2,70,000.

"I have nothing further to add except that the principle embodied in the Act of 1888 has stood the test of experience. It has been most carefully worked out and considered on three separate occasions, and I am firmly convinced that the Council will be making the greatest possible mistake if they make any alteration in it now."

The Hon'ble Babu Boikanta Nath Sen said:—"I have a few observations to make in reference to this section of the Bill. The question is whether there is any necessity for a distinction between the two clases of buildings for the purpose of ascertaining the annual value. It has been observed by the Hon'ble Member in charge of the Bill that this question was thoroughly discussed in 1888 when the principle was adopted. If, however, the working of the Act of 1888 shows that there is a necessity for a change in the method of valuation of one of the two classes of cases, I think that change ought to be introduced. Because this question was discussed upwards of ten years ago and certain principles were adopted, that is no reason why we should adhere to those principles. Modifications of the law are made every day. With regard to one class of houses the existence of a very strong and peculiar feeling among the Hindus has been mentioned, and no doubt Hindus have a peculiar attachment for their dwelling-houses. They don't like the idea of not having a house of their own, but I don't see why that idea should prevent the application of the ordinary method of valuation of those houses. A hypothetical tenant may be found in order to assess a house at its letting value, its letting capacity, and then it would be let for a certain sum which would represent the annual value. If certain persons will not let their houses to any one but themselves, the question is what should be the actual amount payable for their occupation of the house. The Hon'ble Member in charge mentioned that there are about 12,000 such houses in Calcutta. Among these there may be certain palatial residences which cannot be let, which would not find suitable tenants; but the rest of the houses, a very large class, can very easily be let, and therefore their letting capacity can very easily be ascertained. I will mention one fact which will show the obvious injustice being done to the owners of this class of houses. It must be admitted that the value of houses varies according to the localities in which they are situated, and it must be admitted on principle that the value of a building depreciates or appreciates according to the value of the site upon which it stands. A building standing on 5 cottahs of land in the added area and a building on 5 cottahs of land in Harrison Road have very different values. The value of the site in one case may be at the rate of Rs. 200 a cottah; in the

other, it might possibly be Rs. 10,000 a cottah. I am told that in one instance a site was valued at Rs. 60,000 a cottah. The value of a building appreciates according to the value of the site on which it stands. A building in Burra Bazar standing on 5 cottahs of land constructed at a cost of Rs. 25,000 will probably be sold for Rs. 50,000, and may bring in a return of from 6 to 9 per cent.; whereas, with regard to a building on the other side of the town constructed at a similar cost, the value would be much less than Rs. 50,000 and the return would be 2 or 3 per cent. A uniform rate of valuation will, I submit, bring about great injustice. If this clause (*b*) of section 148A (*now* 151) is at all to be retained, and the amendment which has been proposed is rejected, I venture to submit that, to do justice to the owners of houses and grounds, there ought to be a sliding scale. Both the Hon'ble Babu Surendranath Banerjee and the Hon'ble Member in charge of the Bill have referred to the loss which will result to the municipality if the present principle of valuation of residential houses is reversed. I myself do not think there will be any loss, and I also venture to submit that there will be no practical difficulty in the valuation of these houses in the same way as in the case of rented houses. The value of the land according to its situation can be easily ascertained, and there will be no practical difficulty in determining the value of the building as well. The Hon'ble Member in charge of the Bill fortified himself with two letters giving the opinion of two respectable firms of considerable reputation that the return derived from house property in Calcutta varied from 5 to 6 per cent. upon the capital invested. That may be very true, but all the Members of the Council may not be prepared to accept that as the correct valuation. It may be true with regard to buildings within their own particular knowledge, but it may not be true with regard to other buildings."

The Hon'ble BABU JATRA MOHAN SEN said:—"I wish to add one observations. It cannot be denied that the owners of residential houses live in what is known as the native quarter of the town, and that larger amounts are spent in the construction of residential houses than on houses built for letting purposes, and a very fair income is derived from the capital sunk on houses of the latter class. It may be very injudicious to spend greater sums upon houses built for residential purposes in quarters of the town where you cannot get a proper return, but the fact remains that a proper return on the capital invested cannot be got in such cases; and, that being so, I submit that the return cannot be so high as 5 per cent. as the the Hon'ble Member in charge of the Bill maintains. If clause (*b*) of section 148A (*now* 151) is allowed to remain, I think the amendment proposed by the Hon'ble Dr. Asutosh Mukhopadhyaya that the return should be calculated at the rate of interest prevailing in respect of Government securities, should be accepted, and that instead of 5 per cent. it ought to be $3\frac{1}{2}$ per cent."

The Hon'ble MR. BUCKLEY said:—"There is one practical point which bear strongly on this question. The Hon'ble Babu Surendranath Banerjee observed that this clause (*b*) of section 148A (*now* 151), which stands in the Act of 1888 as well as in the Bill, operates as a grievous burden upon the middle class of house-occupiers, and he admits that the result of what he proposes will be a considerable reduction in the municipal revenues. For my part, I must say I do not understand how this is brought about. It seems to me that the result will be just the reverse; and, if the retention of clause (*b*) serves to give uniformity of valuation, the result of its omission will be that the owners of residential houses will have higher assessments made against them now than takes place under this provision of the law. The matter entirely turns on the cost of repairs. Rent is mainly made up of two things; first, the interest on the capital expended in constructing the building; and, secondly, the cost of keeping it in repair. Clause (*a*) of section 148A (*now* 151) seems to assume that 10 per cent. on the assessment will always cover the cost of repairs; but that is by no means the case according to my experience. The Government have houses valued at about ten lakhs of rupees, which are let mainly to Government officers; and, as a matter of fact, the cost of repairs of these houses varies considerably, in some years the cost amounting to $3\frac{1}{4}$ per cent. and in some years $4\frac{1}{2}$ per cent. on the capital cost of the buildings. That figure includes the repair of a number of hospitals and other

large buildings, and is, therefore, too high for the repair of the average house property in Calcutta. The cost of repairs of private houses in Calcutta should not be more than 2 or 2½ per cent. on the capital cost of the buildings. Take the case of a man who owns a house which he lets; he spends Rs. 2,000 in purchasing the land and Rs. 10,000 in building the house; according to the Hon'ble Member in charge of the Bill, he expects to get a return of 5 per cent. on his capital; so that, as regards the house alone, excluding the land, he has to receive a net return of Rs. 500. The repairs of the house will cost him Rs. 200 a year; he must let it, therefore, for Rs. 700; and the assessment, after the 10 per cent. allowed by the law is made, will be Rs. 630. Now, apply the same calculation to a residential house under clause (*b*): the house is built at the same cost of Rs. 10,000: the assessment will be 5 per cent. on that sum, or Rs. 500 only; so the occupier of the residential house will pay less rates to the Municipality than the occupier of the other house which is let by the owner. The long and short of all this is that a 10 per cent. allowance on the assessment for repairs is really too low, and a man who occupies his own house gets a very considerable advantage from that fact if interest, in both cases, is taken at the same figure. If the assessment on residential houses is really honestly made on the same principle as in the case of other houses, the effect will be very much against the argument of the Hon'ble Babu Surendranath Banerjee."

The Hon'ble Mr. Oldham said:—"A point which has not been answered is that which was suddenly suggested by the Hon'ble Babu Boikanta Nath Sen, that for a 5 per cent. rate of assessment should be substituted a sliding scale. That proposal has not been made the subject of any amendment. But it is obvious that a 5 per cent. rate is an average rate. On reading the discussions which took place on Sir Henry Harrison's proposals on this subject, with reference to the value of dwellings in different parts of Calcutta, I find that his general finding on the whole subject was that though the value of land is different in different parts of the town, and there is a tendency to over-value the land, there is the same invariable under-valuing of residences everywhere, so that the results, so far as residential houses are concerned, come out the same. I don't know whether the Hon'ble Babu Surendranath Banerjee has really considered the state of things he referred to in his speech. If that state of things is considered, it will be found to give the complete answer to what he complains of. He never attempted to explain what the reason for it was, but at the same time he admitted that it is an object with every Hindu to acquire an ancestral house which he could leave to his descendants; and, as a very large proportion of the city is Hindu, the consequence is that residential houses constructed with this object form a proportion of about 40 per cent. of the whole number of dwelling-houses in Calcutta. Such a state of things, as far as we know, does not exist in any other part of the world, and the Hon'ble Member in charge of the Bill has fully discussed and given his reasons why the letting value of such houses cannot possibly be ascertained. Similarly, in this state of things, it is impossible to ascertain the true *market* value of these houses, because people only wish to buy them for the purpose of demolishing the houses and building new houses in their stead, and not of living in these houses. In considering what the *market* value of such houses is, we must remember that, when a residential house is built, there is no intention of its being either let or sold; but circumstances alter, and, if in any case there is a forced sale, it is bought by some other person only to demolish it and build another house instead. The land retains its value, but it is impossible to give the house its proper *market* value as a residence when it is only bought for the purpose of domolishing it."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"We feel a considerable strain put upon us to carry on this discussion of a most important kind relating to a crucial point at this late hour of the day, and, if we are obliged to do so, I trust I may be permitted to say that we carry on the discussion under a protest. The matter ought not to be rushed through the final stage of a sitting of the Council which has already lasted from 11 A.M to 5 P.M. My hon'ble friend the Member in charge of the Bill has made the remark that we have been repeating the arguments which have been raised in this Council in 1888, and

which have since been raised at public meetings in the Town Hall and elsewhere. I plead guilty to that charge; the subject is an old one; the arguments are hackneyed; we cannot possibly invent arguments which have no relation to a matter which has been so thoroughly threshed out. But the old arguments derive additional force when they are illustrated by facts which cannot be controverted. I listened with the utmost interest to the statement which was made on the part of the Government, but not a word did I hear in opposition to the statement I read out, and which showed that, with regard to the assessment of this particular class of houses in a particular locality, there have been increases to the tune of 200 per cent. Discreetly silent was the Hon'ble Member in charge of the Bill with regard to those assessments."

The Hon'ble Mr. Baker said:—"The total increase is about 22 per cent. in the area referred to."

The Hon'ble Babu Surendranath Banerjee said:—"Concrete cases relating to particular wards are more telling than a statement of the kind just made by the Hon'ble Member in charge of the Bill. My facts can easily be tested, and the statement which I have read out discloses the fact that in that particular locality the assessments have increased in some cases by 200 per cent. Does the Hon'ble Member dispute the position? I challenge him to do so."

The Hon'ble Mr. Baker:—"I do, certainly."

The Hon'ble Babu Surendranath Banerjee said:—"I am amazed at the statement just made by the Hon'ble Member. A person who is paying Rs. 20 is called upon to pay Rs. 40; that is surely a grievance in the case of a middle class man. My hon'ble friend's reply is that Sir Henry Harrison went into the figures, and found that the increase on the whole amounted to 22 per cent. Is that a reply to the facts which I have adduced? The truth is that there have been in many cases enhancements to the tune of 100 and 200 per cent., and probably more. There have been, in some cases at any rate, grievous hardships endured. I welcome the statement which has been made by the Hon'ble Member that the Government is prepared to carry out the promise made by Sir Steuart Bayley's Government, and that an enquiry will be made, because I feel confident of the strength of my cause. So heavy a burden has been imposed that I feel convinced that a Commission, consisting of thoroughly impartial men, will be forced to the conclusion that the principle of valuation introduced in 1888 for the assessment of residential houses has been attended in its practical operation with grave hardship; and I am prepared to accept the proposal subject to the condition which the Hon'ble Member wants to impose. I do not wish to suggest the smallest reflection upon any one in stating the facts that have come to my knowledge. The Hon'ble Member said that the Assessment Benches abused the powers under the law, and therefore the law of 1876 was changed and the present law was enacted. That was certainly one of the grounds alleged by Sir Henry Harrison for the introduction of the law of 1888. If that is the whole of the explanation, then I am entitled to claim at the hands of the Council a reversal of the judgment which the Council arrived at in regard to this particular matter in 1888. The appellate benches no longer exist. The power of hearing appeals from assessments has been transferred to the Small Cause Court, a perfectly independent tribunal; and, therefore, much of that which led to a modification of the law of 1876 has been removed, and I have therefore a right to claim that the law be restored to its old footing.

"The Hon'ble Member has observed further that the percentage found by John Stuart Mill as the proper percentage of valuation was a mere *obiter dictum*, and that no weight ought to be attached to it. For my part I must say that I attach the greatest possible weight to anything which bears the authority of John Stuart Mill. I am sure he would write nothing under an impulse; he was the greatest thinker of the age, and weighed every

word that he wrote. Therefore, I am not prepared to accept what the Hon'ble Member has said, namely, that the particular part of Mill's opinion which limits the percentage to be taken in such cases should be brushed aside as unworthy of consideration. If we set it aside as an *obiter dictum*, why not discard the whole principle as an *obiter dictum?* What is there to distinguish one part of what Mill says from the other? The truth is that Mill's statement ought to be taken in its entirety. We should not be justified in taking one part of the statement, leaving out the other. Why should not the valuation of a building be taken at 3½ per cent. upon the estimated cost? I admit that it would involve loss to the Corporation, and I am unwilling that the Corporation should suffer in revenue; but the claims of justice are paramount. If in consequence of a change in the law one particular section of the community suffers a grievous burden, then it is the undoubted duty of this Council to take measures to remedy this grievance. The interests of the Corporation ought certainly to be safeguarded; but, if we feel that the state of the law involves something like injustice on a particular section of the community, it is incumbent upon us to remove it.

"I have not been able to follow the observations which fell from the Hon'ble Mr. Buckley, and my hon'ble friend Dr. Asutosh Mukhopadhyaya is very much in the same position as myself. The Hon'ble Mr. Buckley seemed to think that, if our figures are correct, they will operate against the interest of the very class in whose behalf we are pleading. We are the best judges of our own wants, and, if the acceptance of our amendments will prejudice the cause of the middle-class Hindu owners, we are prepared to accept the consequences, whatever they may be. But I am afraid the Hon'ble Member is labouring under a misapprehension. The annual value is taken at 5 per cent. on the sum obtained by adding the estimated present cost of the building to the cost of the land, less a reasonable sum for depreciation. I contend that the cost of repairs should also be deducted.

"In conclusion, I wish it to be distinctly understood that in any observations which I have found myself compelled to make, I have not intended to say anything which implies a personal reflection upon the Hon'ble Member in charge of the Bill. I should be sorry if anything which I have said should be interpreted in that light at all. It is my duty to defend my case. I may do so sometimes with some degree of warmth, but I am certain that Hon'ble Members of this Council will sympathise with a colleague who urges with warmth a case which he believes to be based on substantial justice."

The Hon'ble MR. BAKER explained that by the term "Commission of Enquiry" he did not mean an enquiry into the whole principle of assessment, but an enquiry to test whether the assessments made under the Act of 1888 were excessive or the reverse.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, in reply, said:—"I have no desire at this late hour to detain the Council with a lengthy reply, but I cannot agree with the Hon'ble Member in charge of the Bill that it is unnecessary to re-open the question. He expressed his regret in very unmistakeable terms that this question should have been re-opened at all. I am unable to share in that regret, because I am strongly convinced that the system is wrong from beginning to end. In the course of his able defence of the provisions of this Bill, the Hon'ble Member made an admission which, I submit, completely destroys his own case; and if he were arguing before a judicial assembly, he would have completely lost it in no time. With reference to my argument of a hypothetical tenant, he said that that was also his line of defence, and that there was no difficulty in applying that principle to the case of a princely mansion in the same manner as to the case of a house which is built for letting purposes in the ordinary way; and, in the plenitude of his argument, he went on to add that if the assessment benches in this city had not misunderstood and misapplied the law as it was understood and applied in England, there would have been no necessity for enacting the law of 1888. If that is so, I submit I am entitled

to a reversal of the law of 1888. The law in England has now been finally set at rest by the authoritative decision of the House of Lords. If so, what is the use of importing into our law a principle which does not find a place in the law of England, which is not recognized elsewhere in India, and which is a unique feature of our Municipal Act?

"Then it was said, I think by the Hon'ble Mr. Buckley, that you cannot take the measure of the rental to be paid by a hypothetical tenant as the basis of valuation in respect of buildings not fit for purposes of tenancy, not built with the intention of being let and not ordinarily let, because you cannot ascertain what would be the rental payable by a hypothetical tenant. Be it so. Let us concede that the principle of a hypothetical tenant is based on a fiction. But let us not forget that in trying to avoid one fiction you take shelter under another, namely, the fiction on which the principle of the Bill is based, that, when a man invests capital in building a house as his own residence, he expects that he will derive at least as much profit and enjoyment as will be equivalent in money to a certain rate of interest on the capital sunk. Has this statement any foundation in fact? A man builds a house and lavishly decorates it. Does he think he will actually get from it benefits which will be equivalent to the interest upon the sum he expends? Take, for instance, a hospital built by the Government: they spend five lakhs in building it. Do the Government calculate that the benefit to be derived from that building will be equivalent to the interest derived from a similar sum invested in Government securities? Further, I ask, again, where do you get the arbitrary rate of five per cent.? Why do you pile fiction upon fiction? I repeat with great confidence that the whole principle of this provision of the Bill is based on fictions which have no foundation whatever in fact."

The Hon'ble Babu Surendranath Banerjee's motion that for clauses (*a*) and (*b*) of section 148A (*now* 151), the following be substituted, namely—

"The estimated gross annual rent at which any building (including a hut or shed) or land liable to the consolidated rate under this Act might reasonably be expected to let from year to year shall be deemed to be the annual value of such building or land :"

and that the words "under clause (*a*)" in proviso (*ii*) to section 148A (*now* 151), and the whole of provisos (*i*), (*iii*) and (*iv*) to the same section, be omitted, being put, the Council divided as follows:—

Ayes 6.	*Noes 12.*
The Hon'ble Raja Bahadur Ranajit Sinha, of Nashipur.	The Hon'ble Mr. Buckley.
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Handley.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Rai Durga Gati Banerjee, Bahadur.
The Hon'ble Mr. Apcar.	The Hon'ble Mr. Mackenzie.
The Hon'ble Dr. Asutosh Mukhopadhyaya	The Hon'ble Mr. Spink.
	The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
	The Hon'ble Mr. Oldham.
	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

So the amendments were lost.

The Hon'ble Babu Surendranath Banerjee's motion that the words "three-and-a-half" be substituted for the word "five" in line 4 of clause (*b*) of section 148A (*now* 151), and that the words "and less ten *per cent.* for the cost of repairs" be inserted after the word "any" in line 8 of clause (*b*) of section 148A (*now* 151), was then put and lost.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA's motion that in section 148A (*now* 151), clause (*a*), the words "erected for letting purposes or ordinarily let" be omitted, being put, the Council divided as follows:—

Ayes 6.	*Noes 12.*
The Hon'ble Raja Bahadur Ranajit Sinha, of Nashipur.	The Hon'ble Mr. Buckley.
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Handley.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Mr. Apcar.	The Hon'ble Mr. Mackenzie.
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Mr. Spink.
	The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
	The Hon'ble Mr. Oldham.
	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

So the amendment was lost.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA's motion that clause (*b*) of section 148A (*now* 151), be omitted, was then put and lost.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA's motion that in section 148A (*now* 151), clause (*b*), for the words "deemed to be five *per cent.*," the words "the amount derivable as interest, calculated according to the highest rate of interest payable on Government securities," be substituted, was also put and lost.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA's motion that in section 148A (*now* 151), proviso (*iii*), for "of five *per cent.*" be substituted "according to the rate stated in clause (*b*)," was also put and lost.

The Council was then adjourned to Tuesday, the 19th September, 1899.

CALCUTTA;
The 16th January, 1900.

F. G. WIGLEY,
Assistant Secretary to the Govt. of Bengal,
Legislative Dept.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

The Council met in the Council Chamber on Tuesday, the 19th September, 1899.

Present:

The Hon'ble SIR JOHN WOODBURN, K.C.S.I., Lieutenant-Governor of Bengal *presiding*.
The Hon'ble MR. W. B. OLDHAM, C.I.E.
The Hon'ble MR. R. B. BUCKLEY.
The Hon'ble MR. C. W. BOLTON, C.S.I.
The Hon'ble MR. E. N. BAKER.
The Hon'ble RAI DURGA GATI BANERJEA, BAHADUR, C.I.E.
The Hon'ble MR. C. E. BUCKLAND, C.I.E.
The Hon'ble MR. F. F. HANDLEY.
The Hon'ble MR. F. A. SLACK.
The Hon'ble KHAN BAHADUR MAULVI DELAWAR HOSAIN AHMED.
The Hon'ble BABU JATRA MOHAN SEN.
The Hon'ble MR. T. W. SPINK.
The Hon'ble RAJA RANAJIT SINHA BAHADUR, OF NASHIPUR.
The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH, C.I.E.
The Hon'ble MR. D. F. MACKENZIE.
The Hon'ble MR. J. G. APCAR.
The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, M.A., D.L., F.R.A.S., F.R.S.E.
The Hon'ble BABU BOIKANTA NATH SEN.
The Hon'ble BABU SURENDRANATH BANERJEE.

THE CIVIL COURTS AMINS BILL.

The Hon'ble MR. BOLTON said:—"It was decided in Council on the 16th September, 1899, that the Bill to repeal the Civil Courts Amins Act in Bengal should be taken into consideration to-day. I am not aware whether any Hon'ble Member wishes to offer any remarks upon the Bill."

The Hon'ble RAJA RANAJIT SINHA, BAHADUR, OF NASHIPUR, said:—"I beg to support this motion. I am sure that this Bill when passed into law will be a very useful measure, and that it will remove a long-felt want of the public. On the occasion of the discussion of the Financial Statement in April last, I had the honour to draw the attention of the Government that in the matter of boundary disputes the Civil Court had generally to depend much on the reports of their amins, and so the parties to a suit have to suffer at the hands of the Civil Court amins, who do not generally bear a good reputation. I have now to thank the Hon'ble the Chief Secretary to Government for having taken up the matter in right earnest and so soon supplying what I believe will provide a satisfactory solution of the matter. The announcement that he made the other day that the services of the junior members of the Bar would generally be utilised for the purpose of making local investigations has given universal satisfaction to every section of the community. I have only one further suggestion to make in this respect, that if the pleaders who are employed for this purpose could give satisfaction both to the Courts and the public, then I think their claim to be appointed as Munsifs as vacancies occurred should be favourably considered; and in that case it would operate as an incentive to strict honesty and fairness towards both parties. The other day the Hon'ble Babu Boikanta Nath Sen, I am told, made similar suggestions in regard to this matter; and I understand he was told by the Hon'ble Member in charge of the Bill that pleaders whose names were enrolled for appointment as Munsifs would generally be employed for these purposes. But I presume there may be some difficulty in carrying out this intention in some cases; for it may happen that some of the pleaders whose names are so enrolled may not have a practical knowledge of surveying; and, secondly, I believe there is a rule to the effect that pleaders who fail to get an appointment as a Munsif within the age of thirty years are ineligible for such appointment; therefore, it is probable that such pleaders will not be able to gain sufficient experience in that short time, and names of many experienced men will be discarded from the list of registered candidates on the ground of over age."

The Hon'ble BABU JATRA MOHAN SEN said:—"I am also in favour of this Bill, and I think that, in order to give young pleaders facilities to acquire a practical knowledge of surveying to fit them to undertake these local investigations, they should be allowed to attend surveying classes in some college or other simultaneously with their attendance at law lectures. On the other points connected with this measure suggestions have been offered by other Hon'ble Members of the Council with which I agree."

The Hon'ble BABU BOIKANTA NATH SEN said:—"I consider this to be a wise and safe measure; because, in the first place, having regard to the condition and general circumstances of the province and the improvement which has already taken place in the mofussil Bar, it is but fair that the amins employed under the Act of 1866 should be dispensed with and a non-official agency employed to do the work which Civil Court amins have hitherto done. This Bill does not prevent the services of amins being utilised by District Judges, and therefore I say it is a very useful measure. It will not introduce a revolutionary change; it will be gradually introduced, and District Judges will be perfectly at liberty to employ the agency of members of the Bar when they see fit, but at the same time the services of the present amins will be utilised and they will not be deprived of their bread. As regards the practical portion of the Act, if it be the object of the Government to give immediate effect to it, then rules will have to be framed under section 392, Civil Procedure Code; and I would suggest that the service of a pleader as a commissioner under the Act in a certain number of cases should be considered a condition

precedent to obtaining appointment as a Munsif. The Hon'ble Member in charge of the Bill suggested that members of the Bar already enrolled as candidates for Munsifships should get the commissions; but I think that practically that might give rise to some difficulty. Where registered candidates are available, *i.e.*, in those districts in which there are registered candidates for Munsifships, preference should be given to them; but where such candidates are not available,—and I know several districts where there are no such candidates registered and practising,—in those districts other junior members of the Bar should not be excluded. The next question is whether prospective examinations should be insisted upon in surveying. I submit that, having regard to the rule now in force in the Calcutta University, that drawing will form one of the branches for the Entrance examination, although it is an optional subject, prospective rules should be framed providing for examination in survey as a qualification necessary to get the commissions. At first, however, to give practical effect to this Act, I think a joint certificate by the District Judge and the Subordinate Judge, expressing their opinion as to the qualification of a particular member of the Bar, ought to be considered sufficient. The members of the Bar who have the degree of Bachelor of Law have to pass examinations in pure and mixed mathematics, and it will be very easy for them to learn the practical work of surveying, and District and Subordinate Judges are quite competent to certify as to particular candidates having qualified themselves in the practical part of the work and being competent to carry out local investigations under commission. Certain observations have also been made by the Hon'ble Member in charge of the Bill as to the remuneration to be given for such commissions. I beg to submit that it is hardly necessary for the High Court to frame rules on this point, because, so far as I remember, section 397 of the Civil Procedure Code, if I mistake not, amply provides for the remuneration of such commissioners by the Civil Courts. Hard-and-fast rules sometimes produce dissatisfaction both to the commissioners and the suitors; commissioners sometimes consider themselves ill-paid; but, if the Civil Courts are allowed to exercise unfettered discretion, they will have regard to the amount and nature of the work and be able to fix the remuneration in a proper manner, either by way of payment of daily fees or in a lump sum. Therefore, I do not think the remuneration to be given to commissioners under this Act should be fixed by rules; but the Civil Courts should be left to fix the amount of remuneration to be paid as they are empowered to do under section 397 of the Civil Procedure Code. With these remarks, I give my entire support to this Bill."

The Hon'ble MR. HANDLEY said:—"As this is a subject in which I have taken great interest for many years past, and as a District Judge for the last ten years, I have reported in favour of some such Bill as this. I should have thought that for the present it is hardly necessary to discuss the rules which are to be framed under this Act; but, as some Hon'ble members have offered suggestions regarding the framing of the rules, I shall take the liberty of offering a few remarks upon the Bill. And first I say that the Hon'ble Members who have spoken have not noticed one branch of the subject. Not only have local investigations to be made in which a knowledge of surveying is necessary, but the local examination of accounts is often required, which is a very difficult branch of the work, and for which very few pleaders are qualified, for they have not had any training in accounts. Therefore, not only should pleaders who wish to have their names enrolled for employment under this new scheme have certificates of qualification in surveying from some recognised college, but they should also have certificates of knowledge of accounts. Some Hon'ble Members have suggested that preference should be given to those pleaders who have had their names enrolled as candidates for Munsifships. I don't think this to be a very practical suggestion, for I believe very few pleaders have managed to get their names enrolled in the High Court, and it is a very difficult thing to do so, whereas the number of pleaders for whom employment could be found under this Bill will be very large. In Alipore some 15 or 20 pleaders are employed besides amins; so very heavy is the work. If only two or three pleaders are enrolled as candidates, how could the work go on? And there are the subdivisions of Barasat and Diamond Harbour, where there are no enrolled candidates at all.

It is very rare indeed for a candidate to be enrolled from a Munsif's chauki. I would therefore by no means limit employment as Commissioners to pleaders who are enrolled as candidates for employment as Munsifs."

The Hon'ble Mr. Bolton said:—"I desire to express the gratification of the Government at the approval with which the Bill has been received by the Hon'ble Members. On its introduction the Hon'ble Babu Boikanta Nath Sen offered suggestions which I promised would be fully taken into consideration, and I can only repeat that, when rules to give effect to the system introduced by the Act are framed, the suggestions which were made by the Hon'ble Member and have now been made by other Hon'ble Members will not be forgotten. With regard to the making of the rules, the High Court must be consulted, and no definite opinion can now be expressed as to the shape which those rules will take; but in dealing with the case the remarks which have been made in Council will be considered. There is one remark made by me when introducing the Bill to which some exception has been taken. I observed that it would be preferable that the commissioners appointed under section 392 of the Civil Procedure Code should be selected from the candidates whose names have been enrolled for appointment as Munsifs. The Hon'ble Babu Boikanta Nath Sen has pointed out, what subsequently occurred to myself, that this may not be practicable in some districts, because such candidates are not found in every district. The suggestion that success in carrying out these enquiries should give a claim to enrolment as candidates for Munsifships appeared to me open to the objection that preference might, in that case, be shown by some Courts to particular pleaders whom they wish to see enrolled. A rule to that effect should not, therefore, be introduced. If junior pleaders carry out these enquiries successfully, they will establish a special claim to enrolment as candidates for the Subordinate Judicial Service which the High Court will doubtless recognize."

The Hon'ble Mr. Bolton then moved that the Bill be passed.

The motion was put and agreed to.

THE CALCUTTA MUNICIPAL BILL.

New section.

The further consideration of the Hon'ble Mr. Baker's motion that the following section be inserted after section 133 (*now* 138),* namely:—

"133AA (*now* 139). The time for the repayment of any money borrowed under section 124 (*now* 129) or section 133 (*now* 138) for the purpose of discharging any previous loan shall not, except with the express sanction of the Government of India, extend beyond the unexpired portion of the period for which such previous loan was sanctioned,"

Time for repayment of money borrowed to discharge previous loan.

was resumed.

The Hon'ble Mr. Baker said:—"I don't know that I can add very much to what I said yesterday on this subject. This section has been pressed for by the Government of India. I should be glad if we could dispense with it, but after all I think it will make little difference. The Corporation can never contract any loan without the previous sanction of the Government of India, and, even if this section were not enacted, the Government of India would have power to impose whatever restrictions they please. It will therefore be in their power to limit the currency of any loan raised under this section. All that this section provides is that without such sanction this particular provision shall be enforced in every case."

The Hon'ble Babu Surendranath Banerjee said:—"I have consulted some of my friends, and I have no objection to offer to this section."

The motion was put and agreed to.

* The sections of the Bill having, under the direction of the Council, been re-numbered, the present number of each section is inserted in brackets, wherever the new numbering differs from the old.

SECTION 151.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 148A (*now* 151), clause (*a*), line 5, after the word "building" the words "is actually let or" be added.

He said:—"I shall presently point out that this amendment is in perfect harmony with the principle which underlies the decision arrived at last evening upon four other amendments which I had the honour to move. My Hon'ble friends decided not to accept the principle of a hypothetical tenant in so far as buildings not erected for letting purposes and not ordinarily let are concerned. I now venture to suggest that in order to be consistent they ought to disregard the principle of a hypothetical tenant in so far as buildings erected for letting purposes or ordinarily let are concerned, when such buildings are actually in the occupation of a tenant. I can well anticipate that the Hon'ble Member in charge of the Bill will not be slow to point out that there is weighty authority against my proposition to be found in the English law. I am quite aware of that, and I would have been perfectly satisfied if the system which prevails in England had been introduced here in its entirety; but I do not appreciate the wisdom of adopting the principles of the English law when they suit the Hon'ble Member's purpose and ignoring them when they do not happen to suit his purpose. Section 148A (*now* 151) provides that the annual value of land and the annual value of any building erected for letting purposes or ordinarily let shall be deemed to be the gross annual rent at which the land or building might reasonably be expected to let from year to year. I lay stress on the phrases *reasonably be expected to let* and *from year to year*. These phrases show that there is no difference whether the building is vacant or in the actual occupation of a tenant. In both cases you value the building, not upon what the actual tenant pays, but what a hypothetical tenant might reasonably be expected to pay. *A* has a building which he lets for Rs. 10 a month; he lets it for three years; then comes the assessor and says: 'Although the actual rental is Rs. 10, I think it might reasonably be expected to let for Rs. 15 a month if let from year to year.' Now let us pause for a moment, and consider what elements of uncertainty you introduce here. There is no standard by which you can determine whether the valuation made by the assessor on this principle is reasonable or unreasonable, whether his expectation is just or unjust. Then, again, why do you take as your test the amount of rent which a prudent landlord might reasonably expect if the premises were let *from year to year?* Why do you introduce this extraordinary principle? What is the ground of this preference for a yearly tenancy? You make your assessment on the basis of an annual tenancy, but you make the assessment last for a period of six years. Let me illustrate this by a concrete case. *A*, a landlord, lets out a building to *B* for a period of three years upon a rental of Rs. 50 a month; if he had to let it out for a shorter period, say for one year, he would have demanded a higher rent, say Rs. 60 a month, but he feels secure for three years and naturally accepts a lower figure. Let us not forget at the same time that the tenant is reasonably entitled to this indulgence, inasmuch as he undertakes a liability for three years. Then comes your municipal assessor, and says that, apart from all questions of what is reasonable or what is unreasonable and what may or may not be expected, the annual value must be calculated on the basis of a yearly tenancy, and therefore proceeds on the basis of Rs. 60 a month. Now, look at section 150 (*now* 172), which provides as follows:—

'If the annual value of any building or land, as determined under this Chapter, exceeds in any case the amount of rent payable to the owner, the owner may in such case recover from the person who pays him rent the difference between the sum assessed upon him as the owner's share of the consolidated rate and the sum at which he would have been assessed had the building or land been valued only at the amount of rent actually payable to him, and such difference shall be added to the rent, and shall be recoverable by the owner from the person liable for the payment of the rent.'

"If you apply this to the concrete case of Rs. 50 as the rent of the building for three years and Rs. 60 as the rental for only one year, you assess the rate on Rs. 60, and the tenant is made liable not only for his half-share of the rate on the basis of Rs. 60, but is also liable to the owner for the whole rate calculated on the difference between the sum of Rs. 50 and Rs 60, inasmuch

as Rs. 60 is the sum for which the building is reasonably expected to let from year to year. Although the building is let for Rs. 50, the tenant has to pay his own share of the rate on Rs. 60, and also the excess rate, to the owner. The burden, therefore, unfairly enough, falls wholly upon the unfortunate tenant; and although in consideration of the fact that he has undertaken a burden for a long term, has made the landlord secure in the enjoyment of the fruits of the property for such term, and has thus rightfully obtained the property upon a reduced rental, he has to pay the Municipality *rates*, as if he had taken a lease only for a year. Let us not again overlook the fact that this arrangement between the lessor and the lessee in the case of a tenancy for a long period is not without its benefit to the Corporation, *e.g.*, if *A* lets out his property to *B* only for a year, he may find himself at the end of the tenancy without a tenant at all, which is by no means an uncommon occurrence, and if the premises remain vacant for any period, the Corporation loses the occupier's share of the consolidated rate. Then, again, one of the considerations for the reduction of the rent might have been the payment of a handsome bonus to the landlord, but, although the landlord thus retains the advantage of the bonus, you hold the unfortunate tenant under section 150 liable for the whole of the rates calculated upon the difference between the actual and the hypothetical rents. Therefore, if we are to be consistent, if we disregard the principle of a hypothetical tenant in the case of a building not erected for letting purposes, and not ordinarily let, let us go further, and in the case in which a building or land is in the actual occupation of a tenant, let us take the rent paid by him as the basis of assessment. If a building or land has not been let out, you might take the valuation on the rental of a hypothetical tenant. In either case there ought not to be any room for speculation or discussion as to what is reasonable or unreasonable.

"It may, no doubt, be said that it is not always fair to take the actual rental as the test, because, from a variety of causes, the rent paid in coin may not represent *all* that the owner receives as value for his property, or it may even sometimes be in *excess* of the actual letting value, and include considerations which are not rateable. But it is undeniable that, in our desire to secure a common standard of value by reference to a hypothetical tenant, we introduce an unknown element which it is extremely difficult to determine in practice. To summarise the attributes of the hypothetical tenant, he is a mere lifeless automaton, free from all sentiment, a somewhat imaginary person, who wants similar premises in a similar position for a similar purpose; he is assumed to have ordinary judgment and caution, to have the necessary skill and capital, and to occupy the same position in life as the actual tenant. Under these conditions he will give only a reasonable rent; his competition, however, with the actual tenant can hardly ever have the effect of reducing the actual rental, for the very necessities of the position assume that the actual tenant will offer the highest price his judgment and caution tell him he can afford, with a view to secure the premises. As an invariable result, therefore, the actual tenant suffers in competition with the hypothetical tenant, and what has been not inappropriately described by an eminent English Judge as the principle of 'the higgling of the market' always results in loss suffered by the actual tenant.

"On all these grounds, therefore, I would ask the Council to do away with the system which leads to so much uncertainty and injustice."

The Hon'ble Mr. Baker said :—"I don't propose to discuss this question as a matter of law, because I am not qualified to do so; but I shall show with less difficulty than I anticipated that this amendment is certainly one which ought not to be accepted. The Hon'ble Mover of the amendment began by saying that yesterday we rejected the principle of a hypothetical tenant in the case of residential houses. That statement I listened to with surprise, as I understood that the decision of the Council yesterday affirmed the principle of assuming a hypothetical tenant in the case of residential houses occupied by their owners. There was nothing in the debate in the Council yesterday to show that the principle of the hypothetical tenant is to be rejected. The amendment now before the Council is to insert the words 'is actually let or' after the

word 'building' in line 5 of clause (*a*) of section 148A (*now* 151). There are several reasons for not accepting this amendment. In the first place, the words which the Hon'ble Member proposes to insert are not to be found in the English Act, which is the basis of the law of rating in this country. It is a most difficult and intricate subject, and I think that the mere fact that the English law does not contain these words is a strong reason for not introducing them here. The Hon'ble Member wishes it to be laid down that when a building is actually let the actual rent paid is to be the measure of the annual value of such building. If that is the Hon'ble Member's intention, then I ask the Council not to accept it: it is a most dangerous principle. We wish to have power to go behind the terms of a lease if it is necessary to do so, and the insertion of these words will tend to make it difficult to do so. Then I am not quite sure whether the intention of the Hon'ble Member does not conflict with the principle of *communibus annis* well known in the English law. Suppose a house is let from year to year at a rental of Rs. 60, and in the third year it falls vacant. The intention, as I understand the principle of *communibus annis*, is not to assume that in the third year the house has no value at all, but that the average rental shall be taken all through. But putting that aside—and I lay no stress on it, because I am not a lawyer—there is one serious reason why this principle cannot be accepted, namely, that it will immediately open the door to fraudulent leases. *Benami* leases are very common here already. If the assessor cannot go behind a lease which is put forward, it will open a door at once to the execution of fraudulent leases. For these reasons I submit that this amendment is not in accordance with the English law, and ought not to be accepted."

The Hon'ble Babu Boikanta Nath Sen said:—"I think the annual rent at which land or building is let, or at which it might be expected to let, will be exactly the same if there is no fraud or collusion. The provision in clause (*a*) of section 148A (*now* 151) is a safeguard against dishonest proceedings. But, if the alternative proposed in this amendment is adopted, it will open a door to fraud and collusion. It will give rise to a lot of *benami* transactions, and instances are not wanting which illustrate such fraudulent transactions."

The Hon'ble Mr. Handley said:—"I wish to endorse the objections which have been raised to this amendment by the Hon'ble Member in charge of the Bill, and I agree with the Hon'ble Babu Boikanta Nath Sen that the introduction of the words proposed will open a door to fraudulent transactions, and that might be the case not only where a lease has been actually executed, but even in cases where there is no lease, as is the case of most tenancies in Calcutta. What would be easier than to put down a rental of Rs. 5 a month payable by a bustee tenant where he actually pays Rs. 10. Is there any possible way of proving the existence of a fraud of that kind? The other point is where a large premium is paid by the tenant, and as a consequence a small rent. The Hon'ble Mover of the amendment draws attention to the hardship suffered by a tenant who has to pay rates on a higher letting value where he had discounted that letting value by paying a higher premium. How does he propose to meet that difficulty? I know many cases of this kind, and will only refer to one or two by way of illustration. In the Bhoykolas estate within my own experience the present owners have let their interest in a lot or holding at a high premium and a nominal or pepper-corn rent. The annual rent in the case of religious *muths* or *debatter* properties may be only Rs. 2 or Rs. 3, the assessment upon which would come to something absurd; whereas the fine or premium which is paid may be very large. This is a device which is well known to the Hindu members of this Council, and in such cases, if there is no other method of valuation than the actual rent paid, the Municipality will be a great loser."

The Hon'ble Mr. Oldham said:—"I should like to support the Hon'ble Member in charge of the Bill in his recollection of the result of the discussion which took place yesterday on the question of the principle of a hypothetical tenant. The Hon'ble Mover of the amendment said that the Council had discarded the principle of the hypothetical tenant; but, so far from discarding it, when I first heard the exposition of the law as it has now been settled in

England, which was so lucidly given yesterday by the Hon'ble Member who represents the University, it seemed to me that it was the very solution which had been sought for, for so many years, to meet the cases of Hindu owners of their residences in this town. This explanation is of great importance, for I myself have heard Babu Kally Nath Mitter assert three times at public meetings that, so far from the rates assessed upon the owners of residential houses being 19½ per cent., they amounted to something like 38 or 40 *per cent.* I would particularly commend to my hon'ble friend, Babu Surendranath Banerjee, the way I would put the case for the information of his friends who feel so aggrieved, and if I am wrong I trust the Hon'ble Dr. Asutosh Mukhopadhyaya will correct me. When the discussion of this question took place in this Council in 1888, the English law on the subject was quite unsettled. Sir Henry Harrison saw that there was something not equitable in the English law as applied to Hindu residences in Calcutta, and he tried to find a more perfect principle in the doctrines of Mill, and he then devised his own remedy. In 1893 the House of Lords settled the law by creating the legal fiction of the imaginary tenant, and Sir Henry Harrison meanwhile had settled it here by laying down the 5 per cent. rule, and thus finding the imaginary tenant. It appears to me that the results of the 5 per cent. rule are exactly the same as if the principle of an imaginary tenant is adopted, and I may say it is the opinion of that very careful and competent officer of the Corporation, our Vice-Chairman, that these provisions are proper provisions."

The Hon'ble Babu Surendranath Banerjee said:—"I should not like to give a silent vote on this question. I have considerable sympathy with this amendment of the Hon'ble Member, his object being to alleviate the burden of taxation which this section throws upon the people of Calcutta. But I fear there are serious practical difficulties in the way I had a conversation on this matter with the Vice-Chairman of the Corporation, and I asked his opinion. He said the great objection to it is that it will open a door to fraudulent transactions, that people will enter into *benami* transactions, that they will get up leases which were not real transactions, and on the strength of such leases would obtain reductions of their just dues. The present practice is to insist on the production of a lease for three years. The Vice-Chairman is not satisfied with a lease for less than three years. I find that in this matter the law of 1876 is opposed to the amendment of my Hon'ble friend, and, as I said before, I pin my faith on the law of 1876.

"This view of the matter is supported by the Corporation. They pin their faith on the law of 1876, and I am sure that there will be serious practical difficulties in carrying out this amendment. It will be attended with abuse, it might lead to loss of revenue, and it will tend to demoralise the people. I therefore support that view."

The Hon'ble Mr. Bolton said:—"One point in the remarks of the Hon'ble Mover of the amendment has received no reply. He referred to the case of a three years' lease granted on payment of a premium. No tenant, however, enters into a lease for a house without taking into account the municipal taxes for which he accepts liability, and, whether a premium is paid or not, the contract with the landlord will cover that liability and no more."

The Hon'ble Dr. Asutosh Mukhopadhyaya, in reply, said:—"I was surprised to hear that the Council has not discarded the principle of the hypothetical tenant, but has accepted it and has engrafted on it another fiction, namely, that the rent which such a tenant might be assumed to pay was 5 *per cent.* on the estimated present structural cost of the building *plus* the value of the land; so that it is the blending of two fictions. At any rate, that is not what I understood to be the drift of the discussion which took place yesterday. It has been pointed out by several Hon'ble Members that, if my amendment is accepted, it will open the way to fraud and might lead to difficulties. I thought the language of my amendment made ample provision for that difficulty, and that,

at any rate, difficulties which might arise would not be more serious than those which now exist. My amendment says 'actually let.' I premise that there has been an actual letting. If the Chairman is convinced that there has not been an actual letting, but only a paper transaction, he would have to apply the principle of a hypothetical tenant. The section further says that the annual value shall be deemed to be the gross annual rent. I take it that that means the actual rent, not merely any nominal amount which may be stated in the lease. But, if the investigation of these questions leads to serious practical difficulties, I venture to think that they will not be half so serious as the difficulties to which the present mode of assessment inevitably leads us."

The motion was then put and lost.

The last motion having been lost, Hon'ble Dr. Asutosh Mukhopadhyaya, by leave of the Council, withdrew the motion standing in his name that in section 148A (*now* 151), proviso (*i*), line 3, after the word "land" the words "is actually let or" be inserted.

The Hon'ble Dr. Asutosh Mukhopadhyaya also moved that in section 148A (*now* 151), clause (*b*), line 5, the word "present" be omitted.

He said:—"As the Hon'ble Member in charge of the Bill assures me that the Council has not abandoned the principle of the hypothetical tenant, I hope this amendment will be carried, inasmuch as it follows as a necessary corollary from that principle. When a man has invested capital in constructing a building for residential purposes, you assume that he is willing to pay to the contractor reasonable remuneration, arbitrarily fixed at 5 *per cent.* on the actual outlay. In other words, the contractor's theory is based on the assumption that, because a person has spent a certain sum upon the creation of a property and occupies it himself, such occupying owner must be presumed to be equally willing to pay adequate remuneration to a contractor for land and capital invested therein. Assuming this theory to be well founded, as the Council has already signified its adherence to it, I desire to point out that the introduction of the word 'present' makes the fiction even more mythical, and absolutely inconsistent with the facts. Let me illustrate the position by a concrete case. In 1890 *A* builds a house for Rs. 10,000 for residential purposes. In order to assess the rateable value you introduce the fiction that, because he has sunk so much capital, he must be presumed to be willing to pay 5 *per cent.* to a contractor who might have built it for him; upon this fiction you assess the annual value at Rs. 500. Suppose you have to re-assess it in 1900; you find that, on account of the rise in prices of the materials and the difficulty in procuring labour, the *present cost* of re-building the house would be fifteen thousand rupees, and you assess the annual value of the house at 5 *per cent.* upon the fifteen thousand rupees. Here you assume in fact the absolutely baseless fiction that the owner is able and willing to invest fifteen thousand rupees and to pay a reasonable remuneration to a contractor who might have built a house for him at an outlay of that sum. The owner protests that you cannot impute any such intention to him; he protests that he has not invested fifteen thousand rupees, is unwilling to invest so much, is possibly unable to do so. It seems to me, Sir, that having introduced a fiction which has no foundation in fact, you are overlaying it with another fiction which is absolutely contradictory to the facts. The absurdity of the position is so manifest that it only requires to be stated to be rightly appreciated."

The Hon'ble Mr. Baker said:—"The Hon'ble mover of the amendment says that if he sunk Rs. 10,000 in building a house in 1890, then he may be assumed to have expected a return of 5 *per cent.* upon Rs. 10,000, and he thinks it unjust to assume that he expects to have a return of 5 *per cent.* on Rs. 15,000 in 1900. The answer to that is that he has actually got a return of 5 *per cent.* on Rs. 15,000, because the value of the building has increased. If the value of the building has increased, why should he not be assessed on the increased value? The effect of the amendment would be to fix the annual value of the house for all time once for all. Apart from the

question of depreciation, the value would be determined once and for ever by the original cost of construction. That, I submit, conflicts with the English principle of *rebus sic stantibus*. The rule is this:—

'Property must be assessed at the value it possesses at the time the assessment is made; if it increases or diminishes in value from time to time, there will be a corresponding increase or diminution in the rate, for that must be always proportionate to the then existing value, and the value of the property in the past or the future is immaterial.'*

"It is quite clear that the proposal of the Hon'ble Member is in conflict with that principle. Moreover, the principle for which the Hon'ble Member contends will make it a matter of considerable difficulty to determine the annual value of a house built, it may be, half a century ago; whereas it would not be difficult for the assessor to form an estimate of the cost of erecting the building at the present moment. How could you ascertain the cost of erecting that building forty or fifty years ago? We don't know what the value of materials then was, nor what was the cost of labour. It would make it absolutely impossible to ascertain what sum should be taken as the value of the building."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I support the amendment. The Hon'ble Member in charge of the Bill says that, if this amendment is accepted, the annual value will be fixed once for all, and no increase whatever can take place. I respectfully beg to traverse that statement, and I think the Hon'ble Member will be convinced that he is wrong. The annual value of a house is the resultant of two factors. It depends upon the present estimated cost of erecting the building *plus* the value of the land. The value of land is steadily increasing; it always must increase in a progressive city. Therefore, if one factor is to remain constant, the other factor will be always increasing; and therefore there will not be that permanent fixture of the annual value which the Hon'ble Member says will result from the acceptance of this amendment. Then the Hon'ble Member says it will be difficult to estimate the cost of erecting a house built long ago. I think it is an equally difficult matter to estimate the present cost of the building, and we have a statement from the executive of the Municipality, and which I read to the Council yesterday, which entirely corroborates that view. I know that the effect of adopting this amendment will lead to a diminution in the receipts, and the question is whether we should be justified in legislating in such a way as to reduce the municipal revenues. I think that is the real crux of the whole matter; but it seems to me, as I said yesterday, that the operation of this principle of ascertaining the annual value of a building is very oppressive in respect of a particular class of the community, and that in justice to them we are bound to take the earliest opportunity to revise this provision of the Act of 1888. I do not think the loss of municipal revenue will be very great, for there will be a progressive increase derived from the steady increase in the value of the land which is taking place, though I admit the increase will not be so great as it would be if the law was allowed to remain as it is at present. Taking all these circumstances into consideration, I think the Council would be justified in accepting this amendment."

The Hon'ble MR. BOLTON said:—"I entirely support the Hon'ble Member in charge of the Bill in opposing this amendment. Objection has been taken to the Hon'ble Member's remark that the value of property would remain at a constant figure; but what the Hon'ble Member said was that the value of the building, and not of the land, would remain fixed under the amendment. That statement was correct. The Hon'ble Member has used a very forcible argument in pointing out that, if this amendment is passed, great difficulty would arise in estimating the value of a building which might have been constructed forty or fifty years ago. It is a further argument in favour of the present provision that, in claiming compensation for houses under the Land Acquisition Act, the owners themselves base their claims on the estimated *present* cost of erecting the buildings subject to deduction for depreciation. To the sum so calculated is added the 15 *per cent.* compensation for dispossession.

* *See* Bosher on the Principles of Rating.

The Hon'ble BABU BOIKANTA NATH SEN said:—"If this amendment is accepted, the latter portion of the clause will be harmonious with the previous portion 'less a reasonable amount deducted on account of depreciation'—depreciation of what?—on the original cost of construction, and that will be harmonious with the elimination of the qualification introduced by the word 'present' in the clause."

The Hon'ble MR. HANDLEY said:—"I have one or two remarks to make upon this amendment. What ground has the Hon'ble Mover of the amendment to suppose that the value of a building has increased by 50 *per cent.* within the last eight or ten years? That seems to me to be far beyond the fact. The second point to which I wish to refer is, what means have we of ascertaining the original cost of a building? If a building was constructed, say, from twenty to forty years ago, how is the present owner of the building, who might be a son or other successor of the original owner, to know what was the original cost of the building? I have known land acquisition cases where the present proprietors have made a claim for a certain sum, and it has been found impossible to ascertain what was the original cost of the building, though in some instances we have been able to unearth from the records of the Municipal Office what the original claim was; and in such cases it has been found that the compensation claimed has been double the sum originally claimed. I fear that the acceptance of this amendment will open a door to all manner of frauds, such as the fabrication of bills in the name of some builder. On both these points, therefore, I think this motion is open to the same objection as the last amendment.

"As regards the statement of the Hon'ble Babu Surendranath Banerjee as to the increase in the value of land, it is true that the value of land is increasing, but at the same time the value of the building would be depreciating, and I doubt whether the increase in the value of the land will be greater than the loss by depreciation in value of the building. I doubt whether the value of the land and the building together will in any way be increased by the lapse of time. I think the value of the building will depreciate more than the increase in the value of the land."

The Hon'ble MR. BAKER said:—"I desire to explain, with reference to what has been said by the Hon'ble Babu Surendranath Banerjee, that, when I said that the annual value would be fixed once for all by the operation of this amendment, I was referring to the building, not to the land. It is quite clear that any rise in the value of the land will affect the value of the house and land taken together; but I was referring to the building itself. If you are to determine the value of the building by taking five *per cent.* on the original cost, obviously it will be fixed once and for ever. There will be neither a rise nor a fall."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I thought the Hon'ble Member was referring to the whole cost of the building and the land. I withdraw my remark."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, in reply, said:—"I was not surprised to hear the Hon'ble Member in charge of the Bill quoting the English law on this subject; for when my hon'ble friend is driven to defend a position which is absolutely unsustainable, he seeks for authorities and precedents in every quarter. I repeat that I shall not have the smallest objection if my hon'ble friend will agree to give us the English system in its pristine purity; but he will never be able to induce me to accept it in an adulterated form. I confess I find it difficult to understand how a valuation of Rs. 15,000 can in any way be beneficial to the owner who spent Rs. 10,000 ten years previous to the date of the assessment; but I can well understand his misfortune in having to pay a municipal rate on Rs. 15,000, when he actually invested only Rs. 10,000 on the building of the house. The strongest argument of the Hon'ble Member is that, if you accept my amendment, you fix the valuation for all time to come. But you must not forget that you fix a profit-rate of five *per cent.* for all time to come. Whatever the state of the market may be, a hypothetical tenant is assumed to be always willing to pay five *per cent.* on the structural cost. You accepted that position when you rejected my motion that the

annual value should be calculated according to the highest rate of interest payable on Government securities. If, then, you can assume a profit-rate of five *per cent.* for all time to come, there is no reason why you should not assess a building on the basis of the initial structural cost. As a serious practical difficulty, it has been asked how can you ascertain the actual structural cost of a building erected forty or fifty years ago? But, if you will consider the matter for a moment, you will see that the difficulty here is not greater than what you find in the system you propose to adopt. Take a building raised fifty years ago. What does the assessor do? He estimates the present cost of erecting the building, but this estimated amount must necessarily vary with a number of uncertain elements; for instance, a European architect will charge considerably more than a Native builder. Then, again, you have to deduct a reasonable amount on account of depreciation. Depreciation is a relative term, and must of necessity have reference to the condition of the building when it was originally built. You must compare the original and the present state of the building; so that, if you really give effect to the present law, you are bound to determine what the value of the building was when it was first erected."

The motion was then put and lost.

The Hon'ble Dr. Asutosh Mukhopadhyaya also moved that in section 148A (*now* 151), clause (*b*), for the words "present cost of erecting the building, less a reasonable amount to be deducted on account of depreciation, if any," the words "market value of the building" be substituted.

He said:—"In moving the last amendment I explained the hypothesis upon which the contractor's theory is based, and the object of the present amendment is to bring the law into harmony with that principle. The whole basis of the principle is that, when a person has invested a certain amount of capital in a building, he must be presumed to be willing to forego the interest derivable from that amount by any other mode of investment. Now, consider a case in which a person, instead of building a house for himself, purchases one which he considers suitable for residential purposes. Assume that he pays ten thousand rupees for it, and assume for a moment that, if he had to build it himself, it would have cost him fifteen thousand rupees. Now comes your municipal assessor and says that he must be assessed at five *per cent.* upon fifteen thousand rupees. The owner protests that he has not invested fifteen thousand rupees, and that you cannot impute to him any intention to forego the interest derivable from fifteen thousand rupees. He says, and rightly says, that whatever intention, by the stretch of your imagination, you can impute to him in respect of the ten thousand rupees he has actually invested, you have no right to indulge in your fancy in respect of the five thousand which he has not invested. He protests that this is not a legitimate assumption to make. This anomaly, at any rate, you will obviate, if you assume as the basis of your calculation the market value of the building, instead of the present cost of re-erecting it.

"But then, it is said, how can we apply the doctrine of market value to a thing for which there is no market; for it is assumed that there is no market for these residential buildings, which are not built to be let or sold. I chalenge the correctness of this assumption, and absolutely deny its accuracy. The majority of the buildings used by the middle classes of the community in the city for purposes of residence frequently change hands, and, if you take statistics, you will find that, though there are thousands of people who live in their own houses, it is not correct to say that they live in houses which they have built for themselves. For these houses there is a market, and there cannot be the slightest difficulty in estimating their market value. There might, no doubt, be some few houses in the city—the residences of wealthy men—which have never changed hands and for which there is no market in the sense that if you were to put them up to auction you might not find a large number of competitors. But the difficulty of estimating the market value in these exceptional cases would not in the least approximate to the difficulty of ascertaining the amount of rent payable by a hypothetical tenant or the

amount of reasonable deduction on account of depreciation. I submit, therefore, that the acceptance of the market value as the basis of our calculation will remove a good deal of speculation, and enable us to do away with the anomalies I have pointed out."

The Hon'ble MR. BAKER said :—"This same proposal was brought forward in 1888, and Sir Henry Harrison was at first disposed to accept it; but he was dissuaded from doing so by the representations which were made by Sir Charles Paul and Mr. Allen. Those two leaders of the legal profession expressed the opinion that the term 'market value' was fraught with far more embarrassment than the method of valuation proposed in the Bill, and Sir Henry Harrison and the Council considered they would be wise in allowing themselves to be guided by the opinion of their legal advisers. I think we had better follow that opinion on the present occasion. The hon'ble mover of the amendment has said that the adoption of his proposal would cause less difficulty than the assessment of a house according to the method laid down in the Bill by means of a percentage on the estimated present cost of constructing the building. The great objection to this proposal is that it will bring back the whole of the difficulty which we were dealing with yesterday on the question of the assessment of residential houses in a different form. The difficulty of ascertaining the rent in these cases is only greater than the difficulty of ascertaining their market value, because these houses have really no market, or at most only a very restricted market. It was said in 1888, on the authority of Babu Nilmoney Mitter, an eminent Indian engineer, that even if such a house was sold immediately after it was built, when it was brand new, it would not fetch the amount of money which was expended in its construction. It was also stated in 1888 that there would practically be only two classes of cases in which houses of this kind would come into the market, and those two classes gave very different results. The first is where a building of this class is taken possession of under the operation of the Land Acquisition Act. There is great opposition to this on the part of the owner, and he does all in his power to raise the value of the property, and the compensation awarded in such cases is exceedingly high. On the other hand, when a house of this kind comes into the market owing to the bankruptcy of the owner or the disappearance of his family or any such misfortune, the price obtained is usually very low. It was estimated in 1888 that in such cases the difference between the market value under the Land Acquisition Act and the market value in the case of these forced sales is often as great as 50 *per cent*. It will therefore be exceedingly difficult to take the market value as the standard of value."

The Hon'ble MR. OLDHAM said :— "I wish briefly to explain that the only difference which exists between the hon'ble mover of the amendment and the Hon'ble Member in charge of the Bill and myself is as to a question of fact. But take even the Hon'ble Member's facts. He states with confidence that there are thousands of houses which have a market value. Still that leaves thousands of houses which have no market value."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I support this amendment. Yesterday I spoke on the lines of this amendment, and the Hon'ble Member in charge of the Bill said in reply that it would be fraught with difficulty. But is there not such a principle in the Land Acquisition Act, and is not the market value daily settled in land acquisition cases? Did my Hon'ble friend the Legal Remembrancer, who was recently Judge of the 24-Parganas, find any difficulty in deciding such cases? There may be difficulties, but I cannot understand that there will be serious difficulties if the principle of the market value is accepted. The thing is done from day to day under the Land Acquisition Act."

The Hon'ble MR OLDHAM said :—"We find immense difficulty in the Board of Revenue."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"That is because you proceed in the wrong way: if you proceed in the proper way, there will

be little or no difficulty. There may be a restricted market as regards such spacious buildings as the houses erected by Babu Nundo Lal Bose and Maharaja Sir Jotendra Mohan Tagore; but I venture to assert within my personal knowledge that there is a wide and open market for the sale of small houses in Calcutta. They are constantly changing hands, and I don't think there is any difficulty in ascertaining the market value of such houses. But, as I said yesterday, I desire to place the question of the market value on other than legal grounds. I say it is but equitable that you should proceed on the basis of the market value. A man purchases a house for Rs. 10,000; that is the value he has paid for the house. The assessor comes next day and assesses the house at Rs. 15,000 in accordance with the principle laid down for the valuation of such houses. So that practically the owner has to pay rates not on the amount of money for which he purchased the house, but on the fictitious and imaginary valuation arrived at in accordance with this provision of the law. I wish to brush aside all considerations connected with the legal bearings of the case and put it on the high considerations of justice and equity. Is it fair, I ask, that a man who purchases a house for Rs. 10,000 should have to pay rates assessed on a valuation of Rs. 15,000. That is not right and equitable. It does not commend itself to my notions of justice and equity; and I feel sure it would not commend itself to the judgment of Hon'ble Members if it were divested of the difficulties which are believed to surround the subject. I wish the Council to decide this question on the broad principles of equity, and, if it is looked at from that point of view, I am confident Hon'ble Members will be in favour of the amendment."

The Hon'ble MR. BOLTON said:—"The Hon'ble Member who has just spoken has mentioned the case of a man who purchases a house for Rs. 10,000 and is assessed at Rs. 15,000. There is the obvious remedy in such a case of an appeal to the Vice-Chairman, and from the decision of the Vice-Chairman an appeal may be lodged before the Small Cause Court—a perfectly independent tribunal. It is impossible to provide absolutely against error or unfairness in valuation, but the appellate authorities are there to redress injustice."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I wish to say, by way of a personal explanation, that I was glad to hear the announcement which the Hon'ble Member made regarding the appointment of a Commission of Enquiry, and, if the Vice-Chairman of the Corporation is examined before that Commission, I know what he will say. I know his views in this matter. I am also certain that he will say, having regard to the many cases which come before him and the inadequate information upon which he has to decide, that he is not able to do justice. The Hon'ble Member is aware that the Vice-Chairman wants to be allowed a horse allowance; he wants to go about and test the work of the amins. We have amins upon whom the Vice-Chairman is obliged to depend. A particular house was assessed in Ward No. 1. It was the ward of Babu Bhupendro Nath Bose. The assessment was doubled or trebled, but the most extraordinary part of the affair was that there was no such house, and that discovery was made subsequently. This is the way business is now done."

The Hon'ble MR. OLDHAM said:—"It so happened that I was discussing this very question with the Vice-Chairman four days ago, and the views I gathered from him were exactly the contrary to those which have been expressed by the Hon'ble Member who has just spoken, not as regards the particular house to which the Hon'ble Member has alluded, but as regards the statement that, if the Vice-Chairman was able to go about, the result would be different. The Vice-Chairman's opinion was that, if he was able to go about and examine these assessments, the results would be very considerable enhancements. Then, as regards the case of a house erected or purchased at a cost of Rs. 10,000, and valued for purposes of assessment at Rs. 15,000. Suppose a person got possession of a currency note of Rs. 100 for Rs. 50, would he be supposed to be the possessor of Rs. 50 or Rs. 100?"

The Hon'ble BABU BOIKANTA NATH SEN said:—"I consider it obvious that injustice will be done if a rate of 5 *per cent.* be taken upon the valuation of

a house made in the manner provided by this provision of the Bill, but such injustice will be obviated if the amendment to take a percentage upon the market value is adopted."

The Hon'ble Dr. Asutosh Mukhopadhyaya, in reply, said :—"I find myself in a hopeless maze, from which I am unable to extricate myself. I was assured not long ago that we have adopted the doctrine of a hypothetical tenant. Relying upon this assurance, I endeavour fairly to carry out that doctrine to its legitimate conclusion; but, before I proceed an inch, I am stopped. My hon'ble friend, the Member in charge of the Bill, quoted the high authority of Sir Charles Paul and Mr. Allen; I can assure him that I entertain a very high opinion of the learning and ability of those gentlemen, and if their advice to the Government had been on a legal question, I would have respected the authority of their opinion. But this is not a legal matter. In their opinion, it is a more difficult matter to ascertain the market value of a building than to ascertain the cost of rebuilding it and making a reasonable allowance for depreciation. I respectfully join issue upon that point. As my hon'ble friend has pointed out, in cases decided under the Land Acquisition Act the market value of buildings has to be ascertained. When the whole question was reopened in 1894 in connection with that Act, a strenuous effort was made to do away with the principle of market value; but the supporters of the doctrine of market value made good their position in the Imperial Legislative Council and succeeded in keeping the existing provisions of the law intact. If District Judges in hearing land acquisition cases do not find much difficulty in ascertaining the market value of buildings, I cannot see why the municipal assessor should find greater difficulty. The Hon'ble Mr. Oldham says that, if there are thousands of houses for which there is a market value, there are also thousands of houses for which there is no market value; but in England, where the principle of market value is followed, there occur cases in which there is strictly no market value, and yet the Courts have found no difficulty in dealing with them; and I hope that, if my amendment is carried, there will be no difficulty in carrying out that principle here also."

The motion being put, the Council divided as follows:—

Ayes 6.	*Noes 12.*
The Hon'ble Raja Bahadur Ranajit Sinha, of Nashipur.	The Hon'ble Mr. Buckley.
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Handley.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Mr. Apcar.	The Hon'ble Mr. Mackenzie.
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Mr. Spink.
	The Hon'ble Sahibzada Mahomed Bakhtyar Shah
	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
	The Hon'ble Mr. Oldham.
	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

So the amendment was lost.

The Hon'ble Dr. Asutosh Mukhopadhyaya also moved that in section 148A (*now* 151), after proviso (*iv*), the following be added :—

"(*v*) In calculating the value of land under this section, where such land is held by the owner as an estate or part of an estate subject to the payment of revenue to the Government, the amount of revenue so payable shall be deducted from the gross annual rent."

He said:—"I was in hopes that the minute relief which I sought by this amendment might escape the observation of the Hon'ble Member in charge of the Bill, but I regret to find that application for relief, however minute or inconsiderable, is bound to meet with opposition. The principle of this

amendment may be very briefly explained. Under our municipal law, one-half of the consolidated rate is to be paid by the occupier and the other half by the owner. This term 'owner' does not necessarily include one single individual. It will include everybody above the occupier. As a matter of practice the owner's share is levied from the person who stands immediately above the actual occupier, and there is no unfairness in that, because it is only a matter of contribution as between himself and his superior landlord. It is a matter of contract between them; but, when this superior landlord happens to be the Government, he cannot call on the Government to contribute, and therefore he cannot get any relief at all, but has to bear the whole burden. Let us, therefore, in all fairness exclude from the amount of gross rental the amount of revenue paid to the Government. I am assured by high authority that this will not materially affect the municipal revenues, because in most cases the amount of the Government revenue is so small that it will not afford any appreciable relief to any one. But, though this may be the case in the town of Calcutta proper, it will not be so in the added area, where there are some holdings for which the amount of revenue is considerable; and, if a deduction is made, some relief may be afforded. I feel sure that the Hon'ble Member in charge of the Bill will say that this is such a small matter that we may leave it alone; such a contention would be tenable if it was a matter which would seriously affect the municipal revenues; but, as it will afford some relief, though small, to occupiers, I hope the Hon'ble Member will accept the amendment."

The Hon'ble Mr. Baker said:—"It is quite true that this is a small matter. The total amount of the ground rent and revenue payable to the Government in Calcutta and the Suburbs is only Rs. 65,400. The whole of the soil in the town of Calcutta is formed of holdings, which pay ground rent to the Government of Bengal amounting to Rs. 18,400 a year; and, as regards the Suburbs, there is only one portion in which there is any revenue payable at all. I will read to the Council a letter from the Collector of the 24-Parganas, which states the facts. He says:—

'The added area of Calcutta consists, for revenue purposes, of two portions, *viz.*, (1) the area west of Tolly's Nala, comprising Alipore, Chetla, Kidderpore and a portion of Garden Reach, and (2) the tract east of Tolly's Nala and the Lower Circular Road, which comprises Bhawanipur, Ballygunge and Entally. The whole of the latter tract is in Panchannogram Government estate, but I cannot tell you what the revenue is, because Panchannogram includes also Cossipore-Chitpur and Maniktola Municipalities, as well as portions of South Dum-Dum and the South Suburban Municipality The rent-rate of the holdings in Panchannogram varies from Re. 1 to Rs. 3 per bigha. The latter rate, or Rs. 9 per acre, is the usual rate The average rate is, however, only Rs. 6 per acre, and applying this rate to the area of this tract, which I estimate to be 9¼ square miles, the rental may be reckoned at Rs. 34,400.

'The portion of the added area west of Tolly's Nala is ordinary permanently-settled land belonging to private owners. The revenue rate of the permanently-settled estate in this district is about 8 annas a bigha. A considerable area is, however, included in Government estate Saheban Bagicha, where the rent-rate is Rs. 3 per bigha. For the whole area of this tract, which may be 6½ square miles, I estimate the revenue, at the rate of Rs. 3 per acre, at Rs. 12,500. For round figures the revenue and rental paid to Government in the added area may be estimated at Rs. 47,000. This does not include the rental of the Orphanganj market, which is about Rs. 60,000. I think that the amendment you write of will occasion practical difficulties. Strictly speaking, no *revenue* is paid for lands in the town of Calcutta, for in 1758 the East India Company obtained a *sunud* from the Nawab for the *lakhiraj* tenure of the villages comprising Calcutta, the revenue of these villages, amounting to Rs. 8,836, being remitted. The rents collected in Calcuttta are in fact *ground-rents*, and not revenue.

'Panchannogram is held under a similar tenure, *viz.*, a revenue-free or lakhiraj grant renewed by the Nawab Mir Jaffer in 1758. The holdings in this estate pay *rent*, and not revenue, and are liable to sale for arrears of rent as tenures under Act VII (B.C.) of 1868.

'The Government estate Saheban Bagicha consisted of country houses of Europeans originally. These formerly belonged to private estates, but the proprietors having represented to the Company, at some date before the decennial settlement, that they could not recover their rents, the Company remitted their revenue *pro tanto*, and undertook the collection of the rents of these lands. The holders are therefore tenants, and they pay *rent*, not revenue.'

"It is only in that part of the added area which forms a portion of the permanently-settled tract that any revenue is paid at all. Therefore, the

first objection to this amendment is that it will exclude the greater part of the town from coming under its operation at all. People living in the metropolis of Calcutta and in the Suburbs who pay a sum which is not strictly revenue will get no relief, while other people living within permanently-settled estates will receive relief, and, as I have said before, the total amount is absolutely insignificant."

The Hon'ble BABU JATRA MOHAN SEN said:—"I agree with the Hon'ble Member in charge of the Bill that this amendment will give only very small relief to a few persons, but, if some slight alteration is made in the amendment, the object of the hon'ble mover might be met by omitting the words 'as an estate and part of an estate' and inserting the words 'or rent' after 'revenue'."

The Hon'ble MR. BAKER said:—"This is a substantial alteration which cannot be moved without notice, but I do not press the objection."

The Hon'ble MR. OLDHAM said:—"I do not understand the proposal made by my old Chittagong friend, the Hon'ble Babu Jatra Mohan Sen. Does he understand that the Panchannogram estate on which Calcutta is built, is precisely in the same position as the Noabad estate in Chittagong with which he is so familiar? The effect of the amendment will be that where people pay rent to Government the rent is to be deducted; but where they pay rent to a zamindar no deduction is to be made."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, in reply, said:—"After the explanation given by the Hon'ble Member in charge of the Bill, I will not press the amendment."

The motion was then, by leave of the Council, withdrawn.

SECTION 152.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that proviso (*e*) to section 148B (*now* 152) be omitted.

He said:—"This proviso has somewhat puzzled me. I have not been able to make out what cases are intended to be included in it: I suggest that it be omitted."

The Hon'ble MR. BAKER said:—"I agree. There is nothing on record to show how this proviso was inserted, and the Assistant Secretary is not aware how it came in."

The motion was put and agreed to.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA also moved that in section 148B, proviso (*g*) [*now* section 152, proviso (*e*)], line 12, after the word "force" be added "from the date of the application."

He said:—"I wish to have it made quite clear from what time the alteration is to take effect. My original idea was that the re-valuation should be enforced from the date of the depreciation. I have been in consultation with the Hon'ble Member in charge of the Bill, and he has pointed out that this would not be fair, for, if there was depreciation and the owner did not make any application, he could not very well blame the Municipality for not reducing the assessment. On the other hand, if he made an application and it was not disposed of for months, he ought not to be made to suffer; it would therefore be fair to put in these words."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"Suppose the application is made in the middle of a quarter, there would be a difficulty. I was going to make a suggestion: it is that the new valuation should take effect 'from the quarter following the date of the application.' That is the present law in the mufassal. We could not allow the benefit of half the rate from the

date of the application, because it would introduce complications into the accounts. If it is provided that the application is to be given effect to from the quarter subsequent to the date of the application, I think, Sir, that would do away with the complications which might otherwise arise."

The Hon'ble MR. BAKER said:—"I have no objection to that."

The Hon'ble THE PRESIDENT said:—"I should say 'from the beginning of the quarter following the date of the application'."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"I accept that."

The motion was then put in the amended form and carried.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 148B, proviso (*j*) [*now* section 152, proviso (*g*)], after the words "the Chairman may" be inserted "if he thinks fit," and that for the words "all the sharers" be substituted "any of the share-holders interested individually or collectively to the extent of one moiety or upwards."

He said:—"The section as I propose to amend it will read:—

'If, during the currency of any period mentioned in sub-section (*1*), the ownership of any building or land or portion thereof be subdivided into separate shares, the Chairman may, if he thinks fit, on the application of any of the shareholders interested individually or collectively to the extent of one moiety or upwards, apportion the assessment on such building, land or portion among such sharers according to the value of their respective shares; and such apportionment shall be in force, and the consolidated rate shall be levied according to it, until the expiration of the said period.'

"I confess, Sir, that this question is not free from difficulties, but I hope that by the insertion of the words 'if he thinks fit' after the word 'may' all practical difficulty will be removed. The section, as it stands, authorizes the Chairman to apportion the assessment of any building or land upon the application of all the shareholders. My amendment is to the effect that he should be in a position to do so upon the application of any shareholders interested individually or collectively to the extent of one moiety or upwards, and my object is this: the case which the section contemplates is the case of all the shareholders being willing to have the rates divided amongst themselves. That is a contingency not very likely to happen. The question would ordinarily arise only when some of the owners are willing to pay the rates and the others are not willing to do so. Suppose there are two shareholders—one of them owns 14 annas and the other owns 2 annas; the 2 annas' shareholder is dishonest enough to think that he need not pay the rates; the 14 annas' shareholder has to pay the whole, and his only remedy is to seek relief by the tedious process of a contribution suit. In such a case as that, the 14 annas' shareholder should obviously have some speedy remedy. He owns a large share of the property, and his co-sharer confessedly is not willing to pay. In such a case, I venture to think, the 14 annas' shareholder ought to be in a position to make an application to the Chairman, and, if the Chairman thinks fit, he may apportion the rates. The practical difficulties to which I allude are two—first, it may be said that there may be a dispute as to the shares. I think that is quite possible. If so, there would be ample discretion in the Chairman to withhold his hands. I would here invite your attention to section 364 (*now* 365), where you will find a similar provision. The first clause of section 364 (*now* 365) is as follows:—

'(*1*) When two or more adjoining plots of land are, by reason of their shape, situation or size, individually unsuitable for the construction of buildings in accordance with the provisions of this Act and the rules and bye-laws made thereunder, and the owners of such plots cannot agree to amalgamate and re-divide the plots in order to admit of the construction of buildings as aforesaid, the General Committee may, on the written request of the owners of not less than three-fourths of the area of such plots, take possession of the land and form it into suitable building sites.'

"You do not here provide that action can be taken only upon the representation of the entire body of owners. If another illustration is necessary, I may refer to the Partition Act of 1893, section 2, where also you will find a similar provision. I am ready to admit that, if it was made compulsory upon the Chairman to apportion the rates upon the application of some only of the co-sharers, practical difficulties might arise. He might be called upon to decide questions which ought properly in the first instance to be discussed in a Civil Court.

"Then, in the second place, it might be urged that, if the application is made by some only of the shareholders or by the majority of them, the others might remain in complete ignorance of the proceedings. But, I take it, the Chairman would ordinarily decline to make any orders under this clause unless he had before him all the shareholders, or, at any rate, unless he was satisfied that due notice had been served upon all of them. I, therefore, venture to think that with the limitations proposed, the section as amended will be workable and can lead to no practical difficulties."

The Hon'ble Mr. Baker:—"This is a matter of some difficulty, but I have had an opportunity of discussing it with the hon'ble mover and the Chairman, and I think, with the addition of the words which have been proposed to-day, the section will be free from objection. I am therefore prepared to accept the amendment."

The motion was put and agreed to.

Section 161.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that in section 148L (*now* 161), sub-section (2), after the word "appears" be added "or of any person duly authorised on his behalf."

He said:—"Sub-section (2) of section 148L (*now* 161) reads as follows:—

'At the said time and place the Chairman shall hear the objection, in the presence of the objector if he appears, or may, for reasonable cause, adjourn the investigation.'

"I confess, Sir, that I was somewhat upset by the word 'presence.' Take, for instance, the case of an infant or of a *pardanashin* lady; surely it is not intended that the infant or *pardanashin* lady should be present before the Chairman. It would be quite enough if they were represented, not necessarily by a lawyer, but by any authorised agent. I feel sure it is not intended that they should appear in person."

The Hon'ble Babu Surendranath Banerjee said:—"The present practice is for the person to appear himself or by an authorised agent. So that there is absolutely no objection in accepting my friend's amendment."

The Hon'ble Mr. Baker said:—"The rule which the Select Committee followed was not to put in any words which would give a statutory right to appear by an authorised agent, but simply to leave it to the practice of the Corporation or the General Committee. Is it worth while to make any change? I admit that these words in themselves are absolutely free from objection, but is it worth while to insert them in the Bill? The words are the same in the present law: 'at the said time and place the Chairman shall hear the objection in the presence of the objector if he appears, or may for reasonable cause adjourn the investigation.' How would it be to leave out those words 'in the presence of the objector if he appears'?"

The Hon'ble Babu Surendranath Banerjee said:—"Suppose he was to dispose of the case in the absence of the objector?"

The Hon'ble Mr. Baker said:—"If the Hon'ble Member will accept that modification, I have no objection."

The Hon'ble Dr. Asutosh Mukhopadhyaya then said:—"I would be quite satisfied with this amended form. My only objection was to the words 'in the presence of the objector,' which are absolutely misleading."

The Hon'ble the President said:—"Then, instead of adding, the Hon'ble Member subtracts, and I understand the motion is that in section 148L (*now* 161), clause (2), the words 'in the presence of the objector if he appears' be omitted."

The Hon'ble Mr. Oldham said:—"I would oppose that amendment. I do not like the appearance of the section with that omission. I should like to adhere to the existing law, that is, the law in section 136 of the present Act and in this Bill, and I would adhere to the present practice."

The Hon'ble the President said:—"It is rather an important thing to have a clause in the section that it is expected that the objector shall be present and the disposal of the objection shall be in his presence."

The motion in the amended form was then put and lost.

Section 162.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that after sub-section (2) of section 148M (*now* 162) the following be inserted:—

"(*2a*) The provisions of Parts II and III of the Indian Limitation Act, 1877, shall apply to every such appeal."

He said:—"My object, Sir, in moving this amendment is to avoid as far as possible the discussion of difficult questions of law. Section 148M (*now* 162) says:—

'Any person dissatisfied with the orders passed on his objection may appeal to the Court of Small Causes having jurisdiction in the place where the building or land is situated.

'(*2*) Such appeal must be presented to the Court of Small Causes within thirty days of the decision of the objection under section 148L (*now* 161), and must be accompanied by an extract from the register of objections containing the orders objected to.

'(*3*) No appeal shall be admitted under this section unless an objection has first been taken under section 148L (*now* 161).'

"A question which may be raised, and often has been raised, is whether in preferring such an appeal as this it would be open to the appellant to deduct the time which must necessarily elapse for taking a copy of the order made against him. If he were appealing against an order of a Civil Court, he would be entitled to the deduction as a matter of right. I want to have the matter cleared up, and I simply say that the provisions of the Limitation Act which apply to ordinary appeals shall also apply here."

The Hon'ble Mr. Baker said:—"No such difficulty has ever been brought to my notice. It is a matter of law, and I do not propose to say much about it. I should have thought that, as the Indian Limitation Act is a general Act, the provisions of Parts II and III apply to all India."

The Hon'ble Babu Jatra Mohan Sen said:—"My impression is that the general provisions of the Limitation Act do apply, but at the same time it would be safe to have this proviso."

The Hon'ble the President said:—"I am addressing myself to the Hon'ble the Legal Remembrancer. This section provides a period of limitation for an appeal of thirty days. Now, let it be supposed that the Indian Limitation Act in similar cases prescribes sixty days. Of course a special provision in this Act

would over-ride the Indian Limitation Act as regards the period of limitation; but would the fact that we had inserted a period of limitation of thirty days exclude the Indian Limitation Act as regards Parts II and III?"

The Hon'ble MR. HANDLEY said:—"I do not think so, Sir. Section 12 of the Limitation Act provides as follows:—

'In computing the period of limitation prescribed for any suit, appeal or application, the day from which such period is to be reckoned shall be excluded.

'In computing the period of limitation prescribed for an appeal, an application for leave to appeal as a pauper and an application for a review of judgment, the day on which the judgment complained of was pronounced, and the time requisite for obtaining a copy of the decree, sentence or order appealed against or sought to be reviewed, shall be excluded.

'Where a decree is appealed against or sought to be reviewed, the time requisite for obtaining a copy of the judgment on which it is founded shall also be excluded.

'In computing the period of limitation prescribed for an application to set aside an award, the time requisite for obtaining a copy or the award shall be excluded.'

I should think that would apply also to this section, even though it is a special law."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, in reply, said:—"This discussion illustrates precisely what I want to avoid. In this room we have lawyers who do not agree, and I am quite sure that, if two of them were to sit down to argue this question, they would satisfactorily argue it both ways. Uncertainty in the law is the chief thing I want to avoid."

The Hon'ble BABU BOIKANTA NATH SEN said:—"No doubt there is considerable force in what the hon'ble mover of the amendment has observed. It is much better to be on the safe side. The applicability of the general law of limitation with regard to special Acts is a matter which admits of argument on both sides. It is not a point which has been very conclusively settled. There is a difference of opinion as regards the applicability of the general law of limitation to control special Acts. It is a doubtful point therefore, and it is only to be on the safe side that this amendment might be accepted."

The Hon'ble MR. BAKER said:—"I think, having regard to what has fallen from the various legal Members, it would be wiser to accept the amendment. The intention is that proceedings before the Small Cause Court should be governed by those parts of the Limitation Act, and my only doubt was whether that effect would not be produced without the insertion of those words. As there seems to be some doubt on the point, I think the Council would do well to accept the amendment."

The motion was then put and agreed to.

SECTION 163.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 148N (*now* 163), sub-section (*3*), after the word "shall" the following words be inserted:—

"subject to the provisions of section 6 of the Presidency Small Cause Courts Act, 1882, or section 25 of the Provincial Small Cause Courts Act, 1887, as the case may be."

He said:—"I may mention at the outset that this does not stand on the same footing as a similar amendment of mine, which I had the honour to move on a previous occasion. What I intend to do by this section is to confer on the High Court power which it does not possess under its charter, but power, which it derives under certain special Acts, of revising the proceedings of the Small Cause Court upon questions of law. Section 25 of the Provincial Small Cause Courts Act provides that, if a case has been decided by a Court of Small Causes, the High Court may send for the record, and, if there has been an error of law, may make such order as it deems necessary. Subject to this superintendence of the High Court, the decision of a Small Cause Court is final. Appeals in assessment cases will lie to the Court of Small Causes, and the

question is whether, after a case has been decided by a Court of Small Causes, it is desirable that its decision should be absolutely final or should be open to revision upon a question of law only—not upon a question of fact—by the High Court? I think it is desirable that the High Court should have such power. I shall illustrate the position by a recent case in point which the Corporation will not speedily forget. Last year under the existing Act there was a case of assessment in which the rate-payer said that the whole process of valuation adopted by the Municipality was wrong. There was an appeal to the Court of Small Causes; the Judge of the Small Cause Court decided in favour of the rate-payer; the Corporation moved the High Court and obtained a rule under section 25 of the Provincial Small Cause Courts Act. There could not possibly be any doubt that the question of law which was raised was a very important and difficult one, because, I find from this Bill, the provisions of the old Act relating to that matter have been changed; but although the question of law raised was a very important one—of importance not only in that case, but of importance in all similar cases—the High Court had no jurisdiction to interfere. And why? The Small Cause Courts Act says:—'Nothing in this Act shall affect any of the provisions of a local Act.' The Calcutta Municipal Act is a local Act, and therefore the Judges held that section 25 of the Provincial Small Cause Courts Act had no application whatsoever: in other words, if this had been a case decided by a Judge of the Small Cause Court under the Small Cause Courts Act, the High Court would have been entitled to interfere; but as he decided it under the Calcutta Municipal Act, and not under the Small Cause Cour's Act, the High Court was powerless. The only way it could interfere would be under its charter, but it never interferes under its charter unless the subordinate Court has acted without jurisdiction, and confessedly the Small Cause Court had ample jurisdiction, even the jurisdiction to decide erroneously, in the matter. Therefore, although the decision of the Small Cause Court Judge was a very doubtful one, the High Court could not interfere; and it was fortunate for the Corporation that this Bill, at the time, was before the Select Committee, otherwise the consequence would have been that an erroneous decision of the Small Cause Court would have been binding upon the Municipality, the whole system of assessment would have been upset, and the mischief would have remained without remedy probably for years.

"I hope I have amply made out my position that the High Court should have the power of interference upon questions of law. I should add that, when the High Court interferes under section 25, it does not interfere simply because the party who moves the Court wants the Court to do so. The High Court will interfere only if a case is made out of absolute injustice; that is to say, it is not sufficient to say to the High Court that there has been an error of law; you must satisfy the Court that there has been an error of law which has caused grievous injustice to one party or another. I will give an instance: a creditor sued his debtor for money; the debtor was honest enough to take the defence of limitation and pleaded that the claim was barred; the Small Cause Court decided in favour of the creditor and overruled the plea of limitation, upon clearly erroneous grounds. The debtor moved the High Court, but the High Court said:—'We are not going to interfere; it may be that the Small Cause Court Judge has erroneously decided the question of limitation, but the consequence has been that it has directed the debtor to pay his debt; we do not assist dishonest people.' So that, if you confer this power upon the High Court, there will be no interference except for the sake of justice. We ought not to find ourselves absolutely helpless when a Small Cause Court Judge erroneously decides a novel or difficult question of law which, you may be sure, will frequently arise upon the construction of an Act which will be, perhaps, the longest on the statute book. Besides, there is no imaginable reason why the decisions of a Small Cause Court Judge under the Municipal Act should enjoy an absolute finality, while his other decisions, under the ordinary law, have only a qualified finality, and may be challenged any moment before the High Court."

The Hon'ble Mr. Baker said:—"The Hon'ble Dr. Asutosh Mukhopadhyaya has discussed this matter with myself and the Chairman, and he has convinced us that it will be to the advantage of the Corporation to allow an

appeal to the High Court on questions of law from the decisions of the Small Cause Court. I therefore propose to accept the amendment."

The motion was then put and agreed to.

SECTION 165.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 148P (*now* 165), sub-section (*1*), line 5, before the word "which" the words "the reason for" be inserted.

He said:—"This is a small matter, and I believe my amendment gives effect to what was really intended. The amended section will read as follows:—

'Any owner or occupier may at any time apply to the Chairman to have his name entered as owner or occupier in the assessment-book; and the Chairman shall, unless there is sufficient reason to refuse such application (the reason for which refusal shall be recorded in writing), cause such name to be entered in the assessment-book'"

The Hon'ble MR. BAKER said:—"I accept the amendment."

The motion was put and agreed to.

SECTION 169.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 148SS (*now* 169), line 4, after "148M" (*now* 162) the words "or under section 148N (*now* 163), sub-section (*3*)," be inserted.

He said:—"There must have been some mistake in this, because it does not make sense. The section is as follows:—

'When the valuation of any building or land is revised in consequence of an objection made under section 148K (*now* 160) or an appeal preferred under section 148M (*now* 162), the revised valuation shall continue in force for the unexpired portion of the period for which the first-mentioned valuation was made, and no longer.'

"It ought to be 'or an application made under section 148N (*now* 163).' We have just amended section 148N (*now* 163), clause (3), so as to make it read 'Every decision made by the Court of Small Causes under section 148M (*now* 162) shall be final, subject to the provisions of section 6 of the Presidency Small Cause Courts Act, 1882, or section 25 of the Provincial Small Cause Courts Act, 1887, as the case may be.' Of course, if the High Court interferes upon a question of law and sets aside the valuation, that will have to be given effect to."

The Hon'ble MR. BAKER said:—"There is no application made under section 148N (*now* 163), even as amended."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"In that case I would not alter the section, but leave it as it is."

The motion was then, by leave of the Council, withdrawn.

The Hon'ble BABU JATRA MOHAN SEN moved that in section 148SS (*now* 169), line 5, the words "till the end" be substituted for the words "for the unexpired portion."

He said:—"The decision referred to in section 148SS (*now* 169) is meant to be prospective and retrospective. I do not know whether the words I have proposed to substitute here would commend themselves to the Hon'ble Member in charge of the Bill. If they do not, I do not press the amendment."

The Hon'ble MR. BAKER said:—"I do not see any object in making the change."

The motion was then, by leave of the Council, withdrawn.

The Hon'ble BABU JATRA MOHAN SEN moved that the following proviso be added to section 148SS (*now* 169), namely:—

"Provided that no question decided under section 148K (*now* 160) or section 148M (*now* 162) shall be re-opened at the re-valuation on the expiration of the period for which the previous re-valuation was made, if the facts and circumstances on which the decision was arrived at continue to exist on the expiration of the said period."

He said:—"If for instance a house or building is exempt for assessment under the law, but was assessed by the municipal authority, and the assessment was set aside by the Calcutta Small Cause Court under the provisions of this chapter, it would not be admissible to re-open the proceedings at the re-valuation. It would be incurring useless expense. The Municipality will have to incur expense if the matter is re-opened, and the party also would be harassed if he has to go again to the Small Cause Court to establish his point. To guard against such an injustice I have thought fit to put in this proviso."

The Hon'ble MR. BAKER said:—"If this amendment has any effect at all, it can only be to throw purely technical difficulties in the way of a re-valuation. If that is not the effect of it, it has no effect; for if, as a matter of fact, the circumstances and the facts did remain unchanged, then there would be no ground for altering a valuation and no re-valuation would be made. I myself regard the amendment as unpractical, and I hope it will not be accepted."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I am in strong sympathy with the amendment of the Hon'ble Babu Jatra Mohan Sen, because the effect would be no enhancement of the valuation at all. It would, no doubt, be undoing the work which we have been doing for the last couple of days, but, if the Council is prepared to accept it, I certainly will not stand in the way. I certainly would welcome it, because it would be exactly in form with some of the amendments which I myself have moved and which have been rejected. I have not the smallest objection, but the only difficulty is that it is at variance with the decision of the Council in regard to three amendments running on the same lines."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"I desire to point out that the amendment completely defeats its own object. It says:—

"Provided that no question decided under section 148K (*now* 160) or section 148M (*now* 162) shall be re-opened at the re-valuation on the expiration of the period for which the previous re-valuation was made, if the facts and circumstances on which the decision was arrived at continue to exist on the expiration of the said period."

"But those facts and circumstances are precisely what we have to investigate for the purpose of ascertaining whether there is to be any alteration in the re-valuation or not. In order to give effect to the amendment you must make out whether the facts and circumstances continue to exist. I do not see what is to be gained by it."

The Hon'ble Babu JATRA MOHAN SEN, in reply, said:—"It seems to me that there is no contradiction whatever in this amendment. Of course, the authority deciding as to whether it should revise or not would have to see as to whether the facts and circumstances do continue to exist as before."

The motion was then put and lost.

SECTION 150.

The Hon'ble BABU SURENDRANATH BANERJEE said:—"Before I proceed to move my next amendment on the paper, I want to remind the Hon'ble Member in charge of the Bill that he has entrusted me with an amendment which I may call the 'poor man's' amendment, and, if he would allow me, I would move it now."

The Hon'ble MR. BAKER said:—"That is a matter in which the Hon'ble Babu Surendranath Banerjee and myself have been in communication, and I am

prepared to accept the amendment if he moves it. It ought to have been introduced a little sooner; but the Secretary will no doubt insert it in its right place."

The Hon'ble BABU SURENDRANATH BANERJEE, by leave of the President, moved that the following sub-section be inserted in section 148 (*now* 150), namely :—

"With the previous sanction of the Local Government, the Corporation may, by resolution, exempt from the consolidated rate all buildings and lands the annual valuation of which, as determined under this Chapter, does not exceed twenty rupees or such smaller sum as may be specified in such resolution:

Provided that no person shall be entitled to claim the benefit of such exemption if he owns or occupies more than one building or piece of land and the aggregate annual valuation of all the buildings or lands owned or occupied by him exceeds twenty rupees or the smaller sum specified in the said resolution."

He said :—"I raised this point at the meeting of the Select Committee. I suggested to the Select Committee that it would be only right and proper that very small houses should be exempted from the assessment, and the figure that I ventured to suggest was Rs. 25 or Rs. 20. This is altogether an enabling section, that is to say, it gives the Corporation power by resolution, subject to the approval of the Local Government, to exempt from the consolidated rate all buildings of a certain assessment and below a certain assessment. The figure is taken very low. It is all buildings assessed at Rs. 20 or under which may be so exempted, and there is this safeguard that, if they are to be exempted, the exemption must take place subject to a resolution of the Corporation, and further this resolution must be confirmed by the Local Government. Therefore you have guarantees which make it impossible for the Corporation to abuse the power which it is proposed to confer on it. It is important to know what the financial effect of an exemption like this would be, and here I may say that I placed myself in communication with the Municipal Executive. I had an opportunity of talking this matter over with the Vice-Chairman. He thought the exemption might be estimated at about Rs. 10,000 annually, but in estimating this loss of Rs. 10,000 we should bear in mind that you dispense with the necessity of writing out a large number of small bills. That means a saving of expenditure, and that expenditure may be set down at Rs. 2,000 or Rs. 3,000, and then, what is more important, you do not let loose the municipal underlings upon a helpless class of the community. The rate which would be paid by huts assessed at Rs. 20 would be at 20 *per cent.*, about one rupee per quarter, and you exempt all houses which contribute to the consolidated rates to the extent of Re. 1 per quarter. These people constitute the poorest section of the community, and you have to incur considerable expenditure in writing out these bills and in providing machinery for collection; and there is the further fact that you send your underlings to these people to realise the amount, and there is that demoralization consequent on the underlings being brought in contact with them. Having regard to the fact that the Corporation loses little, if anything, and that relief is given to a class of the community who deserve this relief, I trust, Sir, that this amendment will be accepted by the Council. Yesterday I ventured to call attention to the principle of John Stuart Mill with regard to the assessment of residential houses. John Stuart Mill laid down the principle that the annual valuation should be 5 *per cent.* or 4 *per cent.*, according to the prevailing rate of Government securities, of the present estimated cost of buildings plus the value of the land upon which these buildings stand, and he supplemented this principle by another principle, *viz.*, that the house-tax being in the nature of an income-tax, houses below a certain assessment ought to be exempted from the house-tax. This amendment, if accepted, would go some way to give effect to this principle. You have accepted the principle of John Stuart Mill in one part of the Bill; it is right and proper you should accept it in another. And having regard to the relief to the poor owners, the very slight loss which the Corporation would incur; and the avoidance of the demoralization which also would be the necessary result, I trust that there will be a unanimous vote with regard to this matter."

The Hon'ble MR. OLDHAM said:—"I am sorry I must oppose this amendment. In the Select Committee a note of discord was raised as to this matter. Ever since I have been in the Corporation I have had to play the part of the stony-hearted Commissioner and to remonstrate again and again against other people's money being given away for private charitable institutions. I remember this question being discussed in Select Committee, and the proposal was strongly opposed not only by myself, but by Babu Narendra Nath Sen, on the ground that if people choose to live under this Corporation, and to obtain certain services from the city, they should pay for them, and if they do not wish to pay for these services they should go elsewhere. Although I fully appreciate the argument on which the hon'ble mover of the amendment lays most stress, that the striking off of these people's names will greatly simplify the work of the Corporation, and also relieve them from the Municipal underlings, I would also point out that such a section of the community would be stamped as paupers and as people who receive charity, and that the effect of the amendment would be an invitation to people of this class to come to Calcutta."

The Hon'ble MR. BAKER said:—"I think, Sir, the exemption from house-tax of buildings assessed below a certain sum stands on exactly the same footing as the exemption of incomes below a certain figure from income-tax, and I never heard that people who are exempt from income-tax are regarded as being pauperised by that exemption. I am in entire sympathy with the mover of the amendment. I think there is a very large class of poor people in Calcutta who have great difficulty in paying their rates, and it would be a great relief to these people if some measure of this kind should be accepted. We have provided in this amendment ample safeguards against the possible abuse of the power. The Corporation has to fix a limit, and they have to pass a resolution; the resolution has to be confirmed by Government, and there is also a proviso, that the exemption is not to apply to people who own more than one piece of land or more than one building, and in whose case the aggregate value of such buildings exceeds the particular limit. I think with those safeguards there is very little danger of such a provision being abused."

The Hon'ble MR APCAR said:—"I also support this amendment. As it now has worked, many are exempt by special order, and they are not compelled to pay because of their poverty, and as the Hon'ble Member in charge of the Bill has said, there are ample safeguards, which would be sufficient to obviate any abuse of the power that is here given. Those poor who happen to live here in Calcutta are here under circumstances which made it necessary for them, I suppose, to live within the jurisdiction of the Corporation. In the Suburbs before the amalgamation they were only paying $7\frac{1}{2}$ per cent. Now they have to pay $19\frac{1}{2}$ per cent., and it may be they will yet have to pay 23 per cent. I think it is a very hard measure to regard it in such a stern light as the Hon'ble Mr. Oldham has, and to compel these poor people to strike their tents and move away. Where are they to go? They are living here among their relations and people and earning their livelihood. Are we to deprive them of their means of existence? I think I would leave them here to enable them to earn their living here. This measure is one which I think can be very well afforded in all circumstances by the Corporation."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"I should like to say a word or two in reply to the remarks of the Hon'ble Mr. Oldham. I fully appreciate his motives, namely, to safeguard the financial interests of the Corporation, and of course those motives must be exceedingly strong now, having regard to the fact that he stands alone as the champion of the financial interest of the Corporation, having been deserted by a large number of his colleagues, and I strongly sympathise with him. I desire to point out that in the mufassal we have exactly the same law, namely, that although there the people receive the services which it is in the power of the Municipality to render, the Municipality has got the power under the Act to exempt persons entirely from the payment of the rate—a benefit which is enjoyed by the poor in the mufassal towns."

The Hon'ble MR. OLDHAM said :—"As individuals, not as a class."

The Hon'ble BABU SURENDRANATH BANERJEE said :—"I think it should be as a class rather than as individuals. As regards an individual, personal feeling may come into operation. I think, Sir, ours is a better system than the law which prevails in the mufassal, and I hope and trust, when the mufassal law comes to be revised, it will be revised upon the lines of the amendment which I have just laid before the Council. I trust that even the note of discord which the Hon'ble Mr. Oldham has raised in this matter will be withdrawn when the final vote upon this matter is taken."

The Hon'ble THE PRESIDENT said :—"I was under the impression that the mufassal municipalities did authorise 'general exemption,' but I find on referring to the law that the Hon'ble Mr. Oldham is right, and that power is only given to Commissioners to exempt in individual cases. However, I am very pleased to express my entire concurrence in the proposal of the Hon'ble Babu Surendranath Banerjee. I speak here personally. I do not wish to influence in any way the votes of the Council."

The motion was then put and agreed to.

SECTION 171.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the words "or before" after the words "payable on" in line 4 of section 149 (*now* 171) be omitted.

He said :—"The section as I propose to amend it, will read as follows :—

'One-half of the consolidated rate shall be payable by the owners of the buildings and lands, and the other half by the occupiers thereof; and each such instalment shall be payable on the fifteenth day of April, the fifteenth day of July, the fifteenth day of October, and the fifteenth day of January for the quarters respectively commencing on the first day of each of those months.'

"The words as they stand in the section are 'shall be payable on or before the 15th April.' I think you ought to give a precise date. You ought to say payable on such a date, and not 'on or before.' It seems to me that that is a more precise form of expression, and then I am to point out to the Council that that is the present law. In the existing law we have not got the words 'payable on or before,' but 'payable on 15th day of April.' I confess it is a very small matter, but, as we are legislating, it is as well that we should be precise."

The Hon'ble MR. BAKER said :—"In the present Act the words are 'payable on the first day of each quarter,' not 'on the 15th day of each quarter.' I am very much surprised at this amendment. In the original Bill the words were 'shall be paid on the 15th day of April,' and I think it was at the instance of the Hon'ble Member himself that it was changed to 'payable on or before.'"

The Hon'ble BABU SURENDRANATH BANERJEE said :—"But it is a precise date."

The Hon'ble MR. BAKER said :—"Yes; on the first day of each quarter."

The Hon'ble BABU SURENDRANATH BANERJEE said :—"The date is immaterial, but it must be a precise date."

The Hon'ble MR. BAKER said :—"It is quite precise. You could not have it payable on or before the first day of the quarter."

The Hon'ble MR. APCAR said :—"I think if a person is willing to pay before the 15th day of April, he ought to be encouraged."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"If the Hon'ble Member in charge of the Bill has any serious objection, I do not want to press this amendment."

The motion was then, by leave of the Council, withdrawn.

SECTION 172.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that section 150 (*now* 172) be omitted.

He said:—"I have explained my position with reference to this section in the course of my speech upon the first amendment* which I had the honour to move this morning in connection with section 148A (*now* 151). I do not think it necessary to repeat those arguments. My contention is that it would be better to leave this matter to be settled by the contracting parties. The section says:—

'If the annual value of any building or land, as determined under this Chapter, exceed in any case the amount of rent payable to the owner, the owner may in such case recover from the person who pays him rent the difference between the sum assessed upon him as the owner's share of the consolidated rate and the sum at which he would have been assessed had the building or land been valued only at the amount of rent actually payable to him, and such difference shall be added to the rent and shall be recoverable by the owner from the person liable for the payment of the rent.'

"The Council could not have failed to observe that the assessment to which this section is applied is based upon the fictitious principle that the tenant holds under a lease from year to year. As a matter of fact we have often to deal with landlords and tenants when there is not a lease from year to year but a lease for a longer period; this necessarily affects the rent, which may, further, be affected by the amount of the premium paid. If so, it is not necessary, I venture to think, that the Legislature should interfere between them and lay it down as an absolute and inflexible rule of law that, whenever an arbitrary assessment, made in accordance with the provisions of this Act, does not agree with the actual rental, the owner should be placed in a position of advantage to which he may not always be entitled. Section 150 (*now* 172) is based upon the presumption that whenever the assessment for municipal purposes exceeds the actual rent, the rent assessed is the fair rent. As I have already explained, there is no foundation for this assumption. I venture to think that, whatever we may do for the purposes of municipal assessment, we need not trouble ourselves about the relation between landlords and tenants. They may well be left to settle that matter between themselves."

The Hon'ble MR. BAKER said:—"I need not say very much in reply to the remarks that have been made by the hon'ble mover of the amendment. The principle of the assessment clauses of the Bill is that we are to have regard to the annual value of the holding as determined under the Bill. If the actual rental differs by being either above or below the determined annual value, it is ignored altogether. This section gives effect to that principle. I think, as we have accepted that principle in the main sections of the Bill, we are bound to follow it now. The Hon'ble Member in speaking on the original amendment instanced the case of a man who leased a house, and received a large premium and a very small rental. That is clearly the case in which this section would apply, and I think it ought to apply. There is no reason in a case like that why the owner should be saddled with the whole of the rates which would have been payable by him had he received the consideration for the house in the form of a rent only, and not rent *plus* premium."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"The present section is the existing law, and I do not know that any complaint has ever been made as to the operation of this law, and it seems to me, whatever might be the view a lawyer might take, the law is perfectly fair and equitable. The principle laid down is a principle which commends itself to me as fair and legitimate. The existing law has not been attended with any hardship; it has worked well, and I have the Vice-Chairman's authority for it. In these circumstances it seems to me that the section ought to be allowed to remain as it is."

* Printed *supra*, p. 264.

The Hon'ble BABU BOIKANTA NATH SEN said:—"I think the present section ought to be maintained. The particular shares of the cesses payable by tenure-holders and raiyats to zamindars are all clearly defined. It has not been left to the law of contract being applied for a rateable contribution. By analogy, therefore, I think the section ought to be allowed to stand as it is."

The Hon'ble BABU JATRA MOHAN SEN said:—"I think the section ought not to be disturbed. In cases of excess assessment, power has been given to the owner to realize it from the tenant, but in case of under assessment no corresponding power seems to have been given to the tenant to have this tax reduced. I would urge, therefore, that the contractual relations between landlord and tenant should not be disturbed."

The Hon'ble RAJA RANAJIT SINHA BAHADUR, OF NASHIPUR, said:—"I oppose this amendment. If this section be omitted, it will be hard upon owners, as they will have to pay the extra tax from their own pockets, which is not fair."

The motion was then put and lost.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA also moved that in section 150 (*now* 172), line 11, after "recoverable" the words "as rent" be inserted.

He said:—"This is a very small matter. My object is to place this section on the same footing as section 162 (*now* 183), which provides as follows:—

"Every owner who is entitled under section 158 (*now* 179) or section 161 (*now* 182) to recover any sum from the occupier of any building or of any portion thereof, or from the owner of any hut or masonry building in a bustee, shall have, for the recovery of such sum, all remedies, powers, rights and authorities which he has for the recovery of rent."

"If the section is amended as I suggest, then no question can arise as to the Court which will have jurisdiction over suits for the recovery of the sums specified in this section."

The Hon'ble MR. BAKER said:—"I do not see any particular objection to this. At first I was disposed to think that if the owner had any other right of recovery, other than in the form of rent, it would be unreasonable to take it away; but on consideration I am disposed to think that is not the intention of the section. It was all along intended that he should recover it as rent, and not in any other form."

The motion was put and agreed to.

SECTION 175.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 152A (*now* 175) all the words from "and" in line 5 to the end be omitted.

He said:—"I suggest the omission of the following words from section 152A: 'and such period shall be calculated from the date on which such notice is delivered at the municipal office.'

"I wish to point out that, if these words are allowed to stand, section 152A (*now* 175) becomes inconsistent with section 151 (*now* 173), which provides as follows:—

"When any building or land whereon the consolidated rate is assessed has remained unoccupied and unproductive of rent for a period of sixty or more consecutive days during any year, the person liable to pay the owner's share of the consolidated rate shall, if written notice of the facts be given to the Chairman, be liable to pay only one-fourth of the consolidated rate due on account of such period; and, if more than one-fourth of the consolidated rate has been paid in advance, the surplus shall, on demand, be refunded."

"This is followed by section 152A (*now* 175), which says that the owner would be entitled to the benefit of the section only from the date when he served a notice on the Corporation. To illustrate how this will work, let me put a concrete case. A house is vacant for 62 days; the owner is entitled to a reduction of the rates from the date of the vacancy, provided he serves a notice on the Corporation on that date. But, if the house had been vacant for

less than 60 days, he would not have been entitled to any reduction at all. In other words, you require the owner to give notice before the expiry of the 60 days, though he may never become entitled to the benefit of the section. This seems to me to be wholly unnecessary: for ordinary purposes, it ought to be sufficient if notice is given at any time during the vacancy."

The Hon'ble MR. BAKER said:—"This section reproduces the existing law. It was not an oversight. It was the intention of the framers of the original Bill and of the Select Committee to follow the existing practice, and the object of these words is to prevent an *ex post facto* application for remission."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I do not think that any case has been made out for a change in the law. It is the existing law, it has worked well, and I do not think there is any necessity for changing it."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, in reply, said:—"I regret I cannot make myself intelligible either to the Hon'ble Member in charge of the Bill or the Hon'ble Babu Surendranath Banerjee; but sections 151 and 152A (*now* 173 and 175) seem to be absolutely inconsistent, because you say that, as soon as the house has been vacant for one day, the owner must give notice, although there may be a vacancy for less than 60 days, and he may never become entitled to the reduction with a view to which he admittedly gives notice. He notifies to the Corporation the fact of the vacancy, avowedly for the purpose of getting a reduction in the rates, but till there has been a vacancy for 60 days he himself does not know whether he is or is not entitled to such reduction. When an argument is unanswerable, the easiest way to escape is to pin one's faith to the existing law, which, I take it, is an emblem of perfection."

The motion was then put and lost.

NEW SECTION.

The Hon'ble RAJA RANAJIT SINHA BAHADUR, OF NASHIPUR, moved that the following section be inserted after section 152A (*now* 175):—

"152B. For the purposes of sections 151 and 152 neither the presence of a caretaker nor the mere retention in an otherwise unoccupied dwelling-house of the furniture habitually used in it shall constitute occupation of the house."

He said:—"The section which I now propose to be inserted was in the original Bill. It was struck out by the Select Committee on the ground that it would involve a loss to the municipality. Sir, we should consider what is just and unjust. Calcutta is the metropolis of India, and so men living in different parts of the empire have to come here occasionally, and especially during the winter, when it becomes the seat of the Government, and many of them have to keep furnished houses here which are not occupied even for a month during the whole year. So the mere presence of a durwan or a caretaker or mere retention of some articles of furniture should not be deemed to constitute occupation when there is no occupation at all. I hope the Council will accept my amendment."

The Hon'ble MR. BAKER said:—"I desire to support this amendment. It was in the original Bill, as the Hon'ble Raja has pointed out. It is taken from section 64, clause (4), of the Punjab Municipal Act, and it seems to me entirely consistent with equity. It affects chiefly the case of the occupier. As the Hon'ble Raja has pointed out, when the occupier is absent from his house for any reason, it is impossible for him to get any benefit from the various services rendered by the Municipality. He can make no use of the water-supply; he can make no use of the lighting or of the roads. It seems to me to be entirely unjust that occupier's rates should be charged in a case like that, and the mere fact that he has a caretaker or a durwan, and that he leaves his furniture there, seems to me not to be any justification for levying these rates. The caretaker uses an inconsiderable quantity of water, and at all events he cannot utilise the municipal services to anything approaching the same degree as the occupier would utilise them if he was himself present."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I should have rejoiced if I could have found it possible to support the amendment of my hon'ble friend Raja Ranajit Sinha. I presume the Hon'ble Member in charge of the Bill, in making the speech to which we have listened, has spoken on his own personal behalf and not on behalf of the Select Committee; because the Select Committee distinctly recommended that this clause, which found a place in the original Bill, should be withdrawn, and by a vote of the majority it was withdrawn. We gave the matter our anxious consideration, and we all came to the deliberate conclusion that the Simla people who come here and who are birds of passage—I do not mean to speak disrespectfully—ought to contribute their share to the municipal taxes of Calcutta. The Hon'ble Member in charge of the Bill has remarked that when an occupier is away he cannot enjoy municipal benefits, and therefore it is not right that he should be called upon to make any contribution to the municipal funds. I am delighted to find the Hon'ble Member in such deep sympathy with occupiers. Hitherto his sympathy has been with the Municipality; now my friend sympathises with the occupiers of houses. I ask him to look at the matter from the Corporation's point of view. If the occupier was pleased to leave the house altogether, some other occupier would take it and the municipal rates would be paid. I think it is from that point of view that the Council ought to look at a matter like this. The question is not whether the occupier reaps the benefits of municipal services, but whether he ought to be permitted to deprive the Corporation of taxes which the Corporation might have received if he did not stand in the way. He stands in the way, he prevents another person from occupying that house, and surely he ought to make good to the Corporation the taxes which the Corporation would otherwise have received. This very question was discussed in this Council in connection with the mufassal Municipal Bill, and I am perfectly certain the authority of Mr. Herbert Reynolds would be regarded as of great weight by Members of this Council. I desire to read an extract from a speech which he made in this connection, and I want to point out to my hon'ble friend the Member in charge of the Bill this further fact that, as he is so fond of quoting English precedents in support of his views, he will find that English precedents entirely support my view. This is what Mr. Reynolds said:—

'He would take this opportunity of mentioning that a representation had been made by the Deputy Commissioner of Darjeeling with reference to the necessity for a definition of a vacant holding. The Deputy Commissioner said it was a common thing for an unoccupied house in Darjeeling to be kept more or less furnished, and to be left in charge of a chaukidar or caretaker, and it was a question whether, as long as the owner received no rent, the holding should be treated as a vacant holding. Mr. Reynolds did not think that the holding should, under such circumstances, be considered a vacant holding, and he had not therefore brought forward any proposal for defining a vacant holding.'

"Then Mr. Collier, from whose book I quote, goes on to say:—

'The law is clear that a holding under the circumstances stated cannot be held to be vacant; and has been thus stated. Lush J., says (*Reg. v. St. Pancras*, 2 Q.B.D. 581): "The owner of a vacant house is in possession, and may maintain trespass against any one who invades it; but so long as he leaves it vacant, he is not rateable for it as an occupier. If, however, he furnishes it, and keeps it ready for habitation whenever he pleases to go to it, he is an occupier though he may not reside in it one day in the year." If the owner did not keep the furniture in the house he would have to keep it somewhere else, and he may, therefore, be regarded as making use of the house, at least as a warehouse for the furniture. Slight as such user may be, it is enough when added to legal possession to constitute occupation.'

"The provision which finds a place in this Bill is thus in entire conformity with the English law. It is in entire conformity with the mufassal law, and it seems to be in conformity with the principles of justice. It is only right and proper that the municipal funds should not in any way suffer. If the house was not furnished, although the person who furnished it might be away, somebody else would take the house. Somebody else is not permitted to contribute to the municipal funds by reason of the action of this occupier. Therefore I think, Sir, the person who has furnished the house ought to pay, and the municipal taxes ought not to suffer in consequence of his action in this matter. That seems to me to be the plain view of the matter."

The Hon'ble THE PRESIDENT said:—"I should like to ask the Hon'ble Babu Surendranath Banerjee a question on which he may be able to enlighten not only me but the rest of the Council. It seems to me that the practical question in this matter is whether, when an occupier leaves his house unoccupied by himself for a large part of the year, the number of such houses is sufficiently large to enable the Municipality to reduce its establishment in any kind of way. It is quite true, as the Hon'ble Member in charge of the Bill has said, that the occupier of the house, so long as he is not in personal occupation, does not use the municipal services as he would do if he were present, and it is also true that, if he let his house to somebody else, that person would use those services and would pay for them. What I should like to get from the Hon'ble Babu Surendranath Banerjee's personal knowledge of the matter is whether the number of such unoccupied houses is sufficiently large to enable the Municipality at any season of the year to reduce the establishment which fulfils those services for these unoccupied houses."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"No, Sir, I do not think we can reduce the establishment."

The Hon'ble MR. BOLTON said:—"I agree with the Hon'ble Babu Surendranath Banerjee in opposing this amendment. A tenant who retains a house throughout the year in Calcutta, although ordinarily residing elsewhere, does so to suit his own purpose. He needs it for occupation during a portion of the year or occasional visits. If it were not in his possession, another tenant would occupy it and pay the municipal taxes. It is right, therefore, that no portion of the taxes for the year should be remitted. Moreover, the landlord receives the rent, and should pay his portion of the taxes; but the amendment would exempt him also."

The Hon'ble Mr. OLDHAM said:—"I, too, like every member of the Corporation, am in complete accord with what my hon'ble friend, the Hon'ble Babu Surendranath Banerjee, has said; and, as regards the question asked by Your Honour, not only can there be no reduction of the Municipal establishment in the case of these houses, but there is a very great chance of the municipal water being wasted because of the absence of the proper occupant of the house, the house being left to the servants."

The Hon'ble MR. MACKENZIE said:—"I should like to ask whether it is not the fact that when a house is unoccupied the water-supply is actually cut off. I think I am right in saying it is cut off."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"If the rates are paid, it is not cut off."

The motion being then put, the Council divided as follows:—

Ayes 4.	*Noes 13.*
The Hon'ble Raja Bahadur Ranajit Sinha, of Nashipur.	The Hon'ble Mr. Buckley.
The Hon'ble Mr. Mackenzie.	The Hon'ble Mr. Buckland.
The Hon'ble Sahibzada Mahomed Bakhtyar Shah.	The Hon'ble Mr. Handley.
The Hon'ble Mr. Baker.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
	The Hon'ble Babu Boikanta Nath Sen.
	The Hon'ble Babu Surendranath Banerjee.
	The Hon'ble Mr. Apcar.
	The Hon'ble Dr. Asutosh Mukhopadhyaya.
	The Hon'ble Mr. Spink.
	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
	The Hon'ble Mr. Oldham.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

The Hon'ble Babu Jatra Mohan Sen did not vote.

So the amendment was lost.

SECTION 179.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that to section 158 (*now* 179) the following be added:—

"Where such occupiers pay rent to the owner, the amount of rent paid by each shall ordinarily be the measure of the value of the portion of the building in his occupation."

He said :—" Section 158 (*now* 179) says :—

'When the entire rate is paid by the owner of any building under section 157 (*now* 178), such owner may, if there be but one occupier of the building, recover from such occupier half of the rate so paid by him, and may, if there be more than one occupier, recover from each occupier half of such sum as bears to the entire amount of rate so paid by the owner the same proportion as the value of the portion of the building in the occupation of such occupier bears to the entire value of such building.'

"To illustrate this, let us take a case in which a landlord has a house which he lets to several tenants. There are four tenants, and the landlord pays the entire rate. He is entitled to get the occupier's share of the rate from these four tenants, and the question arises how this is to be apportioned amongst them. The law provides that the apportionment is to depend upon the value of the building in the occupation of each tenant. The calculation of the value of the portion of the building in the occupation of each tenant may sometimes give rise to difficult questions; we may avoid this by recourse to the presumption that, when such occupiers pay rent to the owner, the amount of rent paid by each shall ordinarily be the measure of the value of the portion of the building in his occupation. I do not think there can be any dispute that the amount of rent paid by a tenant is ordinarily the measure of the value of the portion of the holding in his occupation. A man may be in occupation of two rooms, paying Rs. 8 a month, and another tenant may have one room, paying Rs. 6 a month, there being a difference in the situation of the rooms. We might ordinarily say that the measure of the value of the rooms in the possession of the one is Rs. 8, and the measure of the value of the other is Rs. 6. No doubt it may so happen, to take an extreme case, that a landlord may have allowed a relation of his to be in occupation of a room at a merely nominal rent. In that case the amount paid may not perhaps be the measure of the value of the room in his occupation; but I take it that ordinarily, if there is an actual tenancy and rent is paid, the amount of rent paid by the tenant may be taken to represent the value of the holding in his possession; the insertion of the word 'ordinarily' will amply meet any exceptional cases."

The Hon'ble MR. BAKER said :—"It seems to me, Sir, that with the addition of the word 'ordinarily' this amendment becomes entirely superfluous, because it is quite true, as the Hon'ble Member has pointed out, that the rent paid by any one of these occupiers is ordinarily the measure of the value of the portion of the building which he occupies. Therefore, those words add nothing to the meaning of the section as it stands. But there are exceptional cases, and the Hon'ble Member has instanced one where the owner of a house may allow a poor relative to occupy part of the house paying either no rent or a pepper-corn rent, and in that case it is not equitable that the other tenants should pay higher rates on account of that private arrangement between the owner and his favoured tenant. In that special case the section is limited by the amendment and makes no provision for determining how the respective portions are to be ascertained. This section simply reproduces the existing law, and so far as I know it has never given rise to trouble, and I think it ought to be maintained. I would further point out that the whole of the assessment sections of the Bill proceed on the basis of the ascertained annual value, and not on the basis of actual rent. Therefore, I think in this case also we should adhere to that principle and not have regard to the actual rent."

The motion was then put and lost.

SECTIONS 180 AND 181.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA also moved that in section 159 (*now* 180), sub-section (*2*), all the words beginning with "and" in line 6 be omitted.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA also moved that section 160 (*now* 181) be omitted.

He said :—"These two amendments are closely connected and may conveniently be discussed together.

"Section 159 (*now* 180) says :—

(*1*) Notwithstanding anything contained in section 149 (*now* 171), the entire consolidated rate leviable upon—

(*a*) bustee land,

(*b*) huts situated on bustee land, and

(c) any masonry building situated in a bustee on land which is not held on a lease for a term exceeding ten years,

shall, after deducting therefrom a sum equal to one-eighth of such rate, be paid by the owner of such land.

(2) The sum so deducted shall be retained by the owner of the land as a set off against the expenses which may be incurred in collecting the portion of the rate recoverable under section 161 (*now* 182) from the owners of huts or such masonry buildings as aforesaid, and as a commutation of all refunds in respect of huts or such masonry buildings as aforesaid which are vacant or which may be removed or destroyed during the continuance of the period for which the rate is leviable.'

"Section 160 (*now* 181) provides as follows:—

'The consolidated rate shall not be payable on account of any new huts built or any huts enlarged on bustee land during the year for which the valuation remains in force under proviso (c) to section 148B [*now* proviso (b) to section 152]."

"You will readily observe that the last clause of section 159 (*now* 180) is intended in a manner to compensate section 160 (*now* 181) This would be strictly so if in a bustee belonging to one owner during a portion of the year there were some huts vacant and in another portion of the year new huts were built. But, suppose that one bustee owner gets the advantage of sub-section (2) of section 159 (*now* 180) and another gets the benefit of section 160 (*now* 181), where is the compensation? Because one person builds some huts for which he has not to pay, there is no justification whatever why another man whose huts are vacant should be made to pay. To use a homely expression, I would say it was robbing Peter to pay Paul. I venture to think that in the last clause of section 159 (*now* 180), sub-section (2) all the words beginning with 'and' in line 6 and section 160 (*now* 181) should both be omitted. If huts are vacant, and if a bustee owner applies for a reduction, or if new huts are built, and it comes to the knowledge of the Municipality, the Municipality would be entitled to re-assess in either case.

"The strongest argument against my amendments is an appeal to the existing law. I know, Sir, this is the existing law, but we have destroyed the existing law in so many particulars that I do not think I should hesitate to change it in this respect also."

The Hon'ble Mr. Baker said:—"The Hon'ble Member will have to show, I think, that the existing law has worked badly in this particular before the Council can be expected to alter it, and I have never heard of any complaint as to this particular provision. The effect of the amendments would be that the Municipality would be obliged to assess all new huts as soon as they were built in a bustee, and that would be a matter of extreme inconvenience. These huts are temporary structures. They are the property of the tenants and not of the bustee owner, and they are able to be put up quickly, and they may be removed within a month. It would be a matter of extreme difficulty to get all these assessed at once, and it is a much more convenient arrangement that the assessment should be for a whole year, leaving any changes that may take place within the year unadjusted."

The Hon'ble Babu Surendranath Banerjee said:—"I entirely agree with what the Hon'ble Member in charge of the Bill has said. The practical difficulty will be serious in the way of giving effect to my hon'ble friend's amendments. There are constant changes in these huts; people are coming and going, and all those applications would be have to be submitted to the Corporation. I do not think it would be possible to carry out my Hon'ble friend's suggestion. And then, Sir, we have got this safeguard: huts are assessed once a year, so that whatever vacancies occurred they would come to light in the course of the year, and it strikes me that the practical difficulties are so serious that it would be impossible to carry out my friend's suggestion."

The motions were then put and lost.

SECTION 180.

The Hon'ble BABU SURENDRANATH BANERJEE moved that for section 159 (*now* 180) the following be substituted:—

"One-half of the entire consolidated rate imposed upon bustee land and the huts built thereon shall be paid by the occupiers thereof, and the other half by the owners; and the other provisions of this Act as to the payment and recovery of the consolidated rate shall apply to such bustee land and huts;"

and that sections 160 to 162A be omitted.

He said:—"My object is to restore the law such as the law was in 1876. If I can show that the anticipations formed under the law of 1888 have not been fulfilled, and that the law as amended by the Act of 1888 has been attended with serious financial loss to the Corporation, I think, Sir, I shall be entitled to ask this Council to reconsider the judgment which it passed upon this matter in 1888. The two grounds which were urged on that occasion in justification of this change of the law are these. In the first place, the ground of administrative convenience was urged. In the second place, it was stated that it was desirable to keep away the municipal underlings from the poor people who inhabited bustees. Both those grounds deserve consideration.

"I desire to state, in the first place, that administrative convenience is not to be confounded with administrative efficiency. I am free to admit that it is certainly more convenient to draw up 7,000 bills in place of the 70,000 bills which had to be made under the law of 1876. Under the law of 1888 you make only 7,000 bills addressed to the bustee-owners. Under the law of 1876 you had to make 70,000 bills, not addressed to bustee-owners, but to the occupants of those bustees. I am free to admit, as I have already remarked, that, as far as the ground of administrative convenience is concerned, there is much to be said in support of the law of 1888; but, Sir, I hold that administrative convenience in this matter has been attended with serious loss to municipal revenue, and, if I make good that ground, I think I shall have established my case.

"After all, Sir, finance is the touchstone of all administration. If we find that in consequence of any law the receipts in respect of any matter have fallen off, we are bound to change that law; and I think I shall be able to demonstrate almost with mathematical precision that, in consequence of the enactment of this provision in the law of 1888, there has been serious financial loss—a serious diminution of the revenue, unrealizable from bustees. I beg to refer you to a discussion which took place at a meeting of the Bill Committee. The Bill Committee say in a report which they have addressed to this Government:—

'The Corporation has on an average paid to the owners of bustee lands about ¾ths of a lakh of rupees every year for the last nine years by way of compensation.'

"That is to say, the landlords collect the rates from the hut-owners, and they get 12 per cent. as a charge for such collection, and this part of the statement refers to that collection. At the same time, the collection of the rate which, before the Act of 1888, was upwards of 90 per cent. of the gross annual demand, without the employment of any coercion, has since then never reached 85 per cent. That this falling off is to a great extent due to the change of law in regard to the payment of bustee-rate bills will be amply borne out by the statement of collections set forth in the Proceedings of the 14th Meeting of this Committee. That statement shows that while owners of house-property have, since 1890-91, paid on an average nearly 90 per cent. of their due without any coercion, the average collection of bustee consolidated rate has not exceeded 72·55 per cent., and that while the percentage in the former case, shown by the Joint-Collector, was never less than 90·97 during the last six years, and in one of these years was so high as 93·3, the percentage in the latter case within the same period was never higher than 74·72, and in the year just expired was so low as only 61·85. Before the Act of 1888 the collection of bustee rates was 90 per cent. of the gross annual demand without recourse to my process of coercion. Since the enactment of the law of 1888 it has fallen below 90 per cent., and has never reached 85 per cent.

"I was a member of the Bill Committee, and I attended every meeting of the Committee. We called the Joint-Collector and the Collector to be present at a

meeting of the Committee when this matter was discussed, and we recorded what they said, and we placed on the record also a very important statement which was submitted by the Joint-Collector. I will read an extract from the proceedings of the Committee. Mr. O. C. Dutt said:—

'He could give no information as to the falling off since the passing of Act II of 1888 in the collections from bustee tenants, because separate accounts were not kept of rates paid by tenants and owners prior to 1889, respectively. They were all included under the head of "house-rate." The percentage of collections before the amalgamation was higher than after it. There were no separate figures, and, therefore, it was impossible for him to give details. Before the amalgamation the highest percentage of collections of the house-rate was 92 per cent.; after the amalgamation it fell to 85, and that was principally due to the non-realisation of bustee bills. The Act of 1876 afforded greater facilities for the realization of bustee rates.'

"That is the evidence of the Collector, but the evidence of the Joint-Collector, who, I believe, has to deal with a larger number of bustees, is even more conclusive. Let me read to you the evidence and the figures which were adduced by the Joint-Collector. The Joint-Collector (Babu Aughore Nath Mukerjee) said that the collections from bustees had fallen off very much from what it used to be under the old system. Under the former law he collected from 88 to 90 per cent. of bustee bills. I shall ask the indulgence of the Council to allow me to read some of these figures, because they forcibly illustrate the point which I am endeavouring to lay before the Council, namely, that the municipal revenue has suffered distinctly by reason of the change of the law of 1876 and the substitution of the provisions which I beg to challenge. In 1890-91 the owner's share as collected by the Collector was 87·54 of the entire collections and the occupier's share was 83·81 per cent. What was the share realized from the bustee people? Eighty-seven per cent. is the percentage of the owner's share, 83 the percentage of the occupier's share; the percentage represented by the realization of the bustee bills came up to 74 per cent. And, Sir, you find this all along year after year. Let me read the figures in the statement:—

Percentage of collections, owner's and occupier's share and bustee land, from the year 1890-91 to 1897-98.

Year.	Nature of rate.	Collector.	Joint-Collector.
1	2	3	4
1890-91 ...	Owner's share ...	87·54	76·96
	Occupier's share ...	83·81	77·20
	Bustee land ...	74·38	62·65
1891-92 ...	Owner's share ...	89·25	79·38
	Occupier's share ...	86·37	80·53
	Bustee land ...	78·40	64·62
1892-93 ...	Owner's share ...	91·60	90·97
	Occupier's share ...	89·83	89·61
	Bustee land ...	79·56	74·72
1893-94 ...	Owner's share ...	91·58	92·79
	Occupier's share ...	89·50	77·42
	Bustee land ...	77·71	70·83
1894-95 ...	Owner's share ...	91·58	92·65
	Occupier's share ...	89·83	86·61
	Bustee land ...	77·82	68·55
1895-96 ...	Owner's share ..	91·58	93·30
	Occupier's share ...	89·56	88·12
	Bustee land ...	79·30	68·58
1896-97 ...	Owner's share ...	92·36	92·99
	Occupier's share ...	90·48	87·99
	Bustee land ...	80·78	63·95
1897-98 ...	Owner's share ...	91·06	91·80
	Occupier's share ...	88·41	91·69
	Bustee land ...	77·15	61·85

"I find Babu Preo Nath Mullick making the following observations in the course of the discussion which took place, and I think it is as well that I should lay them before the Council—

'Babu Preo Nath Mullick remarked that when the new procedure was instituted a memorial was submitted to Government for its reconsideration, and praying that the Bill might be vetoed. That prayer was not acceded to on the ground that the result of the working of the law should be seen. Another application was made four years subsequently, and the reply was that it would be considered with any future proposals for the amendment of the law.'

"Your Honour was pleased to intimate yesterday your approval of the appointment of a Commission to enquire into the question of the assessment of residential houses. I think, Sir, it would not be out of place to extend that enquiry somewhat and include this particular matter to which I have called Your Honour's attention. The people feel a grievance in this respect, the landlords feel a grievance, the tenants feel a grievance; and as I go on, Sir, I hope to be able to point out that the present law is unjust to the landlord and the tenant alike. That being the case, it is right and proper that the Commission should extend its investigation to this particular matter in regard to which there is a serious grievance.

"Let me now approach the consideration of the second ground on which the change of the law was justified in 1888. It was then said that it was desirable to keep the municipal underlings away from the poor people who inhabit the bustees. As a matter of fact, have you succeeded in completely keeping away the municipal underlings from the poor residents of bustees? Even in regard to bustee rate bills, when you are not able to realize them, as you are not able to realize them in the case of minors or of zanana ladies, or of landlords who do not live in town but in the mufassal—in the case of these persons you send your peons with a distress warrant to realize your dues from the inhabitants of these bustees. Therefore you have not been able completely to keep out the municipal underlings from the poor people who inhabit these bustees. Nay, more, you have substituted a worse class of people than the municipal underlings, who are at any rate responsible to somebody. You have substituted unscrupulous agents, in some cases the unscrupulous agents of the unscrupulous zamindar in the place of the responsible agents of the Municipality. The License Officer's peons visit the poor people in the bustees; the Health Officer's peons, the conservancy peons—they all pay their daily visits and pocket their daily perquisites. Do you seriously aggravate the situation if you send one more peon to pay his visit? I have already observed that the law involves injustice to the tenant, injustice to the landlord; and I may say—and it is one of the strongest grounds upon which I put my case—that it involves injustice to the tenants in this way: that unscrupulous landlords and their still more unscrupulous agents sometimes realize from the tenants a great deal more than the dues of the tenants. The tenants do not know what they have to pay. They have little conception of their liabilities, and the result is that these unscrupulous agents approach them and extort from them as much money as they can. Therefore, looking at the matter from this point of view, the Council is bound to hold that the law involves a great injustice to a class of people who ought to be protected by the Government against all acts of injustice and oppression.

"I venture to think it also involves a grave injustice to the landlord. In many cases the tenants will not pay their dues. The landlords have to pay their dues in advance, and these dues are not all realized from the tenants.

"Therefore, Sir, looking at the matter from the point of view of the great injustice that is done to the landlords and tenants alike, looking at the matter from the point of view of the loss to the municipal revenues, it seems to me that a strong case has been made out for the modification of the law upon the lines of the old law of 1876. I await with some anxiety the decision of the Council on this matter."

The Hon'ble MR. APCAR said:—"I wish to ask the Hon'ble Member what his meaning is. Does he mean that the owner shall pay on the valuation of the hut as well as of the land? As the amendment runs it seems to me that what is asked for is that half of the entire consolidated rate imposed on bustee land and on the hut shall be paid by the owner. The hut does not belong to the owner of the land."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"Under the Bill half the consolidated rate has to be paid by the owner and the other half by the occupier."

The Hon'ble MR. BAKER said:—"I am opposed to this amendment, and I hope to be able to convince the Council, and perhaps even the Hon'ble Member, that the course followed by the Select Committee was an eminently fair, safe and reasonable one.

"To show the grounds on which the arrangement in the present Act was supported, I will read the Council the following extract of paragraphs 46—50 from a memorandum recorded by Sir Henry Harrison in 1890 on this subject:—

Former bustee system explained.

'46. The bustee tenure is one in which the landlord allows the tenant to build at his own expense a tiled hut on his land, and to pay him ground-rent for the use thereof. The tenant has no security of tenure, and can be turned out at a month's, if not a moment's notice. Under the old law in Calcutta the landlord had to pay the owner's rates on the land, which was assessed under one number. Each hut on it was separately assessed, the hut-owner paying the occupier's rate on the bit of land occupied by him and the owner's and occupier's rates on his hut. Thus, if a bustee had 20 huts on it and its number was 50, Beadon Street, the huts would be 50H. 1, 50H. 2 ....50 H. 20, there being in all 21 separate assessments. If in the middle of the year another hut was added, it would become 50H. 21, and the rental of the original number must be modified also. Thus the municipal staff had for this one plot of land this one number to collect 61 separate bills from 21 different persons, 60 of which were recovered direct from the hut-owners. In the Suburbs the case was worse, because there the hut-owners were compelled to pay for the ground-landlord as well, with a right of recovery of the amount from him! I have made careful enquiries, and cannot hear of a single case of such recovery.

'47. Under the new law a single assessment is made of the plot of land belonging to each landlord. To this is attached a schedule of all the huts on the land and of the valuation of each, that both landlord and tenant may know the precise sum recoverable by the former. From these valuations a deduction of 10 per cent. is allowed for repairs, and the landlord is allowed 2 annas in the rupee for collection expenses and other losses. The assessment now made holds good for the year, the landlord getting the benefit of new huts and having to pay the rates of any that are removed. At the end of the year either he or the Municipality may insist on a re-valuation, but, if neither do so, the old valuation may continue from year to year. A single bill is made out against the ground-landlord for each quarter.

New measure justified as a matter of public policy.

'48. The main object of this provision is administrative efficiency and the putting a restraint on the ill-treatment of a class little capable of defending themselves; and it is on this ground that I would most earnestly deprecate any reversion to the old system. At the same time I am quite prepared to defend it on the ground of equity also. It is well known that it has been introduced into England for the very same reason, where it has been the law since 1869. All rates in England, with very rare exceptions, are payable by the occupiers; but by 32 & 33 Vict., cap. 41, it was prescribed that whenever a holding was valued at less than £20 in the Metropolis, £13 in Liverpool, £10 in Birmingham or Manchester, or £8 in any other parish, the parish authorities might rate the *owners instead of the occupiers*, giving them an allowance of 15 per cent. The object of this is precisely the same as that of the present Act, *viz.*, to keep the collecting establishment of the Municipality away from the very poor and defenceless. If needed in England, it is needed ten times more in Calcutta, where this is the class habitually most oppressed and most silent under oppression. Under the old law the number of warrants issued in Calcutta annually was between 30,000 and 40,000, the great bulk of course in connection with these poorer rate-payers,—100 warrants a day, yet who heard anything of them! Under the new system a single warrant has been issued against a wealthy ground-landlord, who, with ample means, was openly defying the law, and the whole of Calcutta rings with the event, and a suit in the High Court is the result. Is any comment necessary on such a contrast?

'49. It may be said, however, that as the hut-owners will have to deal with the landlords' agents, they will be worse off than if they had to deal with the municipal

underlings; but this is an untenable objection. The hut-owners must, under any circumstances, be brought into contact with the ground-landlord's collecting sarkar. If he is unprincipled, he can worry the tenants in the collection of rent quite as much as in the collection of rates. Moreover, if the new law is retained, it may be anticipated with confidence that in a very short time the rates *will be included in the rent.* The landlord will say: "I will pay your rates; you pay me Re. 1-12 instead of Re. 1-8 a cottah ground-rent," as they frequently already do in the matter of tenanted houses. When this is brought about, the object of the new legislation will be fully attained. I have no doubt that, if the Government will only support this provision of the new Act, the benefits resulting from it, in a few years, will be most conspicuous. As a very experienced officer of the Corporation said to me the other day, you may almost close the Warrant Department.

'50. But it is urged that the provision is essentially unjust to the ground-landlord, and therefore, however beneficial the results may be, justice ought not to be sacrificed to them. And the distinction pointed out by Sir Charles Paul is approvingly quoted, that in England the owner is made liable for his own property, but in Calcutta he is made liable for the rates of the huts of which he is not the owner. I have the greatest possible respect for Sir Charles Paul's opinion, and he rendered most valuable assistance in carrying through the assessment clauses of the new Act; but in this instance I must be allowed to adhere to my own judgment. The bustee-owner is the sole and only proprietor of the holding. He has surrendered nothing of his proprietary rights—not even a six months' tenancy. To call the hut-owner who can be expelled at a moment's notice an owner, is surely a euphemism. He owns nothing but the bamboos and tiles of his hut. The ground-landlord invests no capital in the bustee (except perhaps for drainage), he risks nothing, he ventures nothing, and he appropriates all the profits of the municipal improvements! The value of bustee land since the bustees have been improved by the Corporation have had roads made through them, bathing-platforms erected in them, and their conservancy attended to, has gone up from 50 to 300 per cent. At a most moderate computation the ground-rents of bustees in Calcutta have increased by five lakhs annually during the last six or seven years. The landlords have literally grown rich in their sleep. And can they, forsooth, complain of injustice at the hands of the Corporation, because for the well-being of the community they are required, as in England, to advance the rates for poor tenants?'

But also perfectly equitable.

"Now, Sir, in so far as the reduction in clerical labour is concerned, Sir Henry Harrison's arguments are as valid and powerful to-day as they were ten years ago. The collector of municipal taxes reported to the Corporation last year that, if bustee rates were to be collected direct from the tenants, the number of quarterly bustee bills would be multiplied by 10. Instead of issuing 7,000 bills each quarter, they would have to issue 70,000! All this enormous labour and expense are being saved to the Corporation. And, again, the bustee tenants themselves have gained the full advantage anticipated by Sir Henry Harrison in being freed from the visits of the municipal tax-gatherers and underlings. This was a matter on which Sir Henry Harrison laid great stress, and the importance of which will be readily appreciated by any one who knows much of the *bustee-wallahs,* how poor they are, how illiterate, and how little able to protect themselves. These great and unquestioned benefits—benefits alike to the Corporation and to the tenants—ought on no account to be surrendered lightly or without convincing proof that we are paying too high a price for them.

"But in another respect it must be admitted that Sir Henry Harrison's anticipations have not been realized. He hoped that by making the bustee-owner responsible for the bustee-rates the collection of these rates would be greatly facilitated; that payments would be recovered from the landlords with ease, and that it might almost become possible to close the Warrant Department. Now, whatever the cause may be, it is clear that these fair promises have not been fulfilled. I will not go over again the figures which the Hon'ble Member has laid before the Council. To some extent they do not give quite an accurate description of what has happened. But, without scrutinising them too closely, I am prepared to admit that, at all events in the suburban bustees, the percentage of collections is very poor: it is lower than it was under the former law, and is not perceptibly improving.

"This state of things is, I admit, a reason for considering our position, and the next step would naturally be to enquire what are the causes of the disappointing collections. And it is just at this point that the arguments for the amendment are defective. I have read carefully the remarks of the Bill Committee on this matter, and I have listened attentively to what the Hon'ble

Member has said to-day. But in neither the one nor the other can I find any kind of attempt to show that the bad collections are due to the change in the law. Both the Corporation and the Hon'ble Member content themselves with showing that the collections have been poor; and they both assume that this is due to the change in the law. It is a case with them of *post hoc propter hoc.* But, Sir, it is quite unsafe to make any such assumption. We must have some definite evidence to go upon before we abandon the present system as a failure, and revert to the older law. There are other causes, besides the change in the law, which have been in operation since 1888. It is notorious that the Warrant Department, till recently, has been utterly inefficient and most probably corrupt, and it is the opinion of the Vice-Chairman, a very competent officer, that this is one of the main causes of the bad collections. Again, it frequently happens that the owner of a bustee does not live within it, but has his residence elsewhere. The effect of this is that the Chairman has no power to cut off the water-supply from the bustee-owner's own house for failure to pay rates. This power is one of the most efficacious modes of enforcing payment of rates that the Chairman possesses, and it is obvious that the want of such a power in the case of most bustees must have affected the collection of bustee-rates.

"I am not prepared to say positively that the bad collections are wholly due to these two causes. The truth is that there is something wrong in the collection of bustee bills, and neither the Corporation nor any one else has yet succeeded in getting to the bottom of it.

"In these circumstances, it seemed that the safest course was to provide an alternative procedure for bustees, and to this the Hon'ble Member has made no allusion whatever. What we have done is to retain the system of the Act of 1888, and simultaneously to provide that the Chairman and the General Committee should have power to withdraw any bustee from it and place it under the operation of the old system which is advocated by the Hon'ble Member. This course commended itself to the Select Committee, who made the necessary provision by inserting section 162A in the Bill. I venture to think that this course is eminently wise, safe and judicious, and I trust that it will commend itself to the Council, if the Hon'ble Mover elects to press his amendment.

"Once the dual system is given a trial, and both systems are worked side by side for some years, we shall be in a position to see whether the falling off in the collection of bustee rates is due to the alteration made by the law of 1898. Until that is established by experience it will be most unsafe to assume that the law of 1888 is in fault."

The Hon'ble Mr. OLDHAM said:—"While my hon'ble friend the mover of the amendment read out his long list of figures for eight years, I could not help reflecting how seriously they took away from the declaration which I made in this Council, that I did not join in the indictment against the Corporation, because I think those figures in themselves form a formidable indictment against the Commissioners. There is scarcely a Member of this Council who has not had practical experience of the collection of rents, and who cannot realize what those figures mean. Bustee-owners are rich: bustee-inhabitants are poor. Your bustee law is changed and the procedure is converted from collecting from 70,000 bustee-inhabitants, who are poor, into collecting from 7,000 bustee-owners, who are well to do. Nevertheless the collections become less, and in one year sank so low as 60 per cent. There can be only one reason for this."

The Hon'ble MR. BOLTON said:—"It occurred to me during the speech of the Hon'ble Mover of the amendment that a compromise might be effected by allowing for bustees the special procedure of collecting the rates to which objection has been taken, or the ordinary procedure applicable to the rest of the town, the option of using either being left to the Chairman. I am glad to

find that provision has been made for this alternative procedure in the Bill. It seems to me, therefore, that the Bill meets adequately the object of the amendment. After experience of the working of the two procedures, it will be possible to decide finally which procedure is the more suitable for bustees, and should be generally or exclusively followed."

The Hon'ble RAJA RANAJIT SINHA, BAHADUR, OF NASHIPUR, said:—"I support the amendment on the ground that it is a matter of great injustice to the owners of bustees to be called upon to pay also the occupier's share of the municipal rates. There will be no loss to the Municipality if the rates are levied directly from bustee-tenants. The Municipality has ample power to realise its dues, whereas it is very difficult for private parties to do so, for they must have recourse to law, and the owners therefore are losers by having to pay their tenants' rates and recover them afterwards by process of law, as all the expenses incurred in litigation cannot be recovered."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"I must admit that it was an omission on my part not to refer to the provision in this Bill which empowers the Chairman, with the sanction of the General Committee, to exempt any bustee from the provisions for the recovery of bustee-rates. I acknowledge that that is a distinct improvement in the Bill, and its introduction very clearly shows that the Select Committee felt that the bustee provisions of the Act of 1888 have not worked well. I have only to express the hope that the Chairman of the Corporation will see fit to freely make use of this alternative procedure. I can only wish that the initiative in the exemption of bustee-owners from the ordinary bustee procedure was given to the Corporation; for, as the Corporation represents the people and comes freely into contact with them, the Corporation would be in a position to administer this part of the law with much greater success than the Chairman and the General Committee; and I appeal to the Hon'ble Member in charge of the Bill to consider this point. The new provision to which my hon'ble friend has referred, I thankfully admit, is a distinct improvement. In the course of the observations which the Hon'ble Member made he was pleased to remark that there had been deterioration in the collection of bustee-rates, but that it was difficult to ascertain the cause, and that it was possibly due to the inefficiency of the Warrant Department and possibly to the defect in the law which did not empower the Corporation to cut off water-connections. But with equal justice and show of reason I might assume that it was possibly due to a defect in the law, and I believe that is the opinion of all experienced Commissioners. It is their deliberate opinion that it is the defect in the law which is responsible for the deterioration in bustee-collections. My hon'ble friend observed—and here again the observation supports my contention—that the landlords under the operation of this law will be disposed to exact higher rates from their tenants than they pay to the Corporation on their account. Is not that a grave injustice to the tenants? The poor people don't know what rates they have to pay; they are absolutely at the mercy of their landlords. I certainly think that involves very great hardship upon the poor."

The Hon'ble MR. BAKER said:—"We made provision for that in the Select Committee; notices are to be posted within the bustee of the valuations which have been made."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"The rates payable by each tenant must be calculated upon the valuations which have been made: will these poor people be able to make the calculations? I say they will be completely at the mercy of their landlords. The most simple and most effective way would be to go straight to these poor people and present a bill to them, instead of leaving the landlord to collect the rates from them. It is obvious that the present law does involve injustice, and, notwithstanding what Sir Henry Harrison has said, I ask the Council to reverse his judgment and to re-enact the law of 1876."

The motion being put, the Council divided as follows:—

Ayes 6.	*Noes 12.*
The Hon'ble Raja Bahadur Ranajit Sinha, of Nashipur.	The Hon'ble Mr. Buckley.
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Handley.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Mr. Apcar.	The Hon'ble Mr Mackenzie.
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Mr. Spink.
	The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
	The Hon'ble Mr. Oldham.
	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

So the amendments were lost.

The Hon'ble BABU SURENDRANATH BANERJEE also moved that the word "five" be substituted for the word "ten" in line 3 of clause (*c*) of section 159 (*now* 180).

He said:—"I am not aware that the Hon'ble Member in charge of the Bill has any serious objection to this amendment."

The Hon'ble MR. BAKER said:—"The Hon'ble Member has treated this amendment as an alternative to his previous motion, which has just been negatived."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"It is not an alternative."

The Hon'ble MR. BAKER said:—"Ten years is the term in the present Act, and I don't think it ought to be reduced without any special reason. I have consulted the Chairman of the Corporation, and he thinks it would be dangerous to accept this amendment. If you exclude from the operation of the bustee law any masonry building in a bustee built on land let for a term of five years, there would be a risk of excluding many more buildings than we anticipate. Landlords may object to give leases of ten years, but they might give leases of five years and one day. For this reason I am not in favour of this amendment."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"Mr. Bright's opinion ought to carry great weight, but I think the opinion of experienced Commissioners is entitled to some little consideration also. Bustee-owners seriously object to allow people to build masonry buildings in their bustees, and if they allow them to construct masonry buildings and give them leases for five years for the erection of such buildings, such buildings ought to be considered as being exempt from the operation of the bustee law. I understand the *raison d'être* to be this, that the bustee procedure is to be retained where the landlord can be found and you can realize the rates from him. Tenants remove from place to place, but, if a tenant has built a house in any particular bustee on a lease of five years, he ought to be treated as a sort of permanent resident; he has not the same sort of fleeting interest as a bustee-tenant has, and therefore a person building a pucka house on bustee-land having a lease of five years ought to be exempt from the operation of the bustee procedure.

"The Hon'ble Member in charge of the Bill referred to Mr. Bright's opinion; but has Mr. Bright given any facts to show that there will be any loss of revenue or any administrative difficulty? It is his mere *obiter dictum*, but I think that the opinions of experienced Commissioners whom we have consulted should also be entitled to some weight. And further there is that ground which I have submitted, namely, that a person having a lease for five years who builds a masonry house on the bustee-land should be considered a permanent resident."

The Hon'ble MR. BAKER said:—"I am not prepared with any facts or figures, because I had not the smallest idea that anybody would question Mr. Bright's statement, and there is nothing in support of this amendment in the report of the Corporation or in any of the papers on the Bill."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I raised the question in the Select Committee."

The motion was then put and lost.

SECTION 187.

The Hon'ble BABU JATRA MOHAN SEN moved that in section 164A (*now* 187), sub-section (*2*), lines 4 and 5, the words "shall be repaid or refunded to the objector or allowed to be set off against any present or future demand of the Corporation against him under the provisions of this Act" be substituted for the words "shall be repaid or allowed."

The motion was put and agreed to.

The Council was then adjourned to Wednesday, the 20th September, 1899.

CALCUTTA;
The 16th January, 1900.

F. G. WIGLEY,
Asst. Secy. to the Govt. of Bengal,
Legislative Dept.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

The Council met in the Council Chamber on Wednesday, the 20th September, 1899.

Present:

The Hon'ble SIR JOHN WOODBURN, K.C.S.I., Lieutenant-Governor of Bengal, *presiding.*
The Hon'ble MR. W. B. OLDHAM, C.I.E.
The Hon'ble MR. R. B. BUCKLEY.
The Hon'ble MR. C. W. BOLTON, C.S.I.
The Hon'ble MR. E. N. BAKER.
The Hon'ble RAI DURGA GATI BANERJEA, BAHADUR, C.I.E.
The Hon'ble MR. C. E. BUCKLAND, C.I.E.
The Hon'ble MR. F. F. HANDLEY.
The Hon'ble MR. F. A. SLACK.
The Hon'ble KHAN BAHADUR MAULVI DELAWAR HOSAIN AHMED.
The Hon'ble BABU JATRA MOHAN SEN.
The Hon'ble MR. T. W. SPINK.
The Hon'ble RAJA RANAJIT SINHA, BAHADUR, OF NASHIPUR.
The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH, C.I.E.
The Hon'ble MR. D. F. MACKENZIE.
The Hon'ble MR. J. G. APCAR.
The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, M.A., D.L., F.R.A.S., F.R.S.E.
The Hon'ble BABU BOIKANTA NATH SEN.
The Hon'ble BABU SURENDRANATH BANERJEE.

THE CALCUTTA MUNICIPAL BILL.

SECTION 189.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 184 (*now* 189), the words "in advance" be omitted.

He said:—"This is merely a verbal change, and I was not a little surprised to hear from one of my Hon'ble friends this morning that he had taken it to be a very substantial change. It is really nothing of the kind. Section 184 (*now* 189) provides that 'the tax shall be payable half-yearly in advance.' Section 185 (*now* 191) fixes the date on which the sum is to be paid, and it seems to me that, if the amount due for the half-year commencing on the first day of April may be paid on the 30th of April, it is not a very correct description to say that the tax is payable half-yearly in advance. It will be quite open for the rate-payer to pay the tax at least thirty days after the half-year has begun, and therefore I think the words 'in advance' may be omitted."

The Hon'ble BABU SURENDRANATH BANERJEE said;—"I want to say just one word in reference to my hon'ble friend's amendment. You have got those words in the law, and, if you omit them, people will come to the conclusion that the taxes are not to be paid in advance. They will say: 'The Legislature has not insisted upon our paying in advance, and why should we do so?' I think it is most essential that the words should be retained. When people are called upon to pay in advance, they pay during the half-year or during the quarter. When they are called upon to pay in arrears, they pay very much later and sometimes don't pay at all; and, having regard to the fact that the omission of these words is likely to lead to misapprehension—my friend shakes his head; he is a sound and an able lawyer, but we are not all lawyers, and people will take a common-sense view of the law and will say that they are not required to pay in advance; they therefore will not do so, but pay in arrears. Taking a common-sense view of the matter, I decidedly think that the words ought to be retained."

The Hon'ble MR. BAKER said:—"I agree with the Hon'ble Babu Surendranath Banerjee's view. I think that to omit these words would cause misapprehension in the minds of the public. There is no doubt this tax ought to be paid in advance, and that intention is made perfectly clear by the use of these words."

The Hon'ble BABU BOIKANTA NATH SEN said:—"From a lawyer's point of view section 184 (*now* 189) is the substantive law, and section 185 (*now* 191) is only the adjective law; therefore, in my opinion, the words should be allowed to remain."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, in reply, said:—"It seems to me, Sir, that we are not very consistent. If under section 149 (*now* 171) there is no misapprehension, I do not see that there can be any possible misapprehension here. I think that, by omitting the words 'in advance,' we might bring the two sections into harmony."

The motion was then put and lost.

SECTION 198.

The Hon'ble BABU SURENDRANATH BANERJEE moved that, for the words "in his discretion" in lines 1 and 2 of the proviso to section 206 (*now* 198), the words "with the previous sanction of the General Committee" be substituted.

He said:—"Sir, I will explain what I mean. The proviso gives to the Chairman the power of refunding licenses under certain conditions. I suggest that the power should be exercised subject to the approval of the General Committee. If my hon'ble friend objects to that, I would say that the power

The sections of the Bill having, under the direction of the Council, been re-numbered, the present number of each section is inserted in brackets, wherever the new numbering differs from the old.

should be exercised subject to an appeal to the General Committee. These are delicate matters, and all of us have our likes and dislikes, and the personal element ought to be eliminated as far as possible. It seems to me that it would be wiser in a matter like this that there should be some sort of control exercised by the General Committee. Of course we know that the Chairman will do his duty. I have not the slightest desire to suggest that he would do anything else but his duty. It is, however, advisable that there should be a safeguard against the play of personal feelings, and it was this idea which suggested to me the idea of recommending this amendment."

The Hon'ble Mr. Baker said:—"If the Hon'ble Member will omit the word 'previous,' I am quite ready to accept his amendment."

The Hon'ble Babu Surendranath Banerjee said:—"Yes, I am quite ready to omit the word 'previous'."

The Hon'ble Mr. Mackenzie said:—"I should be against this on the ground that applications might be made to the Chairman individually by persons who might not care to make applications to the General Committee. That is to say, disclosures might be made about business in a private way to the Chairman, which the applicant would prefer not to make to the General Committee."

The Hon'ble Babu Surendranath Banerjee said:—"I think that objection is met by the omission of the word 'previous'."

The Hon'ble Mr. Baker said:—"I was going to say the same thing. The matter in that case would be subject to the control of the General Committee. The General Committee will have power, under the amendment I moved the other day, to insert a new section, section 24A (*now* 16), to look into and revise the Chairman's orders upon any particular case. But they may, and doubtless will, authorize the Chairman to anticipate their approval, and in that case a mere subsequent report will be sufficient. In that case I think it will probably be found that, in the class of cases to which the Hon'ble Member refers, it will not be necessary for the General Committee to have all the facts before them; a mere report will be sufficient."

The Hon'ble Mr. Mackenzie said:—"Yes, I accept that."

The Hon'ble Mr. Apcar said:—"I don't quite follow how this section would be worked. Is it intended that there shall be an appeal to the General Committee?"

The Hon'ble Mr. Baker said:—"No; the action would be subject to their sanction."

The Hon'ble Mr. Apcar said:—"I understand there will be something like three or four thousand cases coming up in regard to this matter, and, if these are all to come up before the General Committee, they will constitute an enormous burden in addition to the other work of the General Committee."

The Hon'ble Mr. Baker said:—"I think, Sir, it is desirable to give some power to the General Committee in this matter. If the Hon'ble Mr. Apcar will look at clause (*c*), he will see it is there provided that the Chairman may, *in any other case*, exempt any person from liability to take out a license, or may authorize him to take out a license in a lower class. That is rather a large power of discretion to give to the Chairman alone. Therefore, I welcome this amendment."

The Hon'ble Mr. Apcar said:—"It must not be understood that I am opposed to an appeal to the General Committee. I only wish to draw attention to the actual facts, in order that they may be before the Council in the discussion on this matter. That these cases should come up to the General Committee I think is a very necessary provision. I would not like to give absolute

powers in any such matters to any one individual. But, if they all are to be brought up before the General Committee in the ordinary routine of work, I would draw attention to the very heavy additional burden which would, in that case, devolve upon the General Committee."

The Hon'ble THE PRESIDENT said:—"They are subject to the control of the General Committee."

The Hon'ble MR. BAKER said:—"Under my amendment carried the other day, the General Committee will have the power to authorise the Chairman to anticipate their sanction in any class of cases they think proper. These matters, although very numerous, will simply come up, I think, in a routine way as a matter of report. It will not materially add to the work of the General Committee, and I think the Hon'ble Babu Surendranath Banerjee and the Hon'ble Mr. Apcar himself will bear me out in this with their experience of the working of the Corporation."

The Hon'ble MR. BOLTON said:—"I am disposed to think, Sir, that the best course would be to provide that the Chairman shall furnish brief particulars of all the cases to the General Committee, with the reasons for his action. The General Committee then might or might not, as they think proper, call on him for an explanation in particular cases. To subject all these cases to the orders of the General Committee seems to me to be very unnecessary."

The Hon'ble MR. BAKER said:—"That, Sir, is really met by the amendment carried the other day. The effect of that amendment would be to permit the General Committee to lay down rules that in cases of this kind or in similar classes of cases the matter has only to be reported to them afterwards. That was the express object with which that amendment was brought forward. It meets the whole point raised by the Hon'ble Mr. Bolton."

The motion was then put and the amendment was agreed to in the altered form.

SECTION 203.

The Hon'ble BABU SURENDRANATH BANERJEE moved that after the word "rates" in line 8 of section 211 (*now* 203) the following words be inserted:—

"or, where no rates are mentioned, at such rates."

He said:—"The object of this amendment is to provide that the municipal revenue does not suffer any loss, and I think my hon'ble friend will agree with me when I have stated the facts of the case. May I ask the Council kindly to turn to Schedule VIA (*now* IX). The Council will find that this is a schedule which deals with the 'scavenging tax,' and, Sir, the amendment of which I have given notice deals with the rectification of an omission in connection with this schedule. Owners of bazars and markets pay this scavenging tax at the present moment, and a very considerable share of the tax is derived from them. I have ascertained from the Municipal Office that the amount of the tax to be paid by the owners of markets and bazars cannot be laid down in any workable and practical shape. I think it would be best settled by bye-laws. Therefore, Sir, I say that the rates are to be the rates such as are fixed in the schedule or, where no rates are fixed in the schedule, such rates as have been prescribed by bye-laws made under this Act. The object is to improve the municipal revenue, or at any rate to see that the municipal revenue now obtained is not lessened by any law which we may now pass. I think my hon'ble friend has himself given notice of a similar amendment. Owners of markets and bazars pay the scavenging tax, and there is no reason why they should not continue to pay it. If you cannot lay it down in the schedule, it must be determined by bye-laws or by private arrangement. The present practice is for these rates to be determined by private arrangement."

The Hon'ble MR. BAKER said:—"The intention of the section is exactly the intention of my hon'ble friend. In the first instance, the rates to be paid by those people are to be the rates specified in the schedule; if there are no

rates specified in the schedule against any particular case, then they come under the operation of rates to be prescribed by bye-laws. The addition of these words will make no difference either way. I have asked the Secretary of the Council, and he says the addition of these words will have no effect on the meaning of the section as it stands at present."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I have consulted some friends, and they are of opinion that there has been an omission."

The Hon'ble MR. BAKER said:—"Does the Hon'ble Dr. Asutosh Mukhopadhyaya think the words ought to be inserted?"

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"The proposed addition is wholly unnecessary. The section is quite clear as it stands."

The Hon'ble MR. BAKER said:—"The learned Doctor agrees with the Secretary."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"The lawyers of the Council think it is not necessary, and I defer to their opinion. I am not entitled to hold my opinion against theirs in matters of this description, and I therefore withdraw my amendment."

The motion was then, by leave of Council, withdrawn.

NEW CHAPTER.

The Hon'ble THE PRESIDENT said:—"With reference to a new amendment of which notice has been given by the Hon'ble Babu Surendranath Banerjee, although I do not wish to enter in any way into the merits of the proposition or to offer any comments upon it at the present moment, I think the Hon'ble Member will himself see that the Council cannot adopt a proposal of the kind without reference to the commercial bodies which are interested in it. He must be aware also that a system of taxation like this cannot be enforced without penalties, for which we must get the approval of the Government of India, and therefore, without any expression of opinion as to the merits or the demerits of a system of town-dues, I regret I cannot admit this amendment at this stage."

The Hon'ble THE PRESIDENT ruled the following motion, standing in the name of the Hon'ble Babu Surendranath Banerjee, to be out of order:—

That the following sections be inserted in the Bill:—

CHAPTER XVIA.—TOWN-DUTY.

Imposition of town-duty.

"216A. (1) With the previous sanction of the Local Government, the Corporation may, by resolution adopted at a special meeting, by a majority of not less than two-thirds of the members present at such meeting, impose a town-duty and make rules for the levying of such town-duty on such articles as the Corporation may from year to year determine, when the said articles are imported from any place into Calcutta. [Bom. Act, s. 192.]

(2) The said duty shall not exceed 2½ per cent. of the market value of each article.

Table of rates of town-duties.

"216B. The General Committee shall cause tables of the town-duties for the time being leviable, specifying the rates at which and the articles on which the same are leviable, to be printed in the English, Bengali, Hindi and Urdu languages, and to be affixed in a conspicuous position at every place at which the said town-duties are levied. [Bom. Act, s. 193.]

Exemption of articles belonging to Government from town-duty.

"216C. (1) No town-duty shall be leviable on any article which, at the time of its importation, is certified by an officer empowered by the Local Government in this behalf to be the property of the Government. [Bom. Act, s. 191.]

(2) If any article on which town-duty is paid is imported under a written declaration, signed by the importer, that such article is being imported for the purpose of fulfilling a specified contract with the Government or otherwise for the use of the Government, the full amount of the duty paid thereon shall be refunded, on production at any time within six months after importation, of a certificate signed by an officer empowered by the Local Government in this behalf and certifying that the article so imported has become the property of the Government.

duty "216D. (1) When any article upon which town-duty has been paid is exported from Calcutta, the full amount of the duty so paid shall, subject to the provisions hereinafter contained, be refunded. [Bom. s. 195.]

(2) Such refunds shall be made under such rules as the General Committee, with the approval of the Corporation, may make in this behalf.

(3) Provided as follows:—

(a) no refund shall be made unless the same is applied for within one month from the date of exportation;

(b) no refund shall be made of any amount less than five rupees;

(c) no rule framed by the General Committee under this section shall have effect unless and until it is approved by the Corporation and confirmed by the Local Government."

The Hon'ble Babu Surendranath Banerjee said:—"I bow to that decision, Sir. May I be permitted to say just one word by way of explanation. I found on going through the report of the Building Commission that they made a strong recommendation in favour of a system of town-duties. They say that the 'imposition of an octroi-duty ought to be taken into serious consideration.' In Bombay, Madras and the North-West Provinces octrois are in force, and it struck me that if we had an octroi here it would be an excellent means of raising revenue. The mercantile community who are going to have a predominant share in the municipal system of the future would also, as I think they justly should, in a system of octroi-duties, have to pay a predominant share of the rates and taxes. That was my reason for making the proposal."

The Hon'ble the President said:—"That may be so, but we cannot go into the matter now."

Section 211.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that in section 220 (*now* 211), sub-section (2), before the word "Magistrate," the words "Presidency or Municipal" be inserted.

He said:—"The sub-section says 'if any cart or animals so seized be not claimed within ten days, it or they may be sold at auction by order of a Magistrate.' The Magistrate of what place? Take the city of Calcutta. We have the Presidency Magistrates in the city proper, in the suburbs we have the Suburban Magistrates, and the Bill contemplates that we should create another class of Magistrates to be called Municipal Magistrates. The question may arise which of these Magistrates has jurisdiction in this matter; to this my amendment affords a simple solution."

The Hon'ble Mr. Baker said:—"I think there is some misapprehension about this. The intention of course is that these carts shall be sold under the order of any Magistrate having jurisdiction in the place where the offence is committed. It might be in Howrah. If the Hon'ble Member looks at section 217 (*now* 208), he will find that this applies to Howrah as well as to Calcutta. It also applies to the Suburbs and the added area, which are within the magisterial jurisdiction of the Police Courts at Alipore and Sealdah. The word 'Magistrate' cannot be qualified as proposed in the amendment."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"Then I would suggest that he following words should be put in, 'the order of the Magistrate having jurisdiction in the place.'"

The Hon'ble Mr. Baker said:—"If the learned Legal Remembrancer thinks that an improvement, I have no objection; but I would rather have no change."

The Hon'ble Babu Surendranath Banerjee said:—"If you look at the present law you will find the word 'Magistrate,' and I don't know if any inconvenience has resulted or any harm has been occasioned by it. I think it is unnecessary to make any change."

The Hon'ble Mr. Bolton said:—"It seems to me quite unnecessary to make any change in the section. The Magistrate would obviously be one having jurisdiction within the town."

The Hon'ble Mr. Handley said:—"I think, Sir, as the Assistant Secretary has said, that if you make a change here you will have to make changes in about thirty or forty other places in the Bill. If the words were put in, it would make it clear, but if the Magistrate has no jurisdiction he cannot do anything."

The motion was then, by leave of the Council, withdrawn.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that in section 220 (*now* 211), sub-section (3), for "twenty days" be substituted "three months."

The Hon'ble Dr. Asutosh Mukhopadhyaya also moved that in section 220 (*now* 211), sub-section (3), for the words "paid to the credit of the Municipal Funds" be substituted "the property of the Corporation."

He said:—"I think, Sir, it will be convenient if I take these two amendments together. The intention of the amendments is to bring this section into harmony with section 220K (*now* 221). I cannot persuade myself to believe that it was ever intended that the Corporation should keep a separate account of the proceeds of these sales for ever, and that it should be open to a man to come in after the lapse of any length of time and demand his money. I suggest that, if he does not come within three months to claim the money, it should lapse to the Corporation."

The Hon'ble Mr. Baker said:—"As regards the first amendment the Hon'ble Member proposes to extend the term of twenty days to three months. I would point out that 'twetny days' is the existing law, and that there is no good reason for the change. I have never heard that any inconvenience has resulted from its operation.

"As regards the second amendment, I would point out that there is a difference between sections 220 (*now* 211) and 220K (*now* 221). Under section 220 (*now* 211), the sale is made by order of the Magistrate, and the sale proceeds in the first instance remain in his hands. At the end of twenty days, if they are not claimed, the Magistrate must pay them over to credit of the Municipal Fund. But in section 220K (*now* 221), the position in different. There, the sale is made by the Chairman, and the sale proceeds are in his hands. They are credited at once to the proper Municipal Fund, and if there is no claim within three years they become the property of the Corporation. But no actual payment has to be made; it is only a book transaction."

The motions were severally put and lost.

SECTION 213.

The Hon'ble Babu Jatra Mohan Sen moved that in section 220B (*now* 213), sub-section (3), line 1, the word "one" be omitted.

He said:—"Sir, the amendment that I beg to propose is merely a verbal one. Sub-section (3) of section 220B (*now* 213) runs thus:—

'If any one person is liable for the consolidated rate on account of more properties than one, the Chairman may charge to him in one or several bills as the Chairman may think fit the several sums payable by him on account of such properties.'

"I propose we should omit the word 'one' and make the section read 'If any person is liable,' &c. The reason why I propose this amendment is that in the General Clauses Act the words signifying a singular number include the plural number, unless the text signifies something different. If this word were left in here, there would be confusion, and it might be contended that this word 'person' does not include several persons in cases where several persons are jointly assessed with the consolidated rate. I therefore thought that the omission of the word 'one' would make the section clear."

The Hon'ble Mr. Baker said:—"I accept this amendment."

The motion was put and agreed to.

SECTION 217.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 220F (*now* 217) after the word "Chairman" be added "to be recorded in writing."

He said:—"I take it, the intention is that the order made by the Chairman should be in writing."

The Hon'ble Mr. BAKER said:—"I have no objection to this, Sir. I would only suggest that the word 'written' be substituted for 'special'."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I want the word 'special,' Sir, and I may tell you why I want it. In a serious matter like this, the order ought to be a 'special' order. I was always under the impression that the word 'special' covered the proposal of my hon'ble friend. You cannot give a 'special' order surely, except in writing. I have had to administer matters of this description in connection with a mufassal Municipality over which I have the honour to preside. We record a written order, and we put down the name of the officer entrusted with the carrying out of the order. That is the rule. The mere passing of that order suffices: the people know of the existence of the order, and they at once pay up the money. That is the mufussal practice, and it works very well. If you have a 'special' order and then accept my Hon'ble friend's modification, I have nothing to say, but I think the word 'special' covers what my Hon'ble friend proposes. I should certainly be exceedingly unwilling to dispense with the safeguard which the word 'special' provides."

The Hon'ble MR. BAKER said:—"If the Hon'ble Member attaches any importance to it I have no objection."

The motion was then put and agreed to.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 220F (*now* 217), after the word "building" in line 6, be added "on the holding in respect of which default has been made."

He said:—"This, Sir, I must confess, is not a simple matter like my last amendment. It is a substantial thing, and I would respectfully ask the Council to consider it carefully. Under the section as it stands in the Bill, it would be quite open to the Chairman to order that the doors of the house of any person be broken open for purposes of distraint, if the Chairman is satisfied that there is reasonable ground for believing that the building contains property belonging to a person who has defaulted. That this is so is clear from section 220D (*now* 215). That section provides that the moveable property of the defaulter may be distrained wherever it may be found, that is to say, if the property of *A*, who has defaulted, is in my house, it may be distrained. The law goes to that extent in section 220D (*now* 215) and so far it has my entire approval. What I object to is that the law should be carried further so as to authorize the Chairman to break open, for purposes of such distraint, the doors of a house which does not belong to the defaulter. I am not sure that this is intended to be the law; but, if it is, I must say that a provision like this may lead to grave abuses, and enable irresponsible municipal underlings to oppress innocent people. I can well anticipate the objection that a similar provision finds a place in the Bengal Municipal Act. That I cannot admit to be a valid defence; at any rate, I hope that such an argument will carry no weight with my hon'ble friend Babu Surendranath Banerjee, who on a former occasion, when I referred to the Bengal Municipal Act, entered a vigorous protest against what he described as dragging down the Calcutta Corporation to the level of the mufussal municipalities."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"May I say one word as to the danger of accepting my hon'ble friend's amendment? The danger is this. Property belonging to a defaulter may be secreted in the house of somebody else, and would be so secreted, because he would know that it would be perfectly safe. The section as it stands is the mufassal law, and I may also

add that the mufassal law in its practical operation has not been attended with any difficulties at all. We are an exceedingly law-abiding people in the mufassal, and, the moment we find our doors are likely to be broken open, we pay up. I think we ought to have this power of moral coercion which is provided for in the section."

The Hon'ble Mr. Baker said :—"This section was added at the express instance of the Corporation. The amendment as it stands would not only prevent the Corporation from breaking open the houses of any person not a defaulter, but it would also prevent them breaking open a house belonging to the defaulter into which he had removed and secreted property from the holding in default. It would tend entirely to defeat the object of the section."

The Hon'ble Babu Boikanta Nath Sen said :—"This amendment may involve the abuse of authority by the officer charged with the execution of the warrant. On the one hand, a man can safely remove his property and thus avoid the execution of the warrant. There is no fear of prosecution against him. On the other hand, the officer would be liable to prosecution. He would certainly be liable to civil damages, but he might be under certain circumstances liable to criminal prosecution; so this is a safeguard against that. I had the honour to preside over a municipality for about nine years, and I never had a complaint against an officer entrusted with warrants for execution."

The motion was then put and lost.

Section 221.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that in section 220K (*now* 221), sub-section (3), after the word "shall" be inserted "directly or indirectly."

He said :—"I take this to be the real intention of the law."

The Hon'ble Mr. Baker said :—"I entirely agree with the Hon'ble Member and accept the amendment."

The motion was put and agreed to.

Section 222.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that in section 220L (*now* 222), sub-section (4), for the words "next and following payments of his rent" be substituted "rent for the period for which the arrear of consolidated rate was due or the rent of any subsequent period."

He said :—"This is, to some extent, a paraphrase of the language used in the section, and intended to exclude one case in which a dishonest tenant may take advantage of its beneficent provisions. I will illustrate what I mean by a concrete case. A landlord pays regularly the rates due to the Corporation (say) for the years 1896, 1897, 1898. The tenant has been withholding his rent for these years, and as a consequence the landlord breaks down and fails to pay the rates for 1899. The Corporation then issues notices on the tenant, who is thus obliged to pay the rates for 1899. Now, when the tenant pays the landlord the arrears of rent for 1896, he would be entitled to deduct, under the section as it stands in the Bill, the amount of rates he has paid for 1899. This is obviously unjust. He ought not to have this right of set-off till he comes to pay the rents for 1899. If he is himself in arrears, he is not entitled to any consideration; this is the simple equitable principle upon which my amendment is based."

The Hon'ble Mr. Baker said :—"I accept the amendment."

The motion was put and agreed to.

Section 225.

The Hon'ble Babu Jatra Mohan Sen moved that, in the last line of section 220-O (*now* 225), the words "damage that they may be legally entitled to" be substituted for "special damage sustained by them."

He said:—"This section gives protection to municipal servants. The general law says that if material irregularities are committed in respect of any warrants or other processes the party thwarting the warrant is not punishable under the criminal law. Here in this Municipal Bill we have given power to municipal officers to enter buildings and premises from sunset to sunrise, whereas in ordinary cases the Court officers are not entitled to enter premises during those hours. In the discussion on section 220F (*new* 217), it was suggested as a safeguard that if an officer entered the house of a third person for the purpose of distress during unauthorised hours he is liable for damages. I think if the word 'special' be allowed to remain in this section it may be contended that actual damage occasioned by the entry of the officer is meant. For instance, if a particular building is trespassed upon by an officer under an illegal order or no order whatsoever from any municipal authority, there is no doubt he is liable for damages, even on sentimental grounds; but if the man has suffered by reason of the breaking open of a lock or of a door he can only sue for actual damages, and not for the loss of honour or other feelings under the present wording of the section. So I think the words I have proposed, *viz.*, 'any damage that they may be legally entitled to,' cover all cases. I therefore suggest that they be added."

The Hon'ble MR. BAKER said:—"I am altogether opposed to this amendment, Sir. In the first place, the wording is not such as could be accepted. The section would run thus:—

'All persons aggrieved by such irregularity may recover, in any Court of competent jurisdiction, full satisfaction for any damage they may be legally entitled to.'

"What the Hon'ble Member means by 'damage they may be legally entitled to' I don't know. But, putting that on one side, I object to the amendment. The section as it stands follows the existing law. The object is to exclude claims for sentimental damage, alleged injury to feelings, and matters of that kind. When municipal officers commit a trespass, if the municipal officers do actual damage they ought to be made to suffer. If a municipal servant acts in bad faith, if bad faith can be proved against him, he can be criminally prosecuted and punished; but it is quite unreasonable in ordinary cases to grant compensation merely for sentimental damages."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"I regret I cannot support this amendment. It seems to me that the language used in the second part of the section is a necessary consequence of what is stated in the first part. The officer is declared to be under no circumstances a trespasser; therefore, nothing but special damage can be recoverable from him. Even if the amendment of my hon'ble friend were adopted, the Court would have to say that the damage to which the man was legally entitled was special damage. The amendment would not improve matters in the least."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"Apart from the law, I don't think the Council ought to accept the amendment. I think no case has been made out for a change of the law in this respect, and I am also of opinion that municipal servants should be protected. Having regard to the fact that municipal servants need protection, and that there has been no abuse of the existing law which is identical with this section in the Bill, I do not think that any case has been made out for making the section more stringent than it is at the present moment. I am afraid I must oppose the amendment."

The Hon'ble BABU BOIKANTA NATH SEN said:—"I would only add one word. 'Damage that they may be legally entitled to' would be, according to the existing law, the special damage sustained by them. The provision, therefore as it stands is quite correct."

The Hon'ble BABU JATRA MOHAN SEN, in reply, said:—"I should like to make one observation, *viz.*, when the first portion of the section declares that the action of the officer does not amount to trespass because he contravenes a rule, it only goes to show that he is not liable to criminal prosecution. If the

definition of 'special damage' is, as some Hon'ble Members seem to think, that it includes damages touching injury to the feelings, I would not like to press the amendment; but if that is not so, as the Hon'ble Member in charge of the Bill indicates, I think this amendment ought to be carried."

The motion was then put and lost.

SECTION 228.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 220R (*now* 228) the words "for a period of six years after the rate became due" be omitted.

He said:—"Sir, I confess I have been somewhat puzzled by this section. It seems to be taken from the Bombay Act, section 212; the words which I suggest should be taken out are not to be found there, and I have not been able to discover any special reason why they should be put in here. The Indian Limitation Act prescribes a period of twelve years within which a charge on immoveable property may be enforced, and I cannot make out why, in the present instance, that period should be shortened to six years. Further, it is by no means difficult to conceive cases in which this departure from the ordinary law may lead to anomalies, for instance, the case of an occupier who is compelled to pay the owner's share of the consolidated rate. I would venture to suggest that the words 'for a period of six years after the rate becoming due' should be omitted and the law allowed to take its ordinary course."

The Hon'ble MR. BAKER said:—"These words are not in the Bombay Act, and they were not in the Bill when it came up before the Select Committee. They were inserted in Select Committee at the instance of the Hon'ble Babu Norendra Nath Sen."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"At the instance of the Corporation."

The Hon'ble MR. BAKER said:—"I am personally in favour of the amendment, and I think the words are liable, as the Hon'ble Mover has pointed out, to cause confusion. I hope the Council will accept the amendment."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I think my hon'ble friend is somewhat in error in thinking the objection was made by the Hon'ble Babu Norendra Nath Sen. It was made by the Corporation as a reference to the proceedings of the Bill Committee will show.

"I quite agree that it would be to the interest of the Corporation that these words should be omitted. But we have not only to deal with the Corporation, we have also to deal with the rate-payers; and I don't think, Sir, the words that are put in here are words put in for the benefit of the rate-payers as against the Corporation. I don't think a debt against a particular rate-payer ought to be allowed to hang on for twelve years, and therefore it was on that account that the words were put in. In the original Bill the words did not occur, and then after much care and consideration the Select Committee came to the conclusion that they ought to be inserted, and I don't think they should be eliminated now. I admit that it would be better for the Corporation if the words were omitted, but we have to look at it from the point of view of the rate-payers. The members of the Select Committee representing the Corporation having taken the view that these words should be there, and having regard to the fact that the Select Committee after careful thought put in these words, they ought not now to be taken out. I venture to think, Sir, that we ought not to depart from a recommendation of the Select Committee in matters of detail of this kind unless very strong reasons have been shown to the contrary. Further, the Select Committee were unanimous in inserting these words, and they were inserted at the instance of the Members representing the Corporation. Having regard to these facts, I think the words ought to be retained."

The Hon'ble BABU BOIKANTA NATH SEN said:—"I think, if it be considered that when the consolidated rate is not paid by the owner a demand would be made on the occupier, these words should be omitted. It is true that in the Limitation Act the period is six years for moveable property and twelve years for immoveable property; but I think the words be better omitted for the reason I have stated."

The Hon'ble MR. OLDHAM said:—"Sir, in the Select Committee I agreed to this section. I had not then had the advantage of hearing the exposition of the general law on the subject, which we have had from the Hon'ble Member for the University. If I had understood the case, I do not think I should have agreed to the insertion of these words."

The Hon'ble MR. BOLTON said:—"I see no objection to the retention of the words of the Bill. They have been recommended by the Select Committee unanimously, and it is desirable that these liabilities should not be kept on the books for so long a period as twelve years. A fixed and comparatively short period will impress on the collecting establishment the necessity of activity in realizing arrears and conduce to better collections. If the period of limitation is undefined, slackness would ensue."

The Hon'ble MR. MACKENZIE said:—"I don't think it has been suggested by the Hon'ble Dr. Asutosh Mukhopadhyaya that it should be twelve years, but merely that the law should take its course whatever the period may be."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, in reply, said:—"I have patiently listened to what has fallen from my hon'ble friend Babu Surendranath Banerjee, but I see absolutely no reason why this Council should be so tender to the dishonest rate-payer who thinks it his duty to evade the ordinary law. If *A* has a charge on the property of *B*, the law of the land entitles *A* to enforce the same within a prescribed period of limitation. If *B* happens to be a rate payer and *A* happens to be the Calcutta Municipality, there is no imaginable reason why a shorter period of limitation should be prescribed. In the absence of very special and cogent reasons, no departure should be made from the ordinary law to the injury of the Corporation."

The motion being put, the Council divided as follows:—

Ayes 11.

The Hon'ble Mr. Buckley.
The Hon'ble Mr. Buckland.
The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Babu Boikanta Nath Sen.
The Hon'ble Dr. Asutosh Mukhopadhyaya.
The Hon'ble Mr. Mackenzie.
The Hon'ble Mr. Spink.
